# THE JEWELERS' CIRCULAR

THE HOROLOGICAL REVIEW,

WITH WHICH ARE CONSOLIDATED THE JEWELERS' WEEKLY. THE JEWELERS REVIEW

Copyright 1905 by THE JEWELERS' CIRCULAR PUB. CO.

Corbin Building, 11 John St., Corner Broadway, New York.

Entered as second-class matter at the New York, N. Y., Post Office.

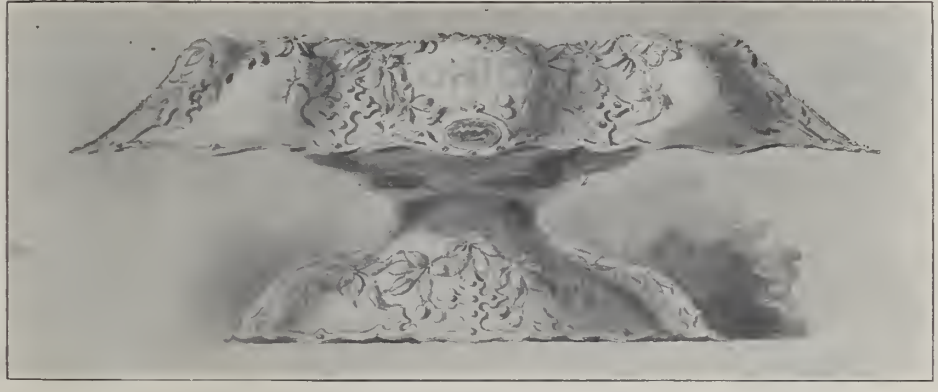
37TH YEAR. NEW YORK AND CHICAGO, WEDNESDAY, AUGUST 2, 1905. VOL. LI. NO. 1.

## CHASTE SILVER SERVICE FOR THE BATTLESHIP OHIO.

ANNOUNCEMENT was made recently at Columbus, O., that the contract for furnishing a silver service for the United States battleship *Ohio* was awarded, July 12, to Shreve & Co., San Francisco. The price was not given out, but it is in the neighborhood of $5,000, instead of the $25,000 it was originally intended to expend. The service consists of the following pieces: One centerpiece, one salad bowl, two compotes, two bread plates, one water pitcher, two serving trays, one soup tureen and ladle, two vegetable dishes with covers, one 24-inch well and tree roast plate, one 19-inch meat platter, one round entree platter, one gravy bowl and ladle, one after-dinner coffee-pot, one sugar bowl and tongs, one cream pitcher, silver-handled roast and game carving sets to match platters.

The design, typical of the Buckeye State, is of buckeye leaves and buckeyes, entwined about the seal of the State of Ohio and the seal of the Navy Department of the United States. A punch bowl was omitted from the service because the same firm furnished the battleship a loving cup, large enough to fill the same purpose, which was presented by Miss Helen Deshler.

Smaller pieces, such as knives, forks, spoons, etc., were omitted on the advice of Shreve & Co. and the admiral of the Pacific squadron, who said souvenir hunters carried them away while guests of the officers and soon broke up the sets.



The reason for changing the plans, in expending $5,000, instead of $25,000, is that the citizens of Ohio failed to subscribe as much as they were expected to. Shreve & Co. in a letter to E. R. Sharp, treasurer of the committee, says the firm takes for its profit on the service the advertising it will receive from having furnished it.

The illustrations herewith are made from designs furnished the makers of the service. The vessels whose services have been illustrated and described in THE CIRCULAR-WEEKLY, and the dates of the issues in which these illustrations and descriptions appeared, from time to time are as follows:

CENTERPIECE OF SERVICE PRESENTED TO BATTLESHIP "OHIO."

In the Rottwill district of the Kingdom of Wurttemberg are industries directed mainly to the manufacture of goods for export. Among these is the manufacture of clocks of every kind. The trade with South America in clocks has been large and profitable, but it now appears by reports from the Rottwill district that the exports to South American countries are suffering in consequence of competition from the United States. The American clocks are superior to those of German make and can be sold at the same or lower prices. In consequence the latter are losing ground in South America. American manufacturers should follow up their advantage.

# ALVIN

¶ Contrary to rumor The Alvin Manufacturing Company are not interested in any combination of silversmiths companies, neither have they any intention of joining or selling out to any such combination.

¶ The best results in the silverware business can be obtained by individuality and on independent lines.

Leather

# Changes in Fashion and How to Keep Posted

Ebony

EACH SEASON brings some modification of styles in Leather Goods. Such modification may affect size, shape, color, fittings, embellishments, finish, and other particulars. Changes may be slight or radical. It is important in buying to deal with a house whose goods can be relied on to be in advance of the fashion.

How *can* a jeweler know what the vogue is to be in fine Leather? He can find out in our showrooms. He can learn of the style by ocular demonstration here. Otherwise his surmises would be guesswork. This house retains the leadership manifested in past seasons.

Para: 22 packages cutlery, $1,474; 3 packages jewelry, $1,005; 8 clocks, $250; 1 package optical goods, $116.
Paranagua: 8 packages clocks, $231.
Progresso: 2 packages cutlery, $244; 1 package plated ware, $164; 1 package watches, $175.
Rotterdam: 467 pieces nickel, $7,855.
Southampton: 2 packages plated ware, $260.
Santiago: 3 packages plated ware, $145.
Sydney: 45 packages clocks, $823; 26 packages plated ware, $3,693; 1 package watches, $124; 4 packages cutlery, $178; 1 package scopes and views, $225; 3 packages plated ware, $118; 26 packages clocks, $199.
Santa Marta: 1 package watches, $122.
Warrington: 1 package jewelry, $500.
Wellington: 128 packages clocks, $2,539; 10 packages plated ware, $679.
Vera Cruz: 73 packages clocks, $1,156.
Valparaiso: 9 packages clocks, $166; 25 packages plated ware, $2,908.

Frederick C. Boswel, Clear Spring, Md., has sold out his stock to Benedict J. Boswel.

The Gustave Fox Co., 14 E. 4th St., Cincinnati, O., is the owner and maker of a recently patented Elk design for brooches and badges.

The Imperial watch movement, manufactured at Buren a/A, is meeting with a ready sale in this country, as a low-priced lever movement giving good service. Those with seven and 15 jewels seem to be the most popular. The former is nickeled has non-magnetic balance, dust band and two winding wheels. The latter is also finely nickeled, and in addition has three settings, Breguet hairspring and cut balance. The parts are fully interchangeable and the movement fits perfectly in any American case of standard size. These goods are sold exclusively through the jobbing trade, and are imported by Byron L. Strasburger & Co., 17 Maiden Lane, New York.

### Shipments of Clocks, Watches and Jewelry to Alaska, Hawaii, Porto Rico and the Philippines.

WASHINGTON, D. C., July 28.—The following details of the commerce of the United States with their non-contiguous territories in clocks, watches and jewelry during certain periods, are of interest to the trade:

ALASKA.—Clocks to the value of $4,457 were shipped to Alaska during the 11 months ending May, 1905, as against a value of $1,847 for the same period of last year. Watch shipments during the 11 months' period of this year were valued at $767, as compared with $496 for the 11 months of last year. Jewelry shipments to Alaska have increased rapidly. During May last the shipments of jewelry were valued at $10,710, as against $2,935 during May a year ago. The value for the four months' period of this year was $36,309, while during the same period of last year the value was only $14,407. Plated ware shipments likewise increased from $242 during May, 1904, to $1,098 during May last, and from 847 during the 11 months of last year to $5,728 this year.

HAWAII.—Decreases in all the above lines are noted in Hawaii's record for the periods under consideration. Clock shipments declined from $11,825 during the 11 months of 1904 to $8,638 during the same period of this year, while watch shipments declined from $8,511 to $1,785. Jewelry shipments increased from $12,980 during May, 1904, to $21,650, but declined from $170,627 during the 11 months' period of 1904 to $166,034 during the same period of this year. Plated ware shipments likewise declined from $56,385 last year to $51,917 this year.

PORTO RICO.—During the 11 months of this year clocks to the value of $2,872 were shipped to Porto Rico, as compared with a value of $2,972 for the 11 months of last year. Watch shipments increased from $1,499 last year to $2,222 this year, while jewelry shipments likewise increased from $6,295 to $7,991, and plated ware from $4,691 to $6,022.

PHILIPPINE ISLANDS.—No shipments of clocks were reported for the Philippines in May a year ago, while in May last the shipments were valued at $2,050. On the other hand $7,743 was the reported value of the watches shipped to the Philippines in May a year ago, while $25 represented the shipments in May of this year. Clocks shipments for the 11 months' period increased from $1,436 last year to $4,453 this year, while watch shipments declined from $8,493 to $1,759. The shipments of jewelry during the 11 months of last year were valued at $1,065, increasing to $2,317 this year. Plated ware shipments increased from $810 to $1,624, indicating a good increase for the year.

---

Albert G. Smith, head engraver for Gurney Bros. Co., Brockton, Mass., recently completed the task of engraving the full alphabet three times on the head of a common pin. He states that to his knowledge the best previous record in this line was held by Charles K. Young, of the Federal Bureau of Engraving and Printing, at Washington, who placed the letters on a pinhead twice.

### Court Grants Discharge in Bankruptcy to Harry Meyer Over Creditors' Objections.

Harry Meyer, who was a broker in diamonds and jewelry with headquarters in the vicinity of 65 Nassau St., received last week his discharge in bankruptcy. Proceedings were taken against Meyer Jan. 12, 1904, when a petition in involuntary bankruptcy was filed by creditors with claims as follows: S. Lindenborn, $3,869; Arnstein Bros. & Co., $2,005; Zimmern Rees & Co., $2,493; Wallach & Schiele, $2,133. The petitioners said that on or about Dec. 15, preceding the date of the petition, Mr. Meyer had transferred or concealed jewelry and diamonds to the value of $5,000 for the purpose of placing the property where the creditors could not get it. Hays & Hirshfield were the attorneys for the petitioning creditors.

Mr. Meyer introduced a demurrer, upon which the petition was dismissed. An amended petition was then filed by the same creditors. This time they charged that Meyer, realizing his insolvency, had bought large quantities of diamonds and other jewelry and had secreted assets to the value of $18,000. For the purpose of proving these charges, Mr. Meyer's wife and his brother-in-law, Julius Robertson, also in the trade, were subpoenaed as witnesses. April 19, 1904 Meyer was duly adjudicated a bankrupt. May 12, he filed his schedules showing liabilities of $24,814 and assets of $2,439 of which $2,020 was in accounts. Orige S. Seymour acted as receiver.

After the adjudication the bankrupt and various witnesses were examined at much length in an effort to trace assets additional to those mentioned in the schedules. The court was not convinced of the truth of the charges made against Meyer, so his discharge was granted. No dividend has yet been paid and, if any is declared, it will be insignificant.

### Further Details as to Discovery of Diamonds in Rhodesia.

A report from Rhodesia, where extensive prospecting for diamonds has been going on for some time, states that a diamondiferous area, about 45 square miles in extent, has been located at a spot in the Somabula forest, about 14 miles distant from Gwelo, and on the railroad. A large number of prospecting shafts have been sunk on the area—there is a deposit of alluvial wash varying from a few feet to 25 feet in thickness—and from every hole from which the gravel deposit has been washed diamonds have been recovered. A systematic search for the "pipe" or source is now being made. Up to the present time, there have been discovered a considerable number of diamonds, among them several stones of fine quality and fair size.

There have also been found a number of sapphires, alexandrites, chrysoberyls, oriental amethysts and amethyst crystals, besides a large number and great variety of garnets in all sorts and shades of coloring. There is also what is known as the Kimberley ilmenite or carbon. The concentrates contain a large percentage of enstalite, which in the opinion of experts is a variation of the Kimberley olivine.

# Fancy All-Gold Barettes.

AN INCREASING TIDE has set in towards the Barette. Starting in the great metropolitan centers where Fashion takes the leadership, this demand will spread in widening circles.

A word as to our Fancy All-Gold Barettes will, therefore, be opportune. They embody many attractive designs, including artistic gem-effects. Pearls, peridots and diamonds are used to advantage. The Jeweler who carries these Barettes is up-to-the-times: a virtue customers appreciate.

### Young Men Who Passed Worthless Checks Settle with Jewelers and are Released—One Rearrested.

Settlement was effected, last week, by the two young men who had been arrested for passing a worthless check for $340, on Dieges & Clust, 23 John St., and another for $470 on William Reiman, 1111 Broadway, both New York houses. In each instance, the young men bought jewelry, giving in exchange checks which were afterward returned by the bank. Don L. Persch, 63 W. 56th St., one of the young men, was said to be the son of a brewer at Pittsburg, Pa. The other young man, Henry Klous, is the son of a silk importer, of New York.

Because of previous acquaintance with the jewelers, growing out of prior business transactions and their family standing, the young men had no difficulty in having their checks accepted. Their relatives, having made good the losses, Ex-Congressman John J. Adams, as counsel, last Thursday, asked Magistrate Baker in the Tombs Police Court to discharge the prisoners. He said that the complainants were entirely willing to withdraw the charges, if agreeable to the court. The judge granted the request and released the young men.

Persch was immediately re-arrested on a warrant obtained by K. P. Wright, a bank cashier at Washington, D. C., who charges that the young man had obtained money on a forged check. Persch's wife and mother, who were in court, were much depressed by the new arrest and said that they had exhausted their resources in trying to save him.

The dismissal of the charges made by the jewelry houses was contrary to the argument of a representative of the district attorney's office, who claimed that as a crime had been committed the defendants should be punished.

The Pittsburg correspondent of THE CIRCULAR-WEEKLY writes: "Jewelry firms in Pittsburg have been reimbursed for losses sustained through dealings with Persch, and will not prosecute him. His claim that he is the son of a wealthy brewer of this city is not true."

### Death of Charles H. Savage.

MIDDLETOWN, Conn., July 27.—Chas. H. Savage, who was formerly President of the Middletown Silver Co., committed suicide last night at his home at South Farms by shooting himself in the head. The deed was committed in the presence of his wife and children, and the cause of it has not been disclosed. He was well known, and his friends and acquaintances were shocked when they heard of his lamentable end.

Mr. Savage was instrumental in forming the Middletown Silver Co., which was organized here soon after the old Middletown Plate Co. was absorbed. He was thoroughly familiar with the silverware business and was especially successful as a salesman. Since he relinquished the position of president of his company he had traveled for it.

In a number of social organizations Mr. Savage was quite prominent, among them the local lodge of Elks of which he was a charter member. He is survived by his wife, a son and three daughters.

### Some Recent Customs Decisions on Precious Stones, Jewelry and Kindred Lines.

Decisions by the Board of United States General Appraisers, New York, were promulgated last week by the Treasury Department, in cases involving duties on precious stones and jewelry as follows:

HALF PEARLS—GOLDSTONES.—Protests of Rud. C. Hahn *et al.* against the assessment of duty by the Collector at New York. Protests sustained on the authority of G. A. 5,914 (T. D. 26,013) and G. A. 6,089 (T. D. 26,555), relating to half pearls and goldstones.

CARNELIANS—GOLDSTONES—PIERCED AMETHYST BALLS.—Protests of Rud. C. Hahn & Co. against the assessment of duty by the Collector at New York. As claimed by the importers, the Board held (1) that certain carnelians and pierced amethyst balls were dutiable under Par. 435, tariff act of 1897, as precious stones cut but not set, and (2) that certain goods invoiced as goldstones, consisting of imitations of aventurine, were dutiable as imitation precious stones under the same paragraph.

CHAIN PURSES.—Protest of N. Botstiber against the assessment of duty by the Collector at New York. Certain chain purses, classified as jewelry, were held to be dutiable as manufactures of metal under Par. 193, tariff act of 1897, on the authority of Tiffany *v.* United States (T. D. 25,316).

HALF PEARLS—IMITATION PEARLS.—Protest of Rud. C. Hahn *et al.* against the assessment of duty by the Collector at New York. Protests sustained on the authority of G. A. 6,088 (T. D. 26,554), relating to half pearls and to imitation pearls.

PRECIOUS STONES DRILLED—ROCK-CRYSTAL BALLS.—Protests, etc., of H. E. Oppenheimer & Co. *et al.* against the assessment of duty by the Collector at New York. As claimed by the importers, the Board held certain balls of amethyst, rock crystal, and lapis lazuli, some of which were pierced, to be dutiable as precious stones cut but not set, under Par. 435, tariff act of 1897.

PRECIOUS STONES.—Protests of Rud. C. Hahn & Co. against the assessment of duty by the Collector at New York. G. A. 6,097 (T. D. 26,586), followed, relating to certain goods invoiced as opal balls, lepis lazuli, opals, crystals, and amethysts, which were held to be dutiable as precious stones cut but not set under Par. 435, tariff act of 1897.

PRECIOUS STONES.—Protests of R. F. Downing & Co. Same as protests of Rud. C Hahn & Co. above.

PRECIOUS STONES—HALF PEARLS.—Protests of Bruhl Bros. & Henius Co. against the assessment of duty by the Collector at Providence. G. A. 6,097 (T. D. 26,586) and G. A. 6,088 (T. D. 26,554) followed, relating to precious stones drilled and to imitation pearls.

PRECIOUS STONES—HALF PEARLS—ONYX KEYSTONES.—Protest of Rud. C. Hahn against the assessment of duty by the Collector at New York. Protest sustained on the authority of G. A. 5,914 (T. D. 26,013), G. A 5,915 (T. D. 26,014), and G. A. 6,097 (T. D. 26,586), relating to half pearls, pierced amethyst balls, and onyx keystones.

BROOCHES — CHATELAINE BAGS.—Protest of Scruggs, Vandervoort & Barney Dry Goods Co. against the assessment of duty

by the Surveyor at St. Louis. The Board held certain brooches to have been properly classified as jewelry under Par. 434, tariff act of 1897, but sustained the importer's contention that certain chatelaine bags should have been classified as manufactures of metal under Par. 193. Note Tiffany *v.* United States (T. D. 25,316).

PERSONAL EFFECTS.—Protest of Mrs. Fred. W. Nolker against the assessment of duty by the Surveyor at St. Louis. This protest related to articles claimed to be free of duty under Par. 697, tariff act of 1897, as personal effects. It appeared that the goods in question did not arrive on the same steamer as the owner, but came in later as freight. Protest overruled on the authority of G. A. 5,955 (T. D. 26,110).

---

Decisions by the Board of United States General Appraisers, New York, in cases involving duties on imitation rock crystal products were last week published by the Treasury Department as follows:

IMITATION ROCK-CRYSTAL LENSES—IMITATION PEARLS.—Protests of Leo Popper & Sons against assessment of duty by the Collector at New York.—Protests sustained on the authority of G. A. 6,086 (T. D. 26,541) and G. A. 6,088 (T. D. 26,554), relating to imitation rock-crystal lenses and to imitation pearls.

IMITATION ROCK-CRYSTAL LENSES.—Protests of H. Robinson against the assessment of duty by the Collector at New York. Protests sustained on the authority of G. A. 6,085 (T. D. 26,540), relating to imitation rock-crystal lenses.

MUCKEL CRYSTAL.—Protest of Leo Popper & Sons against the assessment of duty by the Collector at New York. The merchandise in dispute was invoiced as muckel crystal and consisted of disks of imitation rock crystal molded or pressed into the form of plano-convex lenses. On the authority of G. A. 6,085 (T. D. 26,540) the Board sustained the importers' contention that it should have been classified under Par. 435, tariff act of 1897, as imitations of precious stones.

IMITATION ROCK-CRYSTAL LENSES.—Protest of Overton & Co. Same as protest of H. Robinson, above.

---

### L. M. Guess, McComb City, Miss., Files Voluntary Petition in Bankruptcy.

NATCHEZ, Miss., July 26.—Word was received here last week that L. M. Guess, a well-known jeweler and optician of McComb City, Miss., had filed a voluntary petition in bankruptcy in the Federal Clerk's office, July 21. According to the schedules filed with the petition, the assets are valued at $5,071.90, and the liabilities aggregate $6,303.81.

Mr. Guess is a practical jeweler and optician and is in business with his son at McComb City under the style of L. M. Guess & Son. He originally started at Hazlehurst, Miss., and later moved to Crystal Springs, in which place he went to the wall about 1888. He later resumed and came to McComb about six years ago. Mr. Guess is a man well thought of in the community and was believed to have a capital of about $2,000. It is generally hoped that the bankruptcy proceedings will not interfere with his continuing business.

## The Diamond Markets.

ANTWERP, July 21.—Although July is the beginning of the holiday months, the market here is comparatively active. It is expected that business will be quite brisk by the end of August. One drawback to the trade is the constant arrival of goods from the Premier mine, as these products when polished are often refused by buyers and thus cause a serious loss to the polishers. It was rumored that the mine has been flooded, and several merchants here seemed to welcome the news.

The diamond employes "bond" has decided to erect a sanitarium for consumptive diamond polishers in the Campine, a healthy country of the Antwerp province. This is to cost 25,000 francs, and will be paid for by a weekly assessment of eight centimes per member. The "bond" also purchased the ground for their own building.

R. Esquenazi and Emille Simon, composing the firm of Esquenazi & Simon, have dissolved partnership. The liquidation has been completed.

The committee delegated by the Government to inspect the diamond shops of this city has nearly finished its work, and it looks as though they would only bring complaints against the old shops, where ventilation and cleanliness have hitherto been neglected. The only remaining precaution to be taken to preserve the health of the workmen is the stopping of the use of lead in setting stones.

Among the foreign diamond merchants who visited the city recently were the following buyers: W. Hofman, Ben Rees, Richard Friedlander, Mr. Hess, H. Oppenheimer and F. H. Weinberg, New York; Messrs. Heschelsohn, M. Slabotzky, J. Sloog, B. Rapoport, Michel, Balbi, Wins, Regenold, Worms, Mitacoupola, Weissberg, Rollman, Hekster, Paris; Messrs. Canon, Robinson, Goldberg, Infeld, Kaufman, London; H. Straus, Hanau; Messrs. De Hoop and Schwarz, Amsterdam; Mr. Kahn, Moscow; Mr. Factoreen, Bradford; I. Schwarzstein, Odessa; Mr. Rutstein, Warsaw; Mr. Belais, Algiers; Mr. Mansberger, Madrid; S. Schuld, Alexandria; Mr. Muller, Nurnberg; Mr. Atlas, Philadelphia.

AMSTERDAM, July 20.—The market here has been rather quiet recently, although there are a number of American and foreign buyers visiting the city. For some time past buyers have been looking for roses and "six faces," which are five francs per carat cheaper than they were offered five months ago.

The market was good at the end of June and there were no failures. Amsterdam firms are continually sending in orders, and it is reported that some lots of brilliants have been sold to them at very high prices.

PARIS, July 20.—The market here remains unchanged. There have been some large transactions in pearls. Diamonds are sold at a gain of 1 to 2 per cent., while pearls often bring a profit of 10 to 50 per cent. or more.

The jewels of Princess Stefanie, the daughter of the King of Belgium, which will be sold at auction here, consist of a diadem, necklace and a brooch adorned with rubies, valued at 150,000 francs; a diadem, neck-

### Application of New Trade-Mark Law as to Marks Rejected Under Former Statute.

WASHINGTON, D. C., July 27.—The District Court of Appeals has just rendered an important decision as to trade-marks on the appeal from the ruling of the Commissioner of Patents by the Mark Cross Co., New York, who sought to have registered a trade-mark originally filed under the trade-mark law of 1881, but which was rejected prior to the taking effect of the new statute. The company thereupon undertook to amend its original application so as to bring it within the scope of the new law, Sec. 14 of which provides that an "application for registration of a trade-mark pending at the date of the passage of this act, and on which certificates of registration shall not have issued at such date, may, at the option of the applicant, be proceeded with and registered under the provisions of this act without the payment of further fee."

Sec. 24 of the act provides "that all applications for registration pending in the office of the Commissioner of Patents at the time of the passage of this act may be amended with a view to bringing them and the certificate issued upon such application under its provisions, and the prosecution of such applications may be proceeded with under the provisions of this act."

Relying upon the above quoted clauses, the applicant sought to file the necessary amendment, but the examiner of trade-marks refused to entertain it, and also refused to consider the question whether the alleged trade-mark was registrable under the new law, holding that this was not a "pending" case within the meaning of the law, and that, therefore, the applicant was not entitled to amend it to bring it under the provisions thereof. This action was sustained by the Commissioner of Patents, whereupon an appeal was taken to the District Court of Appeals, which, in the opinion just handed down, sustains the Commissioner, holding that the rejection of the application under the old law finally disposed of it in default of a request within a reasonable length of time for a rehearing, and that the repeal of the trade-mark law of 1881 closed the door to any further proceedings upon the original application.

Several hundred applications now before the Patent Office will be finally rejected under this decision, but doubtless many of them will be revived by the filing of new applications in conformity with the provisions of the new act.

### Assets and Liabilities of the M. S. Benedict Mfg. Co. as Shown in Detail by the Schedules.

UTICA, July 26.—The administering of the bankrupt estates of the M. S. Benedict Mfg. Co., Syracuse, and Harry L. Benedict, of the Benedict & McFarlane Co., and principal stockholder in the M. S. Benedict Mfg. Co., are progressing. The schedules of the Benedict Mfg. Co. have just been filed. The recapitulation shows: Liabilities—wages, $4,631.72; other debts, preferred, $1,404.81; unsecured claims, $337,358.49; notes and bills, $19,679.25; total, $363,074.27. Assets—real estate, $16,950.01; cash on hand, $54.03; bills, notes, etc., $4,892.25; stock, $73,004.07; carriages, etc., $257; machinery and tools, $24,532.75; debts due, $57,207.11; deposits in banks, $15,373.71; total, $192,122.70.

Much of the note indebtedness is for liability on paper which was discounted at different banks through the agency of New York note brokers. This indebtedness was covered extensively in the schedules of Harry L. Benedict, which have been published in THE CIRCULAR-WEEKLY.

The unsecured creditors of the company number about 250 and include the following: American Silver Co., $480; American Express Co., $64; American Cutlery Co., $526; E. P. Bates, $646; W. W. Bush, $611, J. E. Blake Co., $60; Bridgeport Brass Co., $434; Benedict & Burnham Co., $434; W. H. H. Chamberlain, $122.60; David Cronin, $136; Collins & Wright, $282; Cornell & Andrews, $702; Coy, Hunt & Co., $164; R. G. Dun & Co., $300; Egyptian Lacquer Co., $199; H. Finn's Sons, $49; Greene, Tweed & Co., $105; A. H. Heisey & Co., $79; Hansen & Van Winkel, $26; International Silver Co., $225; Jefferson Glass Co., $266; Max Klass, $325; Paul S. Moore, trustee, $325; Samuel Moore & Co., $328; Edward Miller & Co., $297; McKee, Glass Works, $155; Northampton Cutlery Co., $848; New Martindale W. Virginia Glass and Mfg. Co., $94; New Haven Clock Co., $281; National Lead Co., $156; Ovington Bros. Co., $92; Flint Glass Co., $153; Ontario Silver Co., $1,847; Oneida Community, Ltd., $1,431; Pittsburg Lamp Brass & Glass Co., $436; Phelps, Dodge & Co., $4,490; F. W. Perry, $332; J. T. Robin & Co., $101; Rogers & Hamilton Co., $97; W. H. Rogers, $389; Rogers Silver Plate Co., $76; L. Straus & Sons, $693; H. Schmeer Mfg. Co., $884; Tarentum Glass Co., $103; Chas. Tollner Sons Co., $127; S. E. Tate & Co., $107; Unionville Cutlery and Hardware Co., $994; West Leechburg Steel Co., $722; R. Wallace & Sons Mfg. Co., $177; S. S. Wernstein & Co., $269; Watrous Mfg. Co., $482; Weson Box Co., $351; Williams Bros. Co., $2,539; Tucker, Lorett & Loeb Co., $174.

The receiver's appraisal shows: Real estate, machinery, fixtures, etc., $16,950.01; spoon factory, $3,921.31; in hollow ware factory, $7,561.32; in Ottawa factory, $777.37; in novelty factory, $6,250.35; tools and fixtures in machine shops, $1,570.17; other fixtures, $4,452.23; merchandise in spoon factory, $1,957.98; merchandise in hollow ware factory, $16,198.15; flatware, at warehouse, $20,534.58; novelty at warehouse, $9,627.06; Pitts-Kimball stock, $1,499.07; Ottawa stock, $2,623.77; New York stock, $1,097.52; Chicago stock, $1,195.59; stock with salesmen, $294.70; stock in manufacture, $9,261.59; miscellaneous, $2,211.96; goods sold, May 6-20, $4,561; the accounted bills receivable are: Accounts, $52,651.16; bills, $4,092.25; consigned accounts, $2,707.17; ledger suspense accounts, $1,848.78; cash balance, etc., $800, total $176,586.19.

Referee Stone, of Syracuse, has called the first meeting of the creditors for the appointment of a trustee and an examination of the officers of the company. It will be held at his office, 330 Onondaga County Savings Bank building, Syracuse, Aug. 4, at 11 A. M., and it is believed that Mr. Barnes, the receiver, will be made the trustee of the company. Steps will be taken at the meeting towards arranging for a sale of the company's property.

William A. MacKenzie, the trustee in bankruptcy of Mr. Benedict, will sell at auction at the Hamilton Storage warehouse, 90 W. Madison St., Chicago, beginning Aug. 4 at 10.30 o'clock all the assets of the bankrupt. The sale will continue until the property is sold. This stock consists of the merchandise in the different trading stamp stores which Benedict ran.

# Simmons Armilla

WE believe that an examination of the Armilla will convince any jeweler that it is going to be well up on the list of the coming season's good sellers.

The Armilla is a hinged bracelet with a patented, invisible joint and catch. When closed it looks like a solid one-piece bracelet; when on, it fits the wrist snugly—no possibility of its slipping off.

A first-rate variety of patterns, offering choice of chased or plain styles and of three finishes—Roman, English and plain polished. It is made in gold-filled stock and in 10K. and 14K. solid gold.

The Armilla is now in the hands of the wholesale watch and jewelry trade.

**We furnish a handsome easel display card to retailers on request.**

### New Bankruptcy Rules Announced at Chicago Meet With Approval of Jewelers.

CHICAGO, July 28.— Judge Bethea, of the United States District Court, who handles all of the bankruptcy business in the local district, has announced a new set of rules to govern the disposition of bankruptcy petitions. It is declared that under the new rules it will be difficult to heap burdens in the forms of lawyers' fees and other charges upon an estate. Judge Bethea issued a set of rules which were formulated by the bankruptcy referees and approved by the court.

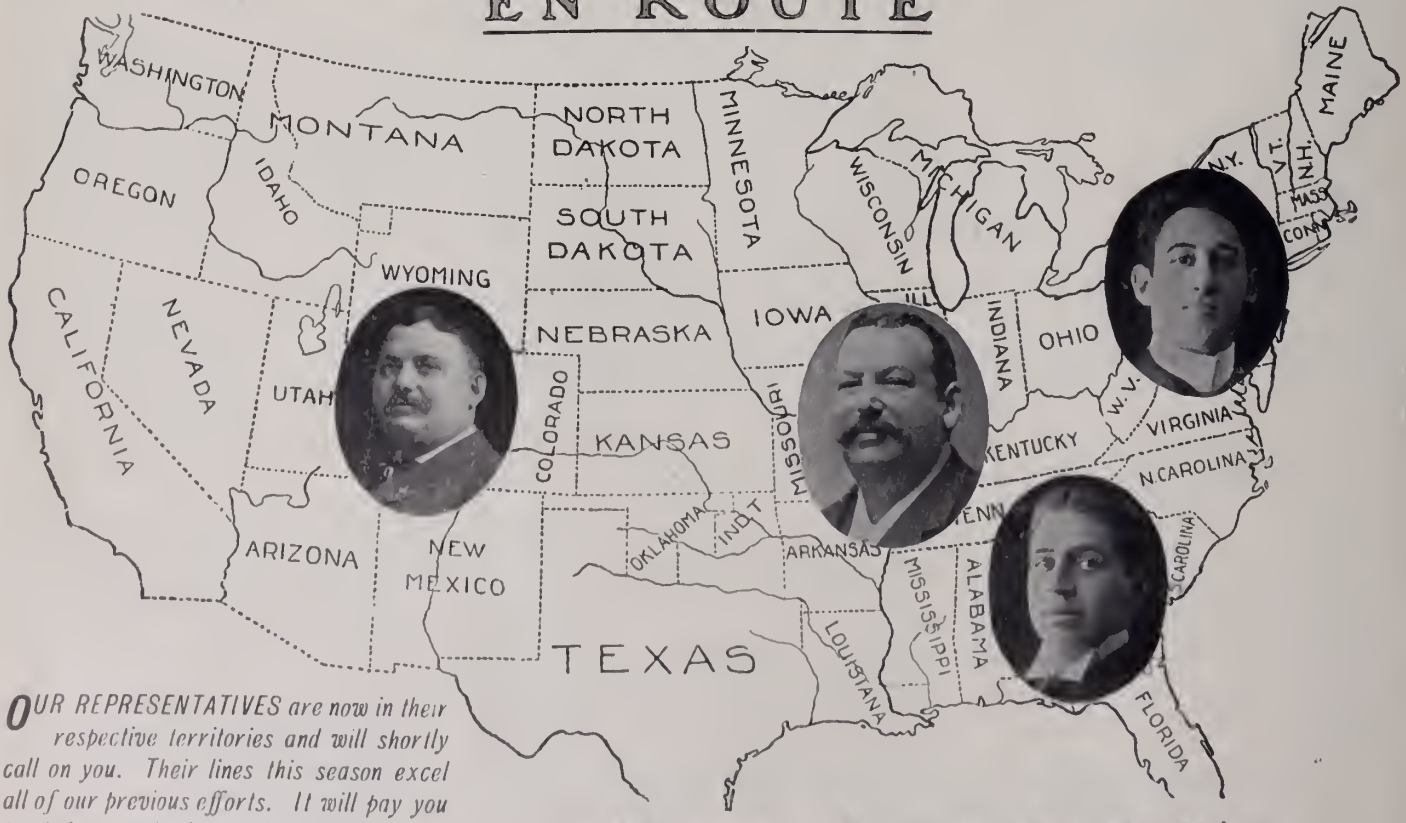
Under the rules of Judge Bethea when application is made for the appointment of a receiver notice must be given the bankrupt before the appointment, unless it be shown that such a notice would be impracticable. The receiver is prohibited by the new rules from employing an attorney unless a proper showing is made, and the attorney is not to be allowed compensation for work other than of a "reasonably necessary and strictly legal character."

In few cases will the sale of an estate be allowed until the creditors have met and appointed a trustee to take charge of the assets. In his stand in the matter Judge Bethea says he is following the letter of the bankruptcy law.

Judge Bethea's new rules meet with the approval of all wholesale jewelers here, as there have heretofore been a number of cases where the expense of administering bankrupt estates has been very large, causing dissatisfaction.

### E. T. Mower, Chicago Optician, Files Voluntary Petition in Bankruptcy.

CHICAGO, July 29.—E. T. Mower, optician, on the third floor of 176 State St., filed a voluntary petition in bankruptcy on Thursday. His schedules show the liabilities were $4,486 and the assets about $350, claimed under the law to be exempt. Of the liabilities about $2,200 is due newspapers for advertising and about $1,500 due for stock, divided among seven creditors, as follows: F. A. Hardy & Co., $60; A. H. Bliss & Co., $200; R. B. Macdonald & Co., $150; Morgan Jewelry Co., $230; R. L. Griffith & Son Co., $366; Julius King Optical Co., $350; H. F. Hahn & Co., $133.



Mr. Mower formerly occupied the ground floor at 176 State St., for nearly three years, under the name of the Globe Optical Co., and had a half interest in the Bolivia Diamond Co., at 98 Madison St. He sold out his interest in the latter place, it is said, about a year ago and last May gave up the store at 176 State St. and moved upstairs.

Mr. Mower said that for three years while he occupied the store, he paid a rental of $9,000 a year, and this, together with heavy running expenses, caused his embarrassment.

---

It is reported from Galveston, Tex., that the silver service to be presented by the States of Kansas and Colorado to the boats of the United States Navy named after these States, will take place at Galveston. Both States are in favor of this point for the presentation ceremonies.

## Preparations for the Twenty-four Karat Club's Annual Outing to be Held Saturday.

Next Saturday, Aug. 5, will be a joyous day in the history of the 24-Karat Club of New York, for then will be given the annual outing at the Cove Hotel, Livingston, Staten Island. The members and their friends will assemble on the Staten Island boat at the foot of Whitehall St. at 12 o'clock, and, after arriving at St. George, will be taken in special trolley cars to the scene of festivities. Chowder will be served immediately on arrival at the hotel, and at 2 o'clock the clam-bake will be opened. As is usual, formality will be dispensed with, and the members will enjoy themselves to their full vent.

Much of the afternoon will be given up to sports, and nothing better can be said in relation to this than the official announcement sent out by the committee as follows:

Twenty-four Karat Members. Ahoy!

Feeling that our coming outing must make up in quality what it lacks in quantity (coming as it does but once a year), your athletic committee has arranged a most strenuous programme.

Two conditions must be observed to insure its complete and successful observance:

First, As the dinner comes first members should observe most rigorous training and eat sparingly. Second, they should know what is expected of them after their dinner, that they may be promptly in their places at the appointed time.

Two prizes have been offered—one to be awarded to the best all round athlete, the other to be given to the "first in" of the "also rans."

The contests will consist of a sack race, a potato race, to be run off in heats of four, winners only to qualify for the finals, and a race around the baseball diamond in heats of two starting in opposite directions from the home-plate, the four survivors competing in a 50-yard dash.

Winners of finals will be credited with five points.

Second men of finals will be credited with four points.

Third men of finals will be credited with three points.

Fourth men of finals will be credited with two points.

The first prize to go to the winner of the greatest number of points.

The second prize to go to the member with the next number of points.

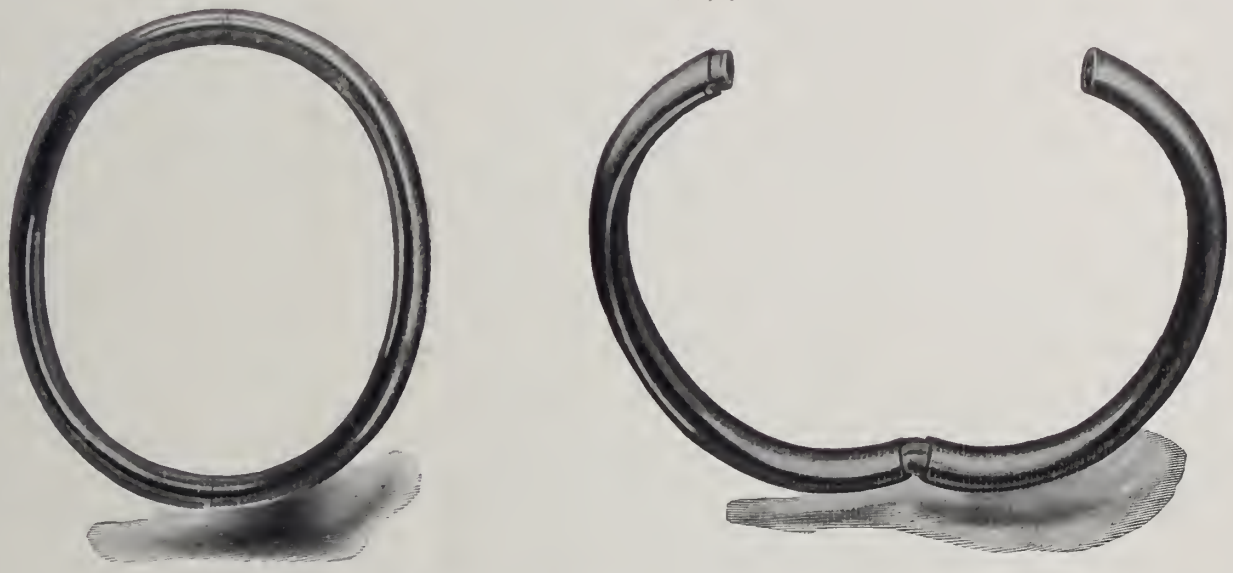
These contests will take place on the stroke of four.

Simultaneously for those less strenuously inclined, contests in bowling and quoits have been arranged.

Promptly at five o'clock our baseball game will be called and your committee feel safe in saying it will be a "hummer."

We hope for a large list of entries and Twenty-four Karat members and their guests are requested to hand their names to either of the athletic members while en route on the ferryboat.

May the 5th of August be set apart as a day free from cares and worry, and may no thought of sore muscles on the 6th mar the enjoyment of our fourth annual outing.



For these few short hours let's all be boys again.

The two cups to be presented in the athletic contests are worthy of the club and will be prized by the winners. The President's Cup, presented to this club for this event by President E. R. Crippen, is a fine, large covered stein, made of weathered oak, richly mounted in silver with silver lining, top and handle. There is an appropriate inscription and the seal of the club ornaments the face of the cup. John Frick manufactured this trophy. He also made and presented to the club a smaller cup, also of weathered oak and silver, and with somewhat similar ornamentation. A representation of a lobster, under the club's seal, is a humorous suggestion as to the nature of the honor.

## Attleboro.

A. T. Smith, of Smith & Howard, is visiting in New York.

Albro A. French, of the D. E. Makepiece Co., has been kept at his home by illness.

Charles Forrester, of Marble, Forrester & Co., has gone to Nova Scotia for a pleasure trip.

The addition to the factory of the S. W. Card Mfg. Co., Mansfield, Mass., is nearing completion.

Maxy W. Potter, salesman for J. M. Fisher & Co., started for the far western circuit last week.

George Hayward, salesman for the Horton, Angell Co., returned last week from a two months' trip.

Raymond L. Wells, with the E. A. Fargo Co., Taunton, has been spending part of his vacation at Asbury Park, N. J.

The Cohannet Silver Co., Taunton, has a baseball team which closed its season last week with an unbroken chain of victories.

E. A. Remington, of Carter, Qvarnstrom & Remington, with Mrs. Remington, left, last week, for an auto tour through Connecticut.

Harold E. Sweet, of the R. F. Simmons Co., was last week elected a member of the executive committee of the New England organization of Universalist Churches.

The J. W. Luther Co. made its annual report to the Secretary of the Commonwealth last week. The figures: Machinery, $21,137; cash and debts receivable, $13,684; merchandise, $11,000; capital stock, $35,000; accounts payable, $10,534; surplus, $48,684.

Edward S. Barton, salesman for Reed & Barton, is at the factory at Taunton, Mass., getting his samples for Fall. His headquarters for some time have been in New Orleans, but owing to the present outbreak of yellow fever he will not go back there for some time, although he retains his office in that city.

Former residents returning to Attleboro would hardly recognize the center of the town, owing to the grade crossing abolition work under construction. Part of the depot has been torn down and a temporary track is being laid over the vacant land which was the scene of the fire May 18, 1898, when many of the jewelry factories were destroyed.

Cottage City has become this year a veritable Attleboro Summer colony, with more of the jewelry manufacturers spending their vacations there than for a long time. Among the men who have been trying to forget orders and samples and regain the fresh minds and strengthened muscles needed for the strenuous season so soon to open, are Charles A. Marsh, of C. A. Marsh & Co., who bought a handsome new house there; R. John Marsh, his son, salesman for the concern; Harry P. Kent and Frank W. Weaver, of F. W. Weaver & Co.; Louis B. Jones, of C. A. Marsh & Co.; H. C. Clap, of the Daggett & Clap Co.; R. Curtis Read, salesman for J. C. Cummings & Co.; John M. Fisher, of J. M. Fisher & Co.; Henry P. Wilmarth, of the W. H. Wilmarth Co.; Louis J. Lamb, of C. H. Allen & Co., and Alton H. Riley, North Attleboro. The social life of this resort has rarely been as brilliant during the Summer season as now.

The growing custom of closing the jewelry factories the last week in July simultaneously was more generally observed this year than ever before. The proprietors and workers get a needed vacation, and there is an opportunity for necessary repairs and alterations at the shops. The firms which joined the movement this year include the F. H. Sadler Co., F. D. Hall, H. L. Thurber & Co., Sykes & Strandberg, the J. W. Luther Co., F. A. Hill & Co., the Jas. E. Blake Co., the Fontneau & Cook Co., John Anthony, Smith & Crosby, J. F. Inman & Co., the D. A. White Co., Marble, Forrester & Co., Attleboro Chain Co., Attleboro Mfg. Co., Carter, Qvarnstrom & Remington, R. B. Macdonald & Co., Mason, Howard & Co., S. O. Bigney & Co., McRae & Keeler, and J. M. Fisher & Co. Eight other firms closed for a part of the week. Monday, July 31, saw a general resumption of work, with good promise of a busy Fall.

An attempt to loot the factory of H. M. Williams & Co., 18 Forest St., was frustrated Wednesday night by the prompt action of night watchman Alfred Silvis. A man who had packed up a quantity of chain in his coat, was surprised by the watchman and frightened off, leaving his plunder behind him. Entrance to the factory is supposed to have been gained just as the watchman entered the building to make his usual rounds. The thief followed the watchman into the shop and while the latter was proceeding through the building, the attempt to rob was made. The marauder used his coat as a bag, putting into it about 25 pounds of valuable chain. Before he could get away, he was surprised by the return of Silvis and fled without attempting to take the goods with him. Owing to darkness, the watchman was unable to identify the man and the police have only a report of the occurrence to work upon. In the week since the incident, no progress has been made by the police toward arresting the miscreant.

36 out of 46 PRIZES
were awarded to
PATEK, PHILIPPE & CO.
in the timing contest of the Astronomical Observatory in Geneva, for the year 1904, comprising the only Series Prize; all the First Prizes (2), half of the Second Prizes (1), 8 of the Third Prizes out of 11, 5 of the Fourth Prizes out of 6, 12 Honorable Mentions out of 14, 8 Single Mentions out of 11.
68 NASSAU ST., NEW YORK. GENEVA, SWITZERLAND.

YOU can readily understand that the retail jeweler appreciates watches of merit when we tell you that from January 1st, 1905, to July 1st, there were more Illinois Springfield adjusted watches manufactured and sold than in any previous six months in the history of the company.

AVERY & BROWN,

68 Nassau St., New York.

## North Attleboro.

Frank Whiting has left on a southern trip for Whiting & Davis.

James D. Lincoln has returned from an outing at Cottage City.

Mr. and Mrs. C. Ray Randall are the guests of relatives at Albany, N. Y.

The power at the Whiting building will cease Saturday night for one week.

Lucius Taylor, the Pacific coast representative of Riley, French & Heffron, is in town.

Nearly all the local factories will be closed next week for annual repairs to the boilers.

Samuel E. Fisher and family are enjoying an outing of several weeks at Lake Archer.

Edward F. Shannon, western salesman for Riley, French & Heffron, is in town for a few days.

The employes of George Robson & Co., 17 in number, had an outing at Miramichi Lake Thursday.

G. Herbert French, of Riley, French & Heffron, has returned from a short outing at Cottage City.

G. Cheever Hudson, of G. C. Hudson & Co., left Thursday on an extended trip through the west.

Richard Evans, for several years connected with R. Blackinton & Co., has engaged in other business.

Louis Blackinton is home from an extended western trip in the interests of the W. & S. Blackinton Co.

James P. Black recently received a bequest of $30,000 by the death of an uncle at Pugwash, Nova Scotia.

Frank Sturdy, of J. F. Sturdy's Sons, Attleboro Falls, and Mrs. Sturdy, are stopping at Nantucket for a few weeks.

Business at Winter Bros.' tap and die factory is rapidly increasing and it is necessary to run nights to fill orders.

Frank Kennedy, of the New York office of the Paye & Baker Mfg. Co., is spending a few days with his parents here.

Mr. and Mrs. Woodbury Melcher, the former of Scofield, Melcher & Scofield, are spending a few weeks at Harwich.

The new boiler to be installed at the Company shop arrived Thursday morning. All firms in the factory, with the exception of J. P. Bonnett & Son, are closed down. The Bonnetts have had two upright boilers placed in position in the rear of the shop, to supply them with power during the two weeks it will take to install the new boiler.

Saturday the employes of the following firms stopped work for one week: Riley, French & Heffron, W. & S. Blackinton Co., G. C. Hudson & Co., C. Ray Randall & Co., T. G. Frothingham & Co., F. H. Cutler & Co., the H. D. Merritt Co., E. Ira Richards & Co., F. M. Whiting & Co., R. Blackinton & Co., Bugbee & Niles Co., J. O. Copeland & Co., estate of O. M. Draper, Cheever, Tweedy & Co., Johnson Brothers, F. S. Gilbert and North Attleboro Enameling Co.

The French July cup in the jewelers' handicap golf tournament, will be won this year by either G. Herbert French, of Riley, French & Heffron, or by Orin W. Clifford, of the G. K. Webster Co. Mr. French qualified by defeating Alton H. Riley. This left E. E. Hale, Elton B. Fisher, H. Herbert French and Orin W. Clifford in the semi-finals. Messrs. Fisher and Hale have gone on their annual vacations, and previous to their departure announced their retirement from the contest. This narrowed the tournament to Messrs. French and Clifford, who will play the final match next week. The cup was given in 1902 by G. H. French. The terms of the gift were that it should be contested for by members of the North Attleboro Country Club, composed of manufacturing jewelers, during the month of July until its final possession was decided. The player winning for three years was to secure permanent ownership of the trophy. In 1902 the cup was won by Alton H. Riley, of Riley, French & Heffron. In 1903 Walter Sherman, of the estate of O. M. Draper, won a point. Last year Mr. Riley won a second time.

John Mosher, of Schoen & Mosher, Owatonna, Minn., has been taking a course of engraving in a school in Chicago.

P. P. Davis, Seattle, Wash., has been receiving the congratulations of his friends on his wedding to Miss Theresa M. Gibboney. The wedding, which was celebrated July 4, was not made public until a week or so ago.

IF IT'S A

ROY

TRADE MARK

IT'S STANDARD

Leading jobbers everywhere prefer the ROY SOLID GOLD WATCH CASES because they are always made from assayed gold, which insures reliable quality in the newest designs and finest workmanship.

ROY WATCH CASE COMPANY

The "ROY" stamp in the watch case is a perpetual guarantee of satisfaction to the purchaser.

ROY WATCH CASE CO.,

21-23 Maiden Lane, New York City, N. Y.

206 Kearny St., San Francisco, Cal.

## Baltimore.

C. Despeaux, watch case manufacturer, has located at 28 East Baltimore St.

J. Wilson Pleasants, with Jacobi & Jenkins, is on an extended trip north.

The committee in charge of the collection of the $5,000 to be used in buying a silver testimonial that will be presented to the cruiser *Maryland* by the State, have chosen the depositories and have issued an appeal for contributions.

The handsome building of the Samuel Kirk & Son Co., on the north side of Baltimore St., is nearing completion. A feature of the building will be the spacious salesroom, the ceiling of which extends to the third floor. The entire front is of white marble and terra cotta to match.

John I. Bishop, a salesman in the employ of J. Castelberg & Sons, was held last week in default of $5,000 bail by Justice Loden on several charges of larceny from the firm. The specific charges are of the larceny of two diamond rings, valued at $700; silver watch, valued at $7.50; gold watches, valued at $115; two diamond rings, valued at $155; one ring, valued at $15, and two gold watch chains, valued at $15. These thefts, it is charged, occurred during March, April and June. Mr. Castelberg says that Bishop had been employed by him about four months previous to the discovery of discrepancies in his affairs. When questioned as to what he had done with a ring that had been intrusted to him, the salesman claimed he had sold it to a man in Texas, Md., and exhibited a receipt. When Mr. Castelberg offered to send a man there to recover the ring the salesman confessed to pawning it and keeping the money. Mr. Castelberg believes the other missing articles disappeared in the same manner. He said that Bishop was paid $10 a week and a commission of 5 per cent. on his sales.

Stephen B. Butts, a retired merchant, who died at his home, Buffalo, N. Y., early last week, was for many years in the jewelry business in the early part of his life. Deceased was born in Washington, N. Y., in 1826, and went to Buffalo in 1850, where he went into the jewelry trade. Later, however, he gave up this line to form the firm of Tucker & Butts, dealers in photographic supplies, in which business he remained for a long time and became prominent. The funeral services were held Wednesday from his late residence.

Hotel Schenley

Pittsburgh, Pa.

Twelve minutes' car ride from Fifth Ave. and Smithfield St., or East Liberty Station. Fireproof, surrounded by three acres of garden, away from the dirt, smoke and noise; large porches, cool breezes at all times; 10 to 15 degrees cooler than in the congested district.

'Phone, 286 Schenley.

## Providence.

P. Wunderle & Co. have taken the plant formerly operated by James E. Potter & Co. at 95 Pine street.

W. A. Schofield and E. B. Hough are acquiring a reputation as fishermen among the Buttonwoods' Summer colonists.

Several of the local factories closed last week, for two weeks, for their annual house cleaning and inspection of boilers.

S. K. Merrill is spending a few weeks at Jackson, N. H. William J. Feeley was registered at the Sakonnet Hotel last week.

Local creditors of W. T. Ferguson, Bridgeport, have decided to accept his offer of 10 per cent. It is understood that Providence claims against the Connecticut man amount to nearly $10,000.

Jewelry buyers were not conspicuous in town last week. Mr. Stone and Mr. Coman, of Chicago, and Mr. Robinson and Mr. Heeren, of Pittsburg, were the only ones recorded up to late in the week.

The vacancy in the board of directors of the Manufacturing Jewelers' Board of Trade, caused by the death of Edwin Lowe, has been filled by the election of E. B. Hough, of the Wightman & Hough Co.

T. W. Foster, of this city, testified in behalf of the manufacturers at the hearing last week before General Appraiser Sharretts in the Custom House, New York, relative to the duty on hat pins and other jewelry.

Creditors of S. A. Mayor & Co., Kansas City, Mo., are considering an offer of 20 per cent. in settlement of their claims. Some of the Providence houses are said to have come to terms at that figure, while others are still holding off.

The Rhode Island Society of Optometry had an outing at Seaconnet Point one day last week, going by steamer to this popular resort, where the day was spent pleasantly, a shore dinner being one of the features. The party was a large one, and the outing was one of the most successful in every way that the organization has ever had.

Several well-known jewelers or men closely affiliated with the craft, figured in the midsummer outing of the Falstaff Club at the Warwick Club last Saturday afternoon. Some said that Harry Saunders was not qualified to run in the fat men's race, but as he did not win, his sporting status will doubtless be allowed to rest in peace.

Men representing the Gorham Mfg. Co. in various cities, and who advance the lines which this company handle, had a gathering at Crescent Park last week. The occasion, while largely one of pleasure, was sufficiently interspersed with business ideas and suggestions to make it a profitable as well as an enjoyable event. A shore dinner was served and the occasion was worthy of remembrance to all present.

Charles F. Godfrey, who died last Thursday at his Summer residence, in Buttonwoods, was well known to the older jewelers. He was in his 82d year, and was born in this city Sept. 26, 1823. After receiving a common school education, he entered the employ of John Gorham, founder of what is now the Gorham Mfg. Co., and learned the trade of silversmith. He worked at the trade for many years, being associated at various times with the Whiting factory at North Attleboro, and Fessenden & Co., of this city. Later he was employed by Godfrey & Gardiner, of this city, the first named being his son, William S. Deceased was married to Miss Hannah B. Manchester, sister of Silas Manchester, who died recently, and who was associated at the time of his death with Fessenden & Co. Mr. Godfrey was a member of the old volunteer fire department of this city and was a member of the Providence Veteran Firemen's Association. Of six children born to Mr. and Mrs. Godfrey, but one survives, Miss Harriet A. Godfrey, with whom he had made his home during his declining years.

## Boston.

Charles W. Finlay, of A. Paul & Co., who was obliged to undergo a surgical operation last week, is reported as resting comfortably with good prospects of recovery.

Henry W. Patterson, of the Smith, Patterson Co., has been enjoying a vacation trip to the Provinces. Mr. Patterson is a Canadian by birth and a prominent member of the Canadian Club in Boston.

Buyers in town during the week included: Charles H. Sinclair, N. C. Nelson, Concord, N. H.; J. H. McGovern, Haverhill, Mass.; D. C. Barrows, Willimantic, Conn., who is fitting up a new store in that city.

The Globe Optical Co. is making extensive changes in its quarters in the Marlboro building. The rooms formerly occupied by the E. Howard Clock Co. have been fitted up for one branch of the business, and the rear part of the second floor is under-

going a transformation which will adapt it to the needs of the company very conveniently. The changes and additions give the concern about 6,000 feet of floor space.

George R. Barbour, formerly with D. C. Percival & Co., who went west a few months ago in the hope of benefiting his health, died in Congress, Arizona. His funeral took place on Wednesday, services being held at his former home in this city.

*Sally VII.*, Lawrence Percival's crack racer, continues to win laurels this season, as she did in the 1904 competitions. On the recent run eastward of the Boston Yacht Club, with records taken on each day's time-race from port to port, Mr. Percival's boat took three first and two second prizes.

## Louisville, Ky.

TRADE CONDITIONS.

All the local jewelers report quite a bright outlook for the Fall trade. The two jewelers in Shelbyville, Ky., also report a fine business for this time of the year.

Mr. Krull, of Rodgers & Krull, will leave shortly for an extended pleasure trip in the east.

Miss Helen Wright, of George Wolf & Co., has just returned from a two weeks' vacation.

Miss Susanne Hennings, New York, has offered two sterling silver loving cups to be given in a pony challenge at the Shelby County Fair. The cups were furnished by George Wolf & Co., of this city.

The trade of this place have been interested in learning something of a young boy who rides around on the street cars with an amount of fine jewelry in his pockets, which he sells to people on the car for just what he can get. So far he has not been apprehended.

Sixteen of the friends and admirers of Marvin Hart have bought a silver loving cup which will be presented to the world's champion some day next week at his country home. The cup is of solid silver, 20 inches high, and cost $150. It has been on exhibition at one of the local jewelry stores.

## Syracuse.

Cornelius N. Damms, 206 Wyoming St., fell in a faint in W. Jefferson St. Thursday and was taken home in an ambulance.

Two diamonds, valued at $275, which were taken from Fred F. Mead Co.'s jewelry store by a woman who was believed to have stolen them, were returned by a messenger boy early this week. The woman had asked to show the diamonds to a friend, and when she did not return them the police were put on the case. Before they had taken action the goods were recovered.

Early last week a thief broke the plate glass window of the Spitz Jewelry Co.'s store, 335 S. Salina St., picked out several trays of cheap rings and ran away. A policeman who heard the crash of the glass gave chase and finally arrested Ira Armstrong, 22 years old, who had fallen to the sidewalk. In the police court he was charged with burglary in the third degree and was held for the grand jury. The jewelry found around him was valued at about $75.

# THE GIANT OF COLLAR BUTTONS

## IN QUALITY, IN SALES.

The Standard American Collar Button.

**Millions of Krementz One-Piece Collar Buttons made, and are sold all over the world.**

**WHY?** *Because* of their HIGHEST QUALITY, BEST CONSTRUCTION, GIVING THE MOST WEAR AND GREATEST COMFORT and their IRON-CLAD GUARANTEE.

To verify this we invite the trade to read **"The Story of a Collar Button, with Illustrations,"** which may be had **FREE** for the asking, and to try the experiment suggested on page 5 of that booklet, by which all may easily determine the exact amount of 14 K. gold in Krementz plate.

**Extract from "Printers' Ink," Nov. 23, 1898.**

The Little Schoolmaster now suggests, to every pupil in bis class, to send a two-cent stamp to Krementz & Co., 49 Chestnut Street, Newark, N. J., and ask to be favored witb a copy of their leaflet. "The Story of a Collar Button." Afterward, if any pupil will send to *Printers' Ink* another leaflet, new or old, that is half as good as this one, or that approaches it in excellence, the deserving student will be rewarded with one of *Printers' Ink's* souvenir spoons as an acknowledgment of his discovery and contribution. "The Story of a Collar Button" is the hest piece of advertisement construction that has come to *Printers' Ink's* attention in the year of our Lord 1898.

**Should you wish to utilize this booklet to increase your collar button business, we will, on receipt of your order, print your card upon and send you a quantity of them.**

**The several qualities of Krementz One-Piece Collar Buttons are stamped as follows, ON BACK.**

Patent Sustained by United States Supreme Court.

**Quality and Construction have made Its Reputation.**

Selling Agents to Jobbing Trade.

## Connecticut.

The Parker Clock Co., Meriden, has enlarged its office building on Elm St.

Frank Young, with the Middletown Silver Co., Middletown, is in Boston on business.

After three weeks the auction at the store of D. C. Barrows, Willimantic, has been closed.

S. W. Tasch, jeweler of Danbury, has been appointed an appraiser of the estate of Miss Mary Stone.

C. L. Bryant, Danbury, accompanied by Mrs. Bryant and his daughter, is spending a few weeks in Seasport, Me.

John W. Carroll, who had been for a long time an employe of the E. Ingraham Co., Bristol, died suddenly last week.

Frederick Allchurch has resigned his position in the jewelry store of C. D. Aldrich at Winsted, and has engaged in business at Barton, Vt.

Chas. D. Morris and Geo. D. Munson have been selected members of the Finance Committee of the Dime Savings Bank, Wallingford.

Edwin Hart, superintendent of the Waterbury Watch Co., with his family, is passing a vacation at the cottage of Mr. and Mrs. Geo. F. Foote, at South Norwalk.

Gen. Geo. H. Ford, president of the Ford Co., New Haven, will sail in a few days for Europe to join his wife and sister-in-law, who have been for some time in Rome.

Thomas I. Gwillim, Bristol, returned last week from an outing at his Summer home near Sebago Lake, Me. His son, H. Dennett Gwillim, is now taking his vacation at the same place. Mrs. Gwillim and Miss Bessie Gwillim will remain at the lake until September.

A. M. Gordon, of the Seth Thomas Clock Co., Thomaston, has gone to Elgin, Ill., to superintend the instalment of a large clock recently shipped to the Elgin Watch Factory.

J. A. Monroe, an employe in factory "E," of the International Silver Co., at Meriden, will go to Pittsburg, Pa., to take charge of the silverware at the Ft. Pitt Hotel.

L. B. Parsons, Milford, is enjoying a bicycle trip in the White Mountains and earning more than sufficient money to pay his way by repairing clocks at houses along the route.

Among the trustees elected last week by the Meriden Savings Bank were Walter Hubbard, Edward Miller, G. M. Curtis, and L. A. Miller. Mr. Hubbard was re-elected a vice-president.

Geo. Wallace, a former employe in the clock works of the Seth Thomas Clock Co., Thomaston, died recently at Middlebury, and the body was taken back to his former home for burial.

Col. Jas. H. Close, a veteran of the Mexican and Civil wars, who for several years was employed at the Wilcox Silver Plate Co.'s plant, Meriden, died July 22, at his home in Hartford.

Special Saturday sales at the store of G. W. Fairchild & Sons, Bridgeport, are proving quite successful. The store closes Friday afternoons during July and August to give the clerks a half day off.

Sports of many kinds marked the outing given last Saturday at Mansfield's Grove by the fire brigade of the R. Wallace & Sons Mfg. Co., Wallingford. During the day an excellent course dinner was served.

William P. Blanchard, of the International Silver Co., has been delayed in returning to his duties after his vacation by painful burns. A cup of scalding hot coffee was accidentally spilled upon his leg.

To the Hon. Michael Kenealy, a handsome silver loving cup, made at the works of the Gorham Mfg. Co., Providence, R. I., was recently presented by his Connecticut colleagues in the house of representatives.

C. J. Monson, Jr., of C. J. Monson, Jr., & Co., New Haven, sailed last Friday from New York on the *Zeeland*. Mr. Monson, who is accompanied by his wife, will make an extended trip on the Continent.

Two members of the directorate of the Southington Cutlery Co. were dropped at last Wednesday's annual meeting, and the number of directors was thereby decreased to seven. The following officers were chosen: C. E. Jennings, president and treasurer; Marcellus B. Wilcox, assistant treasurer; J. H. Baldwin, secretary.

The factories of the Seth Thomas Clock Co. are shut down for repairs, more work of this kind being done than usual. The clock works will be idle for a month, until August 14, but the watch department will remain idle only two weeks. New floors will be laid and other improvements completed which will enable the company to increase its force of workmen.

Opening day at the new store of the F. L. Wilson Co., in the Masonic Temple building, at Danbury, was celebrated July 25, and was more devoted to exhibition than sales. There was a large attendance, and the visitors were enthusiastic in their praise. The fixtures are all mahogany on bases of Tennessee marble with handles and other trimmings of oxidized silver. In the center of the store are nine large floor cases, the first a horseshoe case used exclusively for the display of diamonds and other precious stones, and the other cases each 10 feet long. Two large mirror cases in the front of the store are filled with cut glass. A deep mirror-back case at the back of the store contains bronze and art metal goods. On one side of the store are large wall cases filled with bric-à-brac, hand-painted china and solid silver. On the other side, in similar cases, are plated ware, clocks and materials. The watchmaking and optical departments, offices and work rooms are all conveniently located.

An effort is being made to induce the countries represented in the International Postal Congress, which will be held next March in Rome, to agree to the proposal to reduce the postage from five to two cents on letters to foreign countries. It is understood that England and Germany are agreeable to the reduction.

John J. Fitzpatrick was arrested, last week, on a charge of fraud, made by J. S. Round & Co., Boston, Mass. It is said that Fitzpatrick bought a watch last October for $36, paying $5 down and agreeing to pay $1 a week. He soon ceased to make the weekly payments, it is said, and sold the watch about a month after he bought it.

## Philadelphia.

Frank Kind, of S. Kind & Sons, is at Atlantic City, for the balance of the Summer.

Harry Bedichimer, of I. Bedichimer & Sons, is at Atlantic City for the rest of the Summer.

Mr. and Mrs. M. H. Long have gone to the Muskoken Lakes, Canada, for the month of August.

John Oberholtzer, of J. B. Bechtel & Co., jobbers, 725 Sansom St., is spending his vacation at Perkiowen Creek.

Suit was instituted on a contract, last week, against the pawnbrokers, M. & S. Fridenberg, by Hannah Gottlieb.

E. M. Bracher, 929 Chestnut St., after a rest at Atlantic City, has departed on a trip through the South to be gone until Sept. 1.

A. Bandschapp, 460 N. 8th St., sails soon for Europe to visit again his old home. In his absence Al Bandschapp, Jr., his son, will conduct the business.

Henry C. Barry, of M. Sickles & Sons, has his wife and son at Wildwood, N. J., for the Summer, where Mr. Barry will spend the next two weeks.

Wm. Eckenbrine, of Earle & Co., 1030 Market St., is enjoying a holiday at Absecon, N. J. Clarence Luken, of the same house, is at Spring Mount, Pa.

The Gorham Mfg. Co., New York, has instituted suit in the courts of this city against J. Wesley Allison, a wealthy merchant, to recover $109, balance claimed to be due on a sale of silverware.

The electroplating establishment of J. M. Linnard, 736 Sansom St., was disposed of at auction, last week. Stock and fixtures were sold at bargain prices and the sale was attended by representatives of nearly all the Sansom St. houses.

Geo. M. Kite and Frank L. Avery, of the Wm. C. Penfold Co., 818-20 Chestnut St., started on their Fall trip, Monday. William Purnell and Thomas J. Hannigan start next week. Daniel Douglass departed last week for a three months' trip through the South.

David Andress, the aged father of Isaac Andress, the Keystone Watch Case Co.'s employe who was arrested recently for pilfering hundreds of dollars' worth of gold, was brought to this city to stand trial for disposing of the stolen gold to the United States Mint.

Gold bullion worth $5,000,000 arrived here, Tuesday, of last week, from Seattle. It was consigned to the United States Mint for coinage. A force of trusted men armed with Winchesters accompanied the precious metal and guarded it closely though unostentatiously.

Confessing to the theft of jewelry valued at upwards of $1,000 from the Jos. Castelberg Jewelry Co., by whom he was employed, Horace Patterson, aged 29 years, a salesman of the firm since January last, is in jail here awaiting trial. Patterson has a wife living in New Orleans. He has purloined jewelry for months past and pawned it.

Wholesale jewelers of this city are elated at the success of the various buyers' excursions which have been arriving from all points during the past two weeks. Rural retailers have been afforded by these excursions to the Atlantic coast exceptional

opportunities to become acquainted with the Sansom St. tradesmen.

A watch belonging to the Bailey, Banks & Biddle Co., and loaned to a customer while the latter's was being repaired led to the arrest recently of a burglar who had robbed a Haverford, Pa., home. The burglar had attempted to pawn the timepiece when he was apprehended.

The return from Europe of Henry Stevens, manager and buyer of Strawbridge & Clothier's jewelry department, afforded an occasion, last week, for the employes of the department to honor their chief with a present. Speeches felicitating him upon his bon voyage were made and appropriately responded to by Mr. Stevens.

## Rochester.

TRADE CONDITIONS

Rochester jewelers say that business was never so good in July as it was this year. This was due, they observed, to the unusual lateness of the Spring selling season, and to the numerous weddings which took place during the month and to the very favorable weather. A few dealers, as is their usual custom, commenced a Summer sale, but otherwise local merchants are receiving regular prices. The jobbers are busy getting their stock in shape and getting their men ready for the road.

All efforts to locate or gain a clue to the thief or thieves who robbed the show cases of Isidore Davis have failed, and it is improbable that any arrests will ever be made in the matter.

Judgments by default were taken last week in Municipal Court by D. I. Danks against Robert D. Simpson for $12.90, and by M. J. Lindsay against George W. Lawson for $10.90.

Folner & Swayne, a New York optical and camera firm, will, after August 15, occupy the lower part of the building at 12 Caledonia Ave., from which the Van Bergh Silver Plate Co. will move to its factory on Elizabeth St.

One of the first large consignments of diamonds billed through the local custom house was received a short time ago from Amsterdam, via New York, the lot being delivered to a Rochester jeweler. Inspection was made of the stones by the officials and their value was placed at $30,000, a duty of $3,000 being imposed and collected before delivery.

The seventh annual reunion of the Burritt family was held at the Burritt homestead at Burritt's Corners last Thursday. In all 225 members of the family from all parts of the country attended. The arrangements were in the hands of S. D. Burritt, who donated the prizes for the sports and otherwise helped to make the family gathering a big success. S. D. Burritt is the only jeweler in the family.

Frank Dowling, Northumberland, Pa., has advertised his jewelry and real estate business for sale.

ORIENTAL PEARLS

## Pittsburg.

TRADE CONDITIONS.

Trade conditions generally are eminently satisfactory to jewelers in the Pittsburg district. During the past few weeks the number of sales has been, for the most part, larger than during the same time last year. At all of the local jewelry houses it was said that the business was getting along unusually well for this time of the year.

John T. Reger, a Carson St. jeweler, has sued John Lehner for $1,000 damages. Lehner occupies the floor above his store, and Reger avers, allowed water to run through the plaintiff's apartments.

This is the season for vacations, and many of the heads of local jewelry houses are enjoying themselves at Summer resorts. Conneaut Lake gets most of those who go away for a week or more, and many take flying trips to Atlantic City.

A sign in the windows of the Prosser Optical Co., 122 Sixth St., shows that the stock of that company is to be sold out at sheriff's sale. The Prosser Optical Co. had well-furnished rooms, and recently these were refitted at considerable expense. The place was a rather large one. Amicable ejection proceedings have begun in Common Pleas Court No. 3 by W. B. Irish against this company.

The second distribution of funds in the bankruptcy proceedings against James W. Best, formerly the proprietor of a jewelry store at 618 Smithfield St., this city, is due and Receiver Justus Mulert will send out the moneys as soon as he receives the order from United States District Court. This distribution will amount to 7 per cent. of the total amounts of the claims. On December 29, 1903, the W. J. Johnston Co. filed a petition in involuntary bankruptcy against Best, alleging a debt of $2,991.50. On the day previous Best is alleged to have deserted his place of business.

In the case of L. De Roy & Co., Pittsburg, Pa., it is understood that the Jewelers Association and Board of Trade, New York, has obtained an admission of insolvency from Levi De Roy. It will be remembered that when the Board began proceedings in bankruptcy the charges which it made were denied by the defendant company. Levi De Roy's daughter, Hannah De Roy, who was supposed to be a partner, denies any responsibility for the debts. It is now expected that the Board will have no further difficulty in obtaining the appointment of a Referee, so that an examination

AMSTERDAM, 2 Tulp Straat.

LONDON, 40 Holborn Viaduct.

CUTTING WORKS, Cor. Union & Nevins Sts., Brooklyn.

may proceed. The petition in bankruptcy was filed early in April, as reported in THE CIRCULAR-WEEKLY of April 12. It was charged that assets to the value of $18,000 had been concealed.

Five per cent. is the amount of the first dividend declared by the trustee in bankruptcy of Harris & Papier, late of this city. It is probable that another dividend of the same amount will be declared in a few months.

After a spirited chase of one year, Harry De Caine, a young man who formerly lived in Allegheny, was arrested at Middletown, Pa., by Pittsburg detectives, and now is in the Allegheny county jail on a charge of embezzlement preferred by his former employer, Louis M. Smit, 227 Fifth Ave. De Caine formerly was employed as a collector and salesman by Mr Smit. Over a year ago his employer discovered that some person was taking money and suspected De Caine, whom he charged with embezzlement. De Caine left the city suddenly, and the matter was placed in the hands of the local detective bureau. The fugitive was traced to Cleveland, then to Cincinnati, and later to Lancaster, Pa., and Atlantic City, then back to Lancaster again, and later to Washington, D. C., finally getting him at Middletown.

A shower of valuable silverware fell upon a Sewickley resident last week, and this may serve as a clue to the robbery of some jewelry house, it is thought. H. G. Darsie, of that suburb of Pittsburg, was walking along the Ft. Wayne Railroad tracks, and just as the fast mail passed him there was a shower of silverware, consisting of a sterling silver cake dish, worth $30, eight sterling silver plates worth $100, one sterling silver plate worth $10, three sterling silver candlesticks worth $15, nine silver plates worth $90, one silver candlestick worth $10, a silver sugar bowl worth $12 and a silver coffee pot worth $25. The box came with the shower, and was marked "R. W. & Sons Mfg. Co., Wabash Ave., Chicago." It was sent by R. Wallace & Sons Mfg. Co., Wallingford, Conn. Mr. Darsie turned the silverware over to the Edgeworth police, who notified the railroad detectives. Mr. Darsie insists that the box did not fall from the train accidentally, and it is thought here that it was thrown off by some one who expected that confederates along the track would get it.

On the complaint of a Food City (Mich.) jeweler named Strohm, Joseph Crossman, Kalamazoo, Mich., teamster, was arrested at Battle Creek on the charge of failing to pay the balance due on a ring purchased on instalments. It is alleged that after paying $33 on a $75 ring he pawned the article and skipped.

## OUR TRAVELING REPRESENTATIVES

**Travelers may consider these columns open for the publication of any items of interest regarding themselves or their confreres.**

John S. Jepson, of Riker Bros., is in San Francisco, Cal., this week.

Arthur Elston is on the road for Rothschild & Hadenfeldt, San Francisco, Cal., making the California, Nevada and New Mexico territory.

W. J. Brown, representing the Holmes & Edwards Silver Co. and the E. Ingraham Co., Bristol, Conn., is at present in Los Angeles, Cal.

P. H. Menlove has severed his connection as traveler with the Canadian Jewelry Co., of Winnipeg, and has gone back to the dry goods trade.

James Harger, with Bippart, Griscom & Osborn, Newark, N. J., fell from a train in the southern part of California, recently, and had the misfortune to lose his grip full of valuables.

Jerry Bernheim, of the Woodside Sterling Co., New York, is calling on the San Francisco trade.

M. H. Pritchard, an Indianapolis, Ind., salesman, was married, last week, to Miss Rosetta Fuller, also of that city, in the Home Lawn Mineral Springs Sanitorium, where he is confined by rheumatism.

The following traveling representatives called on the trade in Omaha, Nebr., last week: Julius S. Mayer, Mauser Mfg. Co.; Mr. Townsend, Kreis & Hubbard; Mr. Benstien, Tuthill Cut Glass Co.; D. N. Gordman, S. S. Fretz Mfg. Co.; E. B. Frank, Pairpoint Corporation; Albert H. Brust, D. Gruen, Sons & Co.

The following traveling representatives were in St. Louis, Mo., last week: S. H. Lesser, Anchor Silver Plate Co.; Harry B. Farquharson; A. W. Levy, Byron L. Strasburger & Co.; Thomas F. Kennedy, Adolphe Schwob; W. A. Moore, F. W. Gesswein Co.; W. F. Heft, Maple City Glass Co.; Mr. Maire, D. Gruen, Sons & Co.

In Louisville, Ky., last week, were: S. A. Goldsmith, Adolph Goldsmith & Son; Abel King, I. Emrich & Co.; Mr. Levy, Bristol Mfg. Co.; Leo Heilbron, Leo Heilbron & Bro.; Mr. Cohn, Jules Racine & Co.; J. R. Payne, Meriden Cutlery Co.; Eugene C. Delmar, Ansonia Clock Co.; R. P. Coughlin, Wm. L. Gilbert Clock Co.

The following traveling representatives, recently, visited Lancaster, Pa.: Walter J. Mays, McIntyre, Magee & Brown; S. Roggenburger, H. B. Sommer Co.; J. S. Townsley, Cross & Beguelin; E. J. Kerns, Simeon L. & George H. Rogers Co.; Joseph D. Varley, Allsopp Bros.; C. B. Smith, M. B. Bryant & Co.; A. B. Shattuck, Joseph Nelson & Co.

Being fined in police court at Indianapolis, Ind.,

A CUTTER AT WORK

**Pearls, Opals, Montana Sapphires, Amethysts, Garnets.**

From Europe still comes news of price-advances. Whatever the goods: small Pearls or large Pearls, Montanas or Amethysts, Opals or Garnets, the story is the same, "Rough very scarce, prices higher." When you are in the market for these goods, *remember we are headquarters.*

**Importers of Precious and Imitation Stones.**

for drunkenness, Gustave Joseph, a traveling salesman, appealed his case to the Criminal Court, where he was acquitted. Joseph has now sued the city for false arrest and imprisonment and preferred charges with the Board of Public Safety against the policeman that arrested him, alleging abuse and inhuman treatment.

Traveling representatives in Columbus, O., during the past week, were: George R. Sutherland, Jos. Fahys & Co.; L. A. Burt, R. Wallace & Sons Mfg. Co.; Meyer Lehman, Ludwig Lehman; J. T. Griffith, Jr., Carter, Howe & Co.; Wm. Seckels; D. Skutch, New Haven Clock Co.; F. A. Perry, John Russell Cutlery Co.; Albert M. Stein, Goodfriend Bros.; F. C. Somes, S. O. Bigney & Co.; A. F. G. Whitford, Bradley & Hubbard Mfg. Co.

Representatives of wholesale houses who visited the Pittsburg, Pa., trade, last week, included: F. C. Winship, H. C. Fry Glass Co.; E. A. Reed, Reed & Barton; Arthur Bradshaw, Meriden Britannia Co.; J. T. Griffith, Jr., Carter, Howe & Co.; A. Herr, Bawo & Dotter; Harry C. Adler, Charles Adler's Sons; G. Cheever Hudson, G. C. Hudson & Co.; Ernest A. Rose, Weigle & Rose; D. Skutch, New Haven Clock Co.; William J. McQuillin, Mount & Woodhull.

A. Pollack is covering the Pacific Coast and adjacent territory for the Anchor Silver Plate Co., St. Paul, Minn., and has his headquarters at 738 Mission St., San Francisco, Cal. R. E. Williams, who has represented this company for years, is now seeing his friends in his territory, which comprises Michigan, Indiana, Ohio and Kentucky. Julius J. Woolf is representing the same house in the southwest, with headquarters in Chicago at the Palmer House, and Guy Shroyer is looking after the territory adjacent to St. Paul.

Representatives of wholesale firms who visited the Cincinnati, O., trade, during the past week, included: Arthur Bradshaw, International Silver Co.; F. E. Tiffany, F. H. Sadler & Co.; E. A. Reed, Reed & Barton; William J. McQuillin, Mount & Woodhull; C. L. Krugler, Mandeville, Carrow & Crane; J. M. Morrow, American Watch Case Co.; George L. Paine, G. L. Paine Co.; Mr. Levi, Byron L. Strasburger & Co.; W. S. Dudley, Rogers, Smith & Co.; Geo. R. Sutherland, Joseph Fahys & Co.; H. F. Tourtellot, Waite, Thresher Co.; S. Arnstein, Arnstein Bros. & Co.

## Omaha.

A. Mandelberg has returned from a trip to California.

George Frater, Louisville, Ky., was in the city last week buying goods.

Geo. W. Ryan, of the Mawhinney & Ryan Co., has gone to Chicago on business.

Fred Brodegaard took a short trip to Millard, Nebr., last week, and while there joined the Plattdeutscher Verein.

T. L. Combs, of T. L. Combs & Co., has received a letter from E. O. Furen, a member of the firm, at present in Norway. The writer says that he is having a splendid time, and is in the best of health.

Henry Ott, George Day and John Moore were arrested last week for selling jewelry at prices which aroused suspicion. When taken to the police station the prisoners were searched, and a quantity of cheap rings and watches were found, of the kind designated by the police as "phony."

The following jewelry firms of Omaha signed an agreement last week to close their stores every evening at 5 o'clock during August: Mawhinney & Ryan Co., S. W. Lindsay, T. L. Combs & Co., Fred Brodegaard & Co., Henry Copley, Brown & Borsheim, Albert Edholm and Jos. P. Frenzer.

The Oklahoma sheriff who is after Frank Shercliff, the Pollack diamond robber, went to Des Moines to confer with Gov. Cummins, with a view to Shercliff's extradition to Oklahoma, where he is wanted on several charges. Gov. Cummins refused to grant the necessary papers on the ground of some informality in the requisition papers. This formality has since been remedied, and there is a strong likelihood that Shercliff will have to go to Oklahoma to stand trial.

Harry De Lacey, the alleged representative of the "United States Investment & Brokerage Co.," and who was arrested on his bridal trip at the Grand Hotel in Council Bluffs, Ia., a few weeks ago, had a preliminary hearing in police court last Friday on the charges of forgery and obtaining goods under false pretenses. Both complaints were made by Mrs. A. Mandelberg, of the Mandelberg Jewelry Co. Police Judge Berka bound the prisoner over to the district court in the sum of $900 on each charge. Mrs. Mandelberg was the principal witness. She related her dealings with De Lacey on the evening of July 10, and said the value of the watch, chain, locket, pin and cuff buttons, which he obtained in exchange for worthless check, was $200. The watch alone is valued at $140. W. B. Laughlin, local superintendent of the Pinkerton agency, says that the New York office has identified De Lacey's handwriting as similar to that of Thomas Wilson, who served six years in the New Jersey State penitentiary for forgery, attempting to break jail and attempting to shoot an officer.

Reports from Coffeyville, Kans., recently, tell of considerable excitement in that vicinity over pearls found in the mussels of the Verdigris River. A number of pearls have been taken out, and there are crowds at all times participating in the search for these gems.

**OUR MR. RICHARD FRIEDLANDER has just returned from Europe after having made heavy purchases of diamonds.**

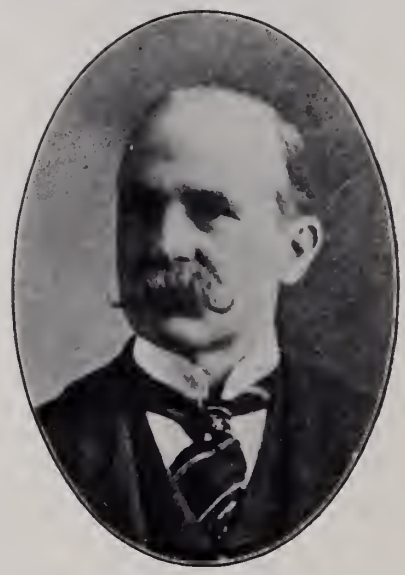
## Retail Jewelers' Convention

### Members of American Retail Jewelers' Association Meet at Detroit and Elect Officers.

DETROIT, Mich., July 28.—The second annual convention of the American Retail Jewelers' Association, comprising members in nine different states, principally the Middlewest, was held here last Tuesday, with a surprisingly large attendance. Out of an approximate membership of 300, about 200 were present at the meetings and this does not include 50 ladies, who were in the party. It was undoubtedly the most successful of all the meetings yet held and is an apt illustration of the growth of the association, as last year the attendance was only 60.

Aside from matters appertaining directly to the retail trade, the most important action taken by the association concerns the proposed legislation relating to the stamping of gold and silver merchandise handled by jewelers. A resolution prepared by a committee consisting of W. F. King, A. B. Hull, G. J. Daum and O. H. Lutz, and adopted without any opposition declares that the convention is in favor of a United States law or stamping act for all gold and silver goods.



The two sessions were held, one in the morning at the Hotel Normandie and one at a Canadian resort known as Wolf's, where over 200 of the delegates went on the steamer *Mineral City* in the afternoon. Before landing at Wolf's for a fish and chicken supper, the members were taken for a beautiful ride over Lake St. Clair.

The following amendments to the constitution were adopted:

Amendment to Article 4, section 4—"The president shall appoint an advisory board subject to the approval of the executive committee. This advisory board shall be made up of one member from each State represented in the membership of the association but which is not already represented on the executive committee."

Amendment to Article 4, which shall be known as section 9—"The duty of the advisory board shall be to look after the affairs of the association in their several states."

President Max Jennings, of St. Clair, has not yet announced the members of the advisory board.

MAX JENNINGS, PRESIDENT.

In his address of welcome Mr. Jennings outlined the object of the association in the following language: "As the trade has long recognized the necessity of co-operative work for protection against trade abuses, it is the purpose of the American Retail Jewelers Association to furnish such protection as far as possible, and be the means through which all may work together to bring about conditions more favorable to the retail jeweler."

The visiting jewelers were entertained by the local jobbers and retailers and the committee that made the arrangements consisted of: F. A. Drexel, Kunz & Rogers, Mathauer & Koester, Noack & Gorenffo, the E. H. Pudrith Co., and Horace W. Steere.

The following officers were elected: President, Max Jennings, St. Clair, Mich.; vice-president, A. B. Hull, Belding, Mich.; secretary, Edward J. Roehm, Detroit; treasurer, John N. Jantz, Detroit; member of the executive committee, E. E. Thomas, Detroit.

The next convention will also be held at Detroit, about this time next year, when two days instead of one will be devoted to business and pleasure.

Among those present from out-of-town were: G. W. Stolz, Saginaw, Mich.; Harry Downs, Bellevue, O.; G. L. Gunther, Bellevue, O.; W. C. Davis, Elkhart, Ind.; O. H. Lutz, Ann Arbor, Mich.; G. J. Daum, Augusta, Ky.; Eugene E. Wagner, Monroe, Mich.; V. C. Morse, Ithaca, Mich.; W. W. Bridges, Marine City, Mich.; W. F. King, Adrian, Mich.; C. G. Draper, Plymouth, Mich.; Arthur Christen, Toledo, O.; S. D. Pond, Allegan, Mich.; E. J. Pettee, Tecumseh, Mich.; Walter Mason, Mt. Clemens, Mich.; Fred L. Howell, Windsor, Ont.; O. F. Kleckner, Milan, Mich.

### Death of Duane H. Church.

As THE CIRCULAR-WEEKLY goes to press news is received of the death of Duane H. Church, of the American Waltham Watch Co., one of the most prominent men connected with watchmaking in this country.

Mr. Church, who was rated as one of the great captains of industry of this country, had been connected with the American Waltham Watch Co. for about 30 yeaers, and was the master mechanician of the concern. He passed away about noon yesday, after an illness of about a week.

A full obitnary of Mr. Church will appear in the next issue of THE CIRCULAR-WEEKLY.

The J. H. Arthur Co., Providence, R. I., will discontinue business.

MEMBERS OF THE AMERICAN RETAIL JEWELERS' ASSOCIATION AND THEIR WIVES AT THE SECOND ANNUAL CONVENTION IN DETROIT, MICH.

### Arrest at Columbus, O., of Man Believed to Have Operated Clever Check Swindle in Other Cities.

COLUMBUS, O., July 31.—Charles Glick, who is said to be the man wanted at Washington, D. C., and Syracuse, N. Y., for obtaining diamond rings, for which he paid with worthless checks, was arrested here Friday while purchasing an expensive diamond ring in Goodman Bros.' store, State and High Sts. Glick introduced himself Wednesday, gave his card, showing he had started in the instalment business, and bought $50 worth of goods, promising to buy much more. He paid his bill with a check.

Edward J. Goodman, who was suspicious because the man made such an effort to gain his confidence, called up the bank and found that the customer had deposited $60 just before going to the jewelry store. The bank had been warned by circular of a man who started a game in this fashion, and Mr. Goodman therefore notified the police. When Glick came in again Friday detectives were telephoned for and arrested him.

The game of the man wanted in Washington and Syracuse was to win confidence by giving good checks for small purchases and then make a large purchase after banking hours, also paying by check. In the morning when it was found the check was no good the man had gone.

Lawyers for Glick endeavored to have a writ of habeas corpus issued Saturday, but the court refused, and Glick was turned over to the United States courts. He was arraigned before Commissioner Johnson and his hearing was continued Monday, when he was held in $1,000 bail, pending extradition proceedings, begun by the Washington authorities.

### Death of Norman S. Boardman.

EAST HADDAM, Conn., July 31.—Norman S Boardman, senior member of the firm of Luther Boardman & Son, silver plated ware manufacturers, died recently at his home of heart disease, from which he had suffered for several months. He was one of the most prominent men in his town, where his death is sincerely mourned, and he was well known in the trade.

Mr. Boardman was born Aug. 5, 1840, and was the son of Luther and Mrs. Lydia Ann (Frary) Boardman. His father was the founder of the silver plate works, and in 1864 admitted his son to partnership. For several years Mr. Boardman had been a director of the National Bank of New England, and he was active in other local business enterprises. He was a member of a number of fraternities, belonging to Columbia Lodge 26, F. and A. M., Middlesex Lodge No. 3, I. O. O. F., and other bodies.

An interesting display of navy relics of the United States, Japanese and Russian navies was used by Herman M. Leffert, Council Bluffs, Ia., recently to attract attention to the windows. Samples of American and Russian shells, smokeless powder, pennants and photographs of the leading battleships were included in the collection.

### Meeting of the Creditors of A. Meyers, Buffalo, N. Y., at New York.

Creditors of A. Meyers, retail jeweler, at 177 Main St., Buffalo, N. Y., met last Friday at the office of Cohen & Cohen, 71 Broadway, New York, to consider an offer of a compromise. The proposition of the jeweler was to pay 10 per cent. in cash and 25 per cent. in notes at two, four and six months. According to a statement made in his behalf, his assets amount to $6,000 or $7,000, while his liabilities are $15,000. Several creditors who were present seemed inclined to accept the offer. As one or two of the larger creditors were not at the meeting little could be done, however, toward reaching a definite settlement, and further developments will probably depend largely on the course to be pursued by the creditors who did not go to the meeting.

Mr. Meyers began business in Buffalo in 1897. Two years later a judgment for $3,000 was entered against him and thereafter he was adjudicated a bankrupt, the estate paying a dividend of 5½ per cent. He received his discharge in bankruptcy, and in 1901 he took back the store which has since been conducted under his own name.

Theo. L. Rogg, now at 418 Walnut St., Des Moines, Ia., recently closed a lease of the store at 613 Walnut St., where he is making extensive improvements and alterations prior to his removal thereto. The business was established in 1856 by Joseph Rogg, and came into the hands of the present proprietor 20 years later.

**TWO SELECTIONS FROM OUR EXTREMELY CHOICE AND UP-TO-DATE LINE.**

We offer a buyer an assortment to select from which is larger and more varied than that offered by any other house in our line.

### Detroit Pawnbroker Robbed and Murdered in His Store While Throngs Passed by.

DETROIT, Mich., July 29.—Joseph Moyer, who for many years conducted a pawn shop and jewelry store at 42 Monroe Ave., was murdered yesterday by two unknown men. They took about $1,000 in cash from the safe, after dragging Moyer's body to the rear of the store and taking the keys of the safe from the man's pocket. The criminals then looted the show cases and, according to Morton Silliman, Moyer's clerk, took several thousand dollars worth of jewelry and diamonds, selecting only the finest articles in the stock.

No one saw the murderers, although thousands were passing the store at the time, on their way home from work. A great crowd gathered in front of Moyer's store, blocking traffic, as soon as the deed was discovered. The police say that they have as yet no clew to the criminals.

The murder was discovered by Charles Latchson, a clerk in Weiss' pawnshop at 46 Monroe Ave. He was sitting in a chair near the curb and observed that Moyer's store was dark, although the lights were usually burning in the windows at that hour. He called L. Freedman, whose store is between the two pawnshops, and the latter noticed that all the stock was out of the windows. They tried the door, which was not locked, but all was dark and silent.

Then the police were called and the pawnbroker was discovered, gasping his last breath. He died before a doctor arrived, having been beaten in a most brutal manner with blunt weapons.

It is believed that two or three men participated in the crime.

Morton Silliman, the clerk, left the store a little before 6 o'clock in order to go to his supper and the crime was committed about half an hour afterward.

Moyer was 54 years of age, and leaves a widow and family. His wife was prostrated by the terrible event.

### Flames Destroy Store of Clifford V. Bates at Huron, S. D.

HURON, S. D., July 28.—A fire Thursday morning completely ruined the stock and fixtures in the jewelry store of Clifford V. Bates. The flames were discovered by a night watchman, who turned in an alarm about 2 A. M., and the fire department quickly arrived on the scene. Damage to the amount of $2,000 was done to Mr. Bates' stock and store. The loss is partially covered by $1,500 in insurance.

The fire started on the floor between two large jewelry cabinets on the north side of the building, ran to the ceiling and rapidly spread. The only stock that was left was cut glass and silver in two show cases, the rest being badly damaged by heat, smoke and water.

### Death by Drowning of Simon C. Shuster, Latrobe, Pa.

LATROBE, Pa., July 26.—Simon C. Shuster, a prominent jeweler of this section, met with an untimely death last night by drowning. Shuster and several acquaintances were in camp at Darlington, and the party went in bathing. Shuster waded into deep water but was unable to swim and suddenly disappearing was not seen again. Although attempts were made to recover the body, they were not successful.

Mr. Shuster was only 31 years old, but was well-known throughout this section. He started in the jewelry business in 1894 and three years later sold out to his father, for whom he had since acted as agent. He is survived by a widow who is prostrated at his death.

### Death of Ancil McCall.

UTICA, N. Y., July 31.—Ancil McCall, who was formerly engaged in the optical business in this city, died last Thursday at the General Hospital here, after two weeks' illness. Mr. McCall was born in Walton, this State, 48 years ago, and as a young man moved to Johnstown, where he learned the optical business. Then he came to Utica and conducted a store on Genesee St. He sold out his business here 11 years ago to M. E. & A. M. Kenney.

Mr. McCall went west where he settled in Spokane, Wash., returning to this city several months ago. He is survived by a widow and one child.

### Crooks Who Swindled Jewelers with Bogus Money Orders Now in Jail.

PITTSBURG, Pa., July 28.—Three prisoners removed to Erie upon request of United States Attorney J. W. Dunkle, on charges made by the United States Government, have been sentenced there by the Federal court to terms of imprisonment ranging from five years to one year. The prisoners

JOHN WILSON, JR., ALIAS JOHN REED.

are John Wilson, Jr., alias John M. Reed; Boyd C. Van Fleet, alias John Whitney, and James O'Connor, alias James Stewart. The men as already told in the CIRCULAR-WEEKLY, were arrested at the Duquesne Hotel in Pittsburg several weeks ago, charged with raising and passing United States postal money orders. Local jewelry houses lost heavily by them.

These men have made admissions that have allowed their work to be traced all over the United States, and a large proportion of their operations was swindling jewelers. They must have realized over $15,000 during the last two years, and the figures may be much bigger.

Wilson was sentenced to five years' imprisonment, Van Fleet to two and one-half years, and O'Connor to one year.

B. C. VAN FLEET, ALIAS JOHN WHITNEY.

## Trans-Atlantic Voyagers.

TO EUROPE.

Leo Goldsmith, New York, sailed last Thursday on *La Lorraine*.

Gen. Geo. H. Ford, of the Ford Co., New Haven, Conn., will sail in a few days.

Major F. R. Appleton, of Robbins & Appleton, New York, sailed to-day on the *Baltic*.

Oscar Keck, of the Keck Mfg. Co., Cincinnati, O., sailed yesterday on the *Kronprinz Wilhelm*.

C. J. Monson, Jr., of C. J. Monson, Jr., & Co., New Haven, Conn., sailed last Friday on the *Zeeland*.

Paul Durand, New York, agent of Cristalleries de Baccarat, sailed last Thursday on *La Lorraine*.

FROM EUROPE.

Henry Sheff, of Sheff Bros., Wheeling, W. Va., returned last week on the *Zeeland*.

L. M. Sigler, of the Sigler Bros. Co., Cleveland, O., has returned from Europe.

Ludwig Nissen, of Ludwig Nissen & Co., New York, returned Sunday on the *Bluecher*.

Syl. Mayers, of the Jos. Frankel's Sons Co., New York, arrived Saturday on the *Kaiser Wilhelm der Grosse*.

Ferdinand Meyer, of Chas. Meyer & Co., Indianapolis, Ind., will return early this month. A. L. Zoller, of the same firm, returned lately.

Arriving last week on the *Kronprinz Wilhelm*, besides those previously mentioned, were H. H. Jacobson, of Jacobson Bros., New York; V. Hirsch, of Hirsch & Hyman, New York; Alexander Feldenheimer, of the California Jewelry Co., San Francisco, Cal.

### Midsummer Meeting of the Retail Jewelers' Association of Minnesota.

MINNEAPOLIS, July 29.—The midsummer meeting of the Retail Jewelers' Association, of Minnesota, was held here last week. President A. E. Paegel presided. The field of the association was broadened to include the jewelers of North and South Dakota and those States, it is expected, will be represented at the regular meeting which will be held in St. Paul next February. There were 18 applications for membership, all being accepted.

The session was devoted largely to a consideration of plans for extending the work of the association, and improvements along the old lines. Objection is made to manufacturers and jobbers who sell to the peddling trade and to consumers. The association has received explanations from a number of firms who do not wish to be listed as going outside the regular field, and yet have been charged with doing so.

An important decision handed down by Judge Riner, at Colorado Springs, recently sustained the claim of Ernest F. Bennett to the exclusive right of manufacturing and selling jewelry in imitation of gold nuggets and gold quartz. The suit was against C. L. Van Wert, and was based on letters patent granted to Bennett by the United States. The court held the patent valid, declared Van Wort had infringed and gave the plaintiff damages as well as a perpetual injunction restraining the defendant from further infringement.

## News Gleanings.

G. W. Bacon, Cannon Falls, Minn., has sold out.

Will H. O'Connell, Audubon, Ia., has discontinued business.

Geo. H. Pruitt, Iuka, Miss., has ceased business operations.

Wm. W. Berry, Scranton, Pa., has discontinued business.

George W. Hayes, Lewistown, Pa., has gone out of the jewelry trade.

G. G. Gross, Bangor, Mich., has been succeeded by C. Mellinger.

W. E. Wilson, Navasota, Tex., has filed a petition in bankruptcy.

C. G. Reim, New Ulm, Minn., has decided to move to Osceola, Wis.

John J. Osborn, formerly of Clarksville, Tenn., is now at Mayfield, Conn.

John A. Owen will shortly move from Bonham, Tex., to Tulsa, Ind. Ter.

Charles E. Simanton, St. Johnsbury, Vt., has been succeeded by A. S. Haskins.

G. B. Lord has purchased the business of Howard Thomas, Independence, Ia.

A. Guibert, Waterville, Wash., recently purchased the store of A. R. Cooper.

D. Sheldon Thomen, Shoals, Ind., is now located in a new territory in Sidell, Ill.

C. F. Steiner has sold out his business in Newman Grove, Nebr., to H. C. Steiner.

Eldo C. Hamilton, Kirklin, Ind., moved, recently, to Pittsboro, in the same State.

S. B. Holmes, of S. B. Holmes & Son, Eminence, Ky., died, recently, at that place.

I. M. Blitz, Kansas Ave., Topeka, Kans., recently commenced an auction sale of his stock.

Considerable anxiety is felt for E. P. Griffoz, a retail jeweler of Portland, Ore., who mysteriously disappeared several weeks ago.

A thief recently entered the store of R. T. Chapman, Atlantic City, N. J., but was frightened away before securing any valuables.

A son of H. C. Morrison, Mt. Pleasant, Pa., recently was severely injured about the head by falling into a sewer ditch at that place.

C. L. Dickerson was a recent visitor to Parsons, Kans., where he was seeking a desirable location for a jewelry store.

S. T. Gilbert, who has been in the jewelry trade for the past 23 years, has opened a new store at 1811½ Johnson Ave., Parsons, Kans.

L. E. Isbell was a recent visitor in Davenport, Ia., where he was seeking desirable quarters in which to open an optical establishment.

The firm of Hadley & Maryott, Jamesburg, N. J., has dissolved partnership, and the business will now be conducted by C. T. Hadley.

Henry Van Cleave, Russellville, Ind., has moved his stock to Ladoga, in the same State, where he has rented quarters in the K. of P. building.

R. C. Green's Sons, Pottsville, Pa., have dissolved partnership, Jas. S. Green having retired. Business will be continued under the firm style of R. C. Green's Son.

L. G. Coolidge, West Derry, N. H., is selling out his stock in Young's Block, and will discontinue business. Mr. Coolidge will move to some point in Massachusetts.

There is considerable comment at Wilkesbarre, Pa., over the disappearance of Theo. Little, a jeweler in the East End. He has not been seen since July 5. On that day Little left home, saying that he was going to New York to buy goods. Mrs. Little is heart-broken over the disappearance of her husband and is on the verge of collapse. Little is 61 years old and for 32 years he and his wife have resided in this section.

## Denver.

Edw. Macke, widely known in the jewelry houses as an expert workman, died last week in the County Hospital. The funeral took place at Baltimore, Ind., his old home, where C. F. Erhardt, a brother-in-law, is in business. Mr. Macke, who was 28 years of age, came here two years ago in the hope of improving his health.

M. A. Saly, pawnbroker, on Larimer St., last week obtained a warrant for the arrest of Chas. F. Small on the charge of assault. According to the pawnbroker's statement, the defendant, who was formerly a tramway motorman, beat him in a brutal manner. It is said that Small was angered because he could not get as much money as he desired on an article he wished to pledge with Saly.

THE District Court of Appeals has just sustained a comprehensive decision of the Commissioner of Patents, which is of the utmost importance to trade-mark owners. It is the first important decision under the new trade-mark law, and holds, in effect, that a large class of applications under the old law of 1881—which have been assumed to be still pending in the Patent Office, although adversely acted upon—cannot be further considered under the new law, but must be treated as finally rejected under the old statute. The court's decision further holds they can be revived only by the filing of new applications under the present law. At the Patent Office it was stated that "applicants whose cases come within the scope of this decision will be put to a considerable expense, as they will be obliged to begin proceedings afresh, and again pay all fees provided by the statute. The rights of such trade-mark owners, however, are not prejudiced by the decision, but, on the contrary, it is probable that in many cases trade-marks rejected under the old law will be found to be registrable under the new statute."

**Two Notable and Important Conventions.**

THE week just past has been notable for the two important conventions to which jewelers from all over the country gave their time and attention. The report of the first, that of the eighth annual convention of the American Association of Opticians, held at Minneapolis, Minn., July 24-27, inclusive, which appears in another column, will be read with deep interest by practically all jewelers having optical departments connected with their business, and the papers read at the convention, some of which appear this week and others which will apear in subsequent issues of THE CIRCULAR-WEEKLY, will no doubt do great good to the craft at large and give many hints of importance and value on business and scientific lines that might otherwise never have been brought before the trade at large. Altogether the convention proved interesting, instructive and enjoyable to all who attended, and showed that the national association of the optical trade is an organization of power and influence that has apparently come to stay; also that its opportunities to help and elevate the calling of its members will not be neglected.

The second convention reported this week is that of the American Retail Jewelers' Association, which was held in Detroit, July 25, and was attended by over 200 jewelers, who came from nine different States of the Union. This organization, which is now interstate in its scope and will soon be in a position to be considered almost a national organization of the retail jewelers of the country, has grown rapidly, as is shown by the increase in attendance this year over that of 1904, when but 60 jewelers participated in the deliberations of the body. This year, in addition to the 200 members who attended, about 50 ladies, wives and relatives of the members, were also present. Among the most important acts of the convention was the declaration of the body in favor of a United States law to regulate the stamping of gold and silver goods.

Besides the commercial advantages derived from the two conventions in question, the members were also much benefited by the opportunities afforded for proper relaxation, the development of a fraternal spirit in the craft, due to mutual intercourse, and also by the realization that has come to all as to the identity of their interests with that of their fellow jewelers and opticians, which cannot fail to result in an *esprit de corps* that is most desirable among members of all commercial lines.

## *LETTERS TO THE EDITOR.*

### Advantages of Short Term Sales.

Brooklyn, N. Y., July 27, 1905.

*Editor* THE JEWELERS' CIRCULAR-WEEKLY:

As the Fall season approaches it seems to be the proper time to call attention to the fact that manufacturers and jobbers should devote serious thought to the question of the terms on which their goods are sold. Granting long time on invoices as an inducement to secure orders, is one of the worst practices in any line of business, and is bound to result in depreciation of quality if the price remains unchanged, or an advance in price if the quality continues the same. This is a natural business necessity to counterbalance the tying-up of working capital, and as insurance in a way against bad accounts which long terms are apt to breed. This being the case, it is readily seen that the retail jeweler does not profit by long terms, and such are surely a great menace to the manufacturer and jobber.

Again, if the retail jeweler becomes accustomed to long terms and gets in the habit of thinking that "pay day" is some time away off in the dim future, he grows into the equally bad habit of neglecting his own collections. He gives his customers what he calls "accommodation," or says he has to be lenient with them. This in turn teaches the individual buyer to be careless in his payments, whereas with a proper collection system, diplomatically enforced, the retail jeweler with back-bone, a good stock and right prices could command reasonably prompt payments.

When slow payments have been the rule for a long time, it is difficult to change quickly to the "prompt payment" method, but nevertheless when it would be of great benefit alike to manufacturer, jobber, retailer and consumer, it certainly is worth an effort.

The manufacturer who has the right goods, reasonable prices and fair terms, commands the respect and trade of the progressive retailer, in preference to the manufacturer who has to make the quality of his goods fit the price owing to his voluntarily offering or feeling compelled to give "any old terms."

Yours truly,

A. C. T.

Th annual exhibition of artistic jewelry of Powers & Mayer, 258 Fifth Ave., New York, will close to-morrow evening, Aug. 3. It has been open since July 24, and is now in full swing. The very latest styles of jewelry to be worn this season are on display, and the large number of visitors who have patronized this exhibition is very flattering. New productions have been added daily, and at the close the stock will be divided among the house's representatives on the road and will be shown to the trade by them.

## Last Week's New York Arrivals.

**THE CIRCULAR-WEEKLY each day posts in its office a bulletin of the latest buyers visiting New York, which every member of the trade is cordially invited to copy.**

***For the sum of $10 (payable in advance), a daily list will be mailed or delivered, during the Fall season (ending Dec. 15), to the offices of those desiring this service.***

### Death of W. H. Litchfield.

KEENE, N. H., July 31.—Walter H. Litchfield, aged 30, a jeweler, of this town, was found dead to-day with a bullet hole in his right temple, in the Elks Hall, of which order he was a member.

A revolver was found in his hand, and the medical referee pronounced it a case of suicide.

Richard E. Boemig has purchased the business of Frank K. Kittridge, Woodsville, N. H.

ON MEMORANDUM

CROSS & BEGUELIN

*Importers and Cutters of Diamonds and Precious Stones*

48 Rue de Meslay, PARIS Telephone, 2188 Cortland 17 Maiden Lane, NEW YORK

## New York Notes.

A judgment for $83.18 against the American Watchman's Time Detector Co. was docketed last week in favor of W. B. Howe.

Henry Sheff, of Sheff Bros., Wheeling, W. Va., returned last week on the *Zeeland*, and left New York, Thursday, for Wheeling.

The offices of R., L. & M. Friedlander, 30 Maiden Lane, have recently been enlarged and improved by a force of carpenters and painters.

Solomon Wallenstein, father of Milton H. Wallenstein, of Silbermann, Kohn & Wallenstein, 87 Maiden Lane, died Sunday, at his home, this city.

Friends are extending sincere sympathy to Henry Ditmer, with R., L. & M. Friedlander, whose brother died last Friday, after a lingering illness.

Louis Neumann, a silver and gold plater, at 6 Maiden Lane, has filed a suit for divorce against his wife, Annie L. Neumann, with whom he formerly lived at 685 St. Marks Ave., Brooklyn.

Meyer and Alexander Sabsevitz, of Sabsevitz Bros., 115 E. Broadway, have both moved their residences recently, taking possession of their new houses at 1418 and 1420 Pitkin Ave., Eastern Parkway Boulevard, Brooklyn.

Arnold Wolff, of the Wolff Jewelry Co., arrived in New York several days ago, and is making arrangements to conduct a handsome new retail store at 1365 Broadway, expecting to open the doors about Aug. 20. He has two stores at Denver, Colo.

Barton P. Jenks, formerly of Goodnow & Jenks, Broadway and 17th St., has been elected president and general manager of the Wm. B. Durgin Co. Henry H. Moulton, former manager of the Gorham Mfg. Co.'s leather goods department, has been appointed manager of the New York office of the Wm. B. Durgin Co. Both changes took effect yesterday. The retirement of B. P. Jenks from Goodnow & Jenks will not cause any change in the firm's name.

General Appraiser Sharretts, of the Board of United States General Appraisers, New York, gave a hearing one day last week to Dieckerhoff, Raffloer & Co., New York, relative to the rate of duty on women's hat pins. A number of manufacturing jewelers of New York and Providence gave testimony. The custom of the Treasury Department has been to assess all hat pins under the jewelry clause of the tariff law at 60 per cent. ad valorem. Importers contend that the articles are properly assessable according to the material of chief value contained. Mr. Curie, of Curie, Smith & Maxwell, represented the importers at the hearing. Several of the witnesses testified that only a small percentage of the hat pins sold in the United States are regarded in the trade as jewelry. Most of the pins, it was said, are entirely of a useful nature, with no attempt at ornamentation, and are of cheap metal and not of gold or silver. The Board, after hearing the testimony and arguments, reserved decision. The decision of this case will be a precedent affecting a large number in which protests have been filed.

Four rings, valued at $1,500, were stolen recently from the room of J. H. Proudfoot, a New York diamond broker, in the

Watson House, at Babylon, L. I. There was a slight fire at the hotel and the pocketbook which contained the rings disappeared during the excitement. Last week Timothy Cahill, 15 years old, who was employed as a bell-boy, was arrested on suspicion, and confessed that he had taken the rings. Three of the rings were afterwards found in the rear of the hotel, where the boy had buried them.

Louis Halpert, 51 Maiden Lane, returned this week from a vacation at Sharon Springs, N. Y.

Stein & Hochberger is the name of a new firm which is manufacturing 10 and 14 karat rings at 80 Nassau St.

Amos M. Brush, who died Sunday in Greenwich, Conn., was the father of A. Edgar Brush, with Tiffany & Co.

Richard Friedlander, of R., L. & M. Friedlander, has returned from his annual trip abroad, after making purchases of diamonds.

It was reported last week to the police that burglars had entered the store of Max Rainess, 1324 Third Ave., and had stolen jewelry and watches valued at $500.

Sympathy will be extended by many friends to Lee Reichman, of Jos. H. Fink & Co., whose three-year-old daughter, a bright little girl, died last Wednesday night.

Alexander Feldenheimer, of the California Jewelry Co., San Francisco, arrived in New York last week on the *Kronprinz Wilhelm*, and after remaining here a few days left for home.

E. M. Gattle & Co. have a claim for $600 for jewelry sold to Clarence E. Rood, who lives at the Gregorian Hotel, 42 W. 35th St., and who on Saturday last filed a petition in bankruptcy.

I. Breidenbach, buyer for Adolphe Schwob, is spending a well-earned vacation at Mt. Clemens, Mich. Jules Schwob, representing the same firm in the east, is out on his Fall trip through the manufacturing towns.

H. A. Meyer, with Geo. Borgfeldt & Co., who recently returned from Europe, has extended his vacation for a couple of weeks on this side, and will shortly resume his duties. He will have control of an entire floor in which to display the artistic products that he obtained while abroad.

William H. Glaser has closed his store at 762 Eighth Ave. in order to form a partnership with Harry Sartoris under the name of Sartoris & Co. The new firm will conduct at 1503 Broadway the business recently established by Mr. Sartoris, who formerly had other stores in this city, but had been out of the trade for a year or so.

W. J. Kriel, 21 Maiden Lane, says that although the reports of scarcity of fine white round American pearls have not been at all exaggerated, yet some excellent offerings have recently reached the market. Among the larger pearls found this season, he says, is a pear-shaped gem, weighing 51 grains and with a pink luster fully equal in delicacy and beauty to that of highly prized Oriental pearls. He says that baroques are not as plentiful as they were.

Stamford White, who is engaged in a controversy with the Japanese Consul-General, with reference to a memorial album to be presented to the Emperor of Japan, says that the book will be the largest and most magnificent of its kind ever made and will cost about $40,000; that the cover will be made by Tiffany & Co., using an entire steer's hide, which will be decorated with coats of arms in gold filigree. Consul-General Uchida, in a newspaper statement, says that he does not commend Mr. White's project.

A terrific explosion, caused by a building contractor blasting foundations for new flat houses, Monday afternoon, wrecked the front of Francis Kronenberger's store, 1008 Westchester Ave., in the Bronx. William Engels, the watchmaker, who was at work repairing a timepiece, was struck and knocked senseless by a stone weighing 20 pounds or more. A second stone fell on him, injuring his knees. He was taken in an ambulance to Lebanon Hospital. The show cases and the stock of jewelry were considerably damaged. The blasting was at Westchester and Tinton Aves., and the excessive explosion, which injured several persons and damaged a number of stores and apartments, was heard for a mile or more away in all directions.

New York men who are familiar with the history of the Pollock diamond robbery do not recall that A. M. Shepard, mentioned in a Minneapolis dispatch, took any part in the case. The dispatch says that Mr. Shepard, who represents A. C. Becken, Chicago, is in fear that he will come to harm at the hands of Omaha men because he assisted The Jewelers' Protective Union, New York, in its investigation. According to the dispatch he had sample cases containing jewelry valued at $25,000 in his room at the hotel, and the accidental misplacing of the room key greatly alarmed him. He then explained the circumstances, on account of which he believed that he was in danger. When the key was found he rushed to his room and found the samples safe.

Murray & McAdams, Danville, Ky., have dissolved partnership. Hugh Murray will continue the business on his own account.

## Newark.

Because of illness Max Reiter closed his store on Broadway, at Perth Amboy, N. J., for a couple of days last week.

Ferdinand Brunner, Rutherford, N. J., has bought the Koster property on Park Ave., a short distance from his store.

A Newark detective arrested Edward M. Birss, 18 years old, of 42 E. 28th St., New York, while he was trying to obtain money on a quantity of jewelry in a pawnshop on Academy St., in this city. Investigation showed that the articles belonged to him, and in the First Precinct Court he was discharged at the request of the detective who made the arrest.

John S. Gibson, receiver of the Van Houten Bros. Jewelry Co., has filed an application with Vice-Chancellor Emery for an order under which the assets of the company would be sold to Richard W. Annin for $3,500. When the company was adjudged insolvent the inventory showed a somewhat high appraisement. Some creditors, it is understood, object to the proposed sale.

Thos. J. Bradley's store, 372 Broad St., continues in charge of the receiver in bankruptcy. At the hearing before Edw. G. Adams, the referee, Mrs. Helen McConville testified that she had a bill of sale of the stock, but that it was not given to her for the benefit of the creditors. The document was dated July 7 and was mailed to her by Bradley after he left the city. She said that before going away he had spoken of giving her a bill of sale, and she told him that she did not care for it. He told her that it might come in handy. She said that on a number of occasions she had loaned him money to put into the business, and she had possession of the store after Bradley left the city and before the receiver put in an appearance. The charge that Bradley removed diamonds valued at several thousand dollars she denied. Mrs. McConville's husband formerly owned the business. An effort has been made by the lawyers to effect a settlement between her and the creditors. An order was issued last week by Vice-Chancellor Emery, directing that Bradley be committed to jail for contempt in not paying alimony to his wife.

Emanuel Moss, Owensboro, Ky., has filed a suit against the Mutual Reserve Fund Life Association, of New York, in which he charges that special classification of members has been made in violation of the regulations, by which certain classes have been forced to pay exorbitant premiums. He further alleges that the company has transferred many of its members to a plan of insurance different from that authorized, and seeks to recover $1,524, which he has paid in premiums on a $2,000 policy.

## Optical Notes and Briefs.

Dr. E. A. Dial, Santa Barbara, Cal., has been calling on the optical supply houses in San Francisco, Cal.

G. G. Button, Hollister, Cal., accompanied by his wife, is taking in the sights on the trail at the Portland fair.

After a three months' sojourn in Europe, Frank Morrison, eye specialist, has returned to his home in Indianapolis, Ind.

The annual meeting of the stockholders of the Gundlach-Manhattan Optical Co. will be held at the offices of the company, 753 Clinton Ave., S., Rochester, N. Y., to-morrow noon.

A special meeting of the Rochester Optical Society was held July 25. On account of the absence of a large number of the members from the city the meeting was adjourned without further action being taken on the picnic matter for which the meeting was called. The picnic will most likely be held the first part of this month.

The Texas Optical Association held its third annual meeting in Houston, Monday and Tuesday of last week, July 24 and 25. There was a large attendance and the session was generally interesting to all who participated. The programme and arrangement of entertainments was in the hands of John C. Wyche, as chairman of the committee. The last session was taken up entirely by papers presented by the members and the discussion which followed. It was decided to hold the next annual meeting at Waco. The officers elected by the association were as follows: Dr. West Cathcart, of Galveston, president; J. R. Segall, of El Paso, first vice-president; Mrs. Mollie Armstrong, of Brownsville, second vice-president; B. R. Stocking, of Belton, secretary; Lois E. Allen, of Beaumont, treasurer. An executive committee was elected, as follows: Mr. John Wyche, of Willis; R. Beskow, of Greenville; T. P. Williams, of Fort Worth, and H. F. Cohen, Houston. Membership committee: W. W. Chamberlain, E. E. Taylor and H. F. Cohen.

An interesting event took place at the Bausch & Lomb Optical Co., Rochester, N. Y., last week, when President John J. Bausch, for the first time since his return from Europe, visited the office. When Mr. Bausch entered he found the 35 foremen employed by the company awaiting him. These men represented the 1,300 employes of the corporation, and in behalf of the workers extended a welcome to Mr. Bausch and congratulated him upon his return as well as upon his 75th birthday, which Mr. Bausch celebrated recently. On behalf of the employes they then presented him with a handsome silver coffee service, suitably engraved. William D. Weisharr made the presentation speech and expressed the great regard all the employes had for Mr. Bausch and the pleasnre they felt in seeing him home again. Mr. Bansch was taken by surprise and for a moment was unable to speak. Then in a few words he expressed the pleasure that he felt at again being with his family and at his desk. He heartily thanked the foremen and through them the employes of the company.

## Canada Notes.

G. M. Mayberry, Wetaskiwin, N. W. T., is selling his stock by auction.

E. L. Crawford, Edmonton, N. W. T., has sold out his business to G. F. Watcher.

The assets of J. A. McMillan, Ottawa, who recently assigned, have been sold.

The jewelry firm of W. J. Clark & Co., Fort William, Ont., has dissolved, and the business will be continued by Wm. Bloomfield.

The manufacturers' section of the Toronto Board of Trade, at a recent meeting, made its arrangements for a public dinner to W. K. George, president of the Canadian Manufacturers' Association, in recognition of the manner in which he has promoted the Canadian industrial interests during the trip of the members of the association to England.

An electric clock service is being installed in the western block of the Parliament buildings, Ottawa. Sixty clocks in all are being put in, controlled electrically by a master clock in the Dominion Observatory. There are already systems comprising 50 clocks in the Langevin building and 10 clocks in the eastern block of the Parliament buildings. It is proposed that all the buildings in the group shall be similarly equipped.

In respect to the tax imposed upon commercial travelers representing outside houses by the provinces of British Columbia and Quebec, the Canadian Commercial Travelers' Association is asking the Dominion Government to interfere and compel those two provinces to submit a case to the courts, as the claim is made that the law violates the British-North America Act; also, that it will seriously interfere with interprovincial trade as well as with direct trade with Great Britain. The United States is not mentioned in the protest.

The Dominion Parliament has passed a bill against trading stamps, which comes into force Nov. 1. After that date trading stamps will be prohibited. Bills had been passed prohibiting the stamps by several of the provinces, and municipalities had passed by-laws to the same effect. They had, however, been declared "ultra vires" by the Supreme Court of Canada. The forces against trading stamps, therefore, went to work to get a Dominion act passed. The trading stamp people still consider that they can drive a coach and four through this act.

Arthur Jacques, real estate dealer, Montreal, has laid a complaint against his treatment in the jewelry store of Adolphe Mongeau, St. Lawrence St. The stock has been selling at auction, and Jacques alleges that he was outbid by a man who was a fake bidder. Jacques refused to bid higher and the auctioneer wanted him to take the article at his lower figure. This he declined to do, and after a discussion the autioneer, he says, ordered him to be put out of the store. One of the clerks thereupon, he says, took hold of him so forcibly that he was thrown to the pavement and sustained severe cuts about the head and face.

No trace has yet been found of the $15,000 worth of diamonds stolen from the jewelry store of Johnston Bros., St. Catherine St., Montreal, three weeks ago. Circulars have been sent out to all the police departments in Canada and the United States, giving a full description of the stolen diamonds, but so far none of them have been recovered. Photographs of jewelry thieves who are known to be at large have been sent to Montreal by Boston, New York, Chicago and other cities, but the clerks who were in the store at the time the robbery is supposed to have been committed have been unable to identify them. An advertisement has been published in the papers offering a reward of one-third the value of the diamonds for information that will lead to the arrest and conviction of the thieves, or for the recovery of the stolen diamonds. There is a suspicion that the thieves have gone to Europe.

Speer Bros., Wheeling, W. Va., are making improvements in the interior of their store on Gravel St., and also increasing their stock.

Vol. LI. CHICAGO, WEDNESDAY, AUGUST 2, 1905. No. 1.

## Chicago Notes.

Emil Hamer, of the E. A. Brown Co., St. Paul, Minn., was a visitor here last week

Charles E. Hoefer, of the Woodstock-Hoefer Watch & Jewelry Co., Kansas City, Mo., was here last week.

Jacob Franks, of the Rockford Watch Co., is spending a few weeks at the Royal Palace Hotel, Atlantic City.

Cole & Young, 9130 Commercial Ave., South Chicago, suffered damage by water from a severe rain storm last Friday.

Daniel H. Stark, purchasing agent for the Illinois Watch Co., spent 10 days last week between Chicago, Cleveland and Buffalo.

Charles H. Turner has been placed at the head of the repair department of the National Cash Register factory, Dayton, O.

Charles Marsh, of the timing room of the Elgin National Watch Factory, is the inventor of a self-adjusting movement holder.

Weber Bros., pawnbrokers and jewelers at 151 Clark St., have secured a reduction in their personal assessment of taxes from $10,000 to $6,000.

Charles A. Wheeler, an expert mechanical and electrical engineer, recently arrived from Japan, where he represented the manufacturers of a new torpedo.

The Towle Mfg. Co. and Otto Young & Co. have removed to the Heywood building. Both concerns have installed new fixtures of a thoroughly up-to-date design.

Mrs. Sara E. Wilson, formerly the wife of the late Geo. E. Marshall, is advertising for the return of a small solid gold Waltham watch which she lost last week.

Former employes of the Elgin National Watch Co.'s factory are very much in evidence just now. H. C. Carpenter is sales-manager for the South Bend Watch Co.

Victor B. Strelitz, of Strelitz Bros., left Aug. 5 on the *Northland* for Buffalo, where he will take the train for Atlantic City, remaining there for a two weeks' vacation.

Ed. Massa, of Bauman Massa Jewelry Co., St. Louis, Mo., accompanied by his wife, passed through Chicago last week on their way home from a trip to the lakes of Wisconsin.

Announcement has been made of the engagement of Miss Pauline Wirt to John A. Roche, of Chicago. Miss Wirt is the daughter of Paul E. Wirt, the well known fountain pen manufacturer of Bloomsburg, Pa.

George G. Gubbins, with the Illinois Watch Case Co., is receiving the condolences of his friends on the death of his brother, Henry T. Gubbins, who passed away on July 23d last, aged 51 years.

Bertha Dallas, the 16-year-old daughter of J. A. Dallas, who disappeared from her home three weeks ago, was brought back last week by her father from Sandusky, O., where she had been employed in a restaurant.

In the matter of the suit of Samuel Lyons against the International Silver Co. for damages, the defendant and A. L. Sercomb and C. B. Dungan have made answer through their attorneys, Wilson, Moore & McIlvain, that they are not guilty of the supposed grievances laid to them.

News was received here last week of the arrest at Calgary, N. W. T., of A. S. Gottlieb, auctioneer and lawyer with an office in the Ashland block. Mr. Gottlieb was charged with the theft of some papers by a merchant. Mr. Gottlieb's friends here declare there must have been a mistake made somewhere, as he is a man of high standing and reputation. Mr. Gottlieb is on his way here and will arrive this week.

W. S. Sparrow, western manager of Stern Bros. & Co., has returned from a lengthy trip to the coast, during which he combined business with pleasure. Mr. Sparrow visited the Yellowstone National Park and indulged in some rare fishing off the Santa Catalina Islands, California. A photograph showing him and one of his catches attests to Mr. Sparrow's prowess as a disciple of Izaak Walton. Only Izaak never caught a 220 pound Jew-fish and Mr. Sparrow did.

Just because A. M. Shepard, salesman for A. C. Becken, couldn't find his room key at the West Hotel, Minneapolis, on July 25, a local paper printed a long affair about an attempted robbery of Mr. Shepard's samples, said to be worth $25,000. As a matter of fact Mr. Shepard is on a catalogue trip and has only a few samples with him. As a further piece of remarkable information the newspaper in question stated that Mr. Shepard was formerly a detective and in that capacity caught one of the Pollock diamond robbers at Sioux City.

## Pacific Coast Notes.

Francis Wansky, Eureka, Cal., died on July 18.

The store of C. I. Hoople, Anaheim, Cal., is being remodeled.

Chas. H. Renner, Arcata, Cal., has enlarged and improved his store.

J. Glick, Stockton, Cal., has removed to new quarters at 239 E. Weber Ave.

C. H. Wardman Globe, Ariz., has gone away, and creditors are looking for him.

The new jewelry store of Samuel Dickson, Fortuna, Cal., was opened on July 14.

The Elgin Jewelry Co. has sued P. J. Gilmore, Pasadena, Cal., for an unpaid balance of $180.

H. A. Schell, Tucson, Ariz., will spend several weeks on a hunting trip along the Black River, in Arizona.

Y. H. Bondrean, Hanford, Cal., is spending several weeks with his family at the Hot Springs, near Porterville, Cal.

B. H. Jordon and Mrs. Jordon, Kansas City, spent last week in Southern California and are now on their way north to visit the Lewis and Clark Exposition at Portland, Ore.

Harry F. Smith, Petaluma, Cal., who is the owner of a handsome automobile, is in trouble with the authorities of Marin County, and is charged with running his machine over prohibited roads.

The Mesa Grande Tourmaline & Gem Co., will be shortly organized with a capital stock of $1,000,000, at San Diego, Cal., for the purpose of mining for tourmaline and other gems in the Mesa Grande region of San Diego County.

A. C. Carpenter, Palo Alto, Cal., had a thrilling adventure at a fire which destroyed his residence, July 20. Mr. Carpenter was at his store when the fire started, and he reached home just in time to rescue his wife, who was asleep in the building. Mrs. Carpenter was slightly burned.

A. J. Reinhardt, Lincoln, Ill., is conducting an auction sale prior to enlarging and making extensive improvements in his establishment.

## Minneapolis and St. Paul.

The Anchor Silver Plate Co., St. Paul, is arranging to open a branch in Winnipeg, Can.

Mrs. Rose G. Roebuck, widow of the late Frederick A. Roebuck, Minneapolis, has been appointed special administratrix to continue the jobbing business of the Western Mfg. Co.

M. L. Finkelstein, St. Paul, caused the arrest of Harry Rosen on the charge of stealing two pairs of diamond earrings, valued respectively at $350 and $400. There will be a hearing this week.

At the first meeting held recently by the creditors of C. S. Sutter, St. Paul, who is in bankruptcy, the attorneys for The Jewelers' Association and Board of Trade, New York, were successful in securing the election of a trustee. Appraisers have been appointed who value the stock at $5,200 and the fixtures of $712. The accounts receivable amount to $804. Arrangements will be made without delay for the disposition of the jewelry which is said to be unusually well selected and desirable. Before the board filed its petition in bankruptcy, Mr. Sutter offered to compromise at 40 cents on the dollar, but in making this proposition he had not completed arrangements for carrying it into effect, and if the offer were accepted it is believed that he would not have been able to carry out his part of the contract.

At the Anchor Silver Plate Co.'s factory, St. Paul, a number of departments are runnings nights with electric motors.

The convention of the American Association of Opticians and the concurrent meeting of the Retail Jewelers' Association of Minnesota, brought into Minneapolis a number of outside dealers. Among them were: G. R. Simons, Langford, S. D.; N. C. Clemmensen, Long Prairie, Minn.; F. K. Randall, Phillips, Wis.; A. M. Fargeman, Fergus Falls, Minn.; E. L. Hunkins, Billings, Mont.; C. G. Conyne, Mandan, N. D.; D. G. Gallett, Aberdeen, S. D.; J. M. Chalmers, Lake City, Minn.; C. L. Ekberg, Red Wing, Minn.; I. M. Radabangh, Hastings, Minn.; W. G. Gould, Glencoe, Minn.; A. G. Tellner, Jamestown, N. D.; C. H. Todd, New Richmond, Wis.; Louis Hanson, Devil's Lake, N. D.; H. J. Heram, Elbow Lake, Minn.; C. A. Sherdahl, Montevideo, Minn.; A. M. Harper, Renville, Minn.; H. M. Hitchcock, Redwood Falls, Minn.; J. W. Brown, Ortonville, Minn.; Wm. Plackner, Benson, Minn.; J. C. Herdliska, Princeton, Minn.; E. F. Huhner, Stillwater, Minn.; G. B. Ellestad, Lanesboro, Minn.; L. O. Hulberg, Northfield, Minn.; Julius Anderson, Mora, Minn.; John C. Marx, Shakopee, Minn.; Wm. Krohn, Annandale, Minn.; A. L. Mealey, Delano, Minn.

S. H. Lesser, who had been for many years sales manager of the Anchor Silver Plate Co.'s New York salesroom, which it has discontinued, has made his new headquarters at the factory in St. Paul, and is at present greeting his friends in the west.

Judge Kelly has filed an order in the case of the Puritan Mfg. Co. against M. T. Gardner, St. Paul, overruling the plaintiff's demurrer to a part of the defendant's answer, with leave to the plaintiff to file a reply on payment of $10 costs. Judge Kelly says in a portion of a memorandum filed: "Action on a written paper, signed by the defendant, to recover $380, the price of certain jewelry alleged to have been sold and delivered. The defendant admits that he received certain goods last October, and never paid for them; admits that he signed a certain paper for, but denies knowledge of the paper's exact contents. He says that about Oct. 3 the agent of the plaintiff called on him in St. Paul, and, for the purpose of inducing him to sign the paper, falsely and fraudulently represented to him that he was desirous of establishing in St. Paul four exclusive agencies for the sales of plaintiff's goods, of whom he wished to make the defendant one." The defendant also set forth that other false representations as to the quality and prices of the goods and provision for their return, if unsold, were made. The judge held that the answer, if true, was a valid defense. It is expected that the case will now go to trial.

James Mix, of Albany, N. Y., who injured his hip by a fall a short time ago, was reported to be getting along very well, and it is believed that his ultimate recovery is certain. Mr. Mix is 82 years old.

## San Francisco.

TRADE CONDITIONS.

Trade conditions generally have improved somewhat, both among wholesale and retail houses, in San Francisco, and it is generally believed that from now on the local jewelers will have a fair trade until Fall, when, judging from all indications, an unusual volume of business is to be expected.

A. I. Hall & Son are getting out their new catalogue.

H. D. Hadenfeldt, of Rothschild & Hadenfeldt, is on a business trip.

R. Bernhardy has just returned from his first road trip for A. Eisenberg & Co.

Edwin Wold, Oakland, Cal., was married in that city a few days ago to Miss Ruth Bruce.

Geo. E. Feagans, of Brock & Feagans, Los Angeles, Cal., and Joliet, Ill., was a recent San Francisco visitor.

G. A. Thiel and wife, of Redwood City, spent a few days in the city this week making selections for the Fall line of jewelry.

E. E. Mahlun, Weimea, Kauai, T. H., is spending a month in San Francisco. Mr. Mahlun was formerly with A. I. Hall & Son.

Shreve & Co. have just received an order to supply the service for the battleship *Ohio*. There were a number of competitors in the field.

Among the interior jewelers not mentioned elsewhere, who have been visiting in San Francisco in the past few days were G. W. Hill, Lodi; H. E. Austin, Stockton; L. C. Swain, Vacaville; H. Young, Stockton.

Geo. B. Lewis, secretary of Shreve & Co., met with a painful accident while attempting to board a moving electric car on Sacramento St. He was thrown violently to the ground, sustaining a number of cuts and bruises.

Ben. Martin and Joseph Martin, salesmen formerly in the employ of F. L. Cook, a Market St. jeweler, have been convicted of grand larceny and sentenced to terms in the California State Prison at San Quinten. Ben. Martin was sentenced to two years' imprisonment and his brother to 18 months. The two men ran away with their samples on Aug 12, 1904, and were brought back to San Francisco from Indian Territory.

ESTABLISHED 1854 INCORPORATED 1898

JUERGENS & ANDERSEN CO.,

28-26 Loollersgracht Amsterdam, Holland.

## St. Louis.

Gerhard Eckhardt has gone on a fishing trip, to be gone about a week.

J. F. Daly, of J. F. Daly & Co., spent several days in Chicago, last week.

E. Massa, of the Bauman-Massa Jewelry Co., has returned from a visit to Charlevoix, Mich.

Alvin L. Bauman, president of the L. Bauman Jewelry Co., has returned from a trip through Missouri.

Moses Straus, the veteran jewelry man, with the L. Bauman Jewelry Co., is on a visit to his family at South Haven.

J. H. Steidemann, of J. W. Cary & Co., has returned from an extended trip to the East, in which he visited New York and Atlantic City.

A. R. Brooks, of the Brooks-Auer Jewelry Co., has returned from a business trip to Chicago. I. Auer of the same firm is now on his vacation.

Sigmund Stern, a member of Stern Bros. & Co., New York, was in St. Louis for several days last week. Mr. Stern left Friday for the Thousand Islands.

William Preuer, Cincinnati, O., who will open a new retail jewelry store there, spent several days in St. Louis last week, combining business with pleasure.

L. W. Waldecker, of the silverware department of the Mermod, Jaccard & King Jewelry Co., left Saturday for Philadelphia, his former home, to spend his vacation.

Goodman King, president of the Mermod, Jaccard & King Jewelry Co., left Friday for New York and will spend some time at the branch store in that city.

William Tudor Wilkinson, son of wealthy parents, was recently arrested on the charge of stealing jewelry from the Simmons Co. He pleaded guilty, and was fined $200.

Among the visiting jewelers in St. Louis last week were J. H. Greer, Fort Worth, Tex.; A. W. Susen, El Paso, Tex.; J. H. Booth, Alton, Ill., and A. Marks, Lawrence, Kan.

A. H. Aylesworth of the J. F. Daly Co., has returned from a visit to Providence. While away Mr. Aylesworth was the guest of his cousin, Will Manchester, of the Manchester Mfg. Co., Providence.

C. P. Hutchinson, of Whelan-Aehle-Hutchinson Jewelry Co., is taking a much needed rest after a busy season. Patrick T. Whelan, president of the company, has returned from a pleasant trip on the Tennessee River.

J. Vion Papin, who was secretary to the Japanese Commission during the World's Fair, and who served on Jury of Awards No. 1, for gold, silver, cloisonne and enameled ware, has recently been appointed railroad and financial editor of the St. Louis "Republic."

E. S. Weidlich, of William Weidlich & Bro., spent last week and a part of this in the Massachusetts manufacturing centers.

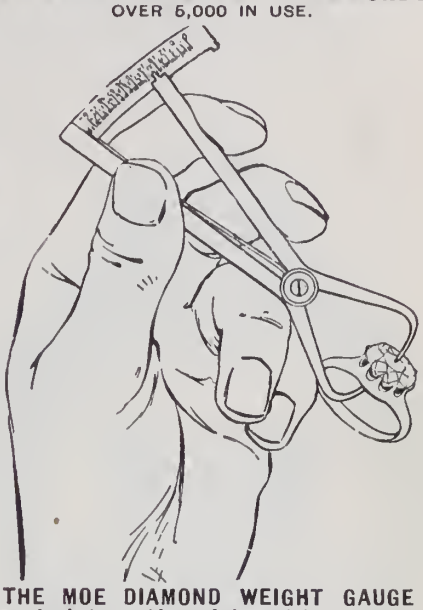
F. L. Jaccard, Texas representative of the Bauman Massa Jewelry Co., is spending a few days in St. Louis. He departs this week for a trip through Arkansas, and thence to his headquarters at Fort Worth. He reports that crops in the Lone Star State are in good condition. The cattle industry is also in properous shape, and Mr. Jaccard considers the business outlook good.

Statistics concerning the possession of jewelry and diamonds are furnished in the final report of the Board of Review of St. Clair County, across the river from St. Louis, to the Illinois State Board of Equalization. With a population of about 30,000 the total valuation of diamonds owned by its citizens is $6,441. Belleville, the next largest city in the county, with a population of 15,000, is without a single diamond, as the property of a tax payer, and has not one piece of gold or silverware, according to the report.

## Pacific Northwest.

Alber Hansen, Seattle, Wash., is distributing a handsomely illustrated booklet.

W. P. Mulholland has succeeded R. Roberts in the jewelry business at Big Timber, Mont.



In a decision handed down a few days ago Judge Frazer, of Portland, Ore., ruled that the copyright of Isaac Aronson, a Portland jeweler, gave him no monopoly in the sale of certain articles of jewelry with a Lewis and Clark design on them, and accordingly dissolved a temporary injunction restraining Joseph Mayer and other Portland firms from using this design. Mr. Aronson, who had secured a copyright, complained that other firms were selling souvenirs with the same or similar designs. In rendering his decision Judge Frazer held that as this Lewis and Clark design was entirely descriptive and did not serve to indicate a particular manufacturer's goods, the copyright could not hold.

As a result of the extensive improvements made recently to his store, at 426 Penn St., Reading, Pa., G. A. Schlechter is receiving considerable free advertising from the local press, the papers speaking very highly of the improvements which he has made.

C. B. Jacquemin, Council Bluffs, Ia., is offering a handsome silver cup as a trophy for the gold championship contest of the city of Council Bluffs. The cup stands about eight inches high and is richly designed and chased.

The Board of Directors of the National Self-Winding Clock Co., Champaign, Ill., has been reorganized and new officers have been elected as follows: President, Edwin S. Swigart; vice-president, J. W. Stipes; secretary, Solon Philburn; treasurer, Geo. B. Storer. Dr. Percy L. Clark has been selected as general manager, and W. Brainard assistant manager.

LEARN JEWELERS ENGRAVING

"The Engraving School that Graduates Experts."

A fascinating, high-salaried and easily learned trade, taught thoroughly and practically by correspondence. Your instructor is the foremost authority and master workman in the world. We will teach the beginner better engraving by correspondence than he can gain in years of rigid apprenticeship. We will improve the skill of any engraver one hundred per cent. and make him master of the trade. The demand for competent engravers far exceeds the supply.

Send for handsome, illustrated prospectus.

PAGE-DAVIS COMPANY.

Suite 10, 90 Wabash Avenue, CHICAGO.

## Cincinnati.

C. J. Nurre, 1214 Main St., has left for an extended tour among the eastern cities.

D. Jacobs, of D. Jacobs & Co., with wife and daughter, is sojourning at Atlantic City, N. J.

Herbert Oskamp, of the Oskamp Jewelry Co., is spending his vacation at his Summer home in Virginia.

Joseph Noterman, of Jos. Noterman & Co., with Mrs. Notterman, has returned from an eastern trip.

Joseph M. Plant, formerly located in the Perrin building, has moved to his new quarters at 320 W. 5th St.

Mr. Freisens, of Parker & Friesens, accompanied by his wife, is making a pleasure trip through California.

G. A. Schneider, recently watchmaker for Herman & Loeb, Johnston building, is now with Herman Lange, 425 Vine St.

Oscar Keck, of the Herman Keck Mfg. Co., sailed Aug. 1 from New York for Europe, where he will devote several weeks to purchasing goods.

The Frank Herschede Co. has put in a large plate glass window on the west side, the former one having been smashed by boys throwing stones.

Joseph H. Kenkel, 1302 Main St., has gone west on a sight-seeing trip, which will include Yellowstone Park and other points along the Pacific slope.

On account of the yellow fever epidemic in the south, a number of Cincinnati traveling salesmen have returned from their southern trip, being cut off by quarantines.

W. W. Howe, of the Loring, Andrews Co., and family, are summering at Wequetonsing, Mich. E. J. Morris, of this house, has gone to Clark's Lake, Mich., where his family are located, for the Summer months.

Jules Franklin, New York, spent a part of last week here as the guest of John F. Herschede, of the Herschede Hall Clock Co. Chas. Lucius and J. Fred. Kramer, of the Frank Herschede Co., have just returned from Chicago, where they were entertained by Mr. Franklin.

Albert J. Lauric, of the supposed "Buffalo" company, whose trial has been on in the Federal Court at Jamestown, N. Y., was convicted, as were his accomplices, Harry Joseph, Aaron Swartz, Moses Hendler and Isaac Joseph, on the charge of conspiracy to defraud creditors, under the bankruptcy law.

DO YOU want your material orders correct and promptly?

LINDNER & CO.,

S.W. Cor. 4th & Walnut Sts., Cincinnati, O.

Out-of-town jewelers who were recently here buying goods, included: J. G. Irwin, Harriman, Tenn.; J. C. Bohl, Hot Springs, Ark.; Chas. Diefenbach, Hamilton, O.; Clay Henry, Ironton, O.; F. B. Carey, Lebanon, O.; Mr. Ellory, Georgetown, O.; Mrs. H. Simpson, New Richmond, O.; J. E. Parry, Galion, O.; A. Clooney, Maysville, Ky.

## Indianapolis.

TRADE CONDITIONS.

Retail merchants are not enthusiastic over the present trade, but manufacturers say it was never better during this season of the year. Several concerns are working night and day. Collections are said to be satisfactory.

Charles Mayer and family are enjoying an outing at the lakes in Michigan.

E. M. Craft, of the A. P. Craft Co., and Mrs. Craft are spending two weeks at Bass Lake.

Carl L. Rost and wife will start for New York, Aug. 10, to remain in the east two weeks.

J. H. Reed and Mrs. Reed are contemplating a trip to the Pacific slope this Fall. Mr. Reed's parents live in the State of Washington.

A. R. Gray, of Gray, Gribben & Gray, and A. J. Burns, the firm's watchmaker, have returned from a successful fishing trip on the Kankakee River.

A. L. Zoller, of Charles Mayer & Co., has returned from a trip abroad. Ferd. Mayer, of the same firm, will arrive home from Europe early next month.

Four new workmen have been added to the force of the A. P. Craft Co. Two came from Cincinnati and two from Chicago. The force works each night until 9 o'clock.

Among the out-of-town jewelers that visited the local manufacturers and jobbers last week were: J. A. Pickett, Newcastle; John W. Hudson, Fortville; J. Henry Smith, Greenfield; George W. Clemons, Greenwood; D. S. Whittaker, Lebanon; J. F. Harding, Brownsburg; C. W. Neal, Franklin; J. Alfred Meissen, Cicero; F. Pennington, Knightstown, and Mrs. B. Maier, Edinburg.

James A. Larkein, formerly a well-known jeweler of Johnstown, Pa., who for some time past has been a resident of San Diego, Cal., writes to his friends in the former city that he is now prospecting for gems in the mountain region of the Golden State.

DIAMONDS

MOUNTED AND LOOSE.

Makers of ARTISTIC DIAMOND JEWELRY.

JOS. NOTERMAN & CO.,

512 RACE STREET, CINCINNATI, OHIO.

## Cleveland.

F. C. Cook, Janesville, Wis., spent several days here, last week.

H. L. Long is advertising a closing-out sale of watches and some other goods.

W. B. Blood, of the Seribner & Loehr Co., started on his trip through Michigan on Monday.

Biskind Bros. opened a store at 353 Bond St., on July 25. It has been overhauled and newly decorated for them.

L. M. Sigler, of the Sigler Bros. Co., has returned from Europe, where he went some time ago to purchase new goods for their diamond and other departments.

Wm. Wagner, of the Sigler Bros. Co., and Herbert W. Burdick, of the Bowler & Burdick Co., attended the annual meeting of the American Jewelers' Association at Detroit, last week.

W. S. Avery, dealer in jewelry, etc., Chardon, O., died suddenly on the evening of July 24 of heart failure. He was 70 years of age and had been in business in Chardon for half a century.

C. S. McRoss, of the Sigler Bros. Co., has returned from a vacation trip to Milwaukee, Wis., and George H. Tipling, from Detroit, Mich. George Bain and Jack Spindler, of the same house, spent a day, last week, at Canton, O.

O. P. Rowley, with the Bowler & Burdick Co., after being incapacitated for business for several weeks, owing to ill health, has fully recovered, and is again making the trip over his territory, southwestern Ohio, Indiana and Michigan.

W. M. Northrup, North Baltimore, O.; H. S. Sumner, Akron, O.; J. C. Joss, New Philadelphia, O.; L. J. Goddard, Ravenna, O.; Ed. Nolf, Wadsworth, O.; O. G. Carter, New London, O., and A. E. Oyster, Alliance, O., were among the visiting buyers in the city, last week.

It is believed here that if some one would take the lead a State association might be formed among the jewelers of Ohio. Such an organization would prove a great advantage in many ways. The time has passed when business men keep all their little business secrets to themselves. That is pitting one's self against all the others. The broad plan on which success is being gained these days is organization and co-operation. It is the gathering and utilization of ideas, no matter whose they are if good. In no other way can men give and receive experiences and tell of the success or failure of the various plans, so well as in a gathering of men who are all in the same line of business. While a neighbor in the same town might profit from the man who possibly would like to keep all his ideas to himself, the latter will in the end be better off for having these ideas and sharing them. Those things will have to be removed from the minds of jewelers and sooner or later they must meet on the broad plane of fellowship. And the sooner, the better. All that is needed is some one to make the start and after that leadership will fall to the lot of those who are willing to give a little of their time to the matter. The opticians have a very interesting State association and there is no reason why jewelers should not also get together in an organization that will benefit all.

## Lancaster, Pa.

Harry B. Boyer, of the Ezra F. Bowman Technical School, has taken a position with J. F. Zugschwert, Carnegie, Pa.

Clarke Houghton, late with L. C. Reisner & Co., has taken a position with the Estate of R. F. Polack, York, Pa.

T. C. Mullenberg, with the H. S. Meiskey Co., who returned last Friday from a vacation trip to the seashore, left on Monday on his regular tour of the trade.

W. D. Martin, Rocky Mount, Va., stopped over in Lancaster, last Friday, to see friends, en route to Atlantic City, N. J., where he has gone to recuperate.

Among the jewelers who visited the Lancaster trade, last week, were: Howard Keagy, of H. R. Yergey, Columbia, Pa.; M. R. Swartz, and L. J. Henise, York, Pa.

George W. Chandler, who came here from Newark, N. J., a few weeks ago, to become superintendent of the Lancaster Silver Plate Co., has resigned and returned to Newark.

Oliver Mentzer, late with L. C. Reisner & Co., who went to Raleigh, N. C., recently, to take the position of foreman of the manufacturing department of H. Mahler's Sons' jewelry establishment, returned to Lancaster last Friday.

Howard A. Erisman and Chas. Weidner, who recently returned to Lancaster from Cleveland, O., where they were employed as engravers with the Seribner & Loehr Co., went to Riverside, N. J., on Saturday, to take a position with the Philadelphia Watch Case Co.

Local jewelers are suggesting the desirability of all prominent manufacturers of 10 and 14 K. goods, especially the latter, using their trade-marks on their bill heads, as it would help jewelers to become familiar with the different trade-marks, and save a good deal of trouble made necessary by their being obliged to refer to files and records.

The employes of the Hamilton Watch Co. resumed work, Monday. A contract has been made for adding another story to the wing on each side of the main building, and the work will be carried on while the factory is in operation. The enlargement is rendered necessary by the plans for making an O size movement.

## Columbus, O.

Fred C. Blenkner, 66 N. High St., and John Y. Bassell, secretary of the Board of Trade, recently finished a line of new gun sights on which they have been working for a year and a half. They will now market their invention.

Earl Kessie, aged 16, and Edward Ettle, aged 17, the latter having been employed in the store of the H. Cole Co., opticians, were arrested at Waynesville, O., Friday, and held for the Columbus police. Detectives later brought them to this city and lodged them in jail. Before leaving the Cole store, Wednesday evening, young Ettle stole $92 from the cash drawer, which theft he later admitted to the detectives.

C. A. Davis is removing his jewelry business from De Vall's Bluff to Hazen, Ark.

## New Stores and Enterprises.

C. C. Wright has opened a jewelry store at Fernie, B. C.

W. T. Stewart has started in business for himself at Swainsboro, Ga.

Thomas Wright, Cairo, Ga., has added a jewelry department to his hardware business.

W. T. Boyd, Waynesboro, Pa., has leased the Detrich Block, where he is opening up a new jewelry business.

Announcement is made by S. T. Gilbert that he has opened a new store at 1811½ Johnson Ave., in Parsons, Kans.

John Klock has opened a new jewelry store at 314 Short St., Belleville, Ind. Mr. Klock formerly was with William Hellengrath of the same town.

Weiss & Wohlgemuth is the name of a new firm that will conduct a jewelry and loan office at 7th and Pine Sts., St. Louis, Mo. Mr. Weiss is president of the Weiss Jewelry Mfg. Co., and Mr. Wohlgemuth is from Eldon, Mo.

C. R. Allen & Co., Chicago, Ill., have been incorporated to do a manufacturing business, with a capital stock of $50,000. Jewelry will be one of the lines made. The incorporators were C. R. Allen, W. E. Becker and H. E. Lanzit.

The Continental Silver Co., Scottdale, Pa., was incorporated last week, with a capital of $5,000. The incorporators are B. T. Overholt, F. R. Bailey, A. C. Overholt, Clyde Overholt, all of Scottdale, and Albert H. Kelley, of Allegheny.

A certificate of incorporation was filed last week at Albany by the Victoria Hill Clock Co. of New York. The capital is $5,000, and the incorporators are Philip H. Klein, Jr., Solomon Markstein and James H. Coe, all of New York.

A contract has been let for the construction of the main building of a group for the Tulsa Clock & Watch Mfg. Co., Tulsa, I. T. The company is composed of local and foreign capitalists, who will engage in the manufacture of clocks and watches. The company is capitalized at $250,000, fully paid in. The officials, who live in Tulsa, are: Clifton George, president; T. E. Smiley, vice-president; C. B. Lynch, treasurer; E. A. Bazzett, secretary and general manager.

### Jewelers' Gold Bars Withdrawn and Exchanged at New York.

### Midsummer Four-Track News.

The August, or Midsummer *Four-Track News* opens with a delightfully written article, entitled "The Call of the Wilderness," by Richard A. Haste; "The Rejuvenation of Jones," by C. R. Hervey, is an admirable description of a canoe trip on the Genesee; J. Frederick Lovejoy, in an article full of local atmosphere, tells the story of "The Tip End of Cape Cod;" "Below the Grand Canyon" is one of George Wharton James' interesting articles on the land with which he is so familiar; "With Washington at Newburgh," by B. H. Dean, tells the important story of Washington's life there during the most exciting period of the Revolution; "Ocean Grove," by Allen Day; "The Hall of Fame," by Isabel R. Wallach; "Our New Empire" (Alaska), by William G. Fitz-Gerald; "After Moose in Maine," by L. F. Brown; "Wind Cave" (South Dakota), by Mary K. Maule, and "Harold Frederic, Novelist," by John Davis Anderson, are articles whose titles are self-explanatory. The articles pertaining to foreign countries relate to "Mont-Saint-Michel," by M. A. Van Norman; "Aberystwyth-by-the-Sea," by Julia M. Colton; "In the Country of John Hampden," by N. R. Benedict; "The Island of the Gael," by Moira L. Ray, and "Peterborough Cathedral," by Norman Vann. "Links in Milford's Chain," by Durand Clapham, tells something of the unique history of Milford's mysteries, and "The Minor Heroes," by Austin Cook, relates to those characters who figured in the Battle of Gettysburg. In addition to these articles there are the usual departments, poems, verse, humor, etc., including a beautiful poem, entitled "The Picture," by Bingham Thoburn Wilson; "In Sleepy Hollow," by Arthur Guiterman; "A Call of the Trail," by Mrs. Wilson Woodrow, and "The Song of the Cascades," by T. Franzel Crawford. The illustrations in this number are exceptionally fine, and possess a great deal of life and human interest.

The *Four-Track News* is one dollar a year, or ten cents a copy, and can be had of George H. Daniels, Publisher, 7 East 42d Street, New York, or at any news-stand.—*Adv.*

## Atlanta, Ga.

The Walter Ballard Optical Co. has filed incorporation papers. The corporation is for 20 years. The incorporators are B. Walter Ballard, Edgar V. Carter, W. S. Thomson, all of Atlanta. The capital stock is $10,000, one-half of which is actually paid in. The home offices of the corporation are to be located in Atlanta.

A. D. Gary, Lavonia, Ga., has applied for a patent on a contrivance that is believed will have a far-reaching effect on the manufacture of clocks. As is well known, a clock will not run correctly unless set level, and if it runs at all when unevenly placed, the mechanism soon wears out. Mr. Gary's invention corrects these faults at an estimated cost of about two cents per clock. With his appliance, a clock will keep perfect time without this destructive friction.

The Columbus, Ga., police have been trying to locate two stylishly dressed women, who "flimflammed" local jewelers. It is thought they left for an Alabama city and the authorities there have been notified. The women, who are about 25 years of age, visited two jewelry stores in succession and asked to see some fine rings. Several trays were set before them. At each store they managed to exchange a cheap ring for a costly one selected from the lot in the tray, and the loss was not discovered until they had left.

A gift of $5,000, toward erecting a permanent building for the Tabernacle infirmary, has been made by A. K. Hawkes, optician. This donation was handed to Dr. Len G. Broughton, the pastor of the Tabernacle Baptist church. About a month ago when Dr. Broughton was endeavoring to raise money with which to pay the infirmary's indebtedness, Mr. Hawkes gave a subscription of $300 to be applied to the support of a charity bed in memory of his mother, Harriet E. Woodbury Hawkes. Since that time Mr. Hawkes has investigated the infirmary's work and made an engagement with Dr. Broughton to talk over with him the provisions of the charter and his plans for the future in connection with the institution. After the conference Mr. Hawkes announced his gift of $5,000 to be used in securing a permanent building for the infirmary.

After Henry Glover, a negro, had given a detective the slip, he was held at the point of a revolver by Martin May, of the firm of Schaul & May, at Peachtree and Decatur Sts., until he was arrested. The negro was charged with attempting a conspiracy with a porter in the store to steal diamond rings. According to Mr. May, the new negro porter, just employed by the firm, came to him Thursday morning and stated that another negro had come to him and offered to pay him for a certain ring in the window if he could slip it out. Mr. May gave the porter a paste ring, and asked the detective department to detail a man to follow him to a meeting place arranged by the two negroes. This was done, the ring was handed over to Glover by the porter and the latter was paid $20 in gold for his trouble, Glover being too eager to notice whether the ring was paste or genuine. Mr. May says that the detective was standing near at the time, but let the negro get away. The porter returned with the $20 and while he was talking to Mr. May, Glover with three other negroes returned to the store. No policeman was near and when Glover was pointed out by the porter, Mr. May called him in. He then reached for his revolver and covered the negro until an officer arrived. Mr. May says that several other porters employed by the firm, have slipped out rings to negroes who have paid them for their trouble. The present porter proved to be honest, giving the firm a chance to break up the business of stealing that has annoyed it so long.

## UNITED STATES PATENTS.

ISSUE OF JULY 25, 1905.

**795,320.** FOUNTAIN-PEN FILLER. Ernest M. Vaughan, New York, assignor by mesne assignments, of one-half to J. Aubry Vaughan, Brooklyn, N. Y. Filed March 14, 1905. Serial No. 249,993.

An ink-holder for a fountain-pen consisting of

a closed tube adapted to slip into the pen-barrel and having a relatively frangible end.

**795,382.** FINGER-RING. Fred M. Allen, Auburn, R. I. Filed April 26, 1905. Serial No. 257,438.

A finger-ring having a box-shaped bead in the bottom of which is an off-center hole adjacent one end and a ledge on the inner side walls of the head having an opening one side of which is

beveled, a signet-plate having a spring-arm, and means for securing one end of the spring-arm to the under side of the plate in a position for the fixed end of the arm to go under the ledge and for the free end of the arm to first strike the beveled surface, pass through the opening in the ledge, and snap under the ledge.

**795,665.** PENDANT BOW. Louis E. F. Wachter, Hartford, Conn. Filed Oct. 24, 1902. Serial No. 128,681.

As an article of manufacture, a pendant-bow comprising the ring proper, single-piece attaching

means, including sockets and screw-threads beyond said sockets, flexibly attached to the ends of said ring proper.

**795,567.** ENDOSCOPE OR OTHER OPTICAL INSTRUMENT. Reinhold H. Wappler, New York. Filed June 24, 1904. Serial No. 213,913.

In an optical instrument, the combination with a tube having an opening therein, of a plano-convex

lens whose convex surface is more than hemispherical set in said tube adjacent to the opening therein and in such a position that the angle between the flat face or back of the lens and the axial line of said tube is an angle of about 70 degrees, a support for the said lens in the form of a cylindrical section-block, and means for closing the end of the tube and holding the lens and block firmly in place.

**795,569.** FOUNTAIN-PEN. Thomas P. Ambrose, Cincinnati, O. Filed Dec. 6, 1904.

Serial No. 235,677.

In a fountain-pen, the combination of a casing,

## BRITISH PATENTS.

ISSUE OF JULY 12, 1905.

(Abridgments of Specifications, 1904, from *The Illustrated Official Journal.*)

**6,447.** SIGHTING-TELESCOPES. J. Stuart and J. W. Hasselkus, London. March 16.
Relates to telescopes of the kind described in

FIG.1.

Specifications No. 4835, A.D. 1888, and No. 21,120, A.D. 1903. To secure a rigid connection between the main tube X and the cross-wires, the ring *b* on which the wires are mounted is secured to the collar C, in which the collecting lens is fixed, and which is screwed into the end of the tube X.

**6,543.** WORKMEN'S TIME RECORDERS. A. Dey, Glasgow, and J. Dey, Syracuse, N.

FIG 3

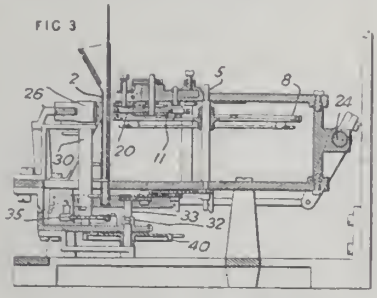

FIG.5.

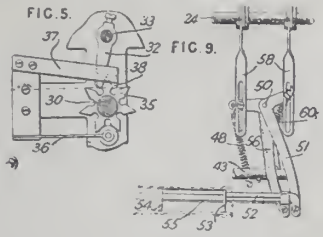

FIG. 9.

Y., U. S. A. March 17.
A workmen's time recorder, Fig. 3, has a vertical slot 2 to receive a card to a variable depth depending on the day of the week, a handle on a shaft 24 which is then rocked to operate the mechanism, two guides which shift the card transversely in the slot 2 to either of several positions for different parts of the day, and a platen 26 which then presses the card against the front figures on three type-wheels 8, 11, 20, to print the minute, hour, and day number, respectively. The printing-wheels are on vertical axles, and arranged to print the data longitudinally on the card, each column cross-wise of which serves for one day, commencing with Monday at the right hand end of the card; other data are written on the left half. Each card is kept in a thin flat metal case, having longitudinal slots to receive the type, and an opening showing a number. The depth stop in the slot 2 is either of several pins projecting from a vertical shaft 30, which is turned a seventh of a revolution each day by a star-wheel 35 being engaged by a tooth 32 on a revolving shaft 33; this is geared to the shaft 5 of a clock, turning once an hour. The star-wheel 35 engages a roller carried by a spring 36, as shown in plan in Fig. 5, and, in order to prevent any movement of the shaft 30 except that given by the tooth 32, the star-wheel engages a notched block 38 carried by a flat spring 37, a projection on which is engaged by the tooth 32 as it passes, to lift the block 38 above the plane of the wheel when the tooth 32 has come into gear with the wheel. The flat spring 37 may be replaced by a spring-pressed pivoted piece. The card is adjusted transversely by guides, 53, 54, shown in plan in Fig. 9, respectively connecting by sliding rods 52, 55 to angular levers 51, 56 on a fulcrum 50. Normally the guides 53, 54 are widely separated by slotted links 58 connecting the levers 51, 56 to arms of the shaft 24, which is acted on by a strong spring. When the shaft 24 is rocked by its handle, the levers 51, 56 are freed by the links 58, and the guide 54 is moved along the slot by a spring 48 turning the lever 56 until an arm of this is stopped by either of several pins on a shaft 43 the guide 53 is also moved towards the guide 54 by a spring 60 connecting the levers together. The shaft 43 may be turned periodically by a star-wheel on it being engaged by teeth of a wheel 40 on the shaft 33, Fig. 3, or the shaft 43 may be set by hand, being connected by bevel gear to a handle movable round an inclined dial; the handle is connected to the bevel gear by disconnectible couplings and a flexible shaft, to permit removal of the part of the casing of the recorder carrying the dial. The platen 26, Fig. 3, is on a lever connected by a spring to an arm of the rock-shaft 24. The minute-wheel 8 is carried on the clock shaft 5, and the hour-wheel 11 is geared directly on it. Independent turning of the hour-wheel is prevented by teeth engaging a detent-lever, which is normally held stationary by a cam on the minute-wheel. The day-wheel 20 is turned by a tooth on the axle of the hour-wheel; gear such as is shown in Fig. 5 may be used. The invention is partly applicable to recorders marking on drums or other surfaces.

## A New Test for Myopia and Hypermetropia Based Upon the Chromatic Properties of an Eye.

(Paper by E. Le Roy Ryer, New York, presented to the American Association of Opticians, at Minneapolis, Minn., July 25, 1905.)

MY past experience has taught me that at conventions where so many pleasures await each individual, a paper is appreciated in direct proportion to its briefness. I shall endeavor, therefore, to keep this fact in view. We frequently read about the normal eye being far from perfect in the details of its construction and that an optical instrument constructed with the same faults would be justly considered crude. The chief so-called defects of the human eye are spherical and chromatic aberration. To my mind we are too prone to jump at conclusions, and what, on the face, seem to be defects may, if examined more thoroughly, prove to be necessary and perfect adjuncts.

Thus, while I do not deny that spherical and chromatic aberration exist, I do not think it unreasonable to assume that there is some office that their existence fulfils. As an example of the carelessness with which we approach these subjects attention is called to the fact that in considering the spherical aberration of an eye we invariably use, in conjunction with our optical apparatus, a flat screen such as a piece of paper or cardboard while the retina presents a markedly concave surface; perhaps this would make no difference but Nature builds with a sure hand as a rule and why should she make an exception to this rule in the case of the human eye, the organ of one of our most important senses?

I preface my subject with these few suggestive remarks mainly to let you see that I am not unconscious of basing my theory on what might be termed rather unsettled premises. Still I must insist that sufficient undeniably correct data is at hand to warrant my making the following claims and in evolving the theory and shaping this test into practical form I have used only such data as has been proven trustworthy; and assuming that the dioptric system of the eye is not achromatic but does focus the various color waves that go to make white light at various distances instead of at one point, I shall endeavor to demonstrate that this so-assumed defect may be made of use in testing.

The following is the principal part of the data employed in deducing the theory under consideration.

White light is a composition of colored lights; every known color is found in this composition.

White light in passing through an optical prism will be decomposed or separated in such a way as to show its various ingredients.

The result of this decomposition or, as it is technically termed, dispersion, is a spectrum, a series of gradually changing tints of innumerable variety, shading almost imperceptibly from red, through orange, yellow, green, and blue, into violet.

The eye recognizes color by means of the length of the light wave that impresses its retina, that is, various sized waves produce various color impressions.

No object really possesses color in itself; we see an object red because it is of such a nature as to reflect only those waves whose length is such as produces upon the retina that sensation which we have learned to call "Red." Yellow is produced by waves somewhat shorter in length and so on through violet.

The largest waves that the eye is capable of recognizing are the red waves, while the shortest are the violet. Waves larger than the red are thermal waves, producing heat but no visual sensation of any kind, and smaller waves than violet are termed actinic waves producing only chemical effects. Those waves between the red and violet inclusive are termed the luminous waves and are the only ones that enter optometrical considerations and we will hereafter understand the expression "the largest and smallest waves" to signify respectively the red and violet waves.

Each set of waves has its individual "refrangibility" or property of being bent by a refracting medium, but the red waves, all else being equal, will be less affected than the violet.

White light in passing through a non-achromatic convex lens or lens system will be broken up and its red waves focused at a point further away than the point at which the violet waves will focus. Or, to put it in another way, if red waves were focused at, for instance, 10 inches by a certain lens, violet waves coming from the same distance as the red would be focused by the same lens at a point inside of 10 inches.

An eye, therefore, focuses the red part of white light further back than it does the violet part. This is because the dioptric system of an eye possesses chromatic aberration and cannot bend or refract the large or red waves as much as the small or violet.

Now, recall, that in all cases we are apt to undercorrect hypermetropia and overcorrect myopia; also, that we have always used a black and white chart either in the form of white letters on a black ground or conversely, black letters on a white ground.

The focus in hypermetropia would be behind the retina and a proper correction would consist of that lens which would bring that focus forward to the retina but on account of accommodation we are apt to fall a little short of that point, but as above stated the red waves focus furthest back and if we used, in testing, a red letter on a white chart we would have to use a little stronger lens to bring their focus to the retina than had we used a letter of any other color and the extra lens required to bring the focus of the red waves forward would be that much gained toward reaching a full hypermetropic correction.

In myopia the focus is in front of the retina but the focus of red would be less ahead than that of violet waves; therefore, if red letters were used in this case also, a weaker lens would bring their focus to the retina than would be required to bring the focus of violet waves to the same point, and we therefore would be less apt to overcorrect than as though letters of any other hue were used.

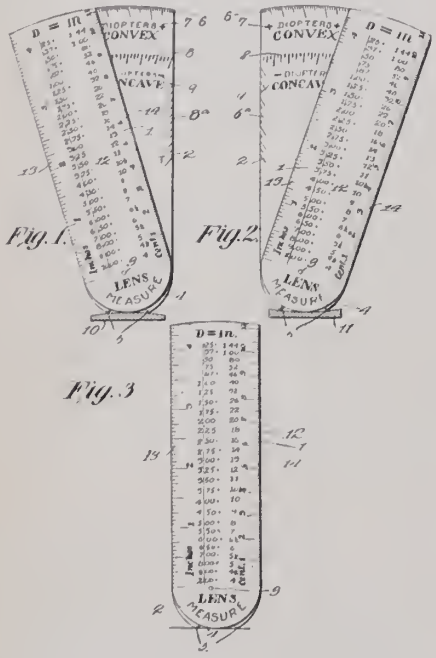
Thus, you see, that a red letter offers superior advantage to the black or white one for subjective testing, and, if you will lay aside "custom," which so often retards progress, you may find, and I sincerely hope will find, both theoretically and practically, that the chart system may be changed to advantage.

## Varying Thicknesses of the Sclerotic Coat the Cornea, the Choroid and the Retina.

WHEN considering the various tunics of the eye we are prone to pay too little attention to details. The most common misconception is that each tunic has the same thickness throughout its entirety. The fact is, however, that the thickness of the cornea is about 1/30 of an inch in its central portion, and a little thicker or about 1/25 of an inch at its periphery.

The sclerotic coat is thinnest in the middle portion of the eye, measuring about 1/50 of an inch; as it nears the cornea it becomes a little thicker; and at the point of entrance of the optic nerve it measures 1/25 of an inch.

The choroid varies in thickness between 1/25 and 1/85 of an inch; its thinnest portion is near the middle of the eye, posteriorly it is a little thicker, and at its anterior border it is thickest.



The retina at its middle portion is about 1/120 of an inch thick, and as the anterior margin is approached it becomes thinner until it measures only about 1/300 of an inch in thickness.

## Lens Measures—A Comparative Analysis.

THE recent invention of James E. Briggs marks a decided departure from the usual form of lens measure and a comparison of the principal features of each cannot be other than pertinent. The Geneva is perhaps the best known of older measures while the Reisner comes second in this respect, though the latter possesses many features that no other instrument of this class embodies.

Figs. 1, 2, and 3, represent the Briggs measure in three positions, measuring respectively a convex, a concave, and a plano lens. This is accomplished by means of the

forward arm and two points, designated by No. 5 in the figures. The two arms are pivoted together at 3, but the pivot does not pierce the forward arm in the center but a little to the left, which arrangement permits the eccentric motion which in turn causes the arm to swing to either the right or left when the three points come in contact with a curved surface; if convex the forward arm moves toward the left, exposing a scale at the top of the rear arm which is so graduated as to register properly the curve and note, thereby the dioptric value of the lens; the value of a concave lens is found in a similar manner but is registered on the lower scale 8. When the measure is not in use or when measuring a plane surface it remains closed, as seen in Fig. 3.

This measure being very compact can be conveniently carried in the pocket and is always at hand when needed; it has no springs or other delicate parts to get out of order and when closed it may be used as an ordinary straight-edge or ruler, and there is ample room for advertising matter on the back. On the front face is a table showing the inch equivalents for the various dioptric values, and besides the inch scale there is on the opposite edge a scale divided into centimeters and millimeters. It may be made of metal, wood, or celluloid. The inventor claims for his instrument the ability only to measure "the concavity and convexity of lenses," meaning, it is judged from his specifications, spherical surfaces only. Cylindrical surfaces could be measured except when the cylinder was in a riding-bow frame and facing inward, in which case the temple would interfere with the arms as they were rotated to measure the various meridians.

FIG. 4.

The Reisner measure, on the other hand, is especially adapted to cylindrical work, completely surpassing all others in this respect. Thus Figs. 4 and 5 show how simple it is to neutralize a cylinder and locate the axis. In Fig. 4 the measure has been rotated on a lens until the greatest movement of the long hand is obtained, as shown at the dotted line and found to be

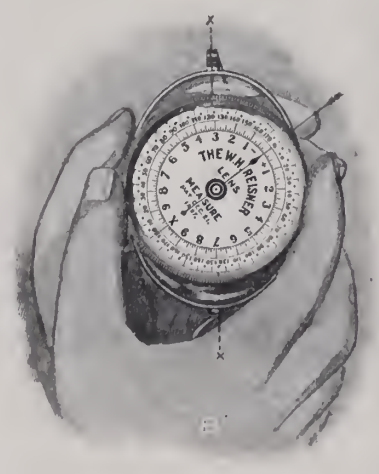

FIG. 5.

— 1.75 on the inner circle of figures. In Fig. 5 the measure has been rotated until the long hand stands over the short hand at zero, as marked by the arrow. Now read the axis as shown by figures opposite temple or nosepiece, marked by dotted lines at temple and bridge, using figures on the outer circle, which show 125. The total result is then read — 1.75 D. Cyl. axis 125.

In Fig. 6 is represented the Geneva measure, which shows readily when the three points are coinciding with the axis by the pointer registering O, but there is no means of telling with the instrument at what degree this axis lies. There is an attachment in the form of a circular plate which fits down over the block that holds the three pointers, but insofar as it is seldom used, it cannot be a real practical feature.

The Geneva or the Reisner measures are very delicate, but this cannot be considered a defect, because measuring a lens is fine work and fine measurements demand fine instruments, while fine instruments in turn deserve fine care. On the other hand the new Briggs' measure is not in anyway delicate and can stand considerably more hard usage than could any of the others.

## Optical Query Answered.

*What would you recommend in the following case? Miss F., aged 27, had scarlet fever at the age of 12, after which she had trouble with her eyes, but was never examined for glasses. Her vision without glasses is* 20/60. *For distance she requires: O u +*

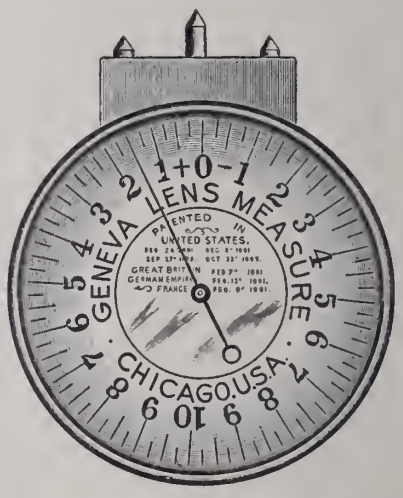

FIG. 6.

75 ⌒ + 50 *ax.* 180°. *This gives* 20/30 *vision* +.

*Her abd, is* 6°, *and her add. is* 15°. *She requires* + 1.75 *added on, for near. This has not yet been given. Her headaches have stopped with the distance glasses, but her near vision has not improved. What do you suggest?* *A. B.*

ANSWER:—The first point to be considered in the above case is that the ciliary muscles are to a greater or less extent paralyzed.

Naturally, therefore, the internal recti would be less highly developed in this than in an emmetropic or a hypermetropic case, and this accounts for the rather low adduction. It is of the utmost importance that you ascertain beyond reasonable doubt that there is not more than half a diopter of astigmatism present; if you are sure that only this amount exists you can do no better perhaps than to add the + 1.75D. to the distant correction for reading, decentering the lenses 1N.

Every effort should be made to uncover any latent astigmatism, as in this class of cases one can often uncover a diopter and a half or more of astigmatism which proves to be the real cause of the reading trouble. Prisms bases 1N might aid for reading, but use these only after the other means fail.

# AMERICAN OPTICIANS IN CONVENTION.

## Full Report of the Eighth Annual Meeting of the American Association of Opticians, at Minneapolis, Minn., July 24-27.

MINNEAPOLIS, Minn., July 27.—Many of the delegates attending the convention of the American Association of Opticians had arrived the day before it began, July 24, or earlier, and early Monday morning. The number of members of the association around the hotel and on the streets was large. The displays and exhibits were well in place by noon and the hour for registration, 2 P. M., found a good number ready to neroll and receive their souvenirs and badges. During the first day the registration exceeded 170.

The first regular session was called in the evening, after a social session in the corridors of the second floor with a stringed orchestra furnishing music. Each member was furnished with a handsome boutonniere before proceeding to the hall.

President Holmes, of Des Moines, calling the convention to order, stated that the Governor was unable to be present. A song by the Masonic quartette and an encore was listened to, after which Henry Deutsch, of Minneapolis, spoke on behalf of the Commercial Club, of Minneapolis. He welcomed the association as representatives of progress and of a higher view which associations present instead of the selfish idea of the individual. These organizations serve to bring men together to work for the greatest good for the greatest number by the exchange of ideas for the common benefit of all. We see men here coming together and putting aside their own purely private and selfish interests, and making public their discoveries for the benefit of all and of the public, irrespective of personal gain. A spirit of altruism and unselfishness is being propagated thereby. Concluding, he extended the association a welcome and extended the free use of the Commercial Club parlors and rooms to all.

President Holmes, responding to the welcome of Mr. Deutsch, spoke as follows:

I take this opportunity of thanking you for the hearty welcome so graciously extended and wish to assure you on behalf of the American Association of Opticians that we consider it both an honor and a pleasure to hold our eighth annual convention within the borders of this great State. A State whose possibilities are unsurpassed, whose beauties are second to none, and the hospitality of whose citizens has no equal north or south, east or west. A State where every individual Indian is the proud possessor of $1,500 in cash and 160 acres of land. We presume the wealth of the sober, industrious white citizen is beyond computation. A State with an area in square miles greater than that of Scotland, Ireland and Switzerland combined, and nearly equal to that of England, Ireland and Wales. A State with 10,000 lakes, the waters of which did but yesterday team with finny millions. O, the devastation, the breaking up of fish families that even now may have begun, incident to the advent of the optical disciples of Izaak Walton.

In no other State where the sun shines with such brightness and beauty, is the air tempered with such rare, crisp, exhilarating, health giving qualities as in Minnesota. Nowhere is the hand of fellowship so freely given.

Medical laws, dental laws and pharmacy laws have, we believe, been blessings to the people of this land. Optometry laws will be a greater blessing, and to hold this the greatest gathering of its kind ever held upon American soil within the State that enjoys the distinction of having secured the passage of the first optometry law ever spread upon any statute book, is indeed fitting and appropriate.

I remember well that when a boy my parents often invited guests to our home. I remember the preparations that were always made. How willing we all were to do our share preparatory to the arrival of our friends. The lawn was clipped from the road to the stable, until it looked like a great green carpet. The trees and shubbery were pruned and trimmed, and the choicest fruits and flowers were saved for this notable occasion. The horses and the colts, the calves and the pigs, even the pups, were arranged so as to be shown to the best possible advantage. Indoors, loving hands were putting the spare chamber into the pink of condition. Viands that would make glad the heart of the oldest inhabitant, were being prepared in vast profusion. When the guests arrived it was hard to tell whether they or we were the happier. They were shown the flowers, the vegetables and the fruits. The colts, the calves, the pigs, and the pups were exhibited and put through their paces. Long drives that had been arranged and rearranged for weeks, were put into execution. Every day was a holiday for everybody, and when the parting came it brought feelings of genuine regret alike to guest and to host.

The feelings that prompted the preparation and execution of the scenes to which I have just referred in the days of long ago, are we believe the same that have prompted the arrangement of the entertainment to which we have all looked forward for months, and to which this is a most appropriate prelude. It is a lamentable fact that in many of our modern cities, conventions of some considerable magnitude come and go and no one is the wiser. Even the ubiquitous reporter appears upon the scene a day too late for the doings. This is not the kind of treatment we expect at the hands of the greatest city in the greatest State in the whole northwest. Some of us have been here before—we know what to expect.

It is not the key to the State or to the city that we want. With the acceptance of keys, comes the assumption of cares and responsibilities, the very thing we want to avoid. The very thing we want you to avoid. Throw away the keys, take a holiday and enjoy yourselves while making us happy.

Take us by the hand and show us what you have to show—not literally the farm products and the live stock, but the wonders of this enchanted land. View its beauties through our astonished eyes, enjoy them with us and when this convention draws to a close and with it another year in the history of this association, when the farewells have been said and our hearts are filled with regret, it would be a pleasure to know that the regrets were not all ours and that the happy recollections that will always be associated with this occasion are as dear to the entertainer as to the entertained.

Wm. R. Uhlemann, of Chicago, a famous tenor, then sang for the convention, and was received with tumultuous applause. He was followed by the representative of Mayor Jones, Ralph W. Wheelock, who gave a talk on the difficulties of the layman in grasping the differences between optician, oculist, optometrist, and other titles, adding that the bill seemed to amount to about the same in the end. As a reporter of the State Legislature, he stated that there was general difficulty in grasping the meaning of the bill for governing the practice of optometry, and added that even the reporters could not fathom it, so there was little hope that an ordinary legislator could do so. He concluded by a happy welcome to the city and the State.

Ex-President John C. Eberhardt, Dayton, O., responded to the welcome, and after thanking the representatives of the city and Commercial Club, he proceeded to speak of the beauties of the city of Minneapolis as he had seen them, proceeding from that to a description of the development of the state of amity between capital and labor in his home city as exemplified by the plans of the National Cash Register Co. for making better and happier the condition of its employes and of working out the application of the Golden Rule. Concluding, he was glad to see so many of the ladies present, and hoped that a future rule would be to provide a fine for any one attending these conventions without being accompanied by his wife or sweetheart.

"Our Lady Visitors" was the subject of A. B. Choate, of Minneapolis, and he handled his subject in a tantalizing manner. He spoke of having been a bachelor until within a year, and how he had learned that his former knowledge was not knowledge at all, that what he had supposed was true of womankind was not true, and that he did not understand the fair sex, nor did he believe the man lived who did. Fair woman was a puzzle, an enigma and a source of trouble. He likened her to a kitten, which seemed so cute and cunning and attractive and harmless, but nevertheless had sharp claws, which scratched painfully. But the lighter vein was but one side of fair woman, and he who viewed her from that point viewed but a portion of her character. Her completest character was in the sentiment suggested in the lines, "When pain and anguish wring the brow, a ministering angel, thou." And he extended a hearty welcome. Mrs. Wm. E. Houston, of Kansas City, responded to the speech with a few witty bits of repartee at Mr. Choate's expense, and thanked the committee for the welcome extended.

The crowd gradually broke up after listening to music from the quartette and the orchestra.

### TUESDAY MORNING SESSION.

President Holmes opened the morning session by reading a cablegram from a British optical association as follows: "Bristol—British Optical Association sends greetings and best wishes to their brethren in convention assembled." This evoked great enthusiasm, and it was decided to reply by mail (as the British association was not in session), returning hearty greetings and extending felicitations to President Dunscombe upon his being honored by the selection of a member of the board of examiners, after long consideration as to the merits of the various eligibles. P. Scholler, of Hancock, Mich., sent regrets for inability to be present and take part in the programme.

The president suggested the formation of a house of delegates, and inquired how many States had delegates present. It was found that there were present enough to make up regular delegates from Ohio, Minnesota and Iowa, to the number of 12 or more, and they were requested to hand in their credentials to the secretary and to organize if practicable.

Mr. Eberhardt suggested that it had been realized in previous conventions that the local representation was of necessity outnumbering that of the more remote sections, and the election of officers resulted in failure to distribute them well through the various sections. He moved a nominating committee be appointed to receive nominations for different offices, these nominations to be endorsed by five names at least. This was not to interfere with the right to make open

## Optical Department.

nominations, and the resolution was adopted.

On motion, a revision of the constitution and by-laws was taken under consideration. The constitution cannot be amended except by giving due notice at the previous annual meeting. B. B. Clark, Rochester, N. Y., presented suggestions for amending and simplifying the constitution, cutting out the provision for associate membership, and leaving simply active and honorary members, and by broadening the requirements of members to include any regular optician, and not limiting to members of State, territorial or local associations. On motion, it was filed for action next year.

Mr. Clark then brought up the by-laws, which it was found could be amended at any time. A suggestion was made to alter the annual dues to $2, except to members of affiliated societies, when they shall be $1. But where these affiliated societies agree to pay a per capita fee for all its members, it shall be at 50 cents per member. Considerable debate ensued over this provision, it being objected to on the ground that it made three classes of rates, and was confusing, so that possible members would not know in which they belonged.

It was suggested to make affiliation from all State and other associations as easy as possible by making it optional whether the associations would pay the dues of 50 cents per member, or else pay no dues, but leave it to the individual members to pay their dollar each. The $2 class was practically to be devoted to manufacturers, publishers and others who wished to show their appreciation of the objects of the association and make a contribution to the work. After making it clear that affiliation was to secure the moral support of the local associations, the amendment was adopted.

A further amendment was taken up to eliminate the part of Article 4, Section 1, which requires members to be eligible to election to office to be present at the convention so electing. Some objection was raised to this, on the idea that if absentees could be elected, it would tend to lessen the interest in attending the conventions; but it was suggsted that the right of ballot was in no wise infringed, and it was still possible for those present to limit the officers elected to those present should they see fit, and the amendment was passed eliminating that portion of the section named.

President Holmes then delivered his annual address, as follows:

PRESIDENT HOLMES' ADDRESS.

*Friends and Fellow Members of the American Association of Opticians*—Another year in the history of this organization is drawing to a close, a year that has not been behind its fellows in education, in legislation and in the favorable consideration accorded by the public. Two more States have secured the passage of optometry laws, making five in all, and there have been several failures, not inglorious failures, but good, substantial stepping stones that are certain to lead to ultimate success.

After Francis Wilson in the "Middle Man" had prepared and burned kiln after kiln, until he had exhausted his fortune, his home, and his credit, attempting to discover the lost art of making a certain kind of pottery, his daughter said, "Father, you are no nearer success than you were 40 years ago." "Yes, I am," was the cheerful reply, "I am 40 years nearer." His efforts were finally crowned with success, as ours will be, and it will not require 40 years to accomplish the passage of optometry laws in every State. Some States having these laws, have improved upon them by amendment, and the annual reports of State boards show cash enough on hand to demonstrate the fact that such boards will be a source of income to a State rather than a bill of expense.

Within one short year the words "optometry" and "optometrist" have not only been adopted by the profession, but they are being accepted and used by the press and the public. The affiliation plan is gradually working itself into a permanent and satisfactory proposition. Ten States are now in affiliation with this society, and others are on the eve of uniting with us.

The question is often asked, "What benefit will we derive from a membership in the American Association?" At the present time we can say you are brought into touch with an association of the most able and representative men of the whole country.

You have educational advantages if you will avail yourselves of them in the library of the physiological section and by taking part in the prize problem contest. Some of the States who have been struggling for legal recognition have received from this organization substantial aid in the form of cash donations, and this can always be done if we have the support of all the State societies. Ways and means must be devised whereby we may be able to hold out still greater inducements.

B. B. Clark, Rochester, in his annual address as president of the New York Society, said, "Of all the progress that has been made within the last 10 years, much of the credit is due to the men who are members of optical societies." A national association composed of delegates from all the States, can accomplish vastly more than can be achieved by the divided efforts of scattering subordinate societies.

It has been stated that this convention would be conducted as nearly as possible in accord with the present constitution and by-laws. It is still the intention of the officers so to do, but when it came to the arrangement of the programme it was discovered that there was no time allowed for amusement features we all so much enjoy. To comply strictly with the letter of the law, we would be in session all day, including evenings. Any officer who would so far forget himself as to arrange for evening sessions in the face of an entertainment committee such as we have in Minnesota, would be able to build Nicaraguan canals for a pastime, to regulate trusts after closing his office, and to do battle successfully with the Japanese army and navy single-handed and alone. The House of Delegates will be organized as early as practicable, and all routine business possible will be despatched as prescribed by the by-laws. It should be borne in mind that the organization of the House of Delegates is in no way intended to shut out members whose State societies are not in affiliation. It is a boiling-down process for the purpose of getting everything into an intelligible condition for the final action of the association in general session. It is calculated to be a time saver.

The needs of the physiological section have been fully set forth in President Grant's article in the programme. This section is doing a grand work and all who do not profit by it are standing in their own light.

A committee should be appointed early in the session to consider the advisability of adopting a new constitution and by-laws or amending the old. While there are a few who would love to listen to and discuss papers from 8 A. M. until 10 P. M., we must all admit that without some time for recreation and amusement we could not long exist. The by-laws should provide for this matter.

A committee on legislation should be appointed to prepare a series of instructions as to how to proceed to secure legal recognition. To formulate a uniform bill for presentation to legislatures. Copies of letters to the optometrist, instructing him as to the best methods of securing pledges from the legislators of his county or district, and drafts of letters suitable to be sent by the optometrist to his legislator should be printed and kept on hand at all times. The ins and outs of lobbying, committee work, selection of a Senator and Representative to "father" the bill, time and manner of introduction, etc., should be thoroughly explained. With such information, a State society would be much better equipped to enter a legislative campaign than they usually are. It generally takes one failure to learn these things.

A complete roll should be kept by the secretary of the members of every State society as well as of this organization. All dues should be paid to the secretary and these membership lists kept up to date and printed at regular intervals, so as to have an available roster at hand at all times. It was a serious problem and not a wholly satisfactory one, to secure a mailing list for sending out the programme this year.

An affiliation committee should be appointed, whose duty it would be to bring before every society at its annual meeting, the necessity of affiliation with this body.

A resolution or petition from an organization composed of the societies from all the States, would have great weight with a legislative committee and the individual members of any State legislature.

Each member of every society should constitute himself a committee of one to secure members. With plenty of members we can accomplish everything, but without members nothing.

President Holmes' suggestions were referred to the house of delegates for consideration.

Dr. G. W. McFatrich, Chicago, next spoke upon the necessity of a law regulating the amount of knowledge a man should possess in order to practice optometry. He spoke of having drawn away from the medical ranks and into the optometrical because of the rather strait-jacket methods of the former. He spoke of the birth of optometry being in the neglect of the medical associations to properly care for and attend to the needs of the eye. Optometry has gradually come up as a distinct science and its organization is a permanent one. A great deal has been said of the possibilities of curing strabismus "without the use of the knife," to use the common expression, although the knife so referred to is really a pair of scissors to clip the muscle, and really means without the intervention of surgical instruments. The statement made that there are no cases which cannot be so cured means that the speaker has not met such a case. Dr. McFatrich spoke of three different cases which represented three types. The first case yielded to treatment promptly, with the vision straightened and much improved. The second had run so long that ambiopia had ensued. He had compelled the patient to rely upon the weak optic, with the ultimate result that the weaker eye was much strengthened and improved, while the normal eye was normal, and both were straightened. The third and worst case was of a girl of nine years, whose vision in the right eye was 25-50, and the left was blind, and the latter continued so despite the use of all lenses. Continuing, he referred to the profession requiring both knowledge and support, but also character. He described the beauties of pure and clean character as compared with that which has lapsed from that pure state.

President Holmes referred to the third case, and mentioned having had similar cases. Mr. Eberhardt spoke of a device which he had used successfully in fitting an extra frame containing one opaque lens over the strong eye and none over the weak eye, thereby fogging the strong eye and forcing the weak eye to exercise itself. By exercising the week eye this way once or twice a day for brief periods, extending as the weak eye increased in strength, the ambioptic eye would gradually increase in strength, and in four to six weeks it was possible to read even fine print, while the effect upon the nervous condition was marked.

Next came the address of S. B. Millard, of Minneapolis, a very successful young practitioner. His subject was illustrated by two photographs of the case described, one showing the patient before treatment,

## Optical Department.

his face sad[illegible] distorted and twitching in paroxysm, a[illegible]he other after his eyes had been straighte[illegible]d and his features calm and placid. The address was listened to with great interest. It is entitled "Robbing Peter to Pay Paul," and will be published in full in a future issue of the CIRCULAR-WEEKLY.

Mr. Millard was to have been followed by E. LeRoy Ryer, New York, upon "A New Test for Myopia and Hypermetropia Based Upon the Chromatic Properties of an Eye." Mr. Ryer was unable to attend, and so sent his paper instead; owing to the lateness of the hour it was read by title and ordered inserted in the proceedings. It is published in full in another column of this issue.

Then followed an address by F. P. Barr, Lancaster, Pa., upon "The Value of a Prism." He had had some marked failures with prism work and some marked results, but the former were of the earlier experiences. The value of a prism is due to its developing capacity through rhythmic operation, developing the ocular muscles. The gymnastic exercises must be done consistently and constantly, the organs of sight must have the proper amount of food and support. The prism properly used tones and strengthens. He cited instances. Mrs. B., aged 44, had headaches since she was 20, and experienced severe paroxyms two and three times a week. Eyes were astigmatic. By treatment her eyes were developed and cured and the headaches and astigmatism vanished. Mr. M., aged 20, had pains in the top and back of the head and also in his limbs. He had given up business and tried tonics, electricity, baths and other treatment without avail. By inducing exercise with prisms, excellent results were attained and the patient was able to resume his work. The work of the prism is in contracting and relaxation in short and rhythmic development.

### SESSION OF THE PHYSIOLOGICAL SECTION.

Immediately upon the adjournment of the convention proper for lunch, the Physiological section convened, with President Grant, B.O.A., of Montreal, in the chair. The first thing taken up was the delivery of the president's address, as follows:

ADDRESS OF PRESIDENT GRANT OF THE PHYSIOLOGICAL SECTION.

*Officers and brother members of the Physiological Section of the American Association of Opticians, Greeting:* On this, the third anniversary of our natal day, it is meet and right that we take a retrospect of the circumstances under which the Physiological Section was brought into existence.

When ex President Eberhardt and those associated with him heralded forth the toesin of higher education, it was difficult under the then existing optometrical surroundings to determine the most feasible and efficient plan to concentrate the onward trend of the forces, whose tendency it was to add prowess and capacity to the earnest optical student.

It was felt that some means of demarkation should be instituted to designate the true student from the illiterate, to distinguish the earnest seeker after more knowledge from the ephemeral platitudinarian, to provide a landmark to separate the true from the false, the honorable from the nefarious, and to provide a designating title and badge of recognition to those who, by merit and ability, prove themselves worthy thereof.

On this basis the Physiological Section was erected, and I need scarcely point out the far reaching tendency of its aims and aspirations, upholding the welfare of the optical colleges and working hand in hand with the manufacturers for a higher class of optical work. I therefore confidently claim that it should receive the unbiased commendation and encouragement of all true friends of optical progress.

Brethren, the past year has many features of encouragement and emboldens us to press forward in the noble work in which we are engaged. The following optometrists have made application for membership and submitted a thesis to the Board of Regents: Wilmot P. Brush, Fredonia, Pa.; F. Schurmann, San Luis Obispo, Cal.; Geo. R. Bausch, Rochester, N. Y.; Earl W. Kostenbader, Groton, N. Y.; W. D. Feast, Washington, D. C.; David A. Lyman, Springfield, O.; Josephine J. Nixon, Marietta, O.

The decision of the Section as expressed by motion at last year's meeting, to establish a circulating library, has been carried out, thanks to the untiring energy of our secretary and our librarian, the books acquired partly by purchase and donations from kind friends, now form the nucleus of a very valuable library, a set of rules to govern the lending of the books has been formulated, and I have every confidence that members will increasingly realize the usefulness of this adjunct of our Section, and that it will be more fully patronized as the members become more aware of its value to them. Further details can be gathered from the report of the librarian, who, I have no doubt, will recommend that the names of the generous donors of books, with the titles thereof, be entered in full in the minutes of our proceedings as a slight recognition of their wholesouled generosity.

A "Problem Contest," for valuable prizes, awarded by the following manufacturers: Globe Optical Co., Boston, Mass.; De Zeng Optical Co., Philadelphia, Pa.; American Optical Co., Southbridge, Mass.; E. Le Roy Ryer & Co., New York; the W. H. Reisner Mfg. Co., Hagerstown, Md.; L. L. Mineer, Rochester, N. Y.; Jos. Friedlander & Bro., New York, under the immediate supervision of the vice-president, has been under way for many months in the columns of the *Optical Journal*. Our thanks are due to the proprietor of this journal for having dedicated space for this purpose as well as a weekly interchange of letters and experiences on optical subjects between members of the Section.

The number of contestants did not realize our expectations and a portion of the prizes remain unallotted. I would recommend that the contest be continued in the form of bi-monthly prizes.

It has been suggested that the Section adopt an academical diploma, and also an emblematic sash, both of which I recommend to your favorable consideration.

It has also been suggested that optometrists who have already passed State examinations, or who can exhibit a diploma from a reputable optical institution, be enrolled on application as members of the Section without the usual thesis.

These and other matters of interest, arising out of official reports, or individually brought forward for the good of the Section, will be laid before you.

All of which is respectfully submitted.

Following this report the secretary reported the financial condition. Cash on hand a year ago, $39.85. Dues received, $16; discounts received, $1.81, a total of $147.66, from which disbursements of $101.64 had been taken, including the establishment of a circulating library, leaving a present balance of $13.02. The treasurer's report coincided with the secretary's, and was by letter, the treasurer being absent. The librarian's report covered the establishment of the library, and the fact that so far only a limited number had taken advantage of the opportunity to utilize the library. The report was adopted.

President Grant then took up the matter of a diploma or certificate of membership to be issued by the Physiological Section, to be prepared in dignified form, containing five lines for signatures of the president, secretary and the members of the board of regents, testifying that the possessor of the certificate had prepared a thesis which had passed and been accepted by the regents. On motion this was left to a committee. He then took up the matter of adopting a designating badge or sash to be worn by members of the section as an indication of membership, to distinguish them from those who were merely members of the regular association, and who had not established their qualification for membership in the higher department by the preparation of a thesis. In line with this suggestion he presented a sash in tri-color, red, white and blue, joined by a rosette and bearing a white shield in front with the initials "P. S. A. A. O." to be worn from the left shoulder to the right side, in distinction to the military, which is worn the other way. The members present considered the suggestion, but it was finally decided to leave the matter to a committee, which should secure the opinions of the members and be governed by their judgment, and action was deferred until the next meeting. Adjournment was then taken until the following day.

### TUESDAY AFTERNOON SESSION.

Immediately after lunch on Tuesday, an attempt was made to organize a house of delegates. President Holmes got them together and it was concluded that the house of delegates was hardly practicable at this time. So after voting the referenee back to the general session of the president's address, it was voted to adjourn, subject to call, should it be deemed desirable.

President Holmes then took up an application for time in which to demonstrate the plan of the so-called Sheldon school of salesmanship, it being represented to be an instructive address, and the members voted to grant three-quarters of an hour to that end on Wednesday in place of C. M. Jenkins, who had advised of his inability to attend as expected.

After the naming of two committees, the convention adjourned.

Four chartered trolley cars were then taken in front of the hotel and the trip made to St. Paul to take the official photograph of the convention. The party then proceeded on the cars to White Bear Lake, about 10 miles out from St. Paul, where the various amusements engaged the attendants. There were boating, fishing, bathing, roller-coasters, chute the chutes, mirth castles and similar amusements at the disposal of the members at this point.

### WEDNESDAY MORNING SESSION.

The first matter taken up Wednesday was the treasurer's report, read by J. K. Stebbins, treasurer. The total receipts shown were $1,415.83, less disbursements of $802.78, leaving a balance of $613.05. On motion the report was accepted, and the treasurer voted $25 as special compensation, he having had the dues to collect and other work not intended to be laid upon the treasurer, as well as having miscellaneous expenses.

On motion the changes of by-laws, as passed upon, were ordered printed and the proper committee was instructed to have it done. Continuing the consideration of by laws, the provision for the house of delegates was practically eliminated and the duties of the secretary were more clearly defined to collect all dues, and the treasurer made custodian of moneys. The latter is to be required to file a bond of $1,000, the cost to be borne by the association. An addition to the by-laws was made, whereby it was provided that they may be amended

## Optical Department.

at any annual meeting upon a two-thirds vote of those present. The report was adopted. The president then stated that under the new by-laws just adopted any member of any State or territorial association may become a member of the association upon payment of $1 dues.

A letter was read from C. M. Jenkins, Richmond, Ind., stating his inability to be present and sending his paper.

It was stated that W. H. Covin would lecture on the following day on the Science of Modern Business Building. C. H. Taylor, of Yankton, S. D., sought time to talk on the development of children's eyes.

The committee on membership reported the following names for adoption: E. W. Grievish, Minneapolis; B. H. Doty, Wankon, Ia.; O. B. Tripp, Aberdeen, S. D.; M. H. Schleuder, St. Peter, Minn.; L. A. Shogren, Oshkosh, Wis.; G. R. Simans, Langford, S. D.; D. G. Gallett, Aberdeen, S. D.; Louis Hansen, Devil's Lake, N. D.; S. A. Rhodes, Chicago; F. Lyman, Bridgeport, Conn.; John A. Walman, Minneapolis; J. E. McKeon, Medford, Mass.; Fred J. Grewe, Detroit, Mich. The names were adopted as read.

Prof. S. S. Grant, president of the Physiological Section, then explained at length the objects and purposes of the section. Secretary E. Eimer, of the section, followed with an explanation of the manner of making application for membership, it being merely sending the applicant's name to him and upon which he sent back a series of questions to be answered in the form of a thesis. This thesis must be numbered and free from the name of the author. This is submitted to the board of regents, who read and pass upon it, and if in their judgment the author shows sufficient qualification for membership, they recommend his acceptance, using merely the number of the thesis, and returning that number to the secretary, who thereupon informs the applicant of his election. Mr. Eberhardt followed with a statement of the hopes of the section, of its aims and objects generally, and predicted that the section would ultimately become the power in optometrical associations of the country. President Holmes solicited members for the section and the hat was passed through the audience and nearly all present sent in their names as applicants for membership.

Professor Grant then spoke upon the "Value of Optical Instruments in Ophthalmic Work." He referred to the fact that opticians formerly worked on the exclusion method, but since the introduction of optometric instruments this has been changed and they now follow the inclusion methods. The former method of exclusion had nothing certain except the liability to much error. On inclusion the work is on the solid basis and the instruments give definite notice of error. He referred to the introduction of the various instruments and what had been accomplished by their use, including the ophthalmoscope, the ophthalmometer, mechanical retinoscopes, Maddox rod and other instruments, and declared that no true work can be done without them.

B. B. Clark, Rochester, N. Y., speaking on legislation, outlined the efforts of the New York association to secure the passage of a bill regulating the practice of optometry in that State. Efforts had been made to interest the physicians of the State in the bill and many favorable replies had been received from them. He concluded by suggesting that the legislative committee of the association be utilized by members in different States to furnish information and advice regarding the work of securing State legislation, with drafts of bills.

Prof. J. W. Grainger, Rochester, Minn., president of the Northwestern Optical Association, next spoke on "Some Things Which the Optometrist Ought to Know." He spoke of there being a complete connection between the eye and all parts of the nervous system. He thought it the duty of optometrists to secure the best books and journals upon the science and to keep informed. He should study diseases of the eye and predicted that the time is not distant when the optometrist will be legally authorized to treat diseases of the eye. He outlined the work of the Northwestern Optical Association, with its membership of medical men, as well as opticians. He believed it to be the duty of the optometrist to confine himself to the work of optometry and not attempt to carry on several lines at once. Professor Granger is a member of the State Board of Optometry and stated the law in the State to be working well. He objected to the law requiring the annual payment of a fee of $2 to keep an optometrist licensed, and thought it humiliating that an optometrist should not be licensed as are physicians. In conclusion he urged optometrists to confine their work to that of their own line and not infringe upon the physician. He urged them to place a value upon their services, knowledge, etc., and to live in harmony with each other, speak well of each other's work, etc.

### Wednesday Afternoon Session.

The afternoon session was opened with Charles Nerbovig, of Mankato, Minn., speaking upon "Hyperopia and the Phorias." He showed drawings of a pair of normal eyes working under normal conditions, and figured the strain when working by reading at 13 inches at 100,000 units, or 10 times that for the system. Working under normal conditions there would be simply the normal strain, but if the eyes were hyperopic, say one extra diopter, the extra strain at the same distance, he figured, would amount to an increase of strain amounting to perhaps 23 per cent. He spoke of exophoria. If hyperoptic astigmatism is present it is natural to look for some disturbance of the nervous system, which, if not caused entirely by the eyes, is largely so. Remedy the trouble with the eyes and nature will do the rest. He mentioned a case which he had of a young man of 19 who was subject to epileptic spells every five days. He never had a headache or trouble with the eyes, general health and appearance were good, with a head larger than normal. He found that he was one degree exophoria and hyperopic. After 34 days' treatment the man was much better. A second case had headaches to such an extent that he could not read five minutes in the evening, and had treated with eight or nine oculists and opticians. The right eye was 20/40 and the left 20/30, one degree exophoria. He reduced the vision to 20/50 and after two months the man wore 20/20, plus and was relieved of headaches.

Wm. E. Huston, Kansas City, spoke on the "Eye, Mind and Purse, the Advertising Triune." Starting with the statement that the sympathetic nerves connect with all the vital portions, he urged upon them to consider all means of placing themselves in a position to appeal for patients and to become in touch with them to the end of securing business and acquiring money. The science of advertising he declared to be a 20th-century production, which furnishes the missing link to success. A successful man is a tactful man. Cleanliness and carefulness of the person is a good advertisement, with the patient close at hand and watching every feature. Every thought creates mental influences which have their effect upon the good luck. A large railroad has recently adopted phrenology to select its employes by. Not to know phrenology is a handicap, for it gives knowledge of the intending patient as to temperament and how best to deal with him.

Prof. Geo. A. Rogers, of Chicago, followed with an elaborate sarcastic paper upon "Lunaphoria or Frenzied Optics." He had changed the title of his paper from that appearing on the program. He spoke of a new disease which has made its appearance among opticians, a new kind of phoria which, for lack of a better name, he had termed lunaphora or a tendency to become loony. It manifests itself in a tendency to cut the acquaintance of the only friend which the optician ever had. Refraction lenses are no longer to be used to correct errors of the eye, but to correct all the diseases that flesh is heir to, from ingrowing toe-nails to insanity. Lenses are worn to make fat people lean and lean people fat; to make honest people of knaves and to reform liars; to cure men from staying out nights, and to eliminate general cussedness in them; to cure bashfulness in young men and awkwardness in young women. Glasses are to be used to reform unruly school children and to correct the hoodlums, so that an optometrist is to be a part of the faculty of every reform school. Glasses are to supplant the Keeley cure. Concluding in earnest he did not regard it the province of the optician to cure, or to attempt to cure, troubles in the province of the physician. In the field of refraction the optician is safe—safer than the physician. His ambition should be to do the great things of refraction in the optical profession and to be known as having the best of refractionists' knowledge.

A paper of C. M. Jenkins, Richmond, Ind., was read by title and ordered printed. Its title is "Some of the Diseases Essential for the Up-to-date Optometrist to Recognize."

The concluding address of the day was by John C. Eberhardt, of Dayton, on a "New Method of Individual Exercising of Recti and Oblique Muscles," which will be published in a subsequent issue of The Circular-Weekly.

Adjournment followed and chartered trolley cars were taken to historic Minnehaha Falls, within the city limits of Minneapolis, for the entertainment feature. Owing to

## Optical Department.

the incomplete condition of the tracks to Fort Snelling two miles beyond, the trip to the fort had to be abandoned, and the remainder of the afternoon was spent in the park at the falls and visiting the various things there, including the extensive Zoo, the State Soldiers' Home and the park generally.

MEETING OF THE PHYSIOLOGICAL SECTION.

Before the regular session convened the Physiological Section held a session. The minutes of the 1904 meeting were read and approved. The secretary's report showed a membership a year ago of 86, and six had been added since, making a total of 92. The report advised the election of one person for the offices of secretary and treasurer, to obviate expense and delays, and the treasurer to be bonded. The practice of remitting dues by personal check should be discouraged unless exchange is added. The monthly contest should be continued and to be open to all whether members or not. Those answering 80 per cent. of the questions for three months should be made members. He concluded by calling attention to the circulating library.

On motion the office of secretary and treasurer were combined in one person, to be bonded. It was further voted to pay the secretary $50, to cover his expenses and the cost of attending the annual session. The matter of the contest was left in the hands of the same committee as last year. Three prizes were unawarded last year, and it was suggested to submit them again this year for a bi-monthly or quarterly contest. Some questions are to be formulated, either physiological or anatomical. Another suggestion is for the section to take up some standard work of optometry and study it, say five chapters for a month, and to be questioned thereon.

The following were named as successful in the contests for prizes: David Lloetzky, Pueblo, Colo.; F. M. Taylor, Pasadena, Cal.; Miss Edith Gallup, Denver, Colo.; Neil Smith, Superior, Wis.; Russell D. Smith, Caledonia, N. Y. The by-laws were amended to allow membership by any one capable of passing the examinations of those States having State optometry boards, where the examinations are regarded by the Board of Regents as satisfactory, without having to submit a thesis, subject to the approval of the Board of Regents. This does not apply to those registered, but to those who actually pass a rigid examination before a board, and it was understood that the regents still had the power to require the thesis if they saw fit, but might waive it.

The election of officers of the Physiological Section resulted as follows: President, S. S. Grant, Montreal, Can.; vice-president, W. R. Donovan, Boston; librarian, C. M. Jenkins, Richmond, Ind.; secretary treasurer, E. Eimer, Muskegon, Mich. All were re-elected with the exception of the treasurer of last year, his office having been joined to that of secretary. Secretary Eimer urged those not members to join the section, and stated that no one who made a faithful attempt at answering the questions, if he showed any capacity whatever, would be turned down. The Physiological Section then adjourned to meet at the next annual convention of the American Association of Opticians.

THURSDAY MORNING'S SESSION.

The first matter coming before the Thursday session of the American Association of Opticians was a paper by Dr. E. C. Roberts, of Red Wing, Minn., entitled "What is Presbyopia," which will soon be published in THE CIRCULAR-WEEKLY.

This was followed by a discusion upon a minimum price list presented by E. F. Renaud, of Keokuk, Ia., who briefly stated the needs of closer conformity in prices for glasses and repairs, replacing lenses and the like, and urged a committee upon the subject, to report at the next annual meeting. This committee was afterwards named as follows: E. F. Renaud, Keokuk, Ia., chairman; F. P. Barr, Lancaster, O.; P. Scholler, Hancock, Mich.

B. B. CLARK.
President-Elect of the American Association of Opticians.

Next came the regular business of the day, an address and clinic of Dr. Chalmers Prentice, of Chicago, upon "Growing Light, Higher Optometry." He stated that glass fitting had been in great part confined to producing good vision, but there were greater possibilities. The eye is an organ capable of doing absolutely nothing of itself, and no organ of the body can perform any function. The eye and other organs are similar to little motors which have in themselves positively no power to do anything. They have a wire which connects them with the power house, and when the power or energy comes in the proper quantity they work. Too much energy will cause a motor to run too fast, and it will tear itself to pieces. Too little power will cause it to run feebly, and no power or energy will cause it to stop entirely. Every organ of the body is somewhat similarly an engine or motor, dependent upon the power house or brain for power and energy, which it receives over the wires which we call nerves, and which carry nerve force. The muscles connected with the eye have no power in themselves to operate with, but are dominated entirely from the brain. The centers in the brain operating the eye are the largest in the human brain. Hence in dealing with the eye an optometrist is not treating with that organ, but with the brain. Fully one-third of the gray matter of the brain or more is taken up with vision and to keep up an adjustment of the eyes that binocular vision may continue. Every center of the brain is connected with every other part, and an effect upon one part is immediately communicated to the others. Vision does not take place in the eye, but in the brain. His hearers were reminded that they frequently had patients who exhibited different conditions of refraction and muscle balance. The optometrist cannot grasp the situation of his patient without looking into the physiological condition. He cited the example of a patient who might be of an excitable temperament, fairly responsive, but not wholly so. Esophoria is concluded to be the case and the patient is fitted with glasses which relentlessly lock up his condition and vision to a condition which increases the strain upon the nervous force to double what it formerly was and results in a condition dangerous to reason, if not to life itself. The optometrist must exercise the greatest care in dealing with the eyes, for he is dealing with the centers of the brain and almost with the soul itself. If careless work is done, the results will be an awful responsibility which none will care to contemplate. The fourth ventricle of the brain has cells of the brain having a part of the origin of the 11 or 12 cranial nerves. In part of these are the nerves governing the external rectus and also connected with the liver and with the kidneys. A strain in the external muscles, connected with these cells, which lie so intermingled, is bound to affect the connecting cells associated with the liver, heart, kidneys or other organs. All action is central. The brain is capable of raising the vision to almost perfection under certain conditions, and it can take many times its share of the energy from the central power house, which is drawn from the portion belonging to other portions of the body. Some organ or other is bound to be affected and to show a resultant affection and disturbance. When latent strains are found and relieved, then the power is restored to the portions thus robbed, and all parts of the body are again ready to take up their full task and to resume normal action. It is therefore not so incredible to say that under certain conditions certain diseases may be cured by restoring that which was taken from it. But the dynamic action is not the whole thing. Everything is not to be cured by glasses. Other things are to be cured by psychic conditions.

You can get marked action on the brain by the use of a fog on the eyes and by prisms and spheres you can secure action of the brain. There are certain diseases which show promptly whether you are on the right track, such as stammering, St. Vitus dance and others. He related a case of pneumonia which he had in a clinic in Chicago, when by fogging the patient with dense fog and prisms the pulse fell in two hours from 128 to 80; pain in the lungs ceased and temperature came to normal. This was done by catching the disturbed nerve cen-

## Optical Department.

ters and easing them, and the results were permanent.

The clinic was then taken up, several cases being conducted at once. The first patient was W. B. Page, of 633 Marshall Ave., St. Paul, a student in the State University, 21 years of age, who stammered since seven years of age, sometimes worse than others. Stammering was accompanied by facial paroxysm. Exophoria was found to be present. After being fogged for a time he was given a newspaper to read, and after some trial read with improving results, although occasionally stammering. He was kept on the platform for an hour, and at the conclusion was considerably improved. Anton J. Klimek, Little Falls, Minn., himself an optician, and wearing glasses, was next. He also stammered and had done so since six years of age. Sleep was irregular, pains in the back at times and had been occasionally informed of walking lame, although unconscious of it. When so informed he resumed a normal gait. This case responded almost immediately. Dr. Prentice worked a reversal of strains through fogging. He found three degrees of exophoria manifest and stated the manner would be to continue the reversal of strain as long as it seems necessary and then proceed with refraction.

The third case was that of F. K. Randall, Phillips, Wis., a jeweler, known to several present to have been deaf in the left ear for 14 years. Dr. Prentice started on the assumption that it was a case of pressure on the visual centers spreading into the auritory centers. After fogging with the densest fog, not sufficient, however, to entirely cut off vision, for it is repression and not suppression which is desired, he explaining that repression induces an effort on the part of the muscles to secure vision through the weak eye which results in a forced relaxation of the cilliary muscle. A fourth case was of an old man with partial deafness. Cataracts had been removed from both eyes and one eye was entirely blind. After experimenting, Dr. Prentice stated that nothing could be done. He had but one eye and no comparisons could be instituted. Exophoria probably resulted in his blindness and affected the auditory cells. Had it been taken earlier his hearing and vision could probably both have been saved.

J. C. Eberhardt stated his expcrience that in cases of loss of sight it was frequently accompanied by loss of hearing and upon restoration of sight the hearing upon the same side was renewed. The case of partial deafness, entire in the left ear was resumed and after about half an hour the man could hear through the deaf ear, with the right entirely closed. He stated that he had been unable to hear the tick of an alarm clock in that ear although held close to the ear and he could feel its throb, and that his hearing was better in that ear than it had been for fourteen years. Dr. Prentice stated that the cases were not cured but would require treatment, they having received what might be termed a mechanical chloroform which allowed the overexerted portions to relax, forced them to do so and brought up the under used muscles into action. Adjournment was taken for lunch.

THURSDAY AFTERNOON SESSION.

The committee on membership read the names heretofore reported for membership and recommended their acceptance, which was done.

E. Hardy, Boston, spoke on "The Advantages of Special Lenses." He mentioned the fact that manufacturers sometimes receive some ridiculous measurements and suggested that opticians should be familiar with measurements generally. He outlined the various special shapes which have been used, the drop, the full eye, round lens and others. Round lenses he objected to as giving the patient an owlish appearance and are not to be advised except to protect the eye. Special shapes

SAMUEL S. GRANT.
President of the Physiological Section.

and large lenses afford a larger range of vision and are recommended to be sized according to the needs of the wearer and his occupation. A bookkeeper needs a good range of close vision while one who is outdoors considerably needs much less The bifocal lens is growing in use he said. The size of the wafer is to be varied according to the wearer's needs but the round wafer can be generally used with great satisfaction. Frameless lenses are very popular in this country, although in England they are used but little. They can be fitted better than those with rims. Opticians should study the features of the patient and should accommodate the features as there are many who refrain from wearing glasses and will rather suffer than put on anything which is unbecoming.

The nominating committee made its report and after slight balloting the following ticket was selected:

President, B. B. Clark, Rochester, N. Y.; first vice-president, Briggs Palmer, Boston, Mass.; second vice-president, Wm. O. Sommers, Chicago; secretary, W. E. Huston, Kansas City, Mo.; treasurer, J. K. Stebbins, Ashtabula, O.; executive committee, George R. Bausch, Rochester, N. Y.; S. B. Millard, Minneapolis, Minn.; Alexander K. Martin, Philadelphia; H. J. Cook, Knoxville, Tenn. New member of the board of regents, E. W. Eisenschmidt, Louisville, Ky.

The place of meeting for 1906 called out invitations from Rochester, N. Y.; Niagara Falls, N. Y.; Atlantic City, N. J.; Cedar Point, Sandusky, O.; but the sentiment was overwhelmingly in favor of Rochester, and upon motion, the vote was unanimously in favor of that city.

Mr. Eberhardt now spoke of the careful attention and hard work which President Holmes had given the association during his term of office and in recognition thereof and on behalf of the association and those present, all of whom had made donations for the purpose, he presented him with a handsome silver loving cup, as a memento of the year in which he was president of the American Association of Opticians. Mr. Holmes responded very feelingly and expressed his deep appreciation of the gift.

President-elect Clark was next brought to the platform and expressed his appreciation of the honor conferred upon him by being made president, and promised his most earnest and best endeavors to serve the association and the profession during his term.

Adjournment was now taken to take up the entertainment feature of the day which included a trip to Lake Minnetonka, a beautiful lake about 18 miles west of Minneapolis, and a tour of the lake on small steamers. The remainder of the afternoon was occupied in the tour of the lake and admiring the beauties of that resort. The party was landed at the Tonka Bay hotel in time for supper in the evening and after a charming social time the train left for the city at 8 P. M., and the 1905 convention of the association was ended. Most of those attending took the evening trains out to their homes but a number remained in the city for a further acquaintance with the sights of the Northwest.

EXHIBITS AND DISPLAYS.

The Murine Eye Remedy Co. had an elaborate display, calling attention to its preparation. Free samples were distributed, as well as serviceable pencils, and convenient pocket mirrors.

The Geneva Optical Co. displayed and demonstrated two of its leading instruments.

The Bay State Optical Co. had a display of its various products.

The Globe Optical Co. did not forget to call attention to its many lines.

The Meyrowitz Mfg. Co. had a general display of its goods, including the Finch eyeglass attachment.

Sischo & Beard, St. Paul jobbers, had a complete display of their general line.

The firm of T. G. Hawkes & Co., Corning, N. Y., had a cut-glass display.

The Eye-Fix Remedy Co. was present with displays of its remedy in different sized packages. Souvenirs of aluminum book-marks, celluloid dice boxes with a set of five dice and others were passed.

The badges of the convention were very handsomely designed, and were the gift of C. A. Wilkinson & Co., of Providence, R. I.

# WALTHAM WATCHES

## Observations by Great Observers

From the Autobiography of HERBERT SPENCER, Vol. II, Page 167, American Edition.

HERBERT SPENCER

"The presentation watch named in Prof. Youman's letter, was one of those manufactured by the Waltham Watch Company. . . . It has proved a great treasure as a time-keeper, and has excited the envy of friends who have known its performances."*

*"I find in a letter written in December, 1880, after the watch had been in my possession fourteen years, a paragraph respecting it which may fitly be quoted:—'I have several times intended to tell you how wonderfully well my American watch has been going of late. It has always gone with perfect regularity, either losing a little or gaining a little; but of course it has been difficult to adjust its regulator to such a nicety as that there should be scarcely any loss or gain. This, however, was done last summer. It was set by the chronometer-maker in July, and it is now half a minute too slow; never having varied more than half a minute from the true time since the period when it was set. This is wonderful going. As the Admiral says, one might very well navigate a ship by it."

("In 1890 it wer. with equal nicety; lost 42 seconds in half a year.")

RALPH WALDO EMERSON
From a drawing made in 1857 by S. W. Rowse, now in possession of C. E. Norton.

RALPH WALDO EMERSON, the Concord Philosopher, used the Waltham Watch as a type of the highest development when he wrote in one of his Essays on Eloquence, in speaking of a man whom he described as a leader and a Godsend to his community:

"He is put together like a Waltham Watch."

THE CITY TEMPLE
Holborn Viaduct

The REV. R. J. CAMPBELL, in a sermon preached at the City Temple, London, on Sunday, September 18th, 1904, spoke as follows:

"When I was in the United States last year, I visited the well-known Waltham Watch Factory; some of you now are wearing the products of this American manufactory. Do you understand, or do you ever try to understand how it is that you are able to afford these articles as compared with the earlier day? I will tell you: It is because the brains of a whole army of men are concentrated in that marvellous institution. I remember asking my guide, as we went from room to room, 'How many watchmakers of an older day do you estimate sit on each of those stools, and the men who do the work by machinery—how many are they equivalent to?' He replied: 'Everyone you see at work here is equivalent to fifty at the very least of operators who lived before this day, conscientious and able though they may have been.' Inventions have increased the working value of every individual man; they have raised the level of the productive output of the civilized world. So it is in higher region."

## Old Sun and Nocturnal Dials.

(Translated expressly for THE JEWELERS' CIRCULAR-WEEKLY from the German of MAX ENGELMANN, in the *Leipziger Uhrmacher Zeitung.*)

PART I.

THE age of technical proficiency in which we live; an age whose marvelous achievements in the construction of clocks and astronomical instruments have rendered possible the calculation of astronomical time to the fraction of a second, and which possesses in the electric spark the most perfect means conceivable of transmitting these results with absolute accuracy to the remotest parts of the earth, has caused the sun and nocturnal dials, by means of which men reckoned their time

FIG. 1.

for hundreds and even thousands of years, to be almost entirely forgotten.

Occasionally we meet with a recently constructed portable sun dial, but it is only with the portable kind of dials that the present article is concerned. It is intended to serve as a help to travelers to determine their position in desert places. Otherwise sun dials belong to the past, and the few specimens that have come down to us are to be met with, as a rule, only in museums. There they serve as illustrations, so to speak, of that great chapter of the history of the measurement of time, which teach us how important and extensive was the science of gnomonics (from "gnomon" a shadow-projecting style), a science associated with the most prominent of the names of our old astronomers and mathematicians. A few facts from the history of sundialling will perhaps not be unwelcome.

The more advanced in civilization of the nations of antiquity had learned at an early

FIG. 2.

date to use their knowledge of the motion of a shadow for marking the divisions of a day and of longer intervals of time. The pyramids and obelisks of the Egyptians, built about 3000 B. C., with their sides facing the cardinal points, were, in virtue of the uniform changes in the direction of their shadows, the first great indicators of time. The gnomon, or shadow-projecting style, was known to the Chinese as early as 1100 B. C. We may safely assume that the Babylonians and Phoenicians were acquainted with a kind of sun dial in our sense of the word. The passages in the Bible (Isaiah 38, 8 and II. Kings, 20, 9-11) referring to the sun dial of Ahaz, King of Judah (736-725 B. C.), are the earliest historical allusions to these instruments, and prove that they were known to the Hebrews.

Passages are to be found in the writings of the ancient Greeks from which we may conclude that they reckoned their time by the varying length of a shadow expressed in feet. Aristophanes (390 B. C.), for instance, in one of his comedies, speaks of a supper which was partaken of "when the shadow was 10 feet long." The invention of the portable sun dial is attributed to the Chaldaean Berosus, who taught in the island of Cos, opposite Miletus, about 640 B. C., and who constructed the heliotrope or scaphium, a hollow stone hemisphere in the center of which a style was fixed for

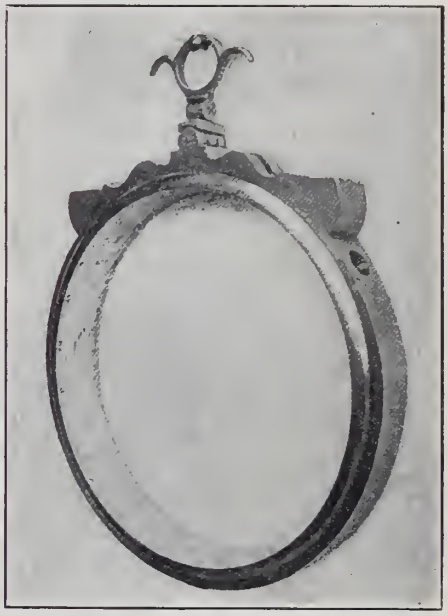

FIG. 3.

projecting a shadow. Instruments of this type were used for a long time by the Greeks and Romans. Similar scaphia have been discovered in Tusculum (1741), in Castelnuova (1751), in Herculaneum (1762), and more recently in Greece. The invention of the sun dial has also been ascribed to the Greek Anaximander (about 560 B. C.). Eudoxus of Cnidus (about 400 B. C.) is said to have constructed a special form of sun dial, called the Arachne, but the the mode of construction of this instrument, like that of the "axe-shaped" dial of Patroclus (395 B. C.), called the Pelcinon,

the "quiver-shaped" dial of Apollonius (200 B. C.), and many others mentioned in ancient records is unknown to us. We are indebted to Marcus Vitruvius Pollio (about 15 B. C.), the architect of the Emperor Augustus, for information concerning these ancient sun dials. The Arabs are known to have possessed extensive astronomical and gnomonical knowledge at an early period.

Details of the construction of a number of sun dials from the pen of one of their writers, Aboul Hassan, who lived in Morocco about 1250 A. D., are extant. The Spaniards, who had attained a high degree of civilization about 1000 A. D., learned the science of gnomonics from the Arabs, and in their turn spread the knowledge of this science over the whole of Christian Europe.

Among the intellectual giants who received their education in Spain was Gerbert of Auvergne, who afterwards became Pope Sylvester II. (999-1003); the first sun dial provided with a magnetic needle is said to have been made by him. The science of the construction of gnomonical time indicators soon became an important and favorite branch of mathematics, especially in Germany and France. A prominent section of the science of astronomy, it developed a special geometrical method.

Of the numerous illustrious men of science who lived during the period from the 15th to the 18th centuries, it will be sufficient to mention the following, with the dates of the appearance of their epoch-making writings on this branch of science: Regiomontanus, 1474; Peter Apian, 1524; Sebastian Münster and Orontius Finäus, 1531; Bartholomew Scultetus, 1572; Salomon de Caus, 1624; La Hire, 1682; Doppelmayer, 1719.

The demand for a simple, practical instrument for determining the time at night led to the construction at an early date of nocturnal dials. These were known as lunar or astral dials, according to their arrangement, and it was Sebastian Münster in particular who helped to make them popular.

The number of different kinds of sun dials made during the last few centuries, often with the addition of all manner of contrivances for rendering them more generally useful, is very great. Many of these are valuable, not merely by reason of their technical utility, but from the point of view of art history, on account of the artistic character of their fittings and decoration; and it is to this circumstance that many sun dials owe their preservation.

The Royal Mathematical and Physical Salon, at Dresden, has a large collection of over 70 specimens of these old dials, and we proceed to give a description, with illustrations, of some of them, for the benefit of those interested in the subject.

SUN DIALS.

In the dial, represented in Fig. 1, and made in 1561, we again see an arrangement similar to that of the scaphium. This instrument, richly inlaid with gold, was formerly the property of the founder of the collection in question, the Elector Augustus I., of Saxony (reigned 1553-1586). The style, unfortunately lost, was fixed vertically in the center of an arc, whose feet were fastened to the right and left in the middle of the broad rim, the arc thus standing at right angles to the meridian line of the instrument.

The time was indicated by the point of the shadow thrown by the style. As in this dial the position and length of the style were invariable, the dial plate was so arranged as to be adaptable to the varying declination of the sun. It is known that the sun in his apparent course is constantly rising during the first half of the year, attaining his highest point, 23½° north of the equator at the Summer solstice. It then gradually declines, reaching its lowest point, 23½° south of the equator, at the Winter solstice. This, of course, produces a lengthening and shortening of the shadow. In this instrument all the months are represented by cross lines marked in the middle of the dial by the initial letters of the Latin terms for the signs of the zodiac. The hours and their subdivisions can be ascertained by means of the longitudinal lines and their intersections. The division

Fig. 4.

of the broad rim into twice 32 parts served the purpose, with the aid of a weathercock, of determining the direction of the wind.

The annular or ring sun dial came greatly into use after the appearance of a work by Gemma Frisius (1548), in which it was described and explained. An instrument of this kind is shown in Fig. 2. It is of the size of an ordinary watch, and was made in 1562 by the famous Augsburg goldsmith, Christopher Schissler. The compass for the orientation of the instrument is fixed in the case itself. The actual sun dial is attached to the case by a hinge, and is placed at right angles to it. In the broad ring a second smaller ring turns round an imaginary horizontal axis pointing due east and west. This smaller ring is provided with a small aperture through which a sun ray passes and indicates the time on the opposite inner edge.

The instrument can be transformed into a small armillary sphere by means of other adjustable rings and parts. The outside of the cover is so arranged as to enable the observer to determine graphically the course of the sun and moon, and to change ordinary into planetary time. The inside contains a perpetual lunar calendar with adjustment of the phases of the moon. The bottom contains on the inside a small astrolabe with a rule for adjusting it, and on the outside a system of intersecting lines for changing Nurnberg time into solar time.

An instrument for measuring time similar to the one just described was the solar ring, also called sea ring, as it was much used at sea, better results being obtainable on the unsteady deck of a ship with an instrument maintaining a constant vertical direction by its own weight than with one resting on a plane surface.

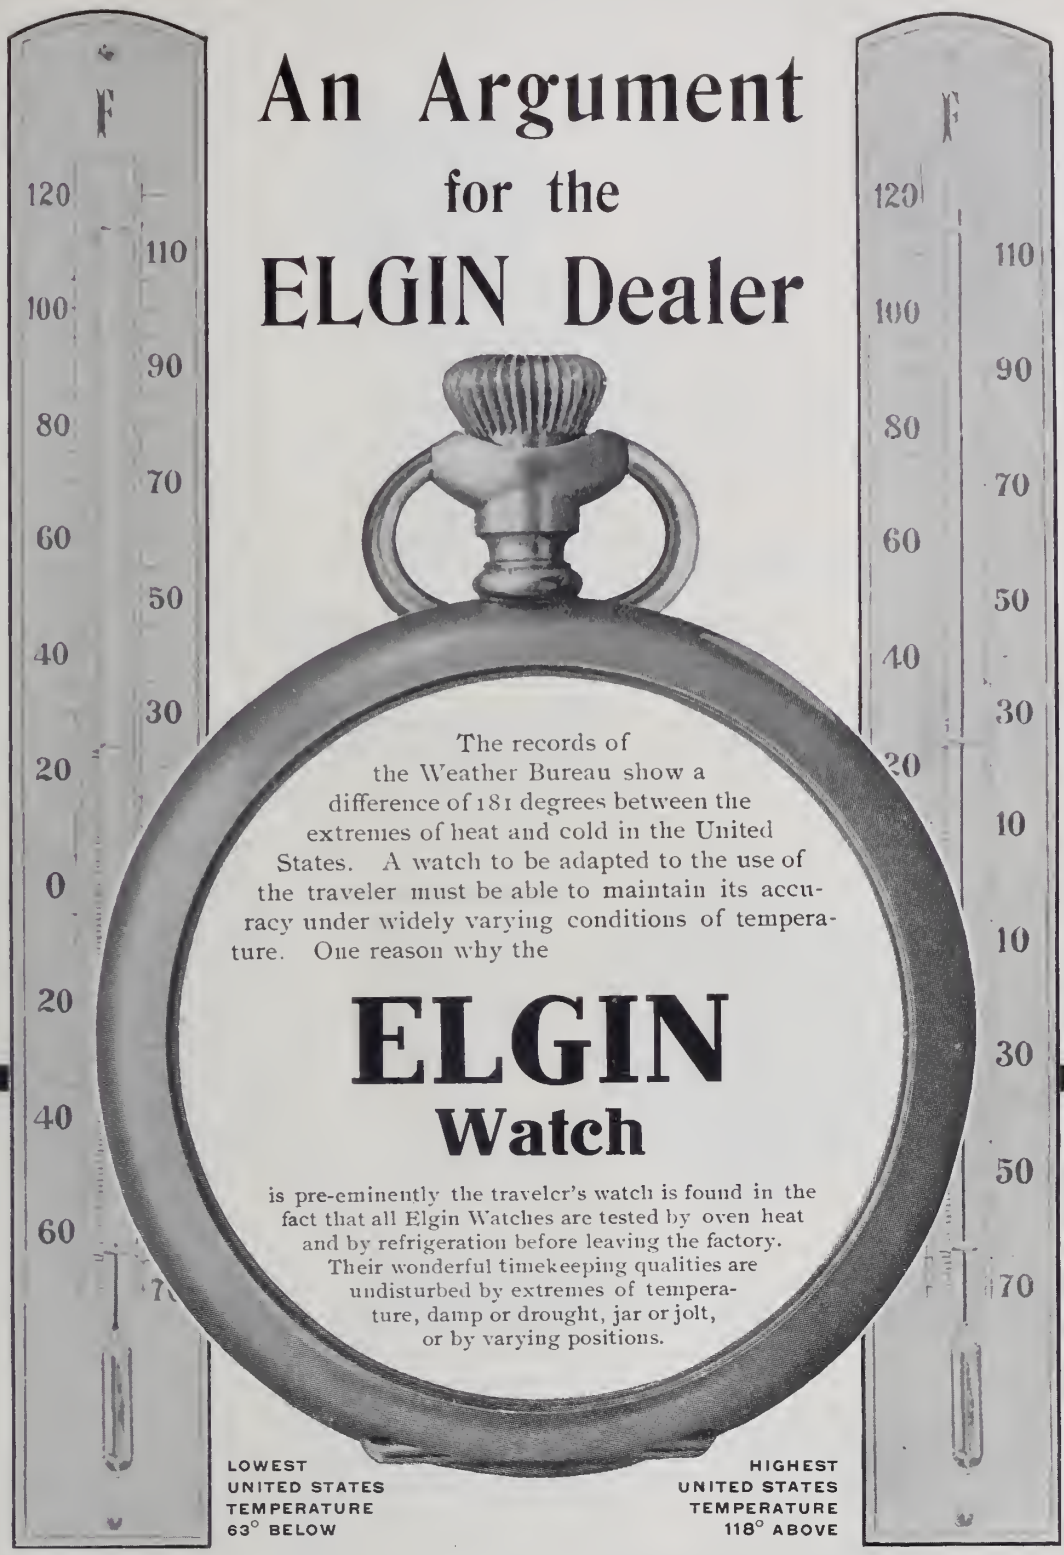

Fig. 3 shows a bronze sea ring of this kind, 220 millimeters in diameter, and constructed probably about the beginning of the 17th century. This ring, constructed, as we have mentioned, for finding the time, was suspended from a hook and placed in the meridian plane. It has a funnel-like aperture, 45° from the zenith point, and a ray of sunlight penetrating through this aperture forms a point of light on the opposite inner side of the ring, which shows the hour. This inner side of the ring is covered with a movable silver strip on which the intersecting hour lines are drawn in such a manner as to correspond, like those in Fig. 1, with the varying declination of the sun. The massive projections under the point of suspension contain small compasses for orientation.

The solar quadrant may be regarded as one of the oldest instruments for the measurement of time. Records of observations are found in the diary of Columbus which must have been made with an instrument of this kind, but the solar quadrant was known at a much earlier date. The difference between the solar quadrant and other sun dials is that in the former the time is found by direct observation of the sun instead of being shown by a shadow or point of light. This instrument was also extensively used at sea and possessed this advantage over all other sun dials that it could be used even in foggy or cloudy weather when the sun was only visible as a faint ball of light. A quadrant is the fourth part of a circle. Its arc is graduated and generally shows the hour divisions in addition. It is provided with a plumb-line suspended from the vertex of the right angle of the quadrant. One of the two radii forming the right angle has two diopters through which the sun was observed.

The quadrant shown in Fig. 4 forms the back of a combined sun and nocturnal dial made in 1514. It is a pocket instrument, 92 millimeters in area, and the diopters are, of course, made very small, appearing as small projections on the right side of the instrument. In taking an observation, the quadrant was held vertically in the hand and turned about till the sun's disk became visible through the diopters; the altitude of the sun was then shown by the freely hanging plumb-line on the graded arc, and the correct time on the curves drawn in a vertical direction above the degree divisions, the readings being preferably taken by a second person.

On the same side of the quadrant as that on which the diopters are fixed are to be seen the signs of the Zodiac representing the

# An Argument for the ELGIN Dealer

The records of the Weather Bureau show a difference of 181 degrees between the extremes of heat and cold in the United States. A watch to be adapted to the use of the traveler must be able to maintain its accuracy under widely varying conditions of temperature. One reason why the

## ELGIN Watch

is pre-eminently the traveler's watch is found in the fact that all Elgin Watches are tested by oven heat and by refrigeration before leaving the factory. Their wonderful timekeeping qualities are undisturbed by extremes of temperature, damp or drought, jar or jolt, or by varying positions.

LOWEST UNITED STATES TEMPERATURE 63° BELOW

HIGHEST UNITED STATES TEMPERATURE 118° ABOVE

The above is one of the many good arguments for the Elgin Watch, all of which help the dealer to sell Elgins.

See Jobbers' list for prices or write the Company.

Every dealer is invited to send for the Elgin Art Booklet, "Timemakers and Timekeepers," illustrating the history and development of the watch.

months of the year; months whose days are of the same length (*e. g.*, February and September), with subdivisions denoting the days, being placed together one above the other in one column. The subdividing lines are conceived as forming concentric circular arcs when produced, intersecting the hour lines. The forenoon and afternoon hours are distinguished in the latter.

In the quadrant (Fig. 4) only three lines are actually produced—the middle line representing the vernal and autumnal equinoxes, and the upper and lower lines the Summer and Winter solstices, respectively. In taking observations the required time would therefore be indicated by the hour lines nearest to the point of intersection of the plumb and day lines. On the side of the quadrant, at right angles to the side with the diopters, are seen the number of hours in the day corresponding to the day lines just described, *e. g.*, July (top line) 16, December (lower line) 8. The divisions on the other sides of the quadrant are for geometrical purposes, and need not be considered here.

The simplest sun dial is the equatorial or equinoctial dial, all other sun dials being constructed more or less on the same principle. In this instrument the dial plate on which the hours are marked at equal distances is fixed parallel to the equator and the gnomon or style, parallel to the earth's axis.

A distinction is made between super- and subequatorial dials, both kinds being usually combined on the same instrument. The upper dial can only be used in Summer, when the sun is above the equator, and the lower dial in Winter, when the sun proceeds on his apparent course below the equator. A drawback to these dials is that, with the exception of a few specially constructed instruments, they cannot be used at the periods of the solstices, for at these times the sun stands immediately above the equator, and the dial plate being parallel to the equator, no shadow can be cast by the gnomon.

## Notes on Watch and Clock Oil.

(Compiled for THE JEWELERS' CIRCULAR-WEEKLY from different authors.)

THE lubricants most generally used for watches, chronometers and clocks are porpoise, olive, sperm and neatsfoot oil. Two or more of these are often mixed together, generally with the addition of a little mineral oil. Mineral oil has an advantage over other oils, inasmuch as it does not absorb oxygen from the atmosphere.

The following processes, or some of them, are usually adopted for refining: (1) The removal of the solid portions when congealed, the operation being repeated until oil is obtained that will not readily freeze. (2) The stearine is removed by placing strips of lead in the oil, which is continued until it ceases to precipitate. (3) The resin and mucilage taken out by washing with alcohol and afterward with water. The oil is finally filtered through animal charcoal. Latterly, vaseline has found favor as a lubricant for the stem-winding mechanism for watches, and will probably find more extended use.

Porpoise jaw oil and blackfish melon oil

The

have become widely known and justly celebrated in all parts of the world, as they were found to be better adapted for the purpose of lubricating fine and delicate machinery than any substance previously used.

Blackfish melon oil derives its name from the mass taken from the top of the head of the animal, reaching from the spout-hole to the end of the nose, and from the top of the head to the upper jaw, from which it is extracted. When taken off in one piece this mass resembles half a watermelon, and ordinarily weighs about 25 pounds. When the knife is put into the center of this melon the oil runs out more freely than does water from a ripe watermelon. Porpoise jaw oil and blackfish melon oil are worth from $5 to $15 per gallon, according to the supply They are used not only in horology, but by manufacturers of fine firearms, philosophical apparatus and in government lighthouses for the clocks of revolving lights.

The blubber, or fat, taken from the jaw of the porpoise or the head of the blackfish was formerly rendered in iron pots over a fire, but the modern method of extracting the oil by steam is said to be much better. The oil is washed with water by thorough agitation, after which it is allowed to stand for several days, when it is drawn off and the last traces of water removed by distillation. The oil is then subjected to a very cold temperature and pressed through flannel cloths, by which process the "oleine" is separated from the "stearine," the resulting oil being more or less limpid as the former or latter constituent predominates.

## An Astronomical Clock Made by a South African Horologist.

A RECENT dispatch from Capetown, South Africa, States that Sir David Gill is just completing an astronomical clock of his own invention, which will be an object of great interest to the British Association during their coming visit. It is the outcome of many years' experiment and thought on the part of the Astronomer Royal.

The idea of a clock is that it should be an absolutely faithful recorder of time, and by means of many most ingenious contrivances Sir David has now provided a clock which will not vary a hundredth part of a second from day to day. Elaborate precautions have been taken to prevent its being influenced by atmospheric conditions, and the mechanism is of an exquisitely delicate character.

SOME · THOUGHTS · BETWEEN · THE · SEASONS.

THIS IS A GOOD TIME for retrospect, as well as for anticipation. How has your Watch trade been for the past season? If it has been good, can it not be made still better in the coming season? If in any instance it has fallen short of expectations, what is the reason? Have you "featured" your Watch department sufficiently? It pays to emphasize this department; it is a good lever to lift your general trade.

The outlook for next season is favorable. This house wishes you the greatest success in your Watch business—and is in a position to aid you in attaining that success.

### A Representative Retail Jewelry Establishment in Reading, Pa.

THE newly furnished store of J. L. Cohen, Reading, Pa., is illustrated below, The store was renovated last month, at an expenditure of $10,000. It has a depth of 125 feet and there are 100 feet of wall cases on each side, divided into six sections, each section containing two plates

HANDSOME STORE OF J. L. COHEN, READING, PA.

ten by five feet in size. The cases are separated by mirrors four by five and one-half feet in size. Then there are 16 counter cases, on low mahogany tables. No wood is used, the plates being clamped together. Each is 30 inches wide and 24 inches high.

To the left as one enters the store is the diamond room, enclosed in mahogany with brass and wrought iron grill work. Directly opposite is the watchmakers' room, enclosed in plate glass, brass grill work and mahogany. Further down are the two large safes and cashier's desk. In the rear of the store, to the right, is the entrance to the gallery which leads to the optical department. In the center is the cut glass room, of which much has been said and written. It created quite a sensation among the many visitors on the opening evening. To the left of the rear of the store is the jewelry manufacturing and engraving department.

A new maple wood floor has been laid and a metallic ceiling added, the latter being finished in green and built by Mr. Yeager. Six arc lamps hanging from the center of the ceiling, in addition to the five-burner chandeliers over each show case, illuminate the store at night, and a number of electric fans insure the comfort of shoppers during hot weather.

The front of the store is in keeping with the interior, the windows being very attractive. Their large size affords opportunity for the window dresser's skill. The windows are entirely of plate glass, made with clamps like the show cases inside, and 378 feet of glass were used in their construction. Three large signs covered with gold leaf attract attention.

Mr. Cohen located in Reading about 11 years ago. About eight years ago he took possession of 618 Penn st., where he remained until his present removal. After three years at this address, increasing business compelled enlargement, and the rear part of the building was taken in. About two years ago, owing to ill health, Mr. Cohen contemplated retiring from business, and made some preparations to that end, but later his condition improved, and he is now again full of energy and ambitious to expand his trade, as is indicated by the large expense to which he has gone in fitting up his new store.

Shortly after his recovery the business began to grow beyond the capacity of the enlarged store, so that it became necessary to look around for a new location that should be central and of adequate size. He then secured the large store formerly occupied by Heffner, Gilbert & Croll, upon which a long lease was secured.

Mr. Cohen also conducts a large store in Allentown, which is in charge of Nathan P. Cohen, a brother.

### To Prevent Windows Steaming.

THESE hints are given in a daily paper: (1) Fix a row of small gas jets at the bottom of the window, and ventilate it well at the top. (2) Open fanlight or door slightly, so that the hot air can escape. (3) A neat and certain cure is to drill with an inch twist-bit, four inches apart, a row of holes in the top sash—as near the ceiling as possible—and then cover with perforated zinc to prevent insects from coming in. If done from the inside you will have to use a ratchet brace. (4) Thoroughly clean the windows; take a pad of cotton rag soaked in glycerine, and rub the glass all over inside. Then take a piece of clean, dry rag, and lightly polish the glass until the glycerine is invisible, but not entirely rubbed away. Do this when the glass is fairly warm and dry, and you will get brilliant windows, no condensation, and a great saving in the amount of cleaning.

The business of the late S. Solomon, Elizabeth, N. J., will be discontinued.

An unknown person threw a piece of iron through the show window of E. Fisher's store in Pottsville, Pa., a short time ago.

## Storekeeping Department.

### Why the Jeweler Should Study Millinery Styles.

"THERE are a great many features in the jewelry trade to which people outside of that business never give a thought, and in fact, many jewelers fail to give them proper attention. The up-to-date jeweler, who is trying to do business along modern lines, however, knows that there are many things to consider, which the average person would not think belong in that line of trade," remarked a jeweler from the Middle West the other day.

"Who would think it was necessary for a jeweler to study the millinery styles, and keep posted on the popular colors in the latest creations dear to the feminine heart? At the same time, the jeweler who gives these matters attention, and then buys in accordance with what he learns, will make his store a popular place with the lady shoppers, and will get a name for being strictly up-to-date, which will bring him the business of those who want to have the latest things out. One reason why he should keep right up to the notch on millinery, is the necessity of always keeping plenty of hat pins on hand to match the popular shades. Of course he will have to carry a large variety of colors, but more particularly those which happen to be popular at the particular season at hand.

"I have managed to make this hat pin proposition quite a feature of my business. It is not the great profit in this line of goods that pays, but it gives me the opportunity for acquaintance and to show other stock that happens to appeal to the purchaser of a hat pin. I find that jewelers generally let the dry goods stores sell these goods, but it is not that way in my town.

"This Spring I learned there was to be a big sale of white hats, and as a result I bought a considerable selection of pins to match. Then when the millinery season was at its height, and long before the milliners began to 'push' their white hats the hardest, I put a display in the show window, which was made up exclusively of white pins and those which would look well on a white hat. In the center of the window I placed a card which read:

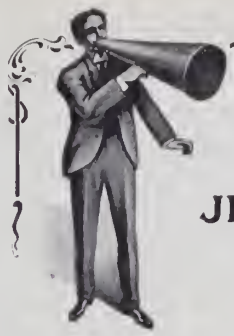
HAT PINS
for your
WHITE HATS.
We also have them to match all colors.

"In the Fall I will do the same thing, in fact each season finds its hat pin display in my show window, with a well worded card to attract attention, and to let the reader know at the same time that other goods are on the inside and invite inspection.

"Then I have a big business on belts, belt buckles, waist sets, etc., and it has all been built up by watching the change in styles, and getting something that is particularly appropriate, and which will make the costume look a little more stunning. Few people have these articles of such good material that they look well on whatever they are worn, and therefore most ladies want a variety of these goods. A careful selection on the part of the jeweler, will put him in position to please all tastes, as far as prices are concerned, and once the range of values is found that suits, it is up to the jeweler to show the other shades, so the lady can see what nice things he has to match her other costumes, and it will be found that the same customer will come again, and will keep coming, if treated right.

"Sash and bodice pins are of the same class, and if carried in large variety, will attract their share of trade.

"I do not figure that I will ever get wealthy selling this class of goods alone, but they act as a stepping stone to the acquaintance of a class of people who spend most all their income, no matter what its size, and it pays to have this acquaintance, for these people are regular customers of some store, and if you do not get your share, it is because they do not know that you have what they want.



"I found long ago that my show window is the place in which to let them know what I have to offer, and I have the window trimmed often. I have always refrained from crowding a window, and believe that a window crowded full of jewelry will not attract attention. I have one particular line in the window at a time, and a good card which is the better half of the display if well made and well worded. When that display has done its work, I change it, putting in an entirely new line. People soon get in the habit of watching for your changes, even remembering the regular days for trimming. When they do this, you have them in condition to carry on quite an educational campaign with your window cards, and they learn to know exactly what you have that is suitable for every occasion.

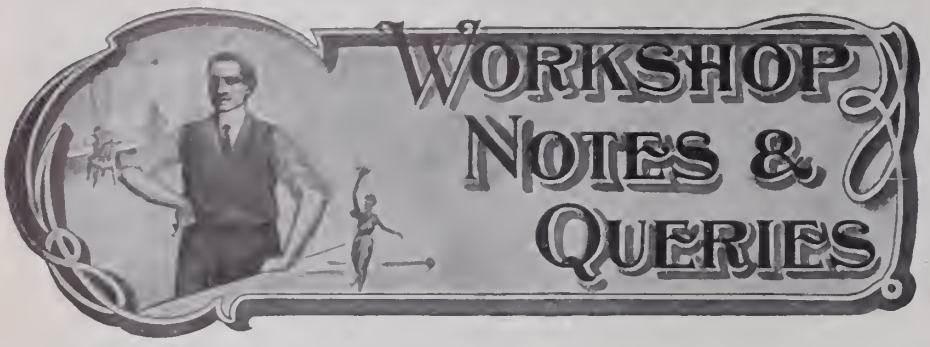
"There is nothing like keeping the people acquainted with your stock, especially the women, for they help you advertise, talking to one another. The jeweler is making a very grave mistake, in my opinion, if he ever allows a lady to leave his store without being shown everything she takes any interest in, no matter whether she spends a cent or not. She is likely to do $5 worth of advertising within the next day or two, and it is the kind you can bank on being remembered, and is most likely to bring results."

### An Attractive Store of Columbus, O.

A STORE of exceptional beauty is that of the Bonnett & Ross Co., Columbus, O. The ceilings are composed of ornamental white stucco. The room is magnificently lighted by incandescent lights arranged in the ceiling, clusters of lights in beautiful chandeliers and side brackets of spun brass.

The front portion of the store contains the gold jewelry stock. The center is fitted with large wall cases, there being no floor cases in this portion, and the customers are served at cloth-topped tables at which they may be seated. The rear is used for silver and cut glass. The diamond office, which is located in the front, is decorated with pale blue silk. The cashier's office is located midway down the length of the room and is built of mahogany and beaten brass.

## WHAT SOME JEWELERS SAY



*Catch phrases, descriptions and arguments which retail jewelers and opticians have used in their newspaper advertisements.*

Diamonds. Do not make a purchase of a diamond until you have called on us. We have a finer collection of high grade white, perfect gems than is usually shown in a southern jewelry store. Our prices make a diamond ring a good investment, and a call will convince you.—Hess & Slager, Jacksonville, Fla.

Ornaments for my lady interest every man whose soul is not sordid. Even if he's on the saving plan, yet willing to buy some gems for those he loves, he is likely to find in this store the place where highest quality and value can be had at the least expenditure. He won't need to see or ask much to find out that what we write here is true.—I. F. Varney, Wichita, Kans.

Summer Jewelry.—With the wearing of summer suits comes the necessity of some nice little waist sets and pins. The latest fads and fancies in jewelry are here. Waist sets, belt and cuff pins, pretty buckles and brooches, in gold, gold filled, silver and enamel. Prices very reasonable. Neck Ornaments.—The styles for low neck dresses at present in vogue need some neck ornament in jewelry. A nice gold locket and chain is always suitable. We have them from $8.50 up. Solid gold Lavaliere chains with amethyst, tourmaline and pearl pendants, ranging in price from $8.50 to $14. Also have them in gold filled from $4.50 to $6.50. These are very handsome and stylish. Neck beads are also fashionable. Solid gold beads $15 and up. Gold filled $3.25 to $5.50. Enamel turquoise, 35c., 50c. to $2.50. Real amber $1.50. Hat Pins and Combs.—Quite an assortment of hat pins in solid gold, gold filled, and silver. The signet pins, with place for initials, are quite popular. In solid gold, prices $2.50 and up. In gold filled, 75c. to $1.50. In silver, 50c. to $1.50. We have just received a new lot of back combs. Tortoise shell effects with gold filled rims. Price 75c. each. If you do not live in the city write for our illustrated catalogue of staple goods, viz.: Watches, jewelry, silverware, cut glass, etc. P. H. Lachicotte & Co., Columbia, S. C.

Value for Your Money.—A watch, diamond ring, brooch, dumb bell links, cut glass bowl, solid silver spoon; in fact, anything, matters not what, when purchased of a merchant of an established reputation, holds its value and you have something for your money. Call to see us. C. D. Silverthorn, Lynchburg, Va.

*[Answers are also solicited from our readers to the questions published on this page.]*

QUESTION No. 1253.—**Nickel Steel Alloys.**—*Have any improvements been made of late in the employment of nickel-steel alloys, with the view of employing such steel for balance springs for moderate-priced watches, that such may not need any more adjusted compensation balances? R. D.*

ANSWER:—None have been brought to notice, with the exception that some of the Swiss watch manufacturers advertise compensating nickel-steel balance springs as being used in their movements.

QUESTION No. 1254.—**To Smooth Copper Before Plating.**—*What acid will put copper in the smoothest condition for plating after being pressed? H. H. C.*

ANSWER:—Acid should not be employed for smoothing any metallic surface, as an acid which will act on metal will invariably have a tendency to open the pores of the metal and destroy a smooth surface. If metal has not been pressed smoothly, as it should be done by polished dies, the only means of making it smooth is by friction, either by some polishing substance, such as tripoli, fine emery, or rotten stone, applied with oil, glycerine or water, or by placing the articles to be smoothed in a revolving drum which will do the smoothing by abrasion with the assistance of some sharp substance, as emery, etc. Articles of uneven surfaces as well as flat ones may be smoothed in this way very nicely. Experiments will determine the proper sharp substance to be employed, and also the proper speed for the revolving of such drums and the length of time required. Careful cleaning with soap and hot water and a bath in a solution of cyanide of potash will be needed before plating.

QUESTION No. 1255.—**Soldering Gigs.**—*What is a soldering gig and what is it used for? S. S. B.*

ANSWER:—A soldering gig is a small iron revolving table, and is mostly used by solderers of jewelry and silverware. Where large numbers of small articles are to be soldered, there is usually a frame set on the gig. This frame is so arranged that it holds the object in its proper place, which enables the workman to solder the entire lot before removal. This tool is especially useful for the soldering in of knife handles, soldering on knobs of tea pot covers, handles, spouts and for cheap jewelry.

QUESTION No. 1256.—**Soldering Plate.**—*How can I make a plate that I can use to solder objects on, something that will not burn very easily? K. F.*

ANSWER:—Soldering blocks are very useful for the repair bench. Make a band of hoop iron, rivet the ends together like a hoop on a wooden pail. This hoop can then be left round or shaped as desired. Place this on an even board or plate and fill the inside with common plaster of paris mixed into a paste with water. When dry this is suitable for many purposes. If the plate is to be used for much hard soldering, and to make it more durable, add charcoal and asbestos to the plaster. Mix them well together and make into a paste and fill the band as above. To facilitate the use, corks with wire may be set in the paste before it is dry, at the edges. This will allow pins to be fastened in, to which the wire can be fastened. Or holes can be put through the band for that purpose.

QUESTION No. 1257.—**Soft Metal Files.**—*What kind of files are best for filing soft metal, such as Britannia and tin articles? T. B.*

ANSWER:—Files for the softer grades of metal should be single cut. This prevents them from clogging too much, or so they can at least be cleaned easily with the file cleaner. Double cut files clog up with the metal so they are difficult to clean. Iron and brass are best filed with the double cut file, the metal being harder and the filings drop out. When files become worn they may be recut. This will make a file as good as new at considerably less cost than new ones.

QUESTION No. 1258.—**Discoloring of Copper After Lacquering.**—*In using lacquer on copper articles, I often obtain a different color, mostly much darker. What is the cause of this? C. P.*

ANSWER:—The copper pieces were no doubt over-heated in the drying oven. When the heat does not go above 110°, the result is usually successful.

QUESTION No. 1259.—**To Join Two Pieces of Horn Together.**—*I have an old comb that is broken. I want to join the parts together. How can I do this? B. T. L.*

ANSWER.—Two pieces of horn may be joined by heating the ends before a fire and carefully scraping the edges and fitting them together exactly. Then take pincers, previously heated quite hot, and, after moistening the edges to be jointed, press them together firmly and quickly. If the operation is skilfully performed, a perfect joint will be the result. After the edges have been made smooth with a fine file and polished with tripoli and water, it will be difficult to tell where the two pieces are joined together.

QUESTION No. 1260.—**Grinding on Emery Wheels.**—*I notice that some mechanics do their grinding on emery wheels while others do the same on the regular grindstone. Which method is the better? A. B.*

ANSWER.—Grinding tools with an emery wheel is done frequently by some, but the finishing grind should be done on a grindstone. When tools become thick, or need cutting back, then an emery wheel does the work much quicker than could be accomplished with a grindstone. Considerable experience is required to grind fine tools on an emery wheel without drawing the temper out of the edges, and for this reason a good mechanic prefers a good grindstone.

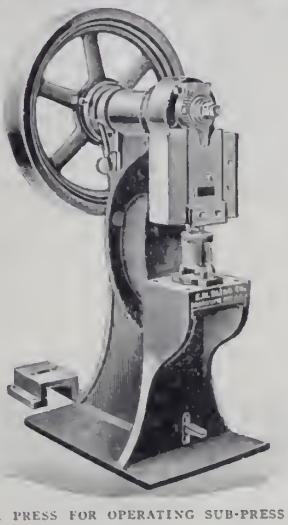
QUESTION No. 1261.—**Utilize Nickel Waste.**—*How can I utilize the nickel waste that gathers at the bottom of the vats in the shape of sand? N. P.*

ANSWER.—Wash the waste repeatedly in clean hot water and then boil in dilute sulphuric acid (one part acid to four of water), until water poured upon the waste is no longer clouded by it. Then pour off the liquid and treat the waste or sand with concentrated nitric acid. This must be done very carefully and a large porcelain vessel should be used to prevent the solution from boiling over. When the solution is sufficiently concentrated, so that it contains little free acid, it should be filtered, and slowly evaporated to dryness over a water bath. The product is nickel nitrate. The nickel nitrate thus obtained is dissolved in hot distilled water, and the solution precipitated with caustic soda, carefully and gradually added. The precipitate of hydrated nickel oxide is then carefully filtered and washed, then treated with dilute sulphuric acid with the aid of heat until solution has taken place. The solution is concentrated by evaporation, and an excess of concentrated solution of ammonium sulphate is added. The precipitate is the double sulphate of nickel and ammonium, or plating salts, which is commonly used for nickel plating.

QUESTION No. 1262.—**King Solomon's Gold Mines.**—*Where were King Solomon's mines located?*

ANSWER.—According to latest reports and discoveries, Solomon's mines were located in Southern Rhodesia. Explorations show the workings of abandoned mines, and it is presumed that they were worked by Arabian Himyanites, Jews and Phenicians, and that they provided much of the treasures of David and Solomon recorded in Kings and Chronicles.

---



A jury trial was demanded recently by Edward Ostrander, when he appeared in the police court, in Washington, D. C., and pleaded not guilty to eight charges of larceny. He furnished a bond for $800 and was released. It appears that Ostrander was formerly a cigar clerk, but being out of work for some time, he used an odd trick to support himself during the dull period. He represented that he was a jewelry repairer, when he called at a number of houses and asked if they had anything in that line they wanted repaired. Several witnesses appeared in court ready to testify that they had entrusted their watches to him to be cleaned and repaired. According to the police, Ostrander pawned the watches and was continuing his peculations up to the time he was taken in by the police.

IN THE SUMMER and early Fall great multitudes of travelers pass through New York, to and from the great pleasure resorts. To this tide of travel the Jewelry Trade contributes its quota. It is very probable that thoughts of business will occupy a secondary place in the mind of such tourists. Still, there is an opportunity to combine business with pleasure if one visits in passing such house or houses as may enlist his interest. We extend this invitation to the Trade, assuring Jewelers that our showings of appropriate Art Wares are unusually attractive and complete.

The work of the foreign artists and art manufacturers has been fully and carefully investigated by the representatives of this house, and the samples displayed are the cream of the best recent art products. Our various departments (Bronzes, Ceramics, Marble Statuary, Art Glassware, etc.), are conveniently and systematically arranged, so that you will have no difficulty in arriving quickly at the goods that most interest you. Our address is easily accessible by all lines of transit—Elevated, Surface or Subway.

## THE RAMBLER'S NOTES.

WHAT THE RAMBLER SAW AND HEARD AMONG THE DEALERS IN ART POTTERY, CUT GLASS, BRONZES, ETC.

THE CUT GLASS MANUFACTURERS' NEW ASSOCIATION.

MANY benefits are expected to accrue from the new organization known as the National Association of Cut Glass Manufacturers. A large number of the prominent manufacturers were present at the recent meeting held at the Astor House, New York, and since then several additional members have been enrolled, so that the organization is already looked upon as representative of the American industry. The expectation is that as a result of the members maintaining agreeable and harmonious relation with one another and of the occasional interchange of ideas, the standard of the business will be raised to higher and more profitable basis. It is realized that in some of the smaller shops glass is being produced and sold, which is of so inferior a quality that it indirectly reflects on the reputation of all American cut glass. Efforts will be made to encourage all manufacturers, large and small, to put out only wares that will be embraced under the name of art. Following are the officers of the organization: President, J. D. Bergen; vice-president, Thomas Shotton; treasurer, W. H. Lum; secretary, R. H. Keller. Executive committee: John S. Earl, of John S. Earl; J. E. Marsden, Quaker City Cut Glass Co.; A. L. Blackmer, of the A. L. Blackmer Co.; Andrew Snow, Pairpoint Corporation; J. D. Robinson, of the Libbey Glass Co.; Samuel Hawkes, of T. G. Hawkes & Co.; J. Howard Fry, of H. C. Fry Glass Co.; Wm. F. Dorflinger, C. Dorflinger & Sons; H. A. Clark, Pittston Cut Glass Co.

*

A CRITICISM OF MODERN POTTERY

WRITING in an English publication an observer of conditions in that country takes a somewhat gloomy view of the trend toward rapid production and accuses some of the manufacturers of "dabbing on their ware patterns (not designs) without beauty, without fitness, style or quality, in fact without anything except vulgarity." He says that this comes from the effort to furnish wares at low prices with little or no regard to artistic qualities. The writer of this rather dismal review of the situation confesses that the first time he saw the printing machine at work in a pottery, he felt that no good could come to it, but that since then he has lived to change his mind for he has seen "some of the finest prints from the most delicately cut rollers turned out by the printing machine." The supposition that transferring machines are soon to be introduced into English factories again gives him cause for sorrow, and he asks "what will the up-to-date pottery of say 50 years hence be like? Will there be any human beings left in it, or will the proprietor come down every morning and wind it up? But I have been brought up with a great reverence for fine English china and earthenware and its decadence is really no subject for joking." Then he urges those English manufacturers who have engaged in the race to furnish pottery at the least cost to pause. He advises that they endeavor to lead the public to appreciate the meritorious in ceramic art, so that the public will give more and more support to the conscientious manufacturer.

*

W. H. Dunn, 66 W. Broadway, New York, representing the J. B. Owens Pottery Co., recently spent a couple of weeks at the works in Zanesville, O., making selections for the New York salesrooms. The trade will find much to admire in the new samples which he brought back with him.

THE RAMBLER.

## International Exposition of Samples at Turin.

UNDER date of April 4, 1905, United States Consul Pietro Cuneo, Turin, Italy, reports as follows:

"An international exposition of samples will be held in Turin, in the Palace for the Promotion of Fine Arts, during August and September, 1905. Agriculture, commerce, hygienics, the liberal arts, machinery, electrical appliances, automobiles, etc., will be represented in the exhibits. Honorable mention will be made of the best samples shown. The managers have complimented the United States by electing its consul in this city one of the vice-presidents. I sincerely hope that our country will be well represented.

"Those intending to exhibit or desiring details should address the president, 34, Via Mazzini, Turin, Italy. The general director is Leonardo Pugi; the general administrator and president of the jury is Prof. E. Perronicito."

George S. Peck, Mount Vernon, Mo., has disposed of his business interests at that place.

Leslie E. Carl, Deposit, N. Y., last week, moved his stock into the quarters formerly occupied by S. G. Barnum.

## Art in Modern Bronze Work of the French, Italians and Austrians.

SO far as any vogue in bronzes can be said to exist at present, it reveals itself in a slight tendency to give the preference to modern as distinct from classical subjects. Realistic pieces, heroic and characteristic conceptions, are somewhat in the lead in popular demand. It would be a mistake to assume that because a bronze is "Modern" it lacks in oppressiveness or genuine dignity. Indeed, the bronze-workers of today are generally careful to avoid light and frivolous subjects, and much of their work is characterized by notable attention to detail. This feature was noticeable in the display of bronzes at the recent Exposition at St. Louis, particularly in the products of the manufacturers in Berlin, whose work, while consisting mainly of smaller pieces, excels in dignity, detail and fine execution.

It is interesting to note that up to about 15 years ago Russia took the lead in producing bronzes of a distinct type. The Russian equestrian pieces were excellent—horse, rider and all trappings and accoutrements being wrought with marvelous skill and fidelity. Doubtless the military traditions of Russia (now somewhat shattered) gave impulse and inspiration to the art. These bronzes were made by a few houses in St. Petersburg and Moscow, but, as already intimated, their work has diminished of late both in volume and quality. The mantle of these Russian craftsmen seems to have fallen on the bronze-workers of Vienna, who have made remarkable advances within the past two or three years. Building on the foundation laid by the Russian bronze-makers, the sculptors and manufacturers of Vienna have carried on and developed what was the Russian concept with marked success. Bronzes in this class are decidedly characteristic; they possess marked individuality, and differ radically, for example, from the productions of Paris.

It would be futile to deny, however, that France is still a prolific fountain of artistic suggestion, and the influence of Paris is revealed in some of our modern bronzes, just as the same influence manifests itself in other departments of art. If Paris has had little influence over the sculptors of Vienna, the same cannot be said of those of Italy. It would be hardly fair to intimate that there is any lack of originality on the part of Italian sculptors, but at the same time it is true that an appreciable part of their work in fine bronzes receives its suggestion and inspiration from French models. Italy still excels, as she always has, in classic statuary; but what are perhaps the most interesting Italian bronzes at the present time, take the form of splendid copies of masterpieces of ancient times, such as antique lamps and other antique art-utilities.

Nor have classical subjects been by any means superseded by modern ideas, though the latter are in present favor. Many classical pieces are being made and sold. To these the rich dark-green color is best adapted as being the natural color of the old, classical bronzes. Other colors characteristic of genuine bronze are seen in the *Barbedienne* or dark brown, in the *Pinedo* or light brown and in the *Meduse* or greenish brown bronzes. The manufacturer generally chooses the color for each piece with special regard to the subject, selecting the color most appropriate thereto. The colors of genuine bronze are very closely approximated in imitations.

The opinion has been expressed that where drapery or clothing is included in bronze figures, the best effects are obtained in the smaller pieces; while nude or semi-nude subjects are most suitable for larger bronzes. This dictum is not given as being authoritative at all, but merely as an interesting point of view. It is not recognized to any extent by manufacturers or purchasers. The idea underlying the opinion seems to be that in large pieces drapery and clothing call for too much uninteresting detail, while in smaller pieces the general effect is all that is requisite. On points of this nature, however, every one is competent to be his own judge.

THE COMMENTATOR.

## Canadian Imports of Crockery and Glassware and Earthenware.

AS the latest statistics show, the imports of crockery, etc., into Canada have steadily grown during recent years. The sources of supply have altered in many cases. More than half the imports still come from the United Kingdom, the exports to Canada last year being 25 per cent. more than in 1903. The surtax has not prevented an increase in the imports from Germany. This increase, however, is not important, as the imports of the United States from Germany are proportionately much more considerable. Canadian merchants feel suspicious towards German goods, and sympathetic towards those of British makers.

An interesting development in Canadian trade is the importation of plain earthenware and the subsequent tinting and gilding of it by Canadian crockery houses. This class of work, which was at first somewhat crude, has so advanced that foreign designs are reproduced with the utmost fidelity. Difficulties which were formerly found in the firing have been successfully overcome. The introduction of this work marks a distinct advance in Canadian pottery. Importations from Japan have been steadily increasing, but their activities along this line have never been exhibited to the extent that they have this year. As an example of what is being done in developing new business the case of a Canadian firm may be mentioned. This firm sent over to Japan a sample of porcelain such as they had been buying in Germany. The Japanese submitted a price much below the European figure and a sample order of half a million was sent in. The goods were in every respect the equal of the sample which had been sent over.

W. H. Jones, Belgrade, Mont., has moved to Livingston, in the same State.

Geo. H. Dunhill was released recently, after having been arrested on a charge of stealing a diamond ring from the store of Mrs. Tillie McNamee, Wheeling, W. Va. Dunhill had been indicted by the Grand Jury, but the indictment was found to be defective when the case came to trial.

# EXHIBITS OF JEWELRY IN THE PARIS SALONS.

ALIKE for the craftsman and the connoisseur the exhibits of jewelry in the 1905 salons of the "Societe Nationale" and "Artistes Français," possess an interest superior to that which attaches to similar exhibitions in other towns. For Paris has an art-atmosphere all its own; an atmosphere not perhaps always healthy, but always stimulating to thought. Paris, though much changed externally, is still from the point of view of literature and art the Paris of Baudelaire and Zola, a huge fermenting-vat of ideas striving for utterance in every department of human thought and activity; ideas original to the verge of extravagance; startling in their boldness, their freedom, their revolt against prescription and conventionality; ideas which excite our wonder even when they fail to command our sympathy. Here, then, if anywhere we may expect to find new ideals, new conceptions, new designs.

The visitor will not be disappointed, nor will he fail to be impressed with the high standard of excellence reached by most of the exhibits and the improvement in public taste of which they are the evidence. Compare, for instance, a silver cup decorated with fir-cones exhibited in the 1905 Salon of the "Societe Nationale," in which the maker, L. Bouvallet, has conceived the happy idea of representing the resin by drops of crystal, with the pretentious productions so common formerly and even now too frequently met with, in which the main object seemed to be the crowding together of as many flowers and animals as possible in a given space.

CORSAGE ORNAMENT BY LALIQUE, AT THE SALON OF THE "ARTISTES FRANCAIS."

Other articles well worth notice in the same salon are: A cup encrusted with silver and ornamented with convolvulus leaves by H. Husson; combs and pendant of horn set with jewels by H. Hamm, (shown on page 16), and a silver jug and cup by Valéry Bizouard in collaboration with A. Debain. Attention should also be drawn to a necklace in the Neo-Merovingian style by Ch. Rivaud of which an illustration appears on this page.

NECKLACE BY RIVAUD AT THE SALON OF THE "SOCIETE NATIONALE."

Valuable contributions to this exhibition have been made by the perfect enamelists Thesmar, Grandhomme, Hirtz and Tourette.

Prominent among the many interesting objects in the Salon of the "Artistes Français" are the exhibits of Lucien Gaillard, especially a vase of brown bronze formed by upright beetles, shown on page 17, a bracelet and collar plaque, also illustrated on the same page, and some combs of coral and horn set in gold. They are all characterized by picturesque

(*Continued on page 16.*)

# ALVIN

¶ Contrary to rumor The Alvin Manufacturing Company are not interested in any combination of silversmiths companies, neither have they any intention of joining or selling out to any such combination.

¶ The best results in the silverware business can be obtained by individuality and on independent lines.

# FAHYS

## Permanent and Montauk Cases

¶ Will not be found illustrated in any mail order house catalogue or any catalogue that goes to the consumer.

¶ In taking this action we are consulting the welfare of the retail jewelers, as well as ourselves, and we feel sure reciprocity on the part of the jewelers will follow.

JOSEPH FAHYS & CO.

You can buy our diamonds for the actual cost of the rough stones, plus the workman's wages who polishes them, with our modest profit added.

No middleman's profit or traveling salesmen's salaries and expenses to be considered; nothing but one small profit between you and actual first cost of the stones.

Our advertisements are not exaggerations, but plain statements of real facts—thousands of retail jewelers know this—do you?

# The REPAIRING

**END OF YOUR BUSINESS IS THE MOST IMPORTANT PART OF IT**

More people come into your store to leave work than to purchase goods.

Almost every one of your good customers became so through your repair department.

Progressive jewelers know this and concentrate their efforts on the repair department of their business. They give it the most prominent place in their stores; they emphasize it in all their advertisements; they keep themselves and their employes thoroughly informed on the costs of all kinds of work, new ideas and methods; they are courteous and accommodating to repair customers; have all work ready when promised; and do only such work at home as they can do well.

They send all the rest to us.

We devote our entire time, energy, capital, and twenty-five years' experience to this important branch of the jewelry business; employ and educate the best help that can be obtained; systematize and inspect the work, and use every modern method to produce the best work promptly at reasonable prices.

It is to your interest to do business with us, it is to our interest to have you.

Let us work together.

LEATHER EBONY

# The AUTHORITY OF SUCCESS

THERE IS NO ORACLE who can proclaim in a positive and arbitrary way that such and such leather goods will take the lead in any particular season. Different manufacturers have different ideas. How then can one know?

The only safe way is to follow a house that has created successes in past seasons. History repeats itself. Some set the pace and lead always. This firm belongs to that class.

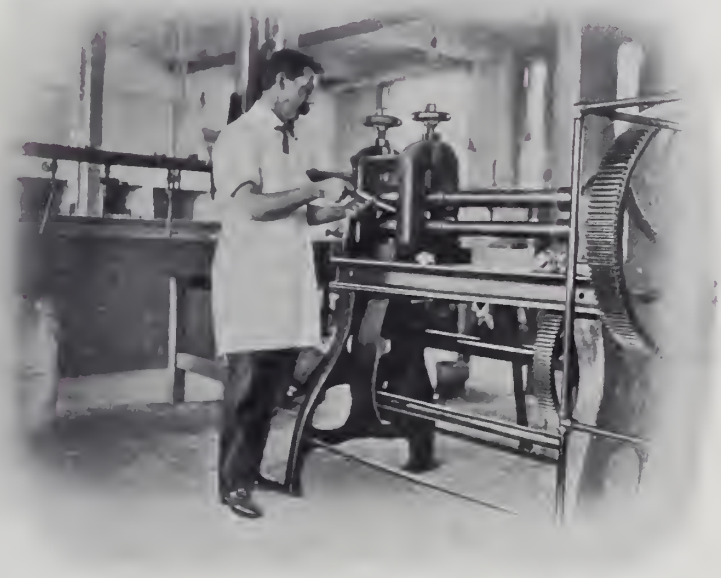
Naples: 1 package jewelry, $450.
Rio Janeiro: 31 packages clocks, $965; 2 packages cutlery, $114.
Santiago: 4 packages cutlery, $212.
Santo Domingo: 6 packages cutlery, $625; 2 packages jewelry, $116.
Souerabaya: 2 packages watches, $670.
Sydney: 14 packages clocks, $249; 2 packages plated ware, $135.
Tampico: 1 package optical goods, $560.
Valparaiso: 20 packages plated ware, $790; 43 packages cutlery, $883; 2 packages watches, $494; 1 package watches, $435.
Vera Cruz: 1 package plated ware, $184; 64 packages clocks, $651; 1 package watches, $350.
Yokohama: 198 packages clocks, $5,272.

### The Sapphire Fields of Anakie.

A CONSIDERABLY extended lease of life has been given to the Anakie, Queensland, sapphire fields, says L. E. Bail, assistant Government geologist of that country, for work in the deep ground is still being vigorously pushed on at Sapphiretown, on Retreat Creek, where, in 1902, the surface was nearly worked out. At Policeman Creek, too, the work in the "deep ground" has been successful, not alone on the south side of the creek, where very profitable surfacing has been carried out, but also on the north side, where the surface, as a whole, was not rich.



Last year's output was about 14,000 ounces, of which Sapphiretown yielded approximately 6,400 ounces. There are excellent prospects for the field. Large areas of sapphire-bearing wash are almost untried. There is no probability of the supply falling below the demand. A few lesser gem stones, viz., zircon, topaz, spinel, garnet, and tourmaline have also been found, but never in sufficient quantities to be worth much attention.

# Modern Ring Making

Life Studies of Larter Workmen

ILLUSTRATION NUMBER FOUR

THE METAL WORKER.

¶ Having the quality of gold desired, the fourth step of ring making is to work the gold to the proper thickness.

¶ Great care is necessary to do this so that the pattern may be brought out and give the ring proper weight.

¶ Powerful rolls help toward this end, so that when finished, all Larter Rings are properly proportioned and correct in weight.

¶ Retail Jewelers who have sold Larter Rings for years, will agree that we know how to make them.

# SPECIALTIES

• • • •

IT IS OFTEN WISE for a firm to limit itself to lines for which it has special facilities, and which prove most satisfactory to itself and its customers.

• •

For example, this firm does not make everything. It does not make rings. It does not make lockets. It does not make watch cases. There are a number of lines that are left to other manufacturers.

• •

But the lines we do make are artistically conceived and well made. Especially do our Vermicilli Decorations merit attention. There is a delicacy of arrangement and perfection of color that distinguish them from all other makes.

• •

We have distinctive showings in Hat Pins, Scarf Pins, Barettes, Back and Side Combs, Brooches, Waist Brooches, Waist Pins, Link Buttons, Studs, etc.

• • • •

**Day, Clark & Company**

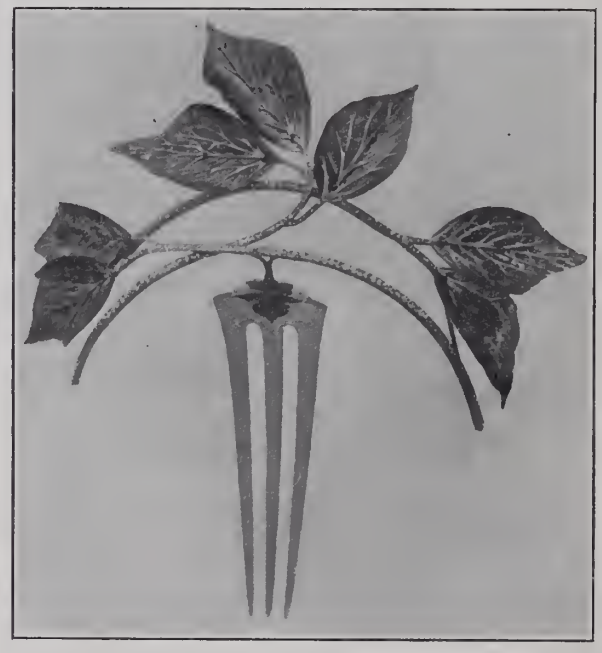
## Exhibits of Jewelry in the Paris Salons.

(*Continued from page* 1.)

composition and a masculine, but restrained power.

Close to these are some delightful specimens of enameled work by Eugéne Feuillatre. An especially fine example is the beautiful enamel vase, also illustrated. Some fine wrought-silver exhibits by Ed. Brandt merit attention.



It would be but proper to conclude with a short notice of the objects shown by René Lalique. His exhibit is decidedly more important than the exhibit contributed by him last year, and reveals some new and surprising effects of color set off by diamonds. Nothing can possibly exceed in effectiveness the insects, flowers, diadems, butterflies, etc., of horn and enamel on richly speckled gold.

The red violet diadem shown on this page is a lanceolated piece of ivy, burnt by the autumn sun, with filaments set in gems. Another diadem has grasshoppers carved from topazes on gold eucalyptus flowers.

COMBS BY H. HAMM.

It is fixed by two pins representing ears of corn. Of the necklaces one may notice a piece consisting of oblong slabs of green and brown horn with grasshoppers under

sapphires *en cabochons*, also the necklace whose branches set with diamonds carry amphoræ of rock-crystal with little figures cut *en mat*.

No artist infuses so much of his personality into his work as Lalique, and in his work we have probably the most perfect

ROMAN BRONZE VASE BY L. GAILLARD.

and most captivating art of the day. Mere wealth of material is relegated to a subordinate position; beauty of outline and color, and the underlying artistic thought are supreme. His productions are at once pictures, sculptures and ornaments associated with the transitory charms of living beauty.

## A Popular Design Made, but Not Sold in the United States.

"THERE'S a pattern of scarfpin," said the foreman of a jewelry factory on Maiden Lane to a *New York Sun* reporter,

BRACELET BY L. GAILLARD.

"that is far and away our leader, yet we do not sell a single one to our local trade, nor have we listed it in our catalogues for United States sale for 30 years. It looks like a banjo upside down, a disk anywhere

COLLAR PLAQUE BY L. GAILLARD.

from the size of a dime to a quarter and a stem to carry the pin that fixes into the scarf or into the bosom of the shirt.

"We get the mounts from a factory in

Connecticut in all grades from near gold to the real thing. In the same way we mount everything from glass to gems, a big one in the middle and a cluster in a ring about it. If you will look at a collection of Civil War photographs you will see that they were then all the rage, but they went out of favor about the time of the smashing of the Tweed ring.

"There is a steady demand for that style in Brazil. Our drummer has just made a trip on the Amazon from Para all the way to Belem, and I wouldn't dare to show you the orders he has booked for just that one pattern in all the grades; it might attract competition."

## *ELSIE BEE'S FASHIONS.*

NOVELTIES SEEN IN A LADY'S RAMBLES AMONG THE JEWELERS.

ARTISTIC designs in some new jewelry show a marked tendency to the finest and most delicate effects in mounting gems—after the French style—whereby the beauty of the stone is greatly enhanced.

*

Pretty lockets are in open gold filigree.

*

Among the latest novelties are the round gold bracelets with the upper half in elaborate open filagree work.

*

Green and white tied ribbon bows simulated in diamonds and emeralds have a pearl or emerald at the knot with a fine drop stone.

*

A novel scarf pin, suggestive of the polar region, is a golden bear on a ball of snow—the latter a baroque pearl. Cabochon stones head other pins.

*

Mat gold filigree in diamond shape, with a pearl or emerald at the center, is shown in sleeve links, while ovals of pink tourmaline, also, have a central pearl.

*

Open designs in graceful leaf and flower work and in conventional patterns, set with gems, together with some fanciful variations in the outlines are seen in crosses.

*

In the line of rings there is an endless variety and very *chic* designs are shown. Platinum, hoops and mountings are seen in diamond rings. A beautiful sapphire ring in the princess style is framed in diamonds.

*

Necklaces were never more beautiful than at present. An exquisite example is shown composed entirely of a five lobed leaf design, with a mass of drooping leaves at the throat, the whole design worked out in diamonds.

*

One of the most useful novelties that has come to milady's aid in holding lace collars, now so generally worn, is the adjustable collar supporter now to be found in most of the first class jewelry stores. These supporters are studded at either end with a precious jewel and are made on a principle whereby they can be easily adjusted to the height of the collar and locked. The jeweled studs are detachable and can be used for other purposes.

## Death of Duane H. Church.

BOSTON, Mass., Aug. 3.—Duane Herbert Church, mechanical superintendent of the American Waltham Watch Co.'s works at Waltham, whose death was announced in last week's issue of THE CIRCULAR-WEEKLY, had been a sufferer for several years from heart disease. It is said that since he had been an invalid he had originated several of his most valuable inventions while lying in bed too weak to move about. He is survived by his widow, one daughter and two sons.

Duane H. Church was born at Hamilton, Madison County, N. Y., in 1849, the son of

THE LATE DUANE H. CHURCH.

William C. and Mary Ann Church. At the age of 16 he began his apprenticeship as a watchmaker with J. E. Gridley, St. Paul, Minn. Mr. Church frequently said that much of his success in later life was due to the oft repeated admonition of his employer, "Never leave a piece of work until you have done the best you can do." For years he worked as a watchmaker at the bench, principally for Matson, of Chicago, and for St. Paul houses. He was for a short time a member of the firm of Frohne & Church, who had a jewelry store in St. Paul. During all this time he was known as a clever watch repairer, but his power as a tool maker and inventor was latent.

One day in 1882 Church made up his mind that he would like to be a traveler, and he was sent upon the road by Steadman Hale, the western agent of the American Waltham Watch Co. The instructions to Mr. Church were to travel through the western country, explaining the merits of the watches, and he was not expected to make sales so much as to do missionary work which would aid the regular salesman. In a few weeks the young man returned to Chicago and resigned his position, saying that he was "tired of trying to make other folks believe things about these watches that I do not believe myself." As a result of this Mr. Hale introduced the watchmaker to the company's officers at the factory, where the

young man went to work introducing improvements.

It is related that soon after Church looked over the plant he came to the conclusion that in the manufacture of the watch there was too large an expenditure in time and labor, and too much waste of material. The company's officers gave him authority to go ahead and reduce the cost of making a watch. From the beginning he bent his energy to the invention of machinery and tools to take the place of human hands. He not only devised the machinery which did the work formerly done by men and women, but he also invented new tools which were manipulated by those machines. As a result, it has been computed that the cost of making watches was reduced 50 per cent.

Speaking of the results accomplished by Mr. Church, Henry Roland, in an article published in the *Engineering Magazine*, in January, 1900, said:

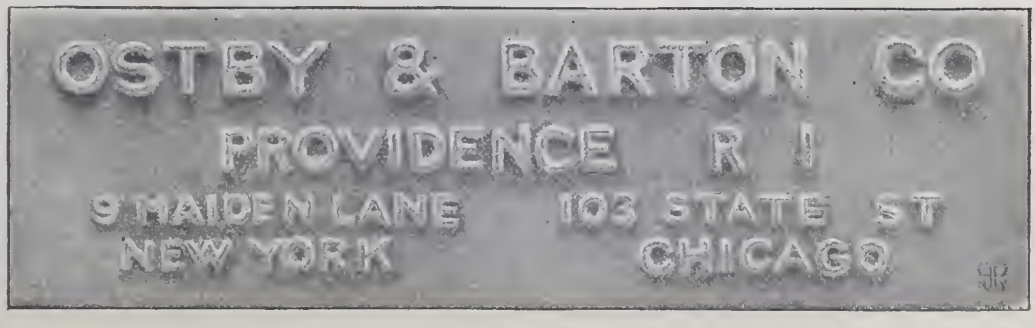
Finally, after 25 years of intimate association with watchmaking in all its forms, Church began his great work of advancing the use of Maudslay's slide rest and Stone's turret to what is now by far the most exalted plane of development known, and giving those elements powers which appear impossible of farther advancement.

Church added to the slide rest and turret two new elements: First, That of compressed-air-driven piston-and-cylinder actuation of his automatic-machine members, and, second, a perfectly exact series of transfer elements, having the power to take a piece of work from one machine and place it accurately in another machine, with a beauty of action and precision of effect which seem to the experienced observer, when he sees these automatic machines in operation for the first time, to fall very short of miraculous.

In addition to the pneumatic and transfer elements, Church originated an automatic grinding machine, which produces cylinders and cones with absolutely no measurable variation in dimensions, wholly without human intervention, and at a saving of at least three-quarters of the cost of producing ground work under manual attendance. The production of cylinders of uniform diameter is an indispensable necessity of the highest development of tool-making, and this automatic grinding machine seems to me to have made one of the most wonderful advances in the whole history of tool-making. The possibilities of the machine are as yet almost wholly unknown to the world of mechanics, and apparently equally unappreciated, the tools not being in use anywhere outside of the Waltham shops, although the inventor is perfectly willing they should go into authorized general use.

The writer then relates how when Church went to Waltham work was done through jigs handled by girls, and he determined that there should be no more jig work. He got up the present scheme of plate drilling, but it was impossible to operate it with any arrangement of tools then made. His solution of this difficulty is thus described:

Yet these impossible conditions were met in the easiest manner possible by the use of compressed-air pistons and cylinders, applied directly to the moving parts, so that, whenever air pressure was admitted to the cylinder, the piston instantly drove the connected member to a flat contact stop of hardened steel, the rapidity of traverse and intensity of the contact blow being perfectly controlled by the air-admission cocks, which are cam-operated. With this beautifully simple and perfect machinery Church moves his plate-holding slides with positive accuracy, revolving heads of hardsteel stop pins giving each hole location in the plate an adjustable definition which can be individually regulated to any degree of precision desirable, with the practical result of producing watch plates with no measurable or discoverable variation in the location of the holes.



Here, then, we have the highest known development of the possibilities of the toolmaker's art, due to the addition, by Church, of compressed-air actuating devices to Maudslay's slides and Stone's turret.

The compressed-air movement makes accuracy

ISN'T it interesting to watch the evolution of an O. & B. Ring from a crude piece of gold? While our factory is equipped with every modern machine, every useful device necessary to manufacture our product—it requires time—yes, quite a deal of time, before the completed article is ready for the Jobber's inspection.

The Jobber, of course, has a different story to tell, and saves time through the excellence of our product. Our unlimited assortment of new designs makes his end a simple matter. If you want business this fall—Ring business—sell the O. & B. product.

possible, as it never before was. Compressed air gives movements with any degree of force, within any space limitations imposed by the exigencies of tool construction, and—impossibility of impossibilities—without wear.

The largest plate-drilling machines have a delivering and receiving magazine, six plate holders, six spindle heads carrying six spindles each, making 36 live spindles in all, and seven transfer arms and heads.

Within certain size limits, this compressed-air actuation in combination with these transfer elements, which are capable of taking a piece of work of any form and accurately locating it in a workholder of any description, show the road to completely finishing any metal piece without direct manual intervention. This is to say, the methods and means now in operation at Waltham can be so modified as to produce any machine part without direct labor.

As to diameter-limit of work produced by this system, Church said that he thought his devices might be successfully and economically applied to pieces up to 10 inches or 12 inches diameter, and, in many forms of pieces, the length would be no har to automatic finishing.

Although Mr. Church was widely known in the craft and among scientists because of his achievements at the Waltham works, yet the general public knew little of him until he was brought forward as one of the 92 "Captains of Industry," who were present at the dinner given Feb. 26, 1902, to Prince Henry, of Prussia, at Sherry's, in New York. This brought Mr. Church into the limelight, and the attention of the daily press was turned upon him.

Mr. Church was engrossed in scientific work and in his family, giving little time to social affairs. His chief pastime was in his automobiles, of which he owned several. When he bought a machine it was his practice to take it all apart and put it together again, so that he could understand its construction. He devised several improvements in these machines.

### Death of Frederick Hosser.

SPRINGFIELD, Ill., Aug. 2.—The death, Sunday, of Frederick Hosser, which occurred at his residence, 709 S. New St., was a subject of regret to many members of the trade here, as Mr. Hosser was an old and well-known jeweler. The deceased dropped dead suddenly while standing in the rear of his residence.

Mr. Hosser, who was 70 years old, was a German by birth, but emigrated to the United States in 1848, and coming to Springfield in that year, had been a resident of this city continuously until his death. For many years he was engaged in the jewelry business for himself at 223 S. 5th St., but several years ago retired from active work. He was a member of the Grand Army of the Republic, having served during the Civil War, and a large number of the members of that organization attended the funeral.

The Illinois Watch Co.'s Factory Band gave a complimentary concert recently at Springfield, Ill., at the State House grounds, the occasion being the 25th anniversary of Louis Lehman's connection with the band in the capacity of director. During the evening Mr. Lehman was presented with a massive silver loving cup by A. S. Wormwood, traveling representative of the company, in behalf of the watch concern. After the presentation speech Prof. Lehman made a few remarks in response, and was again surprised when he was presented on behalf of the members of the band with a beautiful set of silver knives and forks. The Watch Factory Band's reputation extends all over the State of Illinois and its services are always in demand. Its efficiency and reputation is in great part due to the ability that has been exercised by Mr. Lehman in the capacity of director during the past quarter century.

## Drilled Bort Again Declared to be Entitled to Free Entry.

In sustaining a protest by the American Express Co. against an assessment of duty by the Collector of New York, the Board of United States General Appraisers declared that drilled bort, intended for use in manufacturing wire, is free of duty. This follows previous decisions, in which the Treasury Department has acquiesced. General Appraiser Sharretts wrote an opinion, saying:

The merchandise consists of bort, drilled for use in the manufacture of wire as wire draws. It was returned for duty under Par. 435 as precious stones advanced in value, at the rate of 10 per cent. ad valorem.

In G. A. 5,783 (T. D. 25,565) the Board held that similar merchandise was entitled to free entry under Par. 545 of the present tariff act. Upon review this decision was affirmed by the Circuit Court for the Southern District of New York (T. D. 26,490), acquiesced in by the Treasury Department in T. D. 26,534, on the authority of which ruling we sustain the claim in the protest now before us that the goods are free of duty under Paragraph 545 of the tariff act of 1897, and reverse the collector's decision."

The co-partnership which recently existed between Simon F. Harris, Jacob J. Harris and Philip Klein under the style of Harris Bros. & Klein, Atlantic City, N. J., was dissolved, recently, by mutual consent. Mr. Klein sold out his interest to Messrs. Harris, who continue under the style of Harris Bros.

FACTORY AND OFFICE, 101 Sabin St., Providence, R. I.

### Trusted Employe Convicted of Stealing from International Silver Co.

MERIDEN, Conn., Aug. 3.—Patrick Coffey, who for 15 years had been employed at the International Silver Company's factory in this city, was arrested last week and arraigned on Saturday in the city court on the charge of stealing German silverware from the company's plant. He was a trusted workman, in whom Manager Geo. Rockwell placed confidence, and the discovery of his dishonesty surprised and shocked his fellow workmen.

As Coffey was leaving the factory on the day of his arrest it was noticed that his pockets bulged. He was stopped by one of the foremen, and when brought into the presence of the manager, a paper containing four dozen forks was discovered. Mr. Rockwell was disposed to treat the man leniently, but felt that the offense could not be overlooked. A telephone message was sent to the police station and Coffey was taken there. A thorough search of his clothing revealed more silverware in an inside pocket, five dozen pieces in addition to those previously found.

Coffey told the police that he had sold some spoons to Joe Dadona, an Italian. The police went to the Italian's home, where they found a trunk containing spoons and forks which he said he had bought from Coffey for $1.50, their real value being about $28. Dadona assured the police that he had no knowledge of the silverware having been stolen, but he was arrested on the charge of receiving stolen goods.

Manager Rockwell, who was desirous of learning what had driven an old employe to resort to dishonesty, called on Coffey at the jail. The prisoner said that he had not taken anything from the company until of late. The total value of the property stolen, as nearly as it could be figured, was about $80. In the city court Coffey was fined $25 and costs and sentenced to two months in jail on each of two counts. Dadano was fined $5 and costs.

### Samuel R. Sneed; Georgetown, Ky., Makes a General Assignment.

GEORGETOWN, Ky., Aug. 3.—Samuel R. Sneed, who has been in business here under the name of his mother, Harriet S. Sneed, several days ago made an assignment for the benefit of his creditors. Craig Bradley, assignee, is now selling the stock at auction. The debts are small and are scattered in New York and in several western cities. The liabilities have been computed at $2,493 and the estimate of the assets places the value at $2,800. The assignee said that he believes sufficient money will be realized from the sale of the stock and other assets to pay 50 cents on the dollar.

The business has been conducted for Mrs. Sneed for three years, she succeeding her sons, the firm of Sneed Bros., who failed. Besides the jewelry stock a line of drugs was carried.

Early last week the police of Atlantic City, N. J., discovered evidence of an attempted burglary of the store of Henry Fitton, 1709 Atlantic Ave. The plate glass window was shattered, but nothing was taken. Blood on the sidewalk and sill showed that the thief had cut himself badly.

For nearly 60 years "1847 Rogers Bros." Plated Spoons and Forks have been the choice of the American people. The older designs—our Windsor, Tipped and Shell, through popular demand, are still manufactured. These, with the more elaborate Vintage, Berkshire, Avon, etc., complete a line that appeals to the most varied class of buyers and covers every need in tableware. Any jeweler interested in old things may obtain copies of the Silver Standard by writing to MERIDEN BRITANNIA CO., MERIDEN, CONN. (International Silver Co., Successor.)

## GUMMED STAMPS FOR LETTERS.

### FRANKLIN AND WASHINGTON HONORED.

THEIR PORTRAITS APPEAR ON THE FIRST ISSUES OF POSTAGE STAMPS BY UNITED STATES.

### 1847 MADE MEMORABLE.

THE Post Office Department has just issued five cent and ten cent gummed stamps, for attaching to letters to be carried over the postal rontes.

The five cent stamp bears the portrait of Franklin, our first Postmaster General and the ten cent stamp that of Washington, each bearing above the portrait the inscription "U. S. Post Office," and below the amount "5 cents" and "10 cents," respectively.

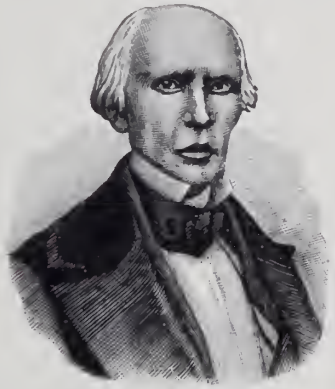
These stamps carry letters according with the rates established by Act of Congress 1845, which are as follows:

For each letter weighing ½ oz. or traction thereof,

Under 300 miles 5 cents.

Over 300 miles 10 cents.

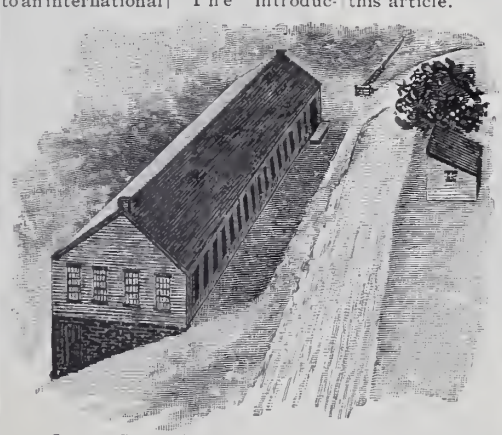
They will be cancelled by the postmasters, who will simply make pen scratch lines across the face of the stamps, thus doing away with the usual prepay receipt heretofore written on the letter. The stamps will greatly facilitate the work of the postmasters, while being a great convenience to the public.



Great Britain issued the first postage stamps in 1840, a 1 P. Black, and a 2 P. Blue. Each bears an engraving of the young Queen Victoria who ascended the Throne three years previously.

Brazil then issued a 3 R, 60 R and 90 R series, in 1843, and has just followed these by seven new stamps from 10 R to 600 R; but the ones we have seen are very plain, simply showing the amount in large figures, within oval lines. The stamps just issued by our government show finer engraving than those of Great Britain or Brazil

We understand that the Canton Administrations of Zurich, Basle and Geneva have also issued stamps and it is probable that the stamp system will soon be used in France, Italy, Germany and other nations.



It may not be too much to predict that the use of postage stamps may lead the way to an international postage agreement that may make it possible to send letters from country to country at a universal rate, thus bringing the nations closer together in commercial and friendly relations.

The introduction of these stamps with many other improvements in the Postal Service are due to the energy and zeal of Postmaster General Cave Johnson, whose portrait and a short sketch of his life accompanies this article.

POSTMASTER-GENERAL CAVE JOHNSON.

CAVE JOHNSON was born in Robertson County, Tennessee, Jan. 11th, 1793. He received a liberal education at Cumberland College, and in 1811 raised a company among the students (of which he was made Captain), and which he offered to General Jackson, who refused their services; advising them to return to their studies. He studied law in the office of W. W. Cooke until 1813, when he served as Deputy Brigade Quartermaster in his father's brigade of Tennessee Militia in the campaigns of 1813 and 1814. He was admitted to the bar in 1814 and practiced at Clarksville, Tennessee. He was elected Prosecuting Attorney for his Circuit in 1817; was a Democratic Representative in the 21st to 24th Congresses, 1829 to 1837, and in the 26th to 28th Congresses, 1839 to 1845. When Mr. Polk became President two years ago, Mr. Johnson was invited into his Cabinet as Postmaster-General, which office he has very efficiently administered.

IVORY COMB FACTORY, JULIUS PRATT & CO.

## 1847 A BIG YEAR!

### MORE IVORY COMBS MADE IN MERIDEN THAN EVER BEFORE.

### BRITANNIA BUSINESS GROWING.

#### OTHER LEADING INDUSTRIES.

THE manufactories of Meriden constitute so prominent a part of the country's product that one naturally feels some curiosity to know something of their origin, and present condition, as their total sales now amount to about $1,000,000 a year.

Of all of them, none is more interesting than the Ivory Comb industry, whether one regards its origin and growth or the great beauty of the production and the systematic work of the mechanism of the machinery employed.

According to the best means of information, ivory combs were first made in this country by Andrew Lord of Saybrook, about sixty years ago. He cut out the "plates" and the teeth by hand with a hand saw; a slow and expensive process. John Graham, of Boston, and Mr. Tyron of Glastenbury, made ivory combs about the same time, on a small scale; the latter person used machinery. Ezra and Elisha Pratt, of Hartford, also manufactured the article about fifty-five years ago, cutting the teeth by hand, like Mr. Lord. Abel Pratt, of Saybrook, made ivory combs fifty-one years ago. He sawed the "plates" by hand, and two hundred and fifty was considered a good days work; whereas by the present improved process four thousand can be sawed out in a day by one man. He cut the teeth, however, with circular saws and machinery moved by hand and afterwards by wind. Ezra Williams also commenced the same business in Saybrook soon after Mr. Pratt, and began to saw the "plates" with machinery moved by water power. This establishment has continued to the present time, and is now known by the name of George Read & Co. Great improvements have been made there in the machinery, and at one time nearly all the ivory comb business in the country was done by that firm. Various other attempts to carry on this business have been made, most of which have not succeeded. At the present time, all the ivory combs made in America are manufactured in Connecticut, and nearly two-thirds of the whole are made in Meriden. The business was commenced in this

### Contract Awarded for Silver Service for Battleship "Kansas."

TOPEKA, Kans., Aug. 2.—The Governor and Executive Council of the State of Kansas met at the Governor's office in Topeka, yesterday to place the order for the silver service for the battleship *Kansas,* for which the State legislature made an appropriation of $5,000. The competition was very spirited.

The competitors were: Tiffany & Co., New York; Mermod, Jaccard & King Jewelry Co., St. Louis; J. E. Caldwell & Co., Philadelphia, representing Dominick & Haff; Edward Vail & Co., Wichita, Kan., representing the Gorham Mfg. Co.; I. M. Blitz, Topeka, Kans., representing the International Silver Co.; and C. E. Wardin, Topeka, representing the Alvin Mfg. Co.; the Mauser Mfg. Co. had sent designs to J. B. Hayden, Topeka, but these designs were not submitted.

Each competitor was allowed time to submit his designs, and urge the points for their adoption, and then the Governor and the Council went into executive session, leaving the anxious exhibitors awaiting their decision.

This resulted in favor of Edward Vail & Co., on the design of the Gorham Mfg. Co., and while Mr. Vail's bid was $4,800, all other bids being $5,000, Mr. Vail was asked to supply an additional piece and the contract was awarded to him for the full amount of $5,000.

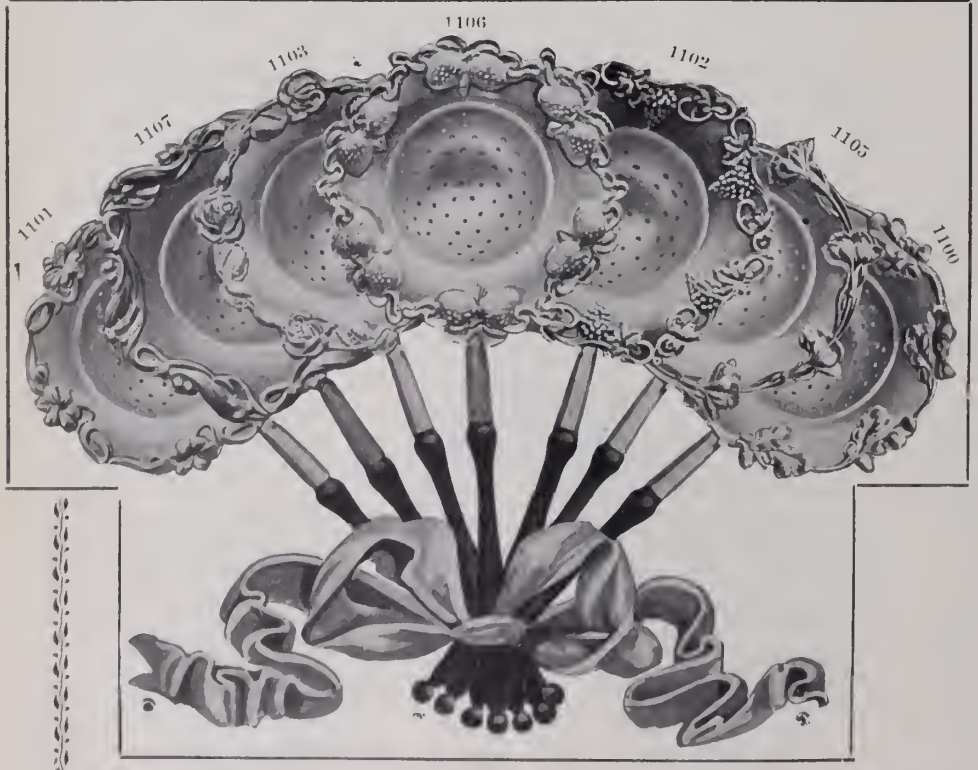
The service purchased consists of punch bowl, base, ladle and 12 punch cups four bonbon dishes, two five-light candelabra, coffee pot, tea pot, sugar bowl, cream pitcher, large waiter, two covered vegetable dishes, meat dish with well and tree, fish dish, entrée dish, soup tureen, water pitcher and waiter, and a mahogany cigar box to hold 300 cigars.

The designs submitted for the successful service were full-sized and in very elaborate detail. The *motif* of the decorations being the sunflower, emblematic of the State of Kansas. The large tray has a representation of the State Capitol building in Topeka. The punch bowl shows the battleship as she will be when completed. The service selected has been pronounced by persons familiar with those already given various ships of the navy, as one of the most beautiful.

When completed it will be placed on view at the State House in Topeka, and later will be shown in the store of Edward Vail & Co., Wichita, from which place it will finally be sent to some seaport where the Navy department will order the ship to receive the gift. The city of Galveston has already requested the Governor of Kansas to ask the authorities to name that city as the place where the ship will proceed when in commission to receive the silver service.

---

The H. D. Cone Jewelry Co., Cedar Rapids, Ia., recently made a very large sale of diamonds to Phenomenal Kraus, a celebrated local character, the amount of the purchase aggregating $4,300.



### United States Acquiesces in Decision That Millinery Ornaments Are Not Dutiable as Jewelry.

WASHINGTON, D. C., Aug. 2.—Attorney-General Moody has advised the Treasury Department that no further proceedings will be directed in the case of United States *vs.* S. Schiff & Co., A. Steinhardt & Bros., and H. Hermann, recently decided in the United States Circuit Court of Appeals for the Second Circuit, adversely to the Government.

The merchandise in suit consisted of millinery ornaments in the form of buckles, slides, bars, etc., wholly of base metal or of such metal set with imitation jet or imitation precious stones, made of glass and known as paste, strass or rhinestone. These ornaments were designed to be permanently fastened to women's hats and form part of the trimming thereof. Duties were assessed thereon at the rate of 60 per cent. ad valorem as jewelry, under Par. 434 of the Tariff Act. The importers claimed the merchandise was dutiable under Par. 112 of the same act at the rate of 45 per cent. ad valorem, as manufactures of glass or paste, or under Par. 193 at the rate of 45 per cent. ad valorem, as manufactures of metal, or of which metal is the component material of chief value, not specially provided for, which claims were sustained by the Circuit Court of Appeals on the evidence presented, it appearing that the ornaments in question were not commercially or commonly known as jewelry.

The Government will refund the duties exacted in excess.

### Sale of Stock of Prosser Optical Co., Pittsburg, Pa., Postponed.

PITTSBURG, Pa., Aug. 5.—The sale of the stock of the Prosser Optical Co., which had been levied on by the agent for the building, in default of payment for rent, was advertised to take place yesterday at the company's store, 220 6th St., but as the court had not confirmed the order of sale, it did not take place. R. E. Prosser is the manager of this concern, and since his trouble has opened offices in room 515, Smith block, just across the street from his former place of business, and is doing business under his own name as agent.

The Prosser Optical Co. was formerly located at 120 6th St., but fitted up the place closed by the Sheriff only a month or so ago. The fixtures in the store, according to a statement made by Mr. Prosser to-day, cost between $7,000 and $8,000, the store being furnished and fitted in a most lavish manner; in fact, it was so fine as to attract the attention of all of the jewelers of the city. The closing of the place was therefore a great surprise. Mr. Prosser was asked to-day if he intended to make an effort to secure the fixtures, and he said that he did not think he would.

There is some dispute on about the disposition of the stock. R. E. Prosser claims that he has stock there which did not belong to the company, and when asked about the matter, put it this way: "All goods not belonging to the company, belong to me." He would make no statement about his affairs for the present, referring THE CIRCULAR-WEEKLY correspondent to his attorney. It is expected that a sale of the goods will be ordered this week, a few of them already having been sold before litigation was commenced. Nothing will be done now until an order is issued by the court.

### Bold Thieves Rob Camden, N. J., Jeweler of Tray of Diamonds.

PHILADELPHIA, Pa., Aug. 7.—A bold robbery of a tray of diamonds worth $1,000 from the store of Thomas H. Smedley & Son, 920 Broadway, Camden, N. J., was committed last week by two colored men. They operated together, one distracting the attention of the elder Mr. Smedley, while his son was at lunch, and the other taking advantage of his distraction reached over, seized the tray and slipped out of the store. The accomplice remained in the store. Mr. Smedley, who quickly detected the theft, said nothing until assistance arrived, in the meantime engaging the attention of the pretended purchaser. Then the pal of the robber was arrested. The other man was arrested after an all-night search.

The accused men are James White, N. 16th St., and Richard Lewis, 827 N. 15th St., both of this city. They have been held in heavy bail. The evidence against them is reported to be sufficient for their conviction, and assurance is given that the stolen property will be recovered.

Michael Whelan was taken into custody last week in Troy, N. Y., on the charge of being one of the four boys who stole a tray of watches from the store of H. T. Hull & Co., Congress St. The watches were found in an alley, where they had been dropped by the boys.

# *The Débutante*

of the coming season will wear a bracelet, you may be sure.

# *And the Armilla*

will catch her fancy and win her favor more surely than any other bracelet you can show her.

The Simmons Armilla is a patented bracelet with an invisible joint and catch that allows it to be opened easily and closed securely. It looks like a solid, one-piece bracelet when worn, but, unlike any of the one-piece kinds, it clasps the wrist snugly—can't possibly slip down on the hand.

The Simmons Armilla is now being shown by the wholesale watch and jewelry trade in a variety of extremely attractive patterns, both plain and beautifully chased, and in three finishes—Roman, English and plain polished. It may be had in gold-filled stock or in 10K. or 14K. solid gold.

## Express Driver Who Stole Jeweler's Trunk Sent to Prison for Four Years and Three Months.

Four years and three months in the State Prison was the sentence passed last week by Judge Foster in the Court of General Sessions, New York, in the case of Michael Burnham, accused of stealing a trunk belonging to S. Nathan & Co., 65 Nassau St., New York. The trunk was said to contain at the time of the theft diamonds and jewelry valued at upwards of $12,000, and Mr. Nathan said that a portion, valued at $4,000, has not yet been recovered. An account of the theft was given in The Circular-Weekly July 12 last.

Mr. Nathan, returning from Philadelphia on the Pennsylvania Railroad, gave the check for the trunk and directions for its transfer to an agent of the New York Transfer Co. The trunk was loaded with other baggage on the wagon for delivery. Burnham, who had been in the company's employ two days, was the driver. He delivered the other baggage but Mr. Nathan's trunk never reached its destination. Notice was immediately sent to the company and to the police. Burnham's wagon was found the next day at Lexington Ave. near 58th St., Manhattan, where it had been abandoned.

In a few days Burnham, who is 25 years old, was found in Boston, where he was living in a lodging house with his wife Elizabeth, 23 years old. In the room was recovered a considerable quantity of the missing jewelry. The police learned that Burnham had been busy selling the jewelry at remarkably low prices in different parts of the city. The couple gave the name in Boston of Riley.

Burnham was brought to New York, indicted and pleaded guilty to grand larceny in the second degree. The original charge was grand larceny in the first degree, but on recommendation of Deputy Assistant District Attorney Smythe, the court accepted the plea of guilty in a minor degree. The judge took occasion, however, to say that the punishment was not adequate. He said that when he accepted the plea he was under the impression that the jewelry had been recovered, and that complete restitution had been made. "Having accepted the plea," said the judge, "I will assume the responsibility. I regret this outcome, as the punishment is by no means fitting to the crime committed."

## Jewelers' Gold Bars Withdrawn and Exchanged at New York.

*Week Ended Aug. 5, 1905.*

The U. S. Assay Office reports:

| | |
|---|---|
| Gold bars exchanged for gold coin | $360,971.48 |

Of this the gold bars exchanged for gold coin are reported by the Sub-Treasury as follows:

| | |
|---|---|
| July 31 | $56,310.67 |
| Aug. 1 | 65,132.63 |
| " 2 | 30,436.06 |
| " 3 | 72,060.22 |
| " 4 | 76,023.14 |
| " 5 | 61,008.76 |
| Total | $360,971.48 |

Under the firm style of E. D. Best Co., Emery D. Best has incorporated his business at Minneapolis, Minn., with a paid in capital stock of $10,000.

## Samuel Hathaway, Missing Carmichaels, Pa., Jeweler Dies at Marion, O.

Pittsburg, Pa., Aug. 3.—Samuel Hathaway, a well known jeweler of Carmichaels, Pa., died last night at the Prospect Sanitarium, Marion, O., of heart failure, superinduced by uræmic poisoning, and his death discloses the details and mystery surrounding his disappearance. About 18 months ago, so it is reported at Pittsburg, Hathaway eloped with a Braddock, Pa., woman, leaving his wife and family at Carmichaels, where he was engaged in the jewelry business, and although detectives made an effort to locate him, they could find no trace of the fugitive. It seems that he had been living under an assumed name. Before he died he told the physician in attendance that his name was Samuel Hathaway, of Carmichaels, Pa.

The dispatches from Marion to Pittsburg did not give the facts of his elopement, but Hathaway is well known here and those who knew him best, gave out this information to The Circular-Weekly correspondent. Braddock is situated about eight miles from Pittsburg and Carmichaels is about 40 miles from this city in the Monongahela Valley. Hathaway was well known and his disappearance from home at the time stated caused a great deal of talk. Within a week after he had gone, detectives were put on his track, but nothing was heard of him, until telegraphic information to-day brought the news of his death.

Mr. Hathaway, who was 50 years old, was well to do and owned a large farm near Carmichaels where his family now live. He is survived by a widow and several sons. He was taken from his lodgings in Marion to the hospital and died five hours after his removal to the sanitarium.

A number of crooks recently visited Portland, Me., and attempted to swindle the jewelers there. Most of the jewelers, however, had been warned by the police and no one suffered any loss, except G. T. Springer, who had not been warned. From him the thief was successful in getting away with a diamond while looking at stock.

YOU can readily understand that the retail jeweler appreciates watches of merit when we tell you that from January 1st, 1905, to July 1st, there were more Illinois Springfield adjusted watches manufactured and sold than in any previous six months in the history of the company.

### Suit Over Gorham Mfg. Co. Stock Amicably Settled and Present Officers Will Continue.

THE CIRCULAR-WEEKLY was authorized last Saturday by an officer of the Gorham Mfg. Co. to say that the differences between President Edward Holbrook and Vice-President Geo. H. Robinson, which threatened litigation, have been adjusted in a manner satisfactory to everybody.

It was learned that under the terms of this settlement the management of the company will be continued exactly the same as in the past. Mr. Holbrook is to continue as president and treasurer, and as heretofore will give his personal attention to the business. Mr. Robinson will be the vice-president, performing the same duties as heretofore.

The news that the matters have been settled and that perfect harmony has been restored will be received with much pleasure in the trade.

### Death of Charles H. Bush.

LOS ANGELES, Cal., Aug. 2.—Chas. H. Bush, a pioneer jeweler of this city, who had been located at 318 N. Main St. for many years, died at the California Hospital in this city July 24, and was buried Wednesday.

EST. 1866.

*Lissauer & Company*

2 TULP STRAAT, AMSTERDAM

XII MAIDEN LANE, NEW YORK.

P. O. Box, 1625.

Mr. Bush was 70 years old at the time of his death and had been a resident of Los Angeles for 35 years. He was married in Ohio many years ago, but had separated from his wife and son before coming to California. In Los Angeles he lived a lonely life, having few intimate acquaintances. He accumulated a fortune estimated at $250,000. Besides his wife and son, he leaves a brother and sister and several nieces and nephews.

Deceased was buried under the auspices of the Los Angeles society of Pioneers, of which he was a member.

### Syracuse Trust Co. Elected Trustee of M. S. Benedict Mfg. Co.

UTICA, Aug. 5.—The Syracuse Trust Co. was appointed as the trustee of the bankrupt M. S. Benedict Mfg. Co. at the meeting of creditors held before Referee Stone yesterday. The bond was fixed at $50,000.

Receiver Barnes, who has had charge of the company since it was forced into bankruptcy in February, is connected with the Trust Co., which is a heavy note creditor of the company. The receiver has continued the factory in operation, and it will be sold as a going concern. No steps have yet been taken towards the sale of the property.

Over 150 of the 250 or 300 claims were filed and the creditors' meeting attracted many lawyers from New York and as far west as Chicago. It is doubtful if the estate will pay 50 cents on the dollar.

Receiver MacKenzie, who is in charge of the property of Harry L. Benedict, of the Benedict & MacFarlane trading stamp concern and the controlling stockholder in the M. S. Benedict Mfg. Co., yesterday began a sale in a Chicago warehouse of the stock found in the firm's trading stamp stores in about a dozen western cities.

### Swindlers Who Defrauded Jewelers by Dishonest Bankruptcies Sentenced to Prison.

JAMESTOWN, N. Y., Aug. 7.—Albert Lowrie and his accomplices who defrauded jewelry and clothing manufacturers, chiefly the former, by a bankruptcy scheme, were sentenced last week in this city. Lowrie's sentence is eight months' imprisonment and $1,000 fine; Harry Joseph was sentenced to 13 months' imprisonment and $1,000 fine; Isaac Joseph, Moses Hendler and Aaron Schwartz were fined each $1,000. The men are former Buffalonians. Hendler is in business at Forest City, Pa.

In 1903 Lowrie opened a store in Buffalo and bought considerable quantities of jewelry and clothing, and a few days afterwards he went into bankruptcy. When his creditors arrived at his place of business they found little stock there. They were informed that the goods had been shipped under names other than that of Lowrie to Scranton and Forest City, Pa. Investigations followed and criminal proceedings were begun.

According to the schedules filed in the bankruptcy court Lowrie owed upwards of $25,000 for merchandise. The stock found in the store by the creditors was worth not more than $3,000.

### Jewelers Should Watch Out for This Man, Wanted on Larceny Charge.

ELMIRA, N. Y., Aug. 5.—The jewelry trade is cautioned to watch out for a young man giving the name of Murray, apparently of Irish descent, well built, about six feet tall, with light blue eyes, brown hair and red pimpled face, who is wanted by the police of this city and Binghamton on a charge of larceny. The man called at Ash Bros'. store here about Aug. 1, and had a ring sized, and the following day went to the firm's store in Binghamton and stole a diamond brooch.

The man wears a 12-size H. C. watch, which he says was given him by a Philippine soldier, with a gold cross attached by two fine strands of gold chain, in fob style. When calling on jewelers he generally pretends to be drunk, is very profane and shows a large roll of money when talking. Jewelers who may see this man are requested to communicate with the police.

### Employes of Gorham Mfg. Co. Hold Enjoyable Outing at Providence.

PROVIDENCE, R. I., Aug. 7.—The 14th annual field day of Room M-3 of the Gorham Mfg. Co., was held at the Warwick Club last Saturday. There was a large number of employes and guests present and the occasion was most enjoyable. The party went from this city in a special car.

The list of sports was a lengthy one and included a grand hunt, bowling, quoits, 100 yards dash, Siren race, tug of war, Room M-3 *vs.* the guests; a guessing contest and a baseball game between Room M-3 and the guests. In the tug of war Room M-3 proved victorious while the guests captured the ball game.

Luncheon was served at 1 o'clock and at 5 o'clock a Rhode Island clam dinner was enjoyed. Brief remarks by Joseph Straker, Sr., of the room and William C. Codman, Sr., enlivened the occasion.

### Death of Joseph W. H. Meacher.

CHARLESTON, S. C., Aug. 5.—The recent death of Joseph W. H. Meacher, of this city, was deeply regretted by his many friends in the jewelry trade, as Mr. Meacher had been connected with the craft here for a long time. He started in the jewelry business in Charleston in the employ of James Allen & Co., later went with the McElree Jewelry Co., and finally, in 1893, began business on his own account. Of recent years he had a store at 483 King St. The deceased was 48 years old, and is survived by a widow.

# Fourth Annual Outing a Success.

**Members of the Twenty-four Karat Club Enjoy a Clambake and Athletic Tournament at Staten Island, N. Y.**

Members of the 24-Karat Club, of New York, enjoyed last Saturday their fourth annual outing, to which they had been looking forward with many pleasant anticipations; and they were not disappointed. Each year a new place is selected for the scene of these midsummer functions, which add variety, but the club, being out for a jolly time, would have it wherever it planted its colors. Livingston, on Staten Island, was chosen for this year's festivities, and the selection showed the committee's discernment in appointing a fitting rendezvous. Headquarters were at the Cove Hotel, including the adjacent grounds, which were once the home of a well-known athletic club.

Several of the members brought friends as guests, and the total attendance was larger than at any of the society's previous outings. Most of the party took the 12 o'clock boat for Staten Island, and arriving at St. George proceeded in cars to the hotel, where all proceeded to have, if not *the* time of their lives, at least one of the times. The formality and the speeches of the Winter dinner were, of course, eliminated from the outing, the charm of which lies chiefly in the delightful informality, as members and guests are here all as brothers assembled for the purposes of feasting, games and merriment.

Out on the lawn were tables at which, as soon as the hungry men arrived, they were regaled with as fine clam chowder as has been served within the memory of the oldest Epicurean in the club. Thus refreshed, the younger men, and some of the older ones, too, whisked away to the baseball grounds in order to limber up preparatory to the field day contests that had been planned for later in the afternoon. Those who did not wish to toy with baseball or bat tried their hands at quoits and other lighter forms of exercise. All this was interrupted by the call to the clambake, the savory odors of which had been blowing out to the field for some time, putting an edge on the appetite of even the most pronounced dyspeptic among the guests.

In the hotel the dining-room was prettily trimmed with festoons and flags of the nations. Two long tables were set, with President E. R. Crippen at the head of the first. As the orchestra finished the strains of the "Star Spangled Banner" the party was seated, the president rising only to say that everything was to be informal and that there would be no speeches. An excellent feast was then enjoyed, beginning with the clams steaming from their bed of sea grass. Then came sea bass, hard-shell crabs,

E. R. CRIPPEN,
President of the Twenty-four Karat Club.

lobsters, chicken, corn, all from the oven on the lawn, just outside the windows, the food being washed down with potations of nut-brown beer.

Music is always a feature of the club's jollifications. The orchestra played about all the songs it knew, and the diners or those of them who could sing joined in accompanying vocal efforts that revealed not only lung power, but good ears for harmony. After the cigars all went out to the grand stand of the baseball grounds, where the photograph was taken by the club's photographer.

Soon the athletic contests were in full swing. Two handsome prizes were offered, and the rivalry to possess them brought out the best efforts of the younger set. But nearly everybody, whether hopeful of winning a prize or not, showed some prowess in one or another form of exercise, for it is a point with the members to assay as high as they can (up to 24 karats if possible) in athletics as well as in business.

The first contest was the potato race, in which there were a dozen entries. The contest was conducted in two heats, and the result was a victory for Henri Schwob, with A. A. Wood second and J. L. Bennett third. Among the contestants for whom there was the most vigorous rooting was W. H. Kinna and P. H. Savory, both of whom made fast time, although they did not get a place among the winners.

Then came the sack race, and earnest efforts were made to induce Messrs. Kinna, Savoy and others, classed as heavyweights, to enter, but only the men of lighter weight could be induced to incase themselves in the bags. Mr. Schwob came in first in this race, with Mr. Bennett a close second, and most of the others rolling around on the field and trying to get on their feet.

Willard H. Wheeler, the chairman of the Committee on Sports, after a consultation with his colleagues, decided that Mr. Schwob had given ample proof of his qualifications as the club champion, and he was entitled to first prize, a large covered stein of weathered oak and silver, suitably inscribed and ornamented with the club seal, this fine trophy being a donation of President Crippen. A smaller cup of somewhat similar pattern, donated by John Frick, was awarded to Mr. Bennett as second prize. As it is a handsome cup, he did not object to the designation "a has been" or to the representation of the lobster beneath the club seal on the face of the cup.

This did not end the day's sport by any means, for the baseball game was still to come. It was expected that it would be a "hummer," as the jobbers were opposed to the manufacturers, and so it proved. Both teams were fortunate in having excellent batteries, the pitching and catching being of

excellent standard for amateurs. On the bases and in the field also were men who knew how to stop a fast ball and were ready to get under a fly and "eat it up."

The jobbers made a brave beginning by scoring two runs in the first inning, and giving a "goose egg" to the manufacturers. In the third inning, however, the manufacturers acquired a batting streak, and when they were put out they had made four tallies, which, with one made in the third inning, gave them a total of five. The jobbers had not scored anything after the two runs made in the first inning. This closed the game with nobody hurt, and no feeling against President Crippen, who umpired, or L. Tallman, who kept score. Following was the line-up of the teams:

Manufacturers—Beckwith, c.; Samuel, 1b.; Prouty, r.f; Kinna, 2b.; Schierloh, 3b.;

THE PRESIDENT'S CUP.

Talbot, p.; Beers, ss.; Trewin, c.f.; Flinn, l.f. Jobbers—Wheeler, 1b.; Alford, ss.; Allison, 2b.; H. Schwob, p.; J. Schwob, c.; Wood, 3b.; Kohn, l.f.; Weisz, c.f.; Fisher, r.f.

In the quoit contests, earlier in the day, Messrs. Kinna and Weisz opposed Messrs. Larter and Tunison, the latter winning by a score of 11 to 8. The result might have been different, the losers said, if the game had not been interrupted by a call to dinner. In another quoit contest Messrs. Benedict and Trewin defeated Messrs. Crippen and Adler by a score of 21 to 19. In a third game, Messrs. Trewin and Crippen had seven points against six for Messrs. Benedict and Schierloh when the call for dinner came.

Following is a partial list of those present:

S. B. Ross, Senator Wm. Tully, John Hall, James Hoare, J. W. Alford, Frank C. Beckwith, R. A. Talbot, H. R. Benedict, A. Feucke, C. S. Belden, Frank McDermott, G. F. Freinier, Robt. Laster, C. F. Brinck, Wm. Allison, John Frick,

A. L. Brown, E. S. Smith, E. R. Crippen, A. A. Wood, T. W. Dreyfus, George Whitlock, H. N. Eliassof, D. H. Fisher, H. A. Flinn, G. B. Knoblock, R. R. Fogel, L. Samuel, James R. Gleason, H. N. Beers, W. H. Kinna, P. C. Maylove, A. G. Prouty, O. W. Kohn, E. P. Kohn, Samuel Kramer, Alfred Krower, Leonard Krower, H. C. Larter, O. W. Tunison, M. G. Levy, H. W. Frudenheim, Robt. Hunt, L. C. Maxwell, C. G. Malliet, V. S. Mulford, W. I. Rosenfeld, P. H. Savory, J. Goldberg, Adolph Schwob, Jules Schwob, Henri Schwob, A. R. Weisz, Col. John L. Sheperd, J. K. Thompson, J. T. Schierloh, A. L. Stearns, Chas. Chevalier, James Hollywood, F. W. Trewin, W.

SECOND PRIZE DONATED BY JOHN FRICK.

H. Wheeler, George R. Whitehead, Hon. J. B. Wood, E. H. Pelletreau, W. G. Wood, T. Zurbrugg, W. P. McGlynn, George T. Stebbins, J. W. Sherwood, J. C. Adler, F. W. Judge, Jr., H. Conradi, H. F. Devoe, J. L. Bennett, H. Bennett, A Rosenthal, L. Tallman, F. A. McGill.

## Echoes from the Field.

Catcher Beckwith excelled in his work and his batting average was high.

* * *

W. H. Kinna, affable as always, was there "with the goods" when hits were needed for his team.

* * *

There was keen rivalry between Pitchers Talbot and Schwob, with honors about even, and each was strong in batting.

* * *

Col. Jno. L. Shepherd was present, and although

THE SOUVENIR.

he did not take part in the athletic contests, he "rooted" energetically.

* * *

Messrs. Malliet and Maxwell were conspicuous for modesty, but enjoyed themselves in their quiet way just the same.

* * *

Unexpected talent was revealed during the dinner when O. W. Kohn and his brother, E. P. Kohn, leaving their places at the table and exchanging places with the pianist and first violinist, played

The only American Commission Merchant in Precious Stones and Pearls located in Paris.

He gets no commission from the Seller; he has no preferences, and his only obligation is to find for the buyer such goods as he may be in need of at the lowest market prices.

This service costs the buyer only 2% of the purchase price.

**FREDERICK A. JEANNE,**

**5 Square de l'Opera,**
**Opposite Theatre l'Athenee,**
**PARIS, FRANCE.**

several duets so cleverly that they were vigorously applauded. "What's the matter with the Kohn brothers in vaudeville?" exclaimed one enthusiast.

* * *

D. H. Fisher played right field for all it was worth. The ball landed twice off the manufacturers' bats, and he lived up to his reputation as a sprinter.

* * *

Among the out-of-town visitors was George W. Whitlock, Eufaula, Ala., who said it was a great pleasure to get among so fine a body of men in his own trade.

* * *

The following were the committees in charge: General Arrangements—Percy Savory, J. R. Gleason, Albert L. Stearns. Sports—Willard Wheeler, J. Warren Alford and Stephen Avery.

* * *

Pitcher Schwob wasn't troubled with glass arm. He retired the manufacturers' side in 1-2-3 order the first inning. Then some one on the opposing team accused him of having professional skill.

* * *

W. H. Wheeler assumed the captainship of the jobbers' baseball team, and endeavored to say things to the umpire when there were close decisions. Needless to say, Umpire Crippen was firm as adamant.

* * *

Everybody praised John Frick's artistic conceptions as expressed in the steins given as trophies. He also made the pretty souvenir cups, of royal copper and pewter, bearing on the face the club's seal and the figures, "1905."

* * *

"The Smoke Goes Up the Chimney Just the Same" and "Annie Rooney," may not be popular, generally speaking, but ask anyone within a stone's throw of the dining hall what the jewelers think of these once popular melodies!

* * *

A certain firm in Newark manufactures a stick pin representing a lobster claw. Both of the representatives of this concern present wore claws of real lobsters in their neckties after the fish had been served. The jobbers all took notice.

* * *

The photographs of the outing were on sale, to be paid for before the photographer had taken the picture. Some of those present asked if the pictures might be had on memorandum. This was about the only business term heard throughout the day.

* * *

As usual, when the 24-Karat Club does anything, the detailed arrangements were left to C. F. Brinck, because he had done the work from the beginning, and has done it so well that nobody could improve upon his labors. No little credit is due him for the smoothness with which the plans were carried out, and the good cheer made apparent on all sides.

* * *

When you approached Leonard Krower, of New Orleans, you saw a white thread on the southerner's otherwise immaculate black coat. Quite naturally you pulled at the thread to remove it and found that there was more than you expected. After you yanked out a couple of yards or so of the silk Mr. Krower courteously threw back the lapel of his coat revealing a tiny spool of thread pinned there for the purpose of amusing you. A score or more of men were caught by this trick.

### Canadian Jewelers Robbed of Rings Worth $4,000 by Daring Burglar.

BRANDON, Can., Aug. 3.—The jewelry store of Mallett & Matthews, Rosser Ave., was robbed in a daring manner late this afternoon. The thief or thieves got away with between 40 and 50 rings all containing fine gems and valued at between $4,000 and $5,000.

Investigation showed that the store had been entered from the rear, the robber getting in by the storm window. Some time later the man was seen coming out of the place, and this, arousing suspicion, an alarm was given and the robbery was discovered. At the time of the robbery the store had been closed on account of the exhibition.

The police immediately went to work on the case and later arrested Edward Murphy, who was identified by witnesses as being the man they saw coming from the store. No jewelry was found on the prisoner, but the police believe him to be a professional criminal, and to have had an accomplice.

### Death of Albert T. Salt.

ATTLEBORO, Mass., Aug. 8.—Albert T. Salt, of the Atlas Silver Foundry, died suddenly of heart failure, on Saturday night. He is survived by his widow and three daughters. He met Mrs. Salt at the door, upon her return home, and dropped dead at her feet.

Mr. Salt was born in Birmingham, Eng., Oct. 2, 1870, and came to this country, with his parents, at the age of 11.

He was an expert moulder, having held positions with the Gorham Mfg. Co., and Tiffany & Co. He was a member of Wanponoman Lodge of Masons of Sag Harbor, and of Montauk Court of Foresters.

The funeral was held to-day, under Masonic auspices, with representations from the Attleboro and Sag Harbor Lodges, and from the Foresters.

### Wisconsin Association of Optometrists Elect Officers at Annual Meeting.

MILWAUKEE, Wis., Aug. 2.—The Wisconsin Association of Optometrists met recently in the Plankington house in this city, and elected the following officers: President, A. J. Stoessel, Milwaukee; vice-president, J. A. Wilcox, Waterloo; treasurer, H. McEwan, Fond du Lac; secretary, E. E. Thomas, Milwaukee; directors, W. H. Becken, of Beaver Dam, A. Snider, of Beloit, and I. M. Addleman of Tomah. H. Waldeck, Milwaukee, was elected delegate to the meeting of the American association, to be held next year in Rochester, N. Y. The alternates are H. E. Wiegant of Racine and L. Muskat of Milwaukee.

Prior to the election the 35 delegates, who formerly represented the Wisconsin State Optical society, changed the name of the organization and adopted a new constitution. Arrangements were also made to incorporate under the new name, but no capital stock will be issued. The annual session in 1906 will be held in Racine.

J. A. Owen is selling out his jewelry business in Bonham, Tex.

### Reappraisements of China.

DECORATED china and manufactures of glass and metal were reassessed last week by the Board of United States General Appraisers as follows:

Decorated china from Porzellanfabrik Victoria, Altrohlau, exported April 29, 1905, entered at New York (File No. 35996); findings of Sharretts, G. A.: 4 dinner sets, 101 pieces, seconds, 834/8153, entered at 17.50, advanced to 20 crowns per set; 4 dinner sets, do., 834/8154, entered at 17.50, advanced to 20 crowns per set; 8 dinner sets, 100 pieces, seconds, 834/8153 and 8154, entered at 16, advanced to 18.50 crowns per set. Add crates and casks.

Manufactures of metal and glass from Kirchner & Co., Barmen, exported June 21, 1905, entered at New York (File No. 36049); findings of Sharretts, G. A.: 430 cartons 10/40 pins, jet heads, entered at .17, advanced to .19 mark per carton; 250 cartons do., 10/50, jet heads, entered at .205, advanced to .24 mark per carton; 800 cartons 10/60 do.; entered at .24, advanced to .27 mark per carton; 40 cartons 10/60 do., white heads, entered at .20, advanced to .23 mark per carton; 70 cartons 10/60 do., jet heads, entered at .17, advanced to .19 mark per carton; 400 cartons 10/80 do., jet heads, entered at .295, advanced to .33 mark per carton; 240 cartons 10/40 do., white heads, entered at .20, advanced to .23 mark per carton; 100 cartons 10/80 do., white heads; entered at .35, advanced to .39 mark per carton; 250 cartons 10/40 do., mat heads, entered at .21, advanced to .25 mark per carton; 100 cartons 10/50 do., mat heads, entered at .255, advanced to .31 mark per carton; 100 cartons 10/60 do., mat heads, entered at .30, advanced to .36 mark per carton. 100 cartons 10/80 do., mat heads, entered at .375, advanced to .45 mark per carton. Add cases. Discount on entered values, 2 per cent.; on advanced values, 5 per cent. and 2 per cent. Packing included.

Ed. Richie, Franklin Grove, Ill., has sold out his business.

Increasing Scarcity of the Finer

# AMETHYSTS

AT ONE PERIOD the Amethyst ranked among the most valuable of precious stones. Its value depends upon fashion. Fine Amethysts are getting scarce. They may re-establish their prestige in the world of gems.

We have a good stock of Uruquay and Brazilian rough. Every stone well cut and polished renders these cheaper precious stones more important and valuable for the purposes of fine Jewelry.

### Death of Nicholas Schwarz.

Nicholas Schwarz, president of the Schwarz Mfg. Co., 217 E. 38th St., New York, died, Aug. 4, at the New York Hospital, at the age of 62 years. He suffered from a stroke of apoplexy, which resulted in his death.

Mr. Schwarz was one of the oldest and most prominent men in his line, the manufacture of jewelry cases, and he had a wide circle of friends in and out of the trade. He was a man of many excellent qualities, which endeared him to his relatives and friends, to whom his death was a sad shock. A native of Germany, he came to this country early in life and built up a prosperous business. He was a member of the Masonic fraternity, of the Elks and other associations, whose members held him in high regard. A widow, six sons and six daughters survive. The funeral took place Sunday, the interment being in Woodlawn Cemetery.

### Involuntary Bankruptcy Petition Filed Against C. E. Jones, Atlanta, Ga.

ATLANTA, Ga., Aug. 8.—An involuntary petition in bankruptcy was filed, last week, against the C. E. Jones Co. Mr. Jones has been in business as a manufacturer's agent. Some time ago several suits were began against him. Some creditors became insistent in pressing claims which he did not meet and they finally decided to begin proceedings in bankruptcy.

It is believed that the total indebtedness is small.

## Baltimore.

Arthur Wallenhorst, 110 N. Gay St., is sojourning at Hot Springs, Ark.

Columbus Wilson, "The Little Jeweler of Gilmor St.," was arrested last week charged with receiving stolen goods. A gold watch and charm valued at $25 and $8 respectively, were taken from a member of No. 7 Engine Co., and it was claimed the thief sold them to Mr. Wilson. The jeweler appeared before Judge Goldman and produced the charm, but declined to make a statement.

John T. Bishop, a salesman in the employ of J. Castelberg & Sons, 106 N. Eutaw St., was recently held in default of $5,000 bail by Justice Loden on several charges of larceny from that firm. The specific charges were the larceny of two diamond rings valued at $700, and a silver watch valued at $7.50, during the month of June, and three gold watches valued at $115, two diamond rings valued at $155, one ring valued at $15, two gold watch chains valued at $15, during March, April and June.

## Boston.

E. A. Marsh, superintendent of the American Waltham Watch Co.'s factory, sailed for Europe, last week.

George L. Kerr, formerly of Malden, has located in Cornish, Me., succeeding George A. Allen who is now traveling for a western house.

Friends of Col. Osgood, of Lewiston, Me., have learned with pleasure this week that he has been able recently to get out again, after an illness of several months.

A. R. Harmon, London representative of the American Waltham Watch Co., who has been in this country for about a month, combining business with an outing trip, returns this week to England.

The E. Howard Clock Co. had a special exhibit at the recent electrical exposition in this city of a watchman's clock, constructed for Jordan, Marsh & Co., to be placed shortly in the superintendent's office. It will make connections with 150 stations.

Buyers in town during the week included: E. S. Brooks, Palmer; F. M. Nichols, Taunton; David Robertson, South Framingham; C. E. Powers, Webster; L. R. Hapgood, Orange; F. O. Cox, Concord, N. H.; Mr. Gooding of Gooding Bros., Plymouth.

Owing to the fact that Barton P. Jenks, formerly of Goodnow & Jenks, was recently elected to the presidency of the Wm. B. Durgin Co., Concord, N. H., the partnership of Goodnow & Jenks has been dissolved and Walter R. Goodnow will settle in liquidation. The business will be continued by Mr. Goodnow, under the style of Goodnow & Co., without material change.

It was reported in the trade in this city, last week, that W. W. Smith, formerly an agent for the jewelry firm of Gordon & Burgin, of Boston and Lynn, who is wanted on the charge of larceny of between $600 and $700 from that firm, had been arrested in St. Johnsbury, Vt. It is alleged that Smith took the money from the jewelry firm while he was at work selling their goods, several months ago, and the police have been looking for him ever since.

Silas P. Houser, Lincolnton, N. C., has decided to return to Rutherford and again go into the jewelry business in that town.

### Watches Not "Plate" Under British Law.

FROM recent advices received from London it is learned that the Goldsmiths' Co. is back of a movement to make it obligatory that all imported gold and silver watches should be marked as plate. To that end a test case was raised in which a penalty of £10 was asked as penalty for the sale of two foreign watches which had not been hall-marked. The contention made by the company was that the watches in question should have been marked in accordance with a customs act of 1802, and an amendment of 1842. In passing judgment the judge went briefly over the various uses of the word "plate," and gave it as his opinion that the expression "gold and silver plate," as ordinarily used, would not be an apt one in connection with watches.

Under the Act of 1802 it is provided that no watch claiming to be made of gold or silver, of English make, can be sold by any dealer unless it is hall-marked. This was to give the customer a guarantee that he was not being cheated, and to prevent the sale to him of watches, the cases of which were composed of base metal. It is claimed by the Goldsmiths' Co. that this was a sensible and practical act, and that methods of government and not the act are responsible for the mischief claimed against British industry. Under the Act of 1842 it was forbidden to import any gold or silver plate or vessel into England unless it should be hall-marked, and it has always been assumed, until this recent decision, that the act governed and applied to the importation of foreign watches. In the recent case the judge took the view that the acts did not seem to say that everything which, if made in England, would have to be marked, would also have to be marked if imported. The real value of the watch was in the works, the case being only an accessory part. He held that a watch was an article depending more for its value upon its mode of manufacture than on the materials composing it.

By this decision it would seem that the foreign watchmaker is freed from all restrictions. He is not obliged to submit watches which are imported complete, with works as well as case, to be assayed and stamped before they can be sold as gold or silver. Watches can be sold in England, therefore, of 8/10 or 7/10 gold or silver, while the British manufacturer has no chance of competing. Nor can the British subject import foreign cases and place English works in them because cases without works are "plate" and must be hall-marked and properly assayed. This gives an opportunity for foreign manufacturers to undersell, as the English watch case must be 9/10ths gold or silver, while the imported can be of any fineness, according to the scruples of the foreign maker. It is thought that the decision will operate to encourage the importation of watches with low-grade cases, called "gold" or "silver," but really composed principally of alloy. When there was a doubt as to whether or not foreign watches were to be exempt from assay, foreign manufacturers were careful as to the exact proportion of alloy used. Therefore a strong effort is to be made to influence the English purchasing public against imported watches. There is some talk of an appeal from this decision which is by some considered manifestly unfair.

### Precious Stone Importations During July.

CONTINUED increase is noted in the importations of precious stones at the Port of New York for the month just past, as shown by the statistics of Gen. Geo. W. Mindel, the jewelry examiner. Following the record-breaking figures of the fiscal year, the month of July began the new year breaking the records of all previous Julys, not only in the total amount of importations, but both in the amount of uncut and cut precious stones. According to the official figures the total value of the gems brought in was nearly four millions, or to be exact, $3,992,831.90, which was over $1,800,000 more than the total for July 1904, and over $1,300,000 more than July, 1902, the largest on record. Of the total the cut stones and pearls were valued at $3,149,735.89, and the uncut stones, principally diamonds, at $843,096.01. The principal increase it will be seen is in the cut stones and pearls, which was over $1,750,000 more than imported last July and nearly $800,000 more than the highest amount ever recorded for the month.

A comparison of the importation of precious stones at New York during July for the past eight years may be interesting and can be made from the following table:

| *July.* | *Cut.* | *Uncut.* | *Total.* |
|---|---|---|---|
| 1905.... | $3,149,735.89 | $843,096.01 | $3,992,831.90 |
| 1904.... | 1,368,154.14 | 811,797.22 | 2,179,948.36 |
| 1903.... | 1,464,147.60 | 700,608.00 | 2,164,755.60 |
| 1902.... | 2,143,805.58 | 511,071.07 | 2,654,806.65 |
| 1901.... | 2,355,389.61 | 189,010.43 | 2,544,400.04 |
| 1900.... | 1,482,781.05 | 618,043.57 | 2,100,824.62 |
| 1899.... | 1,815,649.28 | 578,719.66 | 2,394,368.94 |
| 1898.... | 1,640,469.25 | 491,525.99 | 2,131,995.24 |

### A Loss to the Watch Trade.

THE late Duane Herbert Church, who died Aug. 1, at his home in West Newton, is entitled to high rank among the foremost inventors of his generation. To the watch manufacturing industry he stood in the same relation that Singer held with the development of the sewing machine, that Bell held with the improvement of the telephone, that Edison holds in the electrical field, and that hundreds of other famous inventors who have aided in the advancement of mechanical aids to productiveness in various industries have occupied during the prolific past half century.

More than 150 machines were invented by Mr. Church, and are still in use, most of them by the company which his creative genius helped to place in the front rank of the world's watch manufacturers. He was progressive, alert and up to the moment in his inventiveness. Whatever any other company produced was studied by him, and he seemed to perceive intuitively the methods by which any improvement had been brought about. If it could still be improved upon he was quick to see how and where.

A description of his inventions is impossible, because so many of them are guarded as the exclusive property and for the exclusive use of the Waltham concern. But the history of progress in watchmaking in the last quarter of a century is largely the history of the achievements of the man who has just passed away.

## Last Week's New York Arrivals.

*48 Rue de Meslay, PARIS* *Telephone, 2188 Cortland* *17 Maiden Lane, NEW YORK*

## New York Notes.

A. Roseman and his son, Jacob Roseman, are in the Catskills.

Montagu F. Harris, of Harris & Harrington, 12 Barclay St., returned last week from Europe on the *Caronia*.

Offices and show rooms for its New York business, have been leased by the William B. Durgin Co., in the Reed & Barton building, 320 Fifth Ave.

Eugene Jodry, employed in the jewelry department of a Sixth Ave. store, whose father was formerly in the jewelry business at Port Jervis, N. Y., has been visiting friends in that city.

Cash has just been received by The Jewelers Association and Board of Trade, New York, from B. N. Henshel & Co., Buffalo, N. Y., in accordance with the terms of settlement recently accepted in behalf of creditors who will now receive 40 per cent. The Board is now dispersing the amount among the creditors.

Circulars have been sent out by the Merchants' Association of New York calling attention to the National Reciprocity Conference to be conducted in Chicago Aug. 16 and 17. Among the associations which are scheduled to send representatives there are none composed distinctively of jewelers. Most of the organizations are located in the west.

Application was made last week to the Supreme Court for an order forbidding Henry Stultzky, a jewelry workman, of Brooklyn, from going outside the jurisdiction of the court pending an action brought against him by his wife for divorce. She claims that he was about to leave the city and desert her, after bringing her here from Russia.

A final dividend of slightly more than 11 per cent. was recently distributed by The Jewelers Association and Board of Trade, New York, among the creditors of Geo. R. Metten, Helena, Mont., in bankruptcy. The Board also sent out a first dividend of 15 per cent. to the creditors of W. E. Cannon & Co., in bankruptcy at Kansas City, Mo. In the case of E. L. Hight & Co., Henderson, N. C., who made an assignment, the Board has compromised its claim at 33 per cent.

Imitation carnelian intaglios are not entitled to the benefits of Par. 435 of the tariff law, according to a decision made last week by the Board of United States General Appraisers, disposing of a protest made by Bruhl Bros. & Co. against an assessment of duty by the Collector at Providence, R. I. The merchandise comprised two lots. One was composed of imitation half pearls made of paste. In relation to this the Board, following precedents, sustained the protest and declared that the duty should be 20 per cent. under Par. 435. The second lot comprised the intaglios and when the Board reached them it took a different position, because the intaglios had been ornamented by a super-added process of engraving. The Board decided that they should be excluded from classification under Par 435, and the action of the Collector in assessing duty at 45 per cent. was affirmed.

James M. Bloomfield, a diamond broker living at 151 W. 96th St., was found Saturday night lying unconscious in the vesti-

bule of his house. He was taken to the J. Hood Wright Hospital, where it was found that his skull was fractured. It is supposed that Bloomfield, who is a heavy man, had a sudden attack of vertigo, and fell, striking his head on the stone step. He is 42 years old, and has lived with his wife and a daughter. He was formerly a salesman in the employ of a Maiden Lane house, and in June obtained desk room at Fifth Ave. and 42d St., where he had been in business for himself.

Mr. and Mrs. Nathan A. Sachs are spending August in the Catskills.

Albert Oppenheimer, with R., L. & M. Friedlander, is spending his vacation in the Catskills.

A. Straus, 409 Fulton St., Brooklyn, has gone on a vacation and, before his return, will visit Saratoga, Montreal and Quebec.

Henry Silberfield & Co., 1395 Broadway, is making extensive improvements in his store, which will have a larger and more handsome front.

A discharge in bankruptcy was granted last week to Samuel Turk, the pawnbroker at 1464 Second Ave. The total amount of his liabilities was $19,280.

Imports of diamonds into the port of New York in the week ending Aug. 4 amounted in value to the high total of $1,023,041, a gain of nearly 100 per cent. over the corresponding week of last year.

Among the property owners who have joined in a petition in favor of making a parkway in Seventh Ave., from Central Park to Harlem River, is A. P. Nahmens, a jeweler at 262 W. 125th St. He said it would give tone to Seventh Ave., and would benefit both his business and his residence property.

W. H. Warrington, for some years with J. T. Scott & Co. and recently with A. Roseman, is now representing C. G. Alford & Co. Mr. Warrington has a host of friends and is popular with the trade. In his new position he will unquestionably retain his old customers and add new ones to his already extensive acquaintance.

In the United States District Court, last week, a discharge of his debts in bankruptcy was granted to W. F. Doll, 175 Broadway. The obligations of which he is now legally released were in the form of judgments taken against him in Canada, a number of years ago, in legal proceedings not connected with the jewelry trade. The total amount involved in these judgments was $3,125.

Several jewelers on Fulton St., in Brooklyn, have joined in a movement which promises to improve business on the north side of the street, in the shopping district between City Hall and Flatbush Ave. In the windows of all the stores appears the sign, "This Is the Bargain Side of Fulton Street." It has often been noticed that the tendency of the crowd is to walk on the south side of the street, and the merchants on the opposite side are now endeavoring to coax the people across.

Leonard Krower, New Orleans, La., who has established a temporary office at 37 Maiden Lane, New York, is experiencing some difficulty in consequence of the rigid quarantine established in the south. A letter, mailed from the New Orleans office to a Mississippi firm, was returned to the home office stamped, "Return to sender as undeliverable matter on account of quarantine." The adverse conditions have compelled Mr. Krower to open an office in St. Louis from which goods will be shipped without delay to his trade in the west and south. Mr. Krower reports that notwithstanding the fever scare, all of his several departments have forged ahead in sales from 20 to 40 per cent. during the months of June and July, as compared with the corresponding months last year.

An attempt was reported, last Friday, to steal a gold pencil from the store of Udall & Ballou, 499 Fifth Ave. A young man asked to see some pencils and a case was shown to him by Herbert Graham, one of the salesmen. The caller, according to the salesman's statement, spent some time examining the pencils and while holding one in each hand tried to divert Mr. Graham's attention. At that juncture, the supposed purchaser found occasion to wipe the perspiration from his forehead, and by a movement that looked easy, the handkerchief on going back into his pocket had one of the pencils held in its folds. Mr. Graham's eye never left the two pencils, and he saw clearly that one of them reached the young man's pocket. The salesman promptly took away the case and placed it out of reach. As he did so the visitor withdrew, somewhat hastily. Mr. Graham had been trying for some moments to signal one of his associates to get a policeman, and now he followed the man with the pencil. At the first corner, Mr. Graham called a policeman, and asked him to arrest the young man whom he had kept in sight from the time he had left the store. The young man apparently became alarmed and ran and the policeman gave chase. In the back part of a saloon in 42d St., a man was arrested, who gave his name as Montauk Syrle, his age as 28 years, and Montreal as his place of residence. The salesman identified his as the man who had been looking at the pencils, and charged

him with larceny. The police took Syrle's photograph and sent to Montreal, asking the police of that city if they knew him. In the Jefferson Market Court he was held in $300 bail for trial.

Isidore Cohen, a jewelry workman, of this city, committed suicide one day last week at Denver, Colo., where he had gone in search of health.

Henry Stein, manufacturer of mountings, 80 Nassau St., has been succeeded by the firm of Stein & Hochberg. The new firm is composed of Mr. Stein and M. Hochberg.

Gerstman & Bandman, 75 Nassau St., manufacturers of rings and mountings, have asked for an extension. It is expected that the creditors will reach a conclusion on the question of granting the firm's request in a day or two.

From Saratoga Springs, N. Y., comes a report that George Adamson, who said that he was a diamond broker in New York, was held for the Grand Jury on the charge of shooting at another New York man. In default of bail the prisoner was locked in the county jail.

In the United States District Circuit Court last week Thomas J. Bradley, formerly at 372 Broad St., Newark, N. J., was adjudicated a bankrupt. The warrant recently issued for him in the divorce proceedings brought by his wife has not been served, as the officers have not been able to find him.

## Recent Reappraisements of Clocks, Jewelry and Kindred Lines.

Reappraisements of manufactures of metal, precious stones and clocks were announced last week by the Board of United States General Appraisers as follows:

Clocks from Jahresuhr Schwenningen W. Wurth & Co., Schwenningen, exported April 5, 1905, entered at Philadelphia (File No. 35709); findings of Sharretts, G. ## OUR TRAVELING REPRESENTATIVES

**Travelers may consider these columns open for the publication of any items of interest regarding themselves or their confreres.**

Among United States travelers, recently, in Montreal, Can., were Mr. Parks, of the Seth Thomas Clock Co., and Mr. Loeb, of the Dubois Watch Case Co.

Fred Strauss, Backes & Strauss, London, Eng.; Mr. Steigerwald, Buffalo Jewel Case Co., and W. J. Slanker, James W. Tufts, were looking for orders in Toronto, Can., last week.

The following traveling representatives have, lately, been in San Francisco, Cal.: Wm. Gregory, Strobel & Crane; Mr. Perley, Perley Bros.; Frank Shirek, Deitsch Bros.; Frank J. Locklin, Battin & Co.

Traveling representatives of the following firms were in St. Louis, Mo., last week, and called on the trade: W. F. Mills, Gorham Mfg. Co.; William G. Andrews, C. Sydney Smith & Co.; F. R. Horton, Carter, Howe & Co.; S. W. Abbey, E. Ira Richards & Co.

Travelers visiting Boston, Mass., during the past week, included: Fred Royce, D. C. Dodd, Jr., & Co.; "Jack" Townsend, D. C. Townsend & Co.; A. N. Forrest, Woods & Chatellier; J. E. Alexander, Smith Co.; John Battin, Battin & Co.; Ed Egfeldt, Egfeldt & Ackley; George W. Read, Kerr & Thiery.

Among the travelers in Louisville, Ky., recently, were: Ferguson Mead, Barhour Silver Co.; S. A. Goldsmith, Adolph Goldsmith & Son; E. H. Blandin, T. B. Clark & Co.; John F. Garland, Keller Jewelry Mfg. Co.; W. W. Browne, Holmes & Edwards Silver Co.; Mr. Andrews, C. Sidney Smith & Co.; R. E. Williams, Anchor Silver Plate Co.

Representatives of eastern wholesale houses have been in Minneapolis and St. Paul, Minn., during the past week, as follows: Mr. Raymond, Worthington & Raymond; W. A. Moore, F. W. Gesswein Co.; a representative of Waite, Thresher Co.; W. R. Stevens, Bay State Optical Co.; E. G. Kahle, B. Grieshaber; R. E. Hill, New England Watch Co.; Mr. Armhruscher, Illinois Watch Co.

The following traveling representatives, recently, visited Savannah, Ga.: M. R. Smith, La Pierre Mfg. Co.; A. J. Goode, Chapin & Hollister Co.; H. Abraham, S. Cohn & Co.; Charles Marx; Mr. Sichel, Bonner & Co.; A. M. Stevens, Enos Richardson & Co.; Henry E. Barkman, Jones & Woodland; R. B. Carr, Link & Angell; Wm. Kinscherf, Jr., Wm. Kinscherf & Co.; E. A. Cowan, E. A. Cowan & Co.

Calling on the trade at Columbus, O., last week, were the following travelers: W. A. Moore, Fred C. Steinman & Co.; H. S. Spang, E. Ingraham Co.; W. H. Sparks, Seth Thomas Clock Co.; M. S. Benford, H. C. Fry Glass Co.; Walter S. Strauss, Jacob Strauss & Sons; J. A. Granbery, J. A. & S. W. Granbery; Wm. Frochlich, Manassch Levy & Co.; Theo. L. Lyons, Lyons Gem Co.; F. A. Perry, John Russell Cutlery Co.; G. B. Wiltshire, Suplee, Reeve, Whiting Co.; Max M. Joseph, L. A. Eppenstein & Co.

Among the representatives of wholesale houses who, recently, visited the trade in Detroit, Mich., were: Chas. Hickok, Gorham Mfg. Co.; Wm. Barry, Larter & Sons; H. W. Raymond, Worthington & Raymond; Jas. J. Doll, A. S. Zugsmith; James Brooks, Frank M. Whiting & Co.; J. M. Morrow, American Watch Case Co.; W. H. Shiman, Shiman Bros. & Co.; Harry C. Adler, Chas. Adler's Sons; Joseph F. Marks, Louis Kaufman & Co.; Mr. Nile, Buffalo Jewelry Case Co.; Leo Heilbrun, Leo Heilbrun & Bro.; H. B. Klme, Jonas Koch; J. Thompson, J. B. Bowden & Co.; H. A. Tibbals, Mandeville, Carrow & Crane; Mr. Everton, H. H. Curtiss Co.

Traveling representatives who visited the Cincinnati, O., trade during the past week, included: A. L. Leibman, E. P. Reichhelm & Co.; Fred Somes, S. O. Bigney & Co.; Mr Rosenberg, American Bead Co.; W. S. Metcalf, Plainville Stock Co.; Harry Farquharson, E. D. Gilmore & Co.; H. Rosenthal, B. H. Davis & Co.; Otto Simnauer, Oppenheimer Bros. & Veith; Mortimer C. Adler, Charles Adler's Sons; J. T. Griffith, Carter, Howe & Co.; William Klipper, Klipper Bros.; C. A. Hulstrom, Wilcox & Evertsen Co.; William G. Andrews, C. Sydney Smith & Co.; William J. McQuillin, Mount & Woodhull; F. A. Perry, John Russell Cutlery Co.; E. A. Reed, Reed & Barton; George L. Paine, George L. Paine & Co.; Albert M. Stern, Goodfriend Bros.; William A. Lamb, Geo. H. Fuller & Son Co.; J. M. Curtis, Meriden Silver Plate Co.; C. Morgen, Rogers & Bro.

The trade at Pittsburg, Pa., was visited, last week, by the following traveling representatives: J. A. Granbery, J. A. & S. W. Granbery; S. W. Abbey, E. Ira Richards & Co.; Mr. Bliss, Krementz & Co.; W. Tracy Bergen, J. D. Bergen Co.; L. H. Carpenter, Charles E. Hancock Co.; J. Thompson, J. B. Bowden & Co.; L. C. Corbin, Waterbury Clock Co.; H. S. Spang, E. Ingraham Co.; Walter S. Strauss, Jacob Strauss & Sons; Leo Henle, Sussfeld, Lorsch & Co.; D. A. Davidson, Wallach & Davidson; W. H. Rice, Meriden Silver Plate Co.; Mr. Sichel, Bonner & Co.; W. J. Parker, Osmun-Parker Mfg. Co.; F. C. Somes, S. O. Bigney & Co.; George L. Paine, George L. Paine Co.; Mr. Untermeyer, Chas. Keller & Co.; J. E. DeWyngaert, Scofield & DeWyngaert; Mr. Booth, Warren & Williams; J. J. Woolf, Anchor Silver Plate Co.; G. Cheever Hudson, C. C. Hudson & Co.; H. R. Middlebrook, Bates & Bacon; Harry E. Farquharson, E. D. Gilmore & Co.; E. A. Reed, Reed & Barton.

### Customs Decisions on Jewelry, Precious Stones and Kindred Lines.

Decisions by the Board of United States General Appraisers, New York, in cases involving the duty on jewelry, precious stones and imitations, lenses and other products, were published last week by the Treasury Department as follows:

PRECIOUS STONES—PIERCED BALLS.—Protests of Albert Lorsch & Co. *et al.* against the assessment of duty by the Collector of Customs at New York. Certain precious stones, such as opals, amethysts, etc., cut into the form of balls, and pierced through, were held to be dutiable as precious stones cut but not set, under Par. 435, tariff act of 1897, as claimed by the importers.

IMITATION PEARLS.—Protest of American Express Co. against the assessment of duty by the Collector of Customs at New York. Certain imitation pearls were held to be dutiable as imitation precious stones under Par. 435, Tariff Act of 1897, as claimed by the importers.

IMITATION PEARLS—IMITATION PRECIOUS STONES—KEYSTONES —GOLDSTONES — HALF PEARLS.—Protest of Albert Lorsch & Co. against the assessment of duty by the Collector of Customs at New York. The merchandise consisted of imitation pearls in various forms, imitation precious stones on screw wire, keystones, goldstones and half pearls. Following G. A. 6,088 (T. D. 26,554), G. A. 6,089 (T. D. 26,555), G. A. 5,915 (T. D. 26,014), G. A. 6,053 (T. D. 26,388), and G. A. 5,914 (T. D. 26,013), the Board sustained the various contentions of the importers, except as to certain imitation pearls drilled through, which were held to have been properly classified as beads under Par. 408, Tariff Act of 1897.

UNFINISHED WATCH FOBS—PARTS OF JEWELRY—CHATELAINE BAGS. — Protest of Albert Lorsch & Co. against the assessment of duty by the Collector of Customs at New York. The Board held certain unfinished watch fobs to have been properly classified as parts of jewelry under Par. 434, Tariff Act of 1897, but sustained the importers' contention as to certain chatelaine bags composed of brass, which were held to be dutiable under Par. 193 as manufactures of metal.

## News Gleanings.

C. L. Taylor, Camilla, Ga., recently moved his jewelry business into more attractive quarters.

R. L. Reese, Corsicana, Tex., has removed his stock into new and more spacious quarters on Beaton St.

J. H. Allen has moved his watch repairing and jewelry store to a new stand, one door south of his former location at Anniston, Ala.

Pursuant to the orders of the Bankruptcy Court the jewelry stock of John J. Bleich, Paducah, Ky., was recently sold by the trustee in bankruptcy.

W. A. Persey, Washburn, N. D., has become the local agent for two well-known sewing machines, which he will carry in addition to his jewelry.

Thomas Trower, Shelbyville, Ill., has traded his jewelry stock for a farm of 80 acres in Hamilton Co., and the stock has been shipped to McLeansboro.

According to a report by U. S. Consul Morgan, Lucerne, Switzerland, the value of Swiss watches exported to the United States during the past year was $276,070.

Sullivan Gregoire, 19 years old, was arrested recently at Schenectady, N. Y., on suspicion that he was about to commit a burglary in the store of Charles Biekeman.

Thieves recently broke into the jewelry store of J. D. Cunningham, Lincoln, Ill., and stole about a dozen watches that had been left to be repaired. There is no clue.

The gymnasium of the Elgin National Watch Co.'s factory, Elgin, Ill., was reopened Aug. 1, with a membership of 120. The "gym" had been closed since May 11.

The B. H. Stief Jewelry Co., Nashville, Tenn., recently donated a $35 silver cup to the Tennessee Poultry Association, which will be used as the State prize at the poultry show in January.

The Estherville Jewelry and Music Co., Estherville, Ia., have completed the adjustment of the new fixtures and stock in the store in the Coon block, which was opened last week.

Scott Mullin, Liberty, Ind., was recently swindled by a man who gave him a bogus check in payment for a watch. The jeweler is out the $15 watch and the $5 cash which he gave in change.

The Price Jewelry Co., Itasca, Tex., was incorporated in that city recently with a capital stock of $5,000. The incorporators are: Tom Price, H. E. Chiles, J. W. Hudson and A. L. Murphy.

In the window of Geo. W. Ryder & Son, San Jose, Cal., was recently exhibited a beautiful chocolate-colored diamond, which was found by D. C. Blanchard in the northeastern part of Arizona in 1874.

Bechtold & Fritz have purchased the stock of Oscar Bruflat, Garretson, S. D. The two stocks have now been combined with the result that the firm has now one of the finest jewelry establishments in this section.

An unsuccessful attempt was made to rob the store of A. Miller, Perham, Minn. Mr. Miller heard the screen torn off the rear window and made a demand as to what was wanted. The man turned and ran, making his escape.

Will B. Kimball has disposed of his interest in the business of W. B. Kimball &

Co., Waukesha, Wis., to his partner, James B. Kimball, and will leave about Sept. 1 for Tama, Ia., in which town he proposes to engage in the jewelry business, with B. J. Morey. J. B. Kimball will continue the business in Waukesha under his own name.

Hobson & Gove, Washington, Ia., have secured new and larger quarters for their store.

Anton Kucknk, Shawano, Wis., has installed a new plate glass front in his store.

Louis Keller has moved his new stock from Macon, Mo., to Moberly, Mo., where he now continues the business.

American National Jewelry Co., Huron, S. D., which has a capital stock of $25,000, has been registered in Illinois with a capital of $2,000

Albert Goldstein, a 10-year old boy at Dubuque, Ia., was arrested for the theft of nine gold rings, a gold chain and locket from the store of H. F. C. Schneider. The value of the goods was $75. Most of the goods were recovered. The lad peddles matches. He entered the store when the clerks were absent at lunch and helped himself. He then attempted to peddle the stolen jewelry around the city, but was soon traced and arrested.

Harold Shields, a jeweler living at Mt. Sterling, Ia., committed suicide, recently, by shooting himself in the head. He left no note or word of any kind that would throw light on the reason for the act. Deceased was 25 years old and was prominent as a business man.

The Eye-Fix Remedy Co., Detroit, Mich., has adopted a full-price plan for the protection of the profit retailers are to have who handle their goods. The packages are serially numbered and the retailer is required to sign a contract to sell at 50 cents.

Charles F. Sapp, of the Sapp, Disher Co., Winston-Salem, N. C., is in bankruptcy as an individual, the proceedings not affecting the firm with which he is associated.

Paul Jander, aged 60, a jeweler, at 189 E. Main St., Columbus O., dropped dead Monday night, Aug. 7, of heart disease.

A. Jonas, a well-known jeweler of Youngstown, O., is now in Berlin, Germany, where he went to visit his brother, Emil Jonas. Two days before Mr. Jonas arrived Emil Jonas lost his eyesight, and A. Jonas is prolonging his stay at his brother's home in the hope that the treatment of specialists will permit his brother to see him before he returns to America.

Word comes from London, Eng., that Annie M. Grant, also known as Annie Gleason, of Chicago, who had been held for trial July 5 on the charge of stealing a necklace valued at $10,000 from the famous auction rooms of Christie, Manson & Woods, was found guilty in the "Old Bailey" court last week, and sentenced to three years' penal servitude.

Edward Spencer, formerly a watchmaker with Hight & Fairfield, South Bend, Ind., was recently chosen president of the Methodist College in Rome, Italy, After leaving South Bend Mr. Spencer studied at De Pauw University and later took post graduate courses at Johns Hopkins, Harvard and Columbia universities. For some years he was professor of Latin in the University of Denver, which position he resigned to accept the presidency of the college at Rome.

Stocks of J. L. Sievert, who had stores at Dayton, O., and Richmond, Ind., are to be sold by Charles Vollbrecht, trustee in bankruptcy. In a circular which the trustee sent out he says that both stocks are clean, up to date, and, no doubt, may be bought at the right figures. The Dayton store invoices: goods, $16,134; fixtures $1,026. This stock will be offered in four lots, fountain pens, optical goods, jewelry and silverware with fixtures as the fourth lot. The stock and fixtures will then be offered as a whole, and will be sold in the way that brings the most money. Sealed bids will be received until the hour of sale with the privilege to all bidders of increasing their bids at the time of sale, Aug. 15, at 2 P. M. The Richmond stock will be sold in that city, Aug. 14, at 3 P. M. This stock invoices at $2,244, and the fixtures at $270. The method of sale will be similar to that outlined for the Dayton store.

# Special Notice.—*Our order department will not be affected by the quarantine.*

Send your orders to New Orleans to be passed upon, and wherever quarantine restrictions interfere, goods will be shipped from our temporary St. Louis office, or from our New York office. *There will be no serious delay*, our friends and customers can depend upon our well-established reputation for promptness.

## Canada Notes.

C. C. Wright, Fernie, B. C., has been burned out.

The assets of Alfred Gingras, Montreal, have been sold.

J. E. Church has been appointed assignee of the estate of C. Andernach, Victoria, B. C.

A writ has been issued against Chas. E. Chatfield, Pincher Creek, Man., by Ford & Featherstone, for $185.

Wm. Jas. Walker and Geo. Phillips, Montreal, have registered as Walker & Phillips, importers of silverware.

C. O. Demaurez, Fernie, B. C., was among the sufferers by a disastrous fire which visited that town on July 26.

A. L. Levy, of the Levy Bros. Co., Hamilton, Ont., who recently returned from a European trip, was in Toronto last week.

Among the out-of-town jewelers in Montreal recently were J. B. Lachapelle, Joliette, Que., and E. Lamarche and J. P. Fremeau, St. Hyacinthe, Que.

Wm. Singerman, a jeweler exhibiting at the fair at Brandon, Man., had his entire display of jewelry, valued at $1,500, stolen on the night of Aug. 1, by burglars, who broke into the premises where the exhibit was stored.

Col. Stewart, of the M. S. Brown Co., Montreal, has been in camp at Three Rivers. C. H. A. Grant, of this company, who recently returned to headquarters at Montreal from the Pacific Coast, predicts a good Fall business.

J. C. Barlow, of the American Waltham Watch Co., Montreal, is taking a vacation at Rye Beach, N. H. A. R. Harmon, European manager of this company, was in Montreal a few days ago. Mrs. Harmon has been staying at their cottage at Prout's Neck, Maine.

W. K. George, president of the Canadian Manufacturers' Association, and W. K. McNaught, president of the exhibition branch of the association, who have taken such leading roles in Great Britain during the visit of the Canadian Manufacturers' Association there, are returning to Canada by the Allan Line steamer *Virginian*. Messrs. George and McNaught are among the most prominent men in the jewelry trade of the Dominion.

Geo. R. Thompson, an old-time resident of Winnipeg, Man., died in the general hospital in that city, July 27, after a long illness, aged 47 years. During the early 80s he conducted the jewelry business of Thompson Bros. & Forrest for some years, but owing to business reverses removed to Toronto, where he was for some time in the employ of the Ontario government. He returned to Winnipeg several years ago, and had been in poor health for about a year.

Ryrie Bros., Ltd., Toronto, Ont., have secured a 21 years' lease, renewable in perpetuity, of the property on the corner of Yonge and Temperance Sts., selected for their new store. It is one of the most central sites in the retail district, with a frontage of 70 feet on Yonge St. The lease under which they recently secured possession had only three years to run, and is superseded by the new arrangement under which they will pay $11,500 annually for 13 years and $12,000 a year for the remainder.

Men from the United States secret service have been in Montreal for some time on the lookout for diamond smugglers. They have registered at Montreal hotels under fictitious names. Diamonds come into Canada free, but there is a duty of 10 per cent. on stones entering the United States. There is, therefore, a profitable thing made out of this contraband trade, when those engaged in it escape detection. Now and then, however, the United States Government makes a big seizure of stones and these are confiscated, and sometimes the smugglers are sent to jail. It is said that within the past year enough seizures have been made to pay the customs about 10 per cent. of what is believed to be due for smuggled diamonds. The secret service men have been watching for dealers who are buying the costly stones for shipment across the line, and have been in conference with certain authorities. Results will probably be made public before long.

It is hoped that the Dominion Government will accede to the request of the Canadian Commercial Travelers' Association, and will interfere and compel British Columbia and Quebec, both of which have passed an act for licensing commercial travelers, to submit a case to the courts, as the claim is made that these acts violate the British North America Act, and will seriously interfere with inter-provincial as well as with foreign travelers. The British Columbia Act reads in part, "No commercial traveler, agent or other person shall take or solicit orders, either for himself or any other person, for any goods, wares, merchandise, or other effects to be imported into this province to fill such orders, unless and until he shall have taken out and had granted to him, for the period specified, a license under this act, and paid therefor the license fee prescribed." The license fee in British Columbia is $50 every six months, and it is $300 a year in the province of Quebec.

HW DIAMONDS HW

## Utica.

J. A. Lockwood is removing from the Horsey building to 208 Bleecker St.

Judge Ray, of the United States Circuit Court, recently filed an opinion in the suit of the International Time Recording Co. *vs.* the Dey Time Recording Co. and others, granting an injunction and an accounting to the complainant. The suit was over a patent on a workman's time recorder, and the defendants insisted that the patent was not broad enough to cover their device. It is reported that the defendants will appeal.

Frank A. Chace, salesman for the Chas. M. Robbins Co., Attleboro, Mass., left recently for the complete circuit of the central and western States.

Robert Schneider, Savannah, Ga., has been notified that the bells for the clock on the new City Hall, in that city, will be shipped in about ten days. The E. Howard Clock Co. and Mr. Schneider, who will install the clock, have each given bond to the city. The E. Howard Clock Co. has given a bond that the clock will not vary more than 15 seconds in any 30 consecutive days in the next five years.

## Optical Notes and Briefs.

Wm. Oliver, Ormstown, Que., was in Montreal last week.

The Pratt-Kerr Optical Co., San Jose, Cal., has moved into new quarters at 31 Santa Clara St.

M. F. Ball, of Osgood & Ball, San Jose, Cal., is taking an outing at Capitola, the famous seaside resort.

R. N. Taylor, Montreal, with Mrs. Taylor, has been spending six weeks at his old home in Charlottetown.

R. Hemsley & Sons, Montreal, have added up-to-date optical parlors to their stores at Farnham and at Point St. Charles.

Jerry Britton, Montreal, is spending his vacation at Lindsay, Ont. Mr. Thomas, of Toronto, is taking his place during his absence.

A. J. Geiger, optician with Ambrose Kent & Sons, Toronto, and Mrs. Geiger, spent a few days recently in Montreal and Quebec.

The Ophthalmic Remedy Co., of Reading, Pa., was incorporated under Pennsylvania laws, at Harrisburg, last week, with a capitalization of $5,000.

Geo. P. Martin, Watsonville, Cal., is spending a few days in the mountains hunting and fishing and getting rested in preparation for Fall trade.

W. D. Fennimore, vice-president of the California Optical Co., is on a vacation which will include a hunting trip in Monterey County, where large game will be sought.

The American Ophthalmological, Otological and Laryngological Society met recently at the American Institute of Homeopathy in Chicago. Officers for the ensuing year were elected.

William Wotton, a young colored optician, on W. Rittenhouse St., Germantown, Philadelphia, was committed without bail by Magistrate Fitzpatrick, last week, on a charge of felonious assault preferred by Bertha Maddox, a 15-year-old girl.

Prof. F. Hirschberg, of the optical science department of the University of Berlin, is in California on his way east from the Lewis and Clark Exposition. During his stay in Los Angeles, Dr. Hirschberg was entertained by the Los Angeles opticians.

T. F. Butler, of the Montreal Optical Co., is now in the Lower Provinces and reports business quiet. He is, however, busy organizing an optical class to be opened at St. John's Aug. 15, and has already obtained a good number of students.

J. C. Combs, a traveling optician, with headquarters at La Crosse, Wis., attempted suicide at Preston, Minn., recently. Despondency over ill health is supposed to have been the cause. He went to a hardware store and asked to see a revolver and have it loaded. He attempted to place it to his head and discharge it, but the clerk pulled his hand away before he could do so.

Complaints to the Exposition management and the police have been made against an optical concession company, doing business in the Agricultural Palace at the Lewis and Clark Exposition, at Portland, Ore. One man has sued for damages on the charge of swindling and an aged couple complained that they had been duped out of $95, which was given for five or six pairs of worthless spectacles.

# THE GIANT OF COLLAR BUTTONS

## IN QUALITY, IN SALES.

The Standard American Collar Button.

**Millions of Krementz One-Piece Collar Buttons made, and are sold all over the world.**

**WHY?** *Because* of their HIGHEST QUALITY, BEST CONSTRUCTION, GIVING THE MOST WEAR AND GREATEST COMFORT and their IRON-CLAD GUARANTEE.

To verify this we invite the trade to read **"The Story of a Collar Button, with Illustrations,"** which may be had **FREE** for the asking, and to try the experiment suggested on page 5 of that booklet, by which all may easily determine the exact amount of 14 K. gold in Krementz plate.

**Extract from "Printers' Ink," Nov. 23, 1898.**

The Little Schoolmaster now suggests, to every pupil in his class, to send a two-cent stamp to Krementz & Co., 49 Chestnut Street, Newark, N. J., and ask to be favored with a copy of their leaflet. "The Story of a Collar Button." Afterward, if any pupil will send to *Printers' Ink* another leaflet, new or old, that is half as good as this one, or that approaches it in excellence, the deserving student will be rewarded with one of *Printers' Ink's* souvenir spoons as an acknowledgment of his discovery and contribution. "The Story of a Collar Button" is the best piece of advertisement construction that has come to *Printers' Ink's* attention in the year of our Lord 1898.

**Should you wish to utilize this booklet to increase your collar button business, we will, on receipt of your order, print your card upon and send you a quantity of them.**

**The several qualities of Krementz One-Piece Collar Buttons are stamped as follows, ON BACK.**

Patent Sustained by United States Supreme Court.

**Quality and Construction have made Its Reputation.**

**All Krementz Collar Buttons—of every quality—are manufactured by**

# WESTERN DEPARTMENT

Western Office:
204 Columbus Memorial Building,
Chicago.

Telephone:
4079 Central,
Chicago.

Vol. LI. CHICAGO, WEDNESDAY, AUGUST 9, 1905. No. 2.

## Chicago Notes.

John Hillinger will start for the Coast Aug. 20.

P. Hermes, jewelry buyer for The Fair, is on an eastern buying trip.

R. J. Hillinger is on a fishing trip to Postage Lake Resort, Wis.

Adolph Weiss, of Heinrich Herrmann & Weiss, is on a trip to the northwest.

Wm. E. Bentley, with Stern Bros. & Co., is on a fishing trip to Hartland, Wis.

G. M. Landon, western manager for the Homan Silver Plate Co., is taking a vacation at Eagle, Wis.

L. A. Raven, said to be a jeweler at 1459 State St., has reported the loss of a diamond ring valued at $100.

The family of A. Hirsch are at Lake Beulah, Wis. Mr. William Hirsch has a cottage at Elkhart Lake, Wis.

The American National Jewelry Co., of Huron, S. Dak., has certified that their capital in the State of Illinois is $2,000.

George Winzer, an aged watchmaker, died recently in Elgin. Among his effects is a gold watch once owned by Louis Kossuth.

C. J. Wietz, jewelry buyer for Marshall Field & Co., who recently returned from Europe, is taking a two weeks' vacation in Michigan.

Albert M. Dueber, of the Dueber-Hampden watch works, Canton, O., was here last week on his annual trip through the west and northwest.

Sidney H. Israel has given up looking after the Chicago trade for Marden & Ketlety, Providence, R. I., and is now traveling the eastern States for the same firm.

Miss Caroline Pitkin, daughter of Edward H. Pitkin, of Pitkin & Brooks, was married Sunday at Defdarapf, Ont., Canada, the Pitkin Summer home, to Mr. E. W. McCready.

A Dayton (O.) jeweler, who recently failed, was in town last week trying to effect a settlement on a 40c. basis; 10 cents cash and the balance on notes payable Jan. 1, 1906.

Two silver loving cups were presented to Chicagoans last week. One was given to H. L. Kent, of the First National Bank, and the other was given to Assistant Fire Chief Seyferlich.

John J. McHugh, Edward P. Lally and A. J. Shaughnessy, of the office of Joseph Fahys & Co., have returned from their vacations. Mr. H. John Harms leaves for his vacation this week.

Suit has been brought against W. B. McAuliffe and William D. Krause, respectively Mayor and Justice of the Peace of Franklin Park, by Weiss & Weiss, manufacturers of special order work, 142 W. Madison St. The suit is to recover for labor and making a gold star set with diamonds which was to be presented to Mayor McAuliffe.

A bronze tablet in memory of the late Edward Grafstrom, chief mechanical engineer of the Atchison, Topeka and Santa Fe Railroad, who lost his life while endeavoring to save the lives of others during the Topeka flood of 1903, is on exhibition at the store of Spaulding & Co., and from there will be taken to the State Capitol of Kansas, where it will be installed.

Said a Chicago watch jobber the other day: "A man came here once from a city in southern Ohio to buy his stock. It was the first time he had bought extensively in this market, and I wondered why he didn't buy from a Cincinnati jobber, our terms being equal. My suspicions were further aroused by his easy and careless manner of buying. He picked out about $400 worth of watches, and after considering the matter we did not ship the order. He failed shortly afterwards."

Mat Noel, of Despres, Bridges & Noel, is at the Alexian Brothers' Hospital. Last Saturday Mr. Noel underwent an operation and is doing as well as can be expected. Mr. Noel was to start on the road this month. His territory usually visited by him will be taken care of by Philip Noel, his brother. Max Noel has a host of friends in the west who wish him a speedy recovery. He had been ailing for some time prior to his removal to the hospital, and it is hoped the operation he has sustained will be permanently successful.

A notice appeared this week in a Chicago newspaper to the effect that a detective, Edward Gibson, of San Francisco, had arrived in Chicago to take M. H. Marks, of the Alexander Loan Co., 86 Monroe St., to the coast city, to answer a charge of having passed a worthless check. When the representative of The Circular-Weekly called at the Alexander Loan Co. he was told that Ed. Marks was the sole proprietor of the Alexander Loan Co., and that no one of that firm had ever been in San Francisco. Ed. Marks has a number of brothers who act as salesmen for him, but they refused to give their initials.

One of the most important business deals ever consummated in Chicago took place last week when Otto Young sold his interest in The Fair, one of the greatest department stores in the world, to Mrs. E. J. Lehman, whose late husband founded the business more than 30 years ago. Mr. Young owned 51 per cent. of the capital stock of the corporation, and the amount he received for it is estimated to be in the neighborhood of $3,000,000. For nearly 20 years Otto Young has had the general direction of the business, and he gives as his reasons for selling his interest that his real estate business requires his entire attention. For a consideration of $1 The Fair has transferred to Otto Young the property 184 to 190 State St., which it now occupies. Thus the building and leasehold now occupied by The Fair becomes the property of Mr. Young.

A. L. Gottlieb, jewelers' auctioneer, whose reported arrest at Calgary, N. W. T., appeared in the last issue of The Circular-Weekly, arrived here last week, much incensed at Canada's ideas of justice. According to Mr. Gottlieb he was recommended through Jos. Brown & Co. to conduct an auction sale for G. M. Mayberry Wetaskiwin, Alberta, N. W. T., Mr. Mayberry guaranteeing Mr. Gottlieb a commission on each day's sales and allowing him $131 expenses for transportation. At the end of the sale, which occupied one week, and after Mr. Gottlieb had received his expenses and his commissions, Mr. Mayberry, according to Mr. Gottlieb, claimed that the latter had in his possession a letter from Jos. Brown & Co. which he had no right to possess. This letter, Mr. Gottlieb, said was not in his possession, and he was then summoned before a judge. There was no arrest whatever. The judge suggested that Mr. Gottlieb, in order to settle the affair, should return to Mr. Mayberry the $131 transportation paid by him, but this Mr. Gottlieb refused to do, and the case was dismissed.

Miller & Kahm, Adams, Nebr., have sold out, and the business will be conducted by Leach & Vanengen.

## San Francisco.

TRADE CONDITIONS.

After a season of unprecedented dulness the jewelry trade shows signs of reviving animation, and the probabilities are that a resumption of normal conditions will soon take place. Already the approach of Fall is making itself manifest in the number of "knights of the road" who are beginning to drop into 'Frisco and in the still greater number who are expected to arrive shortly. Local jobbers and manufacturers' agents have all of their traveling representatives on the road, and the reports are that substantial orders for Fall delivery are coming in daily and the general feeling is that a good holiday business is in store for the local trade. Retail trade also continues to improve from day to day, this probably being due to the return of San Francisco people who have been spending vacations in the country.

O. O. Osborne, Lodi, Cal., was a recent San Francisco visitor.

Henry Bohm, of the Bohm-Bristol Co., left last week for Denver, Colo.

R. Schwartzkopf, manufacturers' agent, has just returned from a southern trip.

Fred. Roth, of M. Schussler & Co., has recently returned from a European buying trip.

John A. Black, Tucson, Ariz., visited San Francisco recently, calling on the jobbing trade.

H. Minasian, Sutter Creek, Cal., is among those who called on the local jobbing trade last week.

George F. Blakesley, Tonopah, Nev., was in San Francisco last week selecting holiday goods.

A. Eisenberg, of A. Eisenberg & Co., has returned from a trip to the Exposition at Portland, Ore.

Fred Levy, president of M. Schussler & Co., is spending several weeks at Lake Tahoe with his family.

M. M. Johnson, of H. F. Wichman & Co., Honolulu, T. H., is in San Francisco getting acquainted with the local trade. He will leave shortly for the east.

Col. Andrews, of the Diamond Palace, whose business recalled him from an outing at Byron Springs, has again left to complete his stay at that popular resort.

W. A. Bode, of Radke & Co., has returned from a vacation at Garneyville. L. Smith, also with Radke & Co., is spending his vacation at Santa Cruz.

Arthur L. Judis, of the Alphonse Judis Co., has returned from a vacation in the Ben Lomond country. He was accompanied on the trip by his wife.

The damage to jewelers at 120 Sutter St., resulting from the recent fire at that address, has been satisfactorily adjusted by the insurance companies, the loss to the jewelers being but nominal.

Gus. Fleissner, of the Fleissner-Marshall Co., is on a hunting and fishing trip in Sierra County, the quest being for big game. Mr. Fleissner will make his home while there with his brother.

Wm. Landram and wife will soon leave for a trip into Lake County, where it is hoped the mild climate will improve Mrs. Landram's health. Mr. Landram is now sole proprietor of the wholesale business formerly conducted by Landram & Prouty, at 120 Sutter St.

## Cleveland.

Will Wagner and W. H. Kennon, traveling men with the Sigler Bros. Co., have started on their Fall trips.

The Continental Jewelry Co. have moved into their new quarters on Euclid Ave., where a large amount of space has been secured.

The Whittlesey Optical Co. has been incorporated, with a capital stock of $15,000, by Grant T. Whittlesey, A. M. Snyder, F. E. Wood, N. I. Young and Elmer G. Derr.

Wm. Davis, of the Sigler Bros. Co., is spending his vacation at Sarnia, Canada. Miss Helen Neal, assistant cashier of the store, is at Silver Lake, and John Trapp, head watchmaker, is at Niagara Falls.

Wm. Goodall, a negro, was arrested with a white woman in Lima, O., a few days ago, and more than $600 worth of diamonds were found on them. The officers supposed they probably know something about recent jewelry robberies in Akron and Detroit.

Earl Chamberlain, head engraver for the Sigler Bros. Co., who was married to Miss M. L. Windsor a few days ago, was the recipient of a handsome gold and onyx clock, as a token of esteem, from the young men and women employed in the house.

Traveling men for the Scribner & Loehr Co. have started on the road with Fall samples. Their territories are as follows: W. B. Blood and A. E. Knight, Michigan; Frank T. Blackford, Pennsylvania, Maryland and West Virginia, and H. S. Hurlbut, Ohio.

Among buyers in the city last week were: A. E. Oyster, Alliance, O.; Earl Wolf, Loudonville, O.; W. J. Higgins, Shelby, O.; W. P. Huntley, Orwell, O.; Albert Zang, of J. A. Zang & Sons, Alliance, O.; Mr. Burns, of Burns & Gosser, Coshocton, O., and E. N. Davis, Kent, O.

On Saturday morning of last week the police arrested two men, giving their names as Harry Parker and Harry Johnson, who are believed to be the men who murdered Joseph Moyer, a pawnbroker in Detroit, on July 28. To the local newspaper men the officers were rather reticent, but Chief Kohler telegraphed the authorities in Detroit that he believed the men were the ones they are searching for. The telegram stated that most of the jewelry taken from the broker's establishment had been recovered. The murder of Moyer was a brutal crime, and showed the men had no thought of anything except securing booty. It took place about six o'clock in the evening, when the streets are usually crowded. The men used a heavy weapon and literally pounded the old man's skull into bits. They then took a large amount of jewelry and some money and escaped.

## Pacific Northwest.

C. C. Wright has started in the jewelry business at Fernie, B. C.

Russell & Howard are the successors to Thos. J. Russell, Post Falls, Idaho.

Okasawa & Co., Seattle, Wash., have moved from 504 Jackson St. to 420 Main St.

The stock and fixtures of E. P. Greffoz, Corvallis, Ore., have been attached by his creditors to satisfy a judgment.

The recent fire at Glenwood, Minn., which caused a total damage of $13,000 did damage estimated at $80 to the stock of B. A. Benson. The jeweler carried an insurance of $500.

ESTABLISHED 1854 INCORPORATED 1898

JUERGENS & ANDERSEN CO.,
DIAMONDS,
MAKERS OF FINE JEWELRY,
92 TO 98 STATE STREET
CHICAGO.

28-26 Looijersgracht Amsterdam, Holland.

## Cincinnati.

TRADE CONDITIONS.

The manufacturing jewelers of Cincinnati, O., report factory business better than ever before at this time of year. Owing to favorable weather and crops business among jobbers and retailers has continued good. Out of town jewelers visiting this city have been larger in numbers and more frequent in their purchasing trips than in previous years at this season. Prospects for Fall business exceed in every way past years.

H. Gilsey, of S. & H. Gilsey, is sojourning at Atlantic City for two weeks.

Herman A. Promnitz, 26 E. 4th St., is increasing his factory force.

Joseph Pieper, Covington, Ky., is on an eastern tour, which will include Atlantic City.

George Selmeir, of E. & J. Swigart, is taking a two weeks' rest at Mt. Clemens, Mich.

Louis Hummel, 9 Emery Arcade, has left for New York, where he will spend a two weeks' vacation.

Edwin Fox, of Lindenberg & Fox, is again attending to business after an illness of several weeks.

Gustave Johnson, Paxton, Ill., was here last week purchasing stock for his new store, soon to be opened.

Gustave Fox and A. A. Spiegel, of the Gustave Fox Co., have returned to business after their Summer's outing.

Kessler Bros. & Co., Wellston, O., are remodeling their store in up-to-date style.

Abner C. Thomas, Anniston, Ala., reported to his friends, in this city, last week, the successful opening of his new store.

Julius Jacobs, of D. Jacobs & Co., 434 Race St., is home again after a combined business and pleasure trip to New York and eastern points.

George H. Newstedt, 404 Walnut St., has been making preparations to occupy his new store on 4th and Race Sts., and hopes to be settled by Sept. 1.

I. Herman, of Herman & Loeb, Johnston building, reports a successful western trip. John G. Otting, bookkeeper of this house, will fish a few weeks in Michigan.

Arno Dorst, of the Dorst Co., Lion building, has returned from Kansas City, Mo., where he has been looking after the company's interests at the branch in that city.

D. Gruen and Fred Gruen, of D. Gruen, Sons & Co., Johnston building, have arrived from Europe, where they went about April 1, in the interests of their business in Switzerland.

The Miller Jewelry Co. has sent out a new representative, George Hovekamp, who has been in the company's employ for a number of years. He will cover their northwest territory.

S. A. Burgoyne, Mobile, Ala., paid the trade a visit on his way home from Chicago. W. C. Bate, Birmingham, Ala., was also here, last week, buying stock for the new store which he is soon to open at that place.

William Pflueger and J. B. Osthoff, of Joseph Noterman & Co., have left for their respective trips west and north. Mr. Osthoff spent some weeks in the mountains of North Carolina and Florida and now tells some thrilling experiences with the fish of that vicinity.

Gustave Mansard, a diamond cutter, employed by Fox Bros. & Co., died last week, after an illness of two weeks. Out of respect to the deceased Fox Bros. & Co. closed their factory on the day of the funeral and the members of the firm and their employes attended the services at Spring Grove Cemetery.

Out-of-town jewelers, not elsewhere mentioned, who made purchases here during the past week included: Mrs. Kupferschmid, Lawrenceburg, Ind.; G. W. Meyer, Meridian, Miss.; F. A. Schweeting, Oxford, O.; C. H. Haner, Richmond, Ind.; Charles G. Schlenker, Hickman, Ky.; A. Pfeifer, Little Rock, Ark.; A. Shire, Paris, Ky.; C. H. Creighton, Morrow, O.; Chas. Hofman, Springfield, O.; G. H. Hansgen, Bethel, O.; Frank L. Horning, Brookville, Ind.; J. W. Roop, Greenville, O.; H. S. Freelan, Seaman, O.; F. Simmerman, Felicity, O.; J. A. Simpson, New Richmond, O.; H. Risinger, Lawrenceburg, Ind., and D. Staley, Tullahoma, Tenn.

Harry W. Yaseen is now alone, conducting the business formerly run by the firm of Morris Yaseen & Co., Scranton, Pa., which firm was dissolved recently.

## St. Louis.

Fred Brost, of the L. Bauman Jewelry Co., is now on a trip in Illinois.

I. Auer, of the Brooks-Auer Jewelry Co., has returned from a trip of several weeks through Missouri for recreation.

E. Maritz, president of the E. Maritz Jewelry Mfg. Co., has gone to Mt. Clemens, Mich., with his family. This is his second trip there, recently.

John Bolland, of the John Bolland Jewelry Co., 513 Locust St., has gone to New York and other points east on business. He will be away several weeks.

W. D. Davis, Granite City, Ill., was recently in St. Louis replenishing his stock for his new store, which he is fitting up a few doors from the one he now occupies.

The R. F. Rosenheim Toggery Co., now located at 517 Locust St., will move into new quarters, at 512 Locust St., about Sept. 1, and will add a complete line of jewelry and leather goods to the novelties now carried.

W. E. Campbell, manager of the advertising department of the Mermod, Jaccard & King Jewelry Co., is in New York on a business trip. J. A. Marriner, assistant superintendent of this concern, has returned from an eastern pleasure trip. J. G. Bornmueller, buyer in the silverware department, has been enjoying a vacation at South Haven, Mich., and in northern Minnesota. J. J. Menges, manager of the jewelry department, is in Kansas City on business.

H. C. Edwards, formerly with the Edwards & Sloane Jewelry Co., Kansas City, Mo., is now traveling for the L. Bauman Jewelry Co. He started last week for a trip over his territory, which includes Missouri and Kansas.

Exhibited in one of the large show windows of Mermod, Jaccard & King Jewelry Co. are the medals and cups to be given at the regatta of the Creve Cœur Lake Rowing Association. Included in the prize list are 34 solid gold medals, besides numerous prize cups.

It has been decided that the H. G. Bergfeld Jewelry Co. will be continued under the same name and in the same place, the Globe-Democrat building as before the death of Mr. Bergfeld, several weeks ago. The officers will be elected as soon as the capital stock has been apportioned.

The E. Maritz Jewelry Mfg. Co. is out $3.80 and the United Jewish Charities of St. Louis are losers $5 through the work of Leopold Wertheimer, a jewelry worker, for whom repairers and manufacturers should look out. Several days ago Wertheimer applied to the Jewish Charities for assistance. Upon the strength of his personal statements and a letter of recommendation claimed to be from the Elite Importing Co., 933 Bleecker St., New York, a letter was given by the association to the Maritz Co., stating that they would be responsible for tools to the extent of $5, if the Maritz Co. would give the man employment. Maritz gave him the order for the tools, and when the man purchased them the bill was $8.80. The Maritz Co. guaranteed the payment of the balance. This was the last seen of Wertheimer. A second letter, supposedly from the Elite Co., highly recommends Wertheimer, but states that he was engaged in setting rhinestones in belt buckles. Wertheimer claimed to be a diamond setter. The Maritz Co. say they will prosecute Wertheimer. Wertheimer is described as being 21 years old, smooth shaven, wears nose glasses, is about five feet eight inches tall, weighs 130 pounds, dresses neatly, speaks English with German accent.

IF YOU CAN'T FIND IT, WE CAN MAKE IT.

Exact size of special charm recently made for jeweler who could find nothing large enough to suit his customer.

The A. P. Craft Co.,

Manufacturing Jewelers,

INDIANAPOLIS, IND.

Emblem Goods. Special Orders.

## Pacific Coast Notes.

E. Dobrowsky, Redding, Cal., was last week in San Francisco visiting the wholesalers.

W. L. Carter, Santa Rosa, Cal., was recently in San Francisco selecting his Fall stock.

W. N. Jenkins, Oakland, Cal., has returned from a visit to the East. He was accompanied by Mrs. Jenkins.

J. P. McNulty, manager of the American Turquoise Co.'s mines at Turquesa, N. Mex., was in Santa Fe last week.

The S. Conradi Co., Los Angeles, has taken the store adjoining their quarters at 205 S. Spring St., and will fit it up as part of the establishment, with mahogany fixtures of the most modern type.

Harold Jeffrey, formerly in the employ of Shreve & Co., San Francisco, has made a rich strike in the gold mining district of Nevada.

## Indianapolis.

TRADE CONDITIONS.

Beginning Aug. 25 and continuing until Sept. 7, excursions for buyers will be run to this city by the Indianapolis Merchants' and Manufacturers' Association. A rate of one fare and a third from all points in the Central Passenger Association territory, will prevail. The jewelers of the city join with the other merchants in thinking that the excursions will greatly increase business.

A. T. Hatch, Providence, R. I., recently greeted friends in this city.

John M. Williams, watchmaker for J. H. Reed, is resting at French Lick Springs.

Chas. Mayer has returned from Michigan. His family will remain north for another month.

E. M. Craft, of the A. P. Craft Co., and Mrs. Craft, are spending their vacation at Bass Lake.

Horace A. Comstock is spending the Summer in camp on White River, north of Broad Ripple.

A. W. Gray, of Gray, Gribben & Gray, and family, are visiting Mr. Gray's parents at Madison, Ind.

John Stevenson, who died last week at Frankton, Ind., was well known here where he did most of his buying.

Carl L. Rost and wife are spending two weeks in northern Michigan. On their return they will leave for New York.

Ikko Matsumoto has secured the services of Christian Barnett, who recently arrived in America from Germany, as jewelry maker.

Among the out-of-town jewelers who visited the local manufacturers and jobbers last week were: J. Alfred Meissen, Cicero; F. Pennington, Knightstown; John W. Hudson, Fortville; Mrs. Bernhart Maier, Edinburg; George W. Clemons, Greenwood; J. Henry Smith, Greenfield; D. S. Whittaker, Lebanon, and J. F. Harding, Brownsburg.

## Detroit.

R. J. F. Roehm, of Roehm & Son, is spending a few weeks at Whitmore Lake.

J. H. Schinke, Pemberville, O., with his wife and son, combined business with pleasure in a trip to Detroit, Wednesday and Thursday.

Ed. J. Peters, with J. F. Hicks & Son, Tecumseh, Mich., was here last week. The firm name was recently changed from W. W. Hicks to the above style.

A full-rigged model of the *U. S. S. Constitution*, and the beautiful prizes for the automobile races in Wright, Kay & Co.'s windows, present an attractive display.

J. P. Phillips, of Bowling Green, O., has the sympathy of his friends in this city owing to the loss of his wife last week, after an operation at the hospital.

President Max Jennings, of the American Retail Jewelers' Association, has announced the names of the members of the new Advisory Board, provided for at the recent meeting of the association, as follows: H. Morris, Louisville, Miss.; F. W. Jameson, Ashton, Ia.; P. P. Neill, Clarenden, Ark.; C. W. Bristol, Naperville, Ill.; F. P. Barnett, Lancaster, Wis.; Harry Downs, Bellevue, O.; G. J. Daum, Augusta, Ky.; W. C. Davis, Elkhart, Ind., and Mr. Knapp, of Knapp & Davies, Nelson, Nebr.

## Lancaster, Pa.

John J. Bowman spent part of last week in Philadelphia on business.

Mr. and Mrs. Adam Snyder celebrated their golden wedding last Thursday.

John B. Roth, Jr., and his wife, are on a trip to Baltimore, New York and Boston.

Alfred W. Moyer, manager of the Non-Retailing Co., is home from a trip to Atlantic City.

T. Wilson Dubbs and Scott Leinbach spent a few days, last week, enjoying themselves at Accomac-on the-Susquehanna.

Alexander McComas, Louisville, Ky., spent last week in Lancaster, as did Bartholomew Fenstermacher, a Buffalo, N. Y., engraver and watchmaker.

Marchand Boutelle, a Parisian jeweler, who is spending a few weeks in this country, visited Lancaster last week and inspected the Hamilton Watch Co.'s factory.

The local jewelers are in accord with the rest of the Lancaster merchants in the Friday half-holiday movement, believing it a good thing for themselves and their employes.

Among other out-of-town jewelers, who visited Lancaster, lately, were S. R. Stibgen, Marietta; C. E. Hinkle, Ephrata; H. F. Andrews, Strasburg; E. H. Miller, Mt. Joy.

W. W. Appel and his watchmaker, Edwin L. Snyder, are at Atlantic City. Percy Appel, with W. W. Appel, is off on a two weeks' trip to Baltimore, New York, Boston, and Atlantic City.

Ezra F. Bowman's Sons have organized a jewelry repair special order department for their establishment, placing at its head Oliver Mentzer, late foreman of L. C. Reisner & Co.'s manufacturing department.

The H. S. Meiskey Co. purchased, last Saturday, at private sale, from C. G. Landis, Lancaster, the entire stock of the firm of L. C. Reisner & Co., which Mr. Landis bought at the receiver's sale on July 18. He bought it with the intention of turning it over to Mr. Reisner again, but the deal fell through, so he sold out to the firm above named. The latter have practically retained all the old force of L. C. Reisner & Co. J C. Hahn, who was with Ezra F. Bowman & Co. many years, and afterwards for years with L. C. Reisner & Co., as head of the material department, retains that position and Frank G. Huber will either remain at the head of the tool department or travel for his new employers.

## Minneapolis and St. Paul.

Philip Petousa is now with W. S. Dippe, St. Paul.

W. M. Stone, Minneapolis, has returned from a camping trip.

Fred Harm, St. Paul, has gone to Chicago to take a post-graduate course in optics.

E. C. Bennett has gone to Red Wing, Minn., where he has charge of a jewelry stock.

Frank Lewis, formerly with the M. Thouren Mfg. Co., Minneapolis, is now with Munns & Pomerleau.

The C. S. Sutter stock, in St. Paul, will be moved at once to a store on Wabash St., between 6th and 7th Sts.

S. H. Clausin & Co., Minneapolis, have installed a new show case for gold clocks and other articles in their store.

Among the visitors in these cities last week were: H. W. Anderson, Red Lake Falls, Minn.; E. Pelant, Lonsdale, Minn.; Dillingham & Tripp, Aberdeen, S. Dak.; J. B. D. Wagner, Morton, Minn.; D. G. Gallett, Aberdeen, S. Dak.; Geo. R. Simons, Langford, S. Dak.; Chas. Skoog, Excelsior, Minn.

## Louisville, Ky.

Benj. Rodgers' wife is ill at the Norton Infirmary.

Milton Thalheimer left Thursday on a months' vacation.

Geo. P. Kendrick and family, who have been in the east for six weeks, returned Saturday.

The many friends of Geo. W. Wolf are congratulating him on the arrival of a fine boy at his home.

The National Association of Stationary Engineers is holding a convention in Louisville this week, which has livened up the jewelry trade considerably. The sale of souvenir spoons has been very good.

EBONY
Excellence

the result of years of Ebony study, is offered to you at a price lower than the poorer grades of ebony, and about the same as the worthless imitations.

Intelligent business methods, economy in office force and rent, enable us to do this, and make it possible for you to sell the highest grade of ebony at a price that will appeal to all—and clear a handsome profit.

DON'T ARGUE.
JUST COMPARE PRICES.

SEND FOR CATALOG.

*Our Mr. D. L. How will have the full line on display at the Astor House, New York, from Aug. 10 to 30. Call and see him.*

## New Stores and Enterprises.

G. Predmesky has engaged in the jewelry business in Fremont, Neb.

Homer Hilborn has opened a new jewelry store at Portal, N. D.

G. E. DuCommen is about to engage in the jewelry business at Watsonville, Cal.

E. C. Bennett is about to open a watch repairing establishment at Red Wing, Minn.

A new jewelry and optical store has been opened at 618 Penn St., Reading, Pa., by M. Liefter.

A new jewelry establishment was opened at Anniston, Ala., last week, by A. C. Thomas.

The Mead & Wright Co. has just opened a new jewelry and music business at Claxton, Ga.

C. H. Doll, San Francisco, Cal., contemplates opening a retail jewelry store at 124 W. 6th St., Hanford, Cal.

A new jewelry store has been opened at the corner of Washington and 13th Sts., Oakland, Cal., by P. C. Pulse & Co.

A new firm of importers of diamonds and manufacturers of jewelry is Weiner, Garson & Naigles, 277 Grand St., New York.

Fred. Allchurch, who was recently connected with the store of C. G. Aldrich, Winsted, Conn., has gone to Barton, Va., to engage in the jewelry business.

Miss Sadie Landsberg, who had been in the jewelry departments of Loftis Bros. & Co., Siegel, Cooper & Co., and Mandel Bros., has formed a co-partnership with Mrs. O. Rauch, and on Aug. 15, will open a jewelry store at Rock Springs, Wyo. The new firm will be known as Rauch & Landsberg.

A new wholesale and retail jewelry house at Portland, Ore., is known as the Leffert-Cherry Co., which is now in room 314 Alisky building. The house is composed of H. M. Leffert and A. B. Cherry, the former having come from Council Bluffs, Ia., and the latter having for a number of years been in charge of the jewelry department of Lipman-Wolfe & Co., Portland, Ore.

---

The case of D. E. Hayden, an optician, with the California Optical Co., San Francisco, who was arrested and charged with practicing optometry without a certificate from the State Board of Examiners, has been set for a hearing on Aug. 16. In the meantime Hayden, who had no difficulty in procuring bail, went on practicing at the store of the California Optical Co. as though nothing had happened, and apparently not worried by the charge against him. It is not yet known what the defense will be, but it is presumed from the careless attitude of the defendant that he is not greatly afraid of the charge. It is probable that an attempt will be made to secure a continuance until the test case against Bert. Lissner, of Oakland, is called, which will be on Aug. 18. It is generally believed by opticians throughout San Francisco that to all intents and purposes there will be no optometry law after that date. Judge Maguire, of San Francisco, has been retained as counsel for the prosecution in the Hayden case, and it is extremely probable that a fierce legal war will be waged before the case is ultimately decided.

## Rochester.

TRADE CONDITIONS.

The past week has been a busy one for the jobbers. The men from these houses are now stocked up and ready for their Fall trips. Most of the travelers have had their vacations and are anxious to get out on the road.

J. Kopelowitch is making a two weeks' trip to the south.

M. H Van Bergh, of the Van Bergh Silver Plate Co., returned last week from a several days' trip to New York. M. E. Van Bergh returned last week from a three months' business and pleasure trip through the continental countries.

Final arrangements have been completed by Philip Present, whereby he is now in full possession of the store and stock of B. M. Henschel & Co., Buffalo, N. Y., who recently made an assignment. The store, which will be continued by Mr. Present, will be materially improved and a large stock of high-grade jewelry put in. Mr. Henschel will act as manager.

The Van Bergh Silver Plate Co. is now busy establishing itself in its new factory, which is a model and up-to-date factory building. The building is of pressed brick, latest mill construction, has a floor space of 65,000 square feet and is situated on the site of the company's building destroyed by fire last Winter. It is equipped with automatic sprinklers, an electric plant and every device for the convenience and safety of the employes. Furthermore, the building has light from four sides, and on the side facing Elizabeth St., and connected with the shipping room there is a fine large court, which allows wagons to be loaded and unloaded without obstructing the traffic on the street proper. The first floor and basement are occupied by the boiler room, the metal and pressing room, 1,000 square feet, and the packing and shipping room, 4,000 square feet. To the already large amount of new machinery has been added two new mills and two hydraulic presses with a pressure of 1,200 tons each. On the second floor are located the offices and sample room of the company, which take up the entire front of the building. In the rear on this floor are the spinning and turning room, the soldering room and the buffing room. The plating room, the burnishing room, the engraving room and the finishing and doing-up room take up the space on the third floor. The fourth and fifth floors will be used as stock and storage rooms.

ALOIS KOHN & CO.

16-18 Maiden Lane, New York

BANKRUPT STOCK SALE

I wish to call your attention to an excellent opportunity to buy two first class stocks of jewelry at prices that will make it of interest to you. The stocks are those of J. L. Sievert, who went into bankruptcy in June of this year. Mr. Sievert conducted a first class jewelry store in the Arcade at Dayton, Ohio, and one at Richmond, Indiana. I am the Trustee of both stores for the benefit of the creditors.

Both stocks are clean, up-to-date, and will be money-makers, and no doubt they can be bought at the right figure. They consist of high grade watches, diamonds, silverware, bric-à-brac, umbrellas, fountain pens, etc. The Dayton store invoices, goods, $16,134.58; fixtures, $1,025.00. This stock will be offered in four lots. Fountain pens, optical goods, jewelry and silverware, and fixtures the fourth lot. The stock and fixtures will then be offered as a whole and sold in the way it brings the most money. It will be sold by the undersigned receiving sealed bids until the hour of sale, with the privilege of all bidders increasing their bids on the day of sale. A certified check of $500 will be required with each bid and an additional $500 when the Dayton store is sold, to secure faithful performance.

This stock can be seen at any time upon application of the undersigned. The Dayton stock will be sold at Dayton, Ohio, on August 15, at 2 p. m. The Richmond store will be sold at Richmond, Indiana, on August 14, at 3 p. m. It invoices, stock, $2,244.98; fixtures, $270.50. This store will be sold as an entire and going concern. It will be sold by receiving sealed bids up to the hour of sale, with the privilege of all bidders increasing their bids on the day of sale, and then sold to the highest bidder. A certified check of $500 will be required with each bid to secure faithful performance. Inspection of the Richmond store may be had at any time upon notice of the undersigned.

If you are looking for a bargain, this is your opportunity.

I understand both store rooms can be rented to continue business, by the proper parties, upon application to the owners. No price limit attached to either stock.

Stock will be sold free from any claim of whatsoever nature. Any further information and inspection of inventory may be had upon application of the undersigned.

CHARLES VOLLBRECHT,
Trustee of J. L. Sievert, Bankrupt.

With H. Best & Son, 33 N. Main St., Dayton, Ohio.

EVERY REPAIRER Should Have a Copy of "THE JEWELRY REPAIRERS' HANDBOOK,"

TRADE-MARK TRADE-MARK

## Philadelphia.

Charles Dean, 717 Sansom St., and Wm. J. Robertson, are at Atlantic City.

John Oberholtzer, of J. B. Bechtel & Co., 725 Sansom St., has returned from a vacation spent in the country.

John Abel, of Abel Bros. & Co., was one of the diamond importers who canvassed the Philadelphia trade, last week.

Fred. Scheuler, president of the College of Horology, is spending the Summer at Wildwood, N. J., with his family.

Wm. Fulton, of Strawbridge & Clothiers' jewelry department, is spending a vacation at Anglesea, N. J., where fishing, of which he is an enthusiast, is of the best.

A show case in front of the store of F. C. Myers & Co., dealers in musical boxes, at 823 Arch, was broken open by thieves, last week and plundered of goods valued at $125.

B. Heins, enameler, 717 Sansom St., is reported to be critically ill of a complication of diseases. Wm. Heins, a son, is conducting the business during his father's illness.

The cottage at Pitman Grove, N. J., of Wm. H. Moore, retailer of 1708 Ridge Ave., narrowly escaped destruction in a conflagration which swept part of the grove, last week.

Alterations and improvements to the property of Charles Diesinger, 720 Chestnut St., which he recently purchased, are being pushed to completion, to be in readiness for Fall trade.

Henry A. Kammerer, watchmaker, 20th St. and Fairmount Ave., goes to Pittsburg this week to attend the Grand Lodge convention of the Knights of Pythias, as he has been annually delegated to do by a local lodge for a quarter century.

Sansom St. jobbers displayed with pride, last week, bunches of the lotus flower, a rare botanical product of Sharpstown, N. J., which was presented to them by the messenger traveling New Jersey towns for the jewelers and rural watchmakers.

Charged with the larceny of a gold brick worth $2,000, from the Kenross Free Gold Mining Co., Jeremiah List, who is connected with the enterprise, was arrested and held in heavy bail, last week. The accused man said the company owes him several weeks' salary.

Bedichimer & Co., 11th and Sansom Sts., are having alterations made to their new quarters, 1020 Chestnut St., with a view of making the place one of Chestnut St.'s most attractive jewelry stores. The removal will be made some time during the latter part of August.

The annual clambake of the Philadelphia Jewelers' Club is arranged for August 16, at the Locust Grove farm, Burlington, N. J. It will be on the same lines as the midsummer outings of previous years and about 200 guests are expected to take part in the day's festivities. Wm. H. Long has made the arrangements for this year's clambake.

J. Warner Hutchins and L. P. White returned, last week, from an extended sightseeing tour through Europe, both bronzed and hearty-looking from a delightful pleasure trip. Mr. Hutchins spoke enthusiastically of the treatment accorded the jeweler tourists abroad. Both Mr. Hutchins and Mr. White went to Atlantic City, where Mr. Hutchins has reopened his Chelsea cottage. An impromptu reception was given them by their friends on the beach.

---

The appointment of the First National Bank of Attleboro, of which Joseph M. Bates, of Bates & Bacon, is president, as fiscal agent for Argentina, has been followed by similar appointments for several neighboring banks. The move was rather vague at first, but later mail advices explain that a group of United States capitalists has decided on an industrial scheme in Argentina, and proposes to link that country closely with New England in trade and finance. The Attleboro jewelry manufacturers are finding it harder every year to ignore the signs of the times which direct their attention to prosperous South America as a field for their activity.

## Pittsburg.

A. Pafenbach is home from a business trip to New York.

C. F. Niemann, who has been seriously ill, has fully recovered.

O. C. Graf, of Graf & Niemann, is spending a few weeks at Ohio Pyle with his family.

George B. Barrett left last week for Canada, where he will hunt and fish for one month.

Otto Heeren, of Heeren Bros. & Co., has returned from his European trip, accompanied by his son Ralph Heeren.

C. B. Gillespie, of Gillespie Bros., is preparing to attend the Grand Army Encampment, which takes place in a few weeks.

Miles Rosenthal has opened a jewelry store at 435 Smithfield St., in the square bounded by Fifth Ave. and Diamond St.

W. F. Lang spent his two weeks' vacation in moving into a new home, which he has erected in the Perrysville Ave., Allegheny, district.

George P. West, of West, White & Christy, left last Wednesday night for the east to spend his vacation. He will visit New York before he returns home.

The Hardy & Hayes Co. has been exhibiting the trophies, which have been offered by certain Pittsburghers in the National Guard of Pennsylvania shoot, to take place on the rifle range at Mt. Gretna this week. The firm has sold a number of gold medals and other articles to admirers of the Guard, who will give them to the winners of the various events.

During the last week the following out-of-town merchants have visited Pittsburg: Harry Furtwangler, Greensburg; C. H. Allen, Turtle Creek; D. A. Murray, Canal Dover; F. B. McKinley, Washington; Frank Murdock, Ligonier; F. H. Hayes, Washington; John Linnenbrink, Rochester; P. J. Manson, Jeanette; E. A. Bloser, New Kensington; J. J. Schmidt, Turtle Creek; S. H. Schmidt, Manor; John Z. Simpson, Blairsville; J. F. Zugschuert, Carnegie; J. A. Shonecker, Scio; J. M. Langendorf,

LOOSE AND MOUNTED DIAMONDS.

OUR MR. LEVINSON has just returned from the diamond markets in Europe, where he spent much time and care in selecting for us a large and choice lot of diamonds. We can supply you with these goods at right prices. Write to-day. Our men are now on the road with a complete stock comprising a full assortment of

LOOSE AND MOUNTED DIAMONDS, WATCHES, JEWELRY, CUT GLASS, Etc.

No. 2 Tulp Straat, Amsterdam, Holland. MORRIS ROSENBLOOM & CO., No. 143 East Main St., ROCHESTER, N. Y.

IMPORTERS OF DIAMONDS, AND JOBBERS OF WATCHES AND JEWELRY.

37-39 Maiden Lane, New York. 2 Tulp Straat, Amsterdam

RUDOLPH NOEL & CO.,

IMPORTERS OF

DIAMONDS.

Monongahela; L. Swan, New Castle; George Eckert, Jeanette.

The William Stieren Optical Co. of this city, was, Thursday, granted a charter by the State Department at Harrisburg. The capital of the company is $50,000 and the directors are William M. Stieren, John L. Welshon and C. L. Stieren, all of this city. William M. Stieren has been conducting the optical business at 544 Smithfield St. for a number of years and he decided to incorporate the firm and take into partnership others who have been in his employ. Mr. Stieren said that the capital of the company is all paid in. He intends to greatly increase the business of the concern and improve the present building by the construction of a new front. The store is also to be enlarged and the stock of the house increased considerably.

### Columbus, O.

F. F. Bonnett, of the Bonnett & Ross Co., started Saturday night for a week's vacation at his Summer home at Columbus Beach, Mich.

O. S. Hofman, president of the Hofman Jewelry Co., started Saturday night for San Diego, Cal., where he will remain until at least the end of next Winter. R. M. Whitford, vice-president and general manager of the same company, started Saturday night for New York, to buy goods.

The Bancroft Bros. Co. last week had prism glass panels put in a part of the sidewalk before their store, in order to get light in the basement, to which the repair department will be removed within a short time. The diamond room will then be located in the front of the store, to the right, where the repair department is at present.

M. J. Daniels, pawnbroker and jeweler, has leased the property on the corner of Spring and High Sts., fronting 31¼ feet on High St. and 187½ deep on Spring St., and will erect a six-story white pressed-brick business block. The lease is for 99 years, renewable forever. The rental is on a four per cent. basis, the value of the property being placed at $112,000.

Charles Glick, bound over under $1,000 bond to the United States Court in the District of Columbia, to answer a charge at Washington, of obtaining goods under false pretenses from jewelers of that city, is still in jail in Franklin county, awaiting an order from United States Judge Thompson for his removal. Detective Frank Baur, of the Washington force, was in Columbus for Glick's hearing and identified him as the man wanted in that city. He says that he is the man who has operated under the names "L. Lowenthal" and "Bernat Blumm."

Under the new tariff act recently enacted by Mexico, which becomes operative Sept. 1, clocks for towers and public edifices continue to pay 2c. per kilo; house clocks, $1 per kilo; clock mechanism, 70c. per kilo; silver repeating watches, $6.50 each; gold watches, $8 each; gold repeating watches, $16 each; ordinary watch mechanism, $1.25 each; repeating watch mechanism, $6; ordinary silver watches, $2.50; repeating watches of silver, $1.25 each.

## Attleboro.

TRADE CONDITIONS.

Decidedly optimistic is the tone of the trade talk heard among the manufacturers, the past week. After the simultaneous closing down for a week, in which 29 concerns joined, there has been a resumption of work on a rapid scale. Salesmen for a large number of the firms are now on their long trips, and every mail brings lubricant to keep the factory wheels buzzing industriously. A similar report is made by the manufacturers of Mansfield and Chartley.

The Attleboro Mfg. Co. last week installed a 10-station telephone in the plant.

Frank H. Sadler, of the F. H. Sadler Co., joined the Cottage City colony last week.

W. D. Flagg, advertising agent for Reed & Barton, is on an auto tour about the western part of the State.

Robert Murphy and George Billingston have gone to Toronto to start in the jewelry business for themselves.

Simms & Co. took out last week a certificate of incorporation, with capital stock $50,000. The president is James F. Simms, treasurer, Bernard Simms, and clerk, James F. Simms, Jr.

Jesse L. Carpenter, traveling salesman for the Horton-Angell Co., called last week at Attleborough, England, the namesake of Attleboro, Mass., and left from there for two weeks in Paris.

William A. Sturdy, of W. A. Sturdy & Co., and Albert W. Sturdy, are prominent in the 18th Massachusetts Regimental Association, which will hold its 44th annual reunion Aug. 24, at Chartley.

Announcement was made last week of the marriage engagement of Miss Mabel I. Cobb to Edwin F. Thayer, son of Oscar S. Thayer, for many years a leading manufacturing jeweler in New York. Miss Cobb is a member of the household of the late Henry Wexel, of H. Wexel & Co., ward of the latter, and his wife.

John M. Fisher, of J. M. Fisher & Co., who has been staying with his family at their Summer home in Cottage City, left last week, being called direct to New York on business. Harry P. Kent, of F. W. Weaver & Co., was called back to his office by the demands of his business. The jewelry colony at Cottage City, which has been prominent this Summer, is further depleted by the enforced departure of other manufacturers.

The campaign of Col. Sidney O. Bigney, of S. O. Bigney & Co., for a place on the Governor's Council grows in interest daily. Col. Bigney is in constant receipt of invitations to address large public functions, and is being widely entertained and feted. The only candidate against him has made so little headway it is confidently reported he will withdraw before the convention. The banquets and informal lunches Col. Bigney has given have led to the Boston papers bestowing the soubriquet of "The Foe to the Empty Stomach," and he is credited with adopting for his motto that "Man shall not live by breakfast food alone."

## North Attleboro.

Christopher Dobra, of the B. S. Freeman Co., is stopping at the Cape.

The Paye & Baker Mfg. Co. is improving the land in the vicinity of the factory.

Fred Brigham, salesman for Cheever, Tweedy & Co., left Monday on a western trip.

F. H. Sadler, of Sadler Bros., has returned from a vacation spent at Cottage City.

Thomas Totten, Nestor, Cal., formerly of Totten Bros. of this town, has been here for a few days.

Alpin Chisholm, of the Bugbee & Niles Co., with his family, are at the Island House at Martha's Vineyard.

C. S. Joslin, general agent for G. L. Claflin & Co., dealers in jewelers' supplies, is spending two weeks in Maine.

Dr. E. E. Hale, owner of the estate of O. M. Draper, and Mrs. Hale, are on an automobile trip through New Hampshire.

Superintendent George G. Wheeler, of the W. & S. Blackinton Co.'s factory, and family, are stopping at Lake Archer at Wrentham.

F. M. Whiting & Co. have a new salesman in the person of James Baker, who will travel through the west. Mr. Baker left Wednesday night on his initial trip.

Samuel E. Fisher, formerly Fisher Bros., but now retired, has announced his candidacy for the Republican nomination for representatve to the State Legislature.

Henry Mason, formerly of the Mason-Ruggles Co., has attached the property of that concern to secure the payment of a balance claimed to be due him for services while connected with that business.

Freeman Wiggin, a well-known local jewelry worker, and a member of the Kingston, N. Y., baseball team, and Miss Carrie Bowder of this town were married Saturday evening. They will reside here.

Wallace E. Franklin, of E. I. Franklin & Co., won the point in the Fish and Game Association shoot, held Saturday, breaking 19 out of 20 birds. This gives Mr. Franklin a good lead in the tournament.

## Providence.

Several factories were closed last week in order that the annual repairs might be made and an account of stock taken.

W. F. Main, who is to establish a new factory here, has moved his headquarters to 402 Westminster St., from 212 Union St.

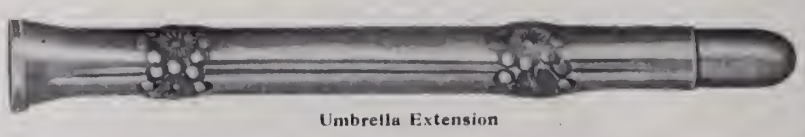
A. W. Hancock won the championship of the Choppequonsett Golf Club last week by defeating A. S. Vennerbeck 3 up and 2 to go.

W. Louis Frost, well known to many of the manufacturers, has been appointed standing master in chancery by the new Superior Court.

Among the imports at the Port of Providence last week were four packages of imitation precious stones from Bremen and two from Havre.

The factory of the Geo. H. Fuller & Son Co., Pawtucket, will be closed from Aug. 18 to Aug. 28, in order that repairs may be made, stock taken, etc.

Geo. H. Grant will be one of the members of the committee which will have charge of the Labor Day outing of Calvary Commandery No. 13, Knights Templar.



The occupants of W. R. Dutemple's automobile had a narrow escape from a fall of 40 feet the other day when the steering gear of the machine failed to work while the vehicle was being driven along Reservoir Ave., near the railroad bridge. The wheels of the machine crashed against the railing, breaking it, but bringing the vehicle to a stop in time to avoid a fall.

William Edward Potter, for 25 years in the employ of the Gorham Mfg. Co., died at his home, 32 Stanwood St., last week, after an operation for appendicitis. He was one of the silversmiths employed in the spoon room and had the respect of his employers and associates. He was 44 years of age, and leaves a widow and two children. His death comes as a distinct personal loss to a large number of friends.

Tip Cup

Umbrella Extension

Tip Cup, Extension and Tie Claspmade in Gold and Sterling Silver to match the Handle

Tie Clasp

**Mr. Jeweler:**

See that the umbrellas you buy this fall have the new Braitsch Specialties, "Tip Cups," "Tie Clasps" and "Umbrella Extensions," illustrated herewith. They are the latest and best accessories now on the market. If your umbrella maker cannot supply you, write us. Our trade-mark, "W. J. B. & Co.," on all our goods.

Established 1887

**W. J. BRAITSCH & CO., 396-8 Broadway, New York**

## Connecticut.

M. J. Beuchler, Bridgeport, is among the contributors to the fund for flood sufferers.

Burton B. May, Meriden, started last week on his western trip for the International Silver Co.

Next month the Factory "N." Outing Club, Meriden, will hold its annual outing at Steeple Chase Island, Bridgeport.

Handsome quartered oak fixtures are being made for the new store of S. W. Tasch in Danbury, by the Ellis Woodwork Co., Bethel.

At the recent annual meeting of the Meriden Cutlery Co. Horace A. Curtiss was elected president and treasurer, and Thomas A. Benham, secretary.

The old clock shop on W. Main St., Meriden, owned by the Parker Clock Co., will be renovated, remodeled and connected with the main factory by bridges.

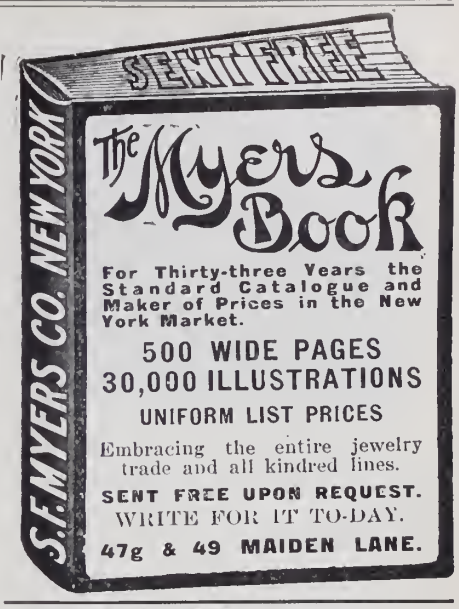
Sympathy is extended to Hezekiah Davis, of the New England Watch Co.'s office, Waterbury, owing to the death of his wife, which occurred last week at her home in Newton Heights.

Gen. Geo. H. Ford, of the Ford Co., New Haven, is among the enthusiastic believers in the bicycle revival and this Summer has used the wheel for business purposes in riding about the city.

N. Burton Rogers, identified with the silver plate industry at Danbury, is the president of the new Rogers Telephone & Electrical Co., which is to manufacture telephones and electrical appliances.

On the charge of murder Jerico Capbiance, an employe of the Waterbury Clock Co., Waterbury, has been held for trial without bonds. He is accused of shooting Angelo Solomita, an employe of the Scovill Mfg. Co.

Aug. 14 has been fixed as the date when the Seth Thomas Clock Co.'s clock shop at Thomaston, will resume operations. The tower clock department began yesterday and the watch department has been busy since Aug. 1.



Before Geo. B. Johnson, former president of the New Haven Business Men's Association, left for Boston to engage in business there, his old associates presented to him a handsome silver cup, made by Samuel H. Kirby & Son, New Haven.

While John Soya, an employe in the factory of the New Haven Clock Co., New Haven, was riding on an elevator, he was accidentally caught between the platform and a door, breaking his right shoulder and elbow.

Next Monday the Jumbo Club, composed of foremen and employes of the Bradley & Hubbard Mfg. Co.'s factory, Meriden, will have an outing at Birdsey's Grove. The annual vacation, comprising about three days, including Labor Day, will be passed at Averill's Ark, Indian Neck.

An enjoyable outing was given Saturday afternoon by the employes in the German silver department of the R. Wallace & Sons Mfg. Co., Wallingford. The party went to Wallace's Grove, where there were athletic contests and other amusements, and refreshments were served. In the ball game the German silver workers were defeated by the employes in John Heather's room.

Two strangers who called at Legrand Jackson's store in Norwalk, almost succeeded in getting away with a valuable watch belonging to the jeweler. When they entered they asked to see some cheap watches, and they spent some time looking them over, finally buying one and paying for it. After they had gone the valuable timepiece was missed, and the jeweler started out after the two men. After some searching he found them in another part of the city about to board a trolley car for Bridgeport. He threatened them with arrest and they returned the stolen watch.

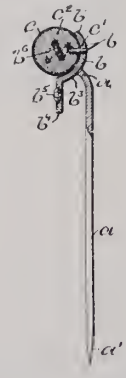
A LIST OF THE LATEST PATENTS GRANTED BY THE UNITED STATES AND GREAT BRITAIN AND UNITED STATES PATENTS THAT HAVE EXPIRED.

## UNITED STATES PATENTS.

ISSUE OF AUG. 1, 1905.

**795,930.** METALLIC VESSEL. Clarence M. Perkins, St. Louis, Mo. Filed July 30, 1904. Serial No. 218,871.



A vessel comprising two separately-finished structural elements, one of said elements comprising a

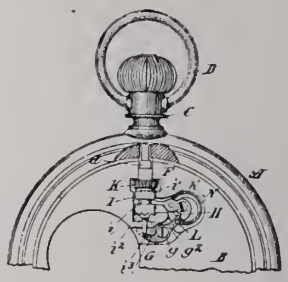
metallic cup, a metallic skelcton permanently connected to said cup, the other of said elements comprising a separate wooden shell fitting in and visible through said skeleton and surrounding said cup, and means permanently securing said shell in said skelcton.

**796,151.** STICK-PIN SETTING. Louis E. Sadler, Attleboro, Mass., assignor to the F. H. Sadler Co., Attleboro, Mass. Filed Dec. 21, 1903. Serial No. 185,970.

The combination with a stick-pin, of a setting having the upwardly-extending arm $b^1$, the down-

wardly-extending arm $b^3$, and the rearwardly-extending points, the arms and points being formed integral with the setting, the jewel, and an open coiled wire secured to the setting and adapted to support the jewel on the setting.

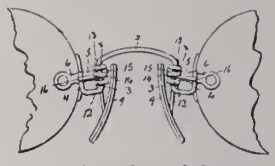
**796,152.** BRACELET. Louis E. Sadler, Attleboro, Mass., assignor to the F. H. Sadler



Co., Attleboro, Mass. Filed Oct. 10, 1904. Serial No. 227,852.

A bracelet constructed from a series of units, each unit consisting of a shell forming the face and sides in which are slots forming connecting members, a sliding connecting-link having an opening merging into a contracted opening forming stop-shoulders on the link, a coiled spring in the contracted opening of the link, and a back plate.

**796,162.** STEM-WINDING MECHANISM FOR WATCHES. Ryland L. Taft, Waltham, Mass., assignor, by mesne assignments to the E. Howard Watch Co., Riverside, N. J. Filed April 8, 1904. Serial No. 202,128.



In a stem-winding and setting watch, the combination with a lever pivoted to the movement-plate and operated by the winding-arbor, of a

second lever pivoted to the movement-plate, a clutch-sleeve operated by said second lever, and a normally expansible spring the ends of which are secured to said levers, that end of said spring secured to said first-mentioned lever having a greater possible movement than the end attached to said latter or clutch-operating lever, the ends of said levers engaging with each other when the winding-arbor is raised, and locking said clutch-sleeve in its lowered setting position against vertical movement.

**796,215.** EYEGLASSES. Carl F. Ingold, New Haven, Conn. Filed April 1, 1905. Serial No. 253,302.

The herein-described eyeglasses consisting of lenses, posts secured therein and each formed

with an eye, a bridge formed from a single piece of metal and comprising a central portion, stems and points forming U-shaped ends, plates connected with said posts and formed with eyes through which said stems extend, springs arranged to bear upon the said points, and nose-guards secured to said posts.

## TRADE-MARKS.

PUBLISHED AUG. 1 1905.

[The following trade-marks have been adjudged entitled to registration under the act of Feb. 20, 1905, and are published by the Patent Office in compliance with Sec. 6, of said act, which provides: "Any person who believes he would be damaged by the registration of a mark may oppose the same by filing notice of opposition, stating the grounds therefor, in the Patent Office, within 30 days after the publication of the mark sought to be registered, which said notice of opposition shall be verified by the person filing the same before one of the officers mentioned in Sec. 2, of this act. If no notice of opposition is filed within said time the Commissioner shall issue a certificate of registration therefor, as hereinafter provided for."]

Ser. No. 4,599. WATCHES, WATCH CASES, AND WATCH-MOVEMENTS. Philadelphia Watch Case Co., Riverside, N. J. Filed May 8, 1905.

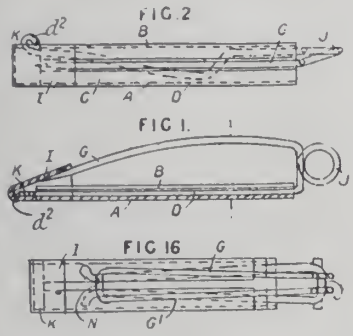
TRADE MARK.

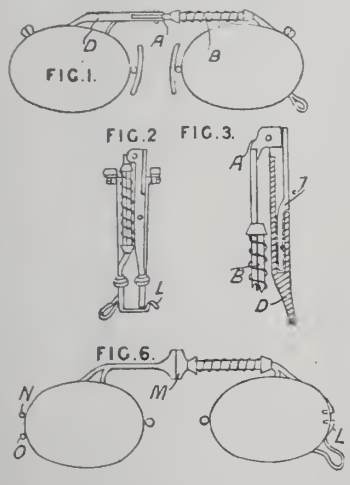


## BRITISH PATENTS.

ISSUE OF JULY 19, 1905.

(ABRIDGMENTS OF SPECIFICATIONS, 1904, FROM *The Illustrated Official Journal.*)

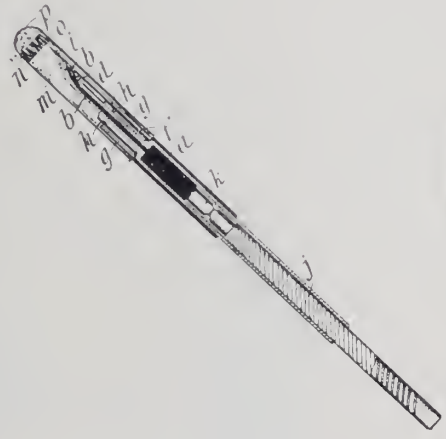
**7,431.** FASTENINGS FOR JEWELRY, ETC. J. CALLOW, Crakehall, Yorkshire. March 29.



A bar D, connected with a spring pin G, Fig. 1, by a piece J, is adapted to slide between guides B, C, Fig. 2, on the edges of a carrier A made of any suitable material. At one end the guides are joined by a cap or cover I forming a sheath for the point of the pin, and if desired a bridge over the pin G may join them at the other end. The

end of the arm D is curved as at $d^2$ for entering a perforation K in one of the guides to secure the pin. The device may be attached to a brooch, watch, bracelet, eyeglass hook, badge, or rosette, or it may be used as a safety-pin. It may also be applied to the fasteners of bracelets or necklaces, when the cap I may be dispensed with. In modifications, the carrier may be ornamented by means of perforations, two or more straight or curved sliding bars may be employed, joined by a crosspiece to which the pin G may be jointed, brazed, or soldered, and perforations K may be made in both guides. The sliding bars may be made longer than the carrier so that the curved ends may grip it firmly. Stops may be fitted to limit the traverse of the pin G when free of the cap I. In a modification, specially suitable for a hair slide or curler, either two pins G, $G^1$, Fig. 16, joined at the ends N nearer the cover I, or a single wide, flat, solid pin is provided. When used to support eyeglasses, watches, or the like, a hook is formed by bending over a portion of the carrier.

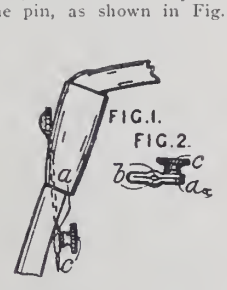
**7,435.** EYEGLASSES. W. DODSHON, London, N. W. March 29.



Spring sliding bridges for eyeglasses are jointed

so as to fold up. The spring slide bar B, Fig. 1, is attached to one eye wire and at its other end has a knuckle A, Fig. 3, so as to be held in closed or open position by a blade spring *j* fitted in the tube D attached to the other eye wire. The tube is finished off to a rounded form like the spring of the other part and is cut away as shown to allow play to the knuckle and blade spring. A wire L, Fig. 2, attached to the eye wire of the sliding half, may be used as a catch. In a modification, a better balance of parts is obtained by forming spring slides on both sides, that on the tube side being shorter than the other. Instead of a clasp-knife joint as above described, a spring-box joint M, Fig. 6, such as is used in lorgnette bridges, may be employed. Stops O, N may be used with the catch L. The provisional specification also describes a catch formed of a wire bent at right angles and attached to the eye wire near the screwing-up boss, to engage a ring or collar on the other eye wire.

**7,451.** RESERVOIR PENS. E. KEESING, Brighton. March 29.



A reservoir pen for desk or pocket use, may have a hand-operated piston to draw in or expel ink through a feeder *b*, and a removable socket to hold the nib, which is kept dry by a blotting-pad *n*, and cleaned by a pen-wiper *o*, both in the cap *m*. The piston *k*, preferably made of old leather soaked in oil, is moved in the pen suitable for desk use, by means of a spirally-grooved handle *j* engaging with a projection formed on the end of the reservoir *a*. In the pen suitable for pocket use, a shorter handle, rotatably held by the end of the reservoir, moves the piston by means of a long screw passing through it, a feather on the

inside of the barrel *a* preventing the piston from turning. The nib holder *f* passes over the barrel *a*, and the nib *i* is held between it and a part *g*. The end of the feeder *b* is shaped to lie in the nib, and has an air hole *d*.

**7,675.** SCARF-PINS. J. W. STOCKER, Beckenham, Kent. March 31.

Scarf-pins and the like are kept in place in cravats, scarfs, and the like by a clamp *a*, attached to the pin, as shown in Fig. 1. The U-

shaped clamp is made of brass or other suitable material, and is tightened by means of the screw

1. Snap complete.

J. C. Byrd, Wagoner, I. T., who is a careful reader of the trade papers, recently received word from C. W. Hoskins, Collinsville, I. T., stating that he had been robbed of $1,800 worth of jewelry, a list of which he enclosed. In reading The Circular-Weekly Mr. Byrd noticed an article telling how H. L. Morrison, Pittsburg, Kans., had received a number of watches from a farmer. He had purchased them from a man who appeared to have a number of such articles. A comparison of the numbers of the goods showed that those stolen from Mr. Hoskins tallied with those sold in Kansas, and Mr. Byrd imemdiately notified Mr. Hoskins and also the jeweler in Pittsburg, Kans.

# TRADE MARK INFORMATION

**Note.**—The publication of our work, "Trade-Marks of the Jewelry and Kindred Trades," Second Edition, containing 4,000 marks, the accumulation of various works of reference, and the ramifications of our business enable us to trace to their origin nearly all marks that may be found on jewelry, silverware, art pottery and kindred lines, of both American and foreign make. All questions in regard to trade-marks will be cheerfully answered. We would be pleased to have the trade seek the benefit of our facilities regarding the identity of any marks they cannot trace. We would prefer to receive the article for examination; for, if the mark is of foreign origin, the slightest difference between a drawing and the original is of great importance.

*All queries received are also answered promptly by mail.*

### Mighty Niagara.

The New York *Press*, of June 16th, says of Niagara: "Most people visit Niagara Falls once, then go away forever, cherishing the recollection of having seen something, but unable to explain to themselves or another exactly what the something is. They know it is something grand, wonderful, amazing, astounding, overpowering; but they can never quite grasp or comprehend it. Now, the thing to do is to make a study of this marvel of nature; go to see it in winter, spring, summer and fall dress. Go to see it a dozen times. You will discover new interest, new beauty, new wonder each time. Stand in its mighty presence often, and you will find your spiritual stature greatly enlarged."

Everyone who has visited the falls a number of times will agree that only by "intimate acquaintance" can one come to a full appreciation of the extent, beauty and grandeur of this greatest of all natural phenomena. Niagara is now in its "summer dress." —*From "In the Trail of the Traveler," in Four-Track News for August.* Adv.

# WALTHAM WATCHES

## Observations by Great Observers

From the Autobiography of HERBERT SPENCER, Vol. II, Page 167, American Edition.

HERBERT SPENCER

"The presentation watch named in Prof. Youman's letter, was one of those manufactured by the Waltham Watch Company. . . . It has proved a great treasure as a time-keeper, and has excited the envy of friends who have known its performances."*

*"I find in a letter written in December, 1880, after the watch had been in my possession fourteen years, a paragraph respecting it which may fitly be quoted :—'I have several times intended to tell you how wonderfully well my American watch has been going of late. It has always gone with perfect regularity, either losing a little or gaining a little; but of course it has been difficult to adjust its regulator to such a nicety as that there should be scarcely any loss or gain. This, however, was done last summer. It was set by the chronometer-maker in July, and it is now half a minute too slow; never having varied more than half a minute from the true time since the period when it was set. This is wonderful going. As the Admiral says, one might very well navigate a ship by it."

("In 1890 it went with equal nicety; lost 42 seconds in half a year.")

RALPH WALDO EMERSON
From a drawing made in 1857 by S. W. Rowse, now in possession of C. E. Norton.

RALPH WALDO EMERSON, the Concord Philosopher, used the Waltham Watch as a type of the highest development when he wrote in one of his Essays on Eloquence, in speaking of a man whom he described as a leader and a Godsend to his community:

## "He is put together like a Waltham Watch."

THE CITY TEMPLE
Holborn Viaduct

The REV. R. J. CAMPBELL, in a sermon preached at the City Temple, London, on Sunday, September 18th, 1904, spoke as follows:

"When I was in the United States last year, I visited the well-known Waltham Watch Factory; some of you now are wearing the products of this American manufactory. Do you understand, or do you ever try to understand how it is that you are abie to afford these articles as compared with the earlier day? I will tell you: It is because the brains of a whole army of men are concentrated in that marvellous institution. I remember asking my guide, as we went from room to room, 'How many watchmakers of an older day do you estimate sit on each of those stools, and the men who do the work by machinery—how many are they equivalent to?' He replied: 'Everyone you see at work here is equivalent to fifty at the very least of operators who lived before this day, conscientious and able though they may have been.' Inventions have increased the working value of every individual man; they have raised the level of the productive output of the civilized world. So it is in higher region."

"*The Perfected American Watch*," *an illustrated book of interesting information about Waltham Watches, sent free on request.*

## To Convert an Ordinary Watch into a Universal Decimal Tachometer.

(Translated for The Jewelers' Circular-Weekly from the French of M. J. de Rey-Pailhade, in the *Revue Internationale de l'Horlogerie.*)

FOR this conversion it is necessary to use a watch with a central second hand. The dial is divided into 300 equal parts, each equivalent to the fifth of a second; some number these divisions according to the 60 seconds; others number them from one to 300, in sections from 25 to 25. Of course, the centesimal of the minute will be obtained by numbering the divisions by threes. Thus the first hundredth of

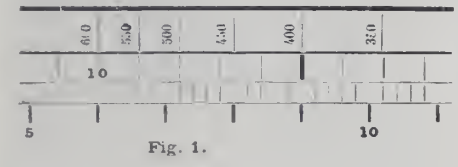

Fig. 1.

the minute is equivalent to three-fifths of a second; the second hundredth of the minute equivalent to six-fifths of a second; the 99th hundredths of the minute is equivalent to 297 fifths of the second; the 100th hundredth of the minute to 300 fifths of the second.

This method of numbering the 300 divisions allows, therefore, without changing the trains, to divide the minute into 100 subdivisions of a third of the hundredth. If the seconds hand is stopped on the second mark after the 17th hundredth, it is said to mark 17 two-thirds hundredths, which is written decimally, 0.177 m.; 2/300 is equal to 0.066, or more simply 0.007 (approximately).

On the dial of the watch can be depicted perfectly (1) the seconds and fifths of the seconds; (2) the hundredths of the minute; (3) the speeds in kilometers for the time corresponding to either system. The reading is easier and more precise where each indication has a special color. Below is a model that might be used.

It is seen that 10 centiminutes are equivalent to six seconds; 15 centiminutes to eight seconds; 18 centiminutes to 10 4/5 seconds; inversely, 7 2/5 seconds correspond to 0.123 m., and so on. The drawing, therefore, allows of the conversion at sight of a time in seconds to a time in hundredths of a minute.

When the second hand has made more than one revolution, two for example, and 10 2/5 seconds over, we write 2.177 m.; this number is immediately applicable to the calculations. The diagram gives the speed

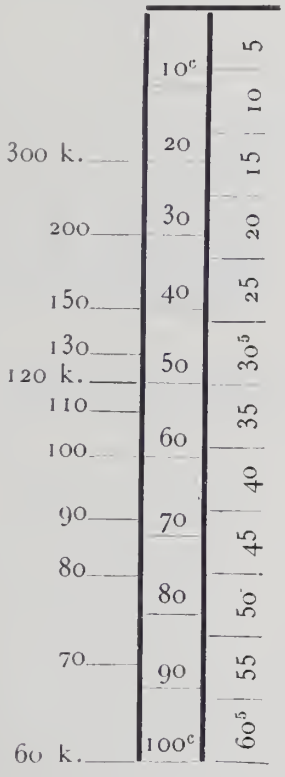

Fig. 2.

in kilometers per hour, corresponding to the given time for one kilometer. Thus, a + c vehicle has passed over a kilometer in 15 centiminutes, or nine seconds, and the diagram indicates a speed of 400 kilometers per hour. It is manifest that if the mobile had made one kilometer in 1.50 m., or 150 centiminutes, the velocity would have been 10 times less; that is, 40 kilometers per hour.

Fig. 2 is shown free from unnecessary details, the ensemble of the design for the circles of the dial in straight lines for the convenience of the printer. The values are reversible; that is, if the kilometers are taken for the times, they will be read in the column of the times; for example, for the time of 170 centiminutes corresponds a speed of 50 kilometers per hour.

This diagram allows of ascertaining the speed per hour of an automobile that has passed over 100 kilometers in 2 h. 30 m. A mental calculation gives 173 minutes, and the diagram, for the time of the kilometer, 173 centiminutes, a speed of 34.6 kilometers. Thus, all the problems of velocity can be solved without calculations, and with an approximation sufficient for practical needs.

The division of the periphery of the dial into 100 parts presents another advantage; it allows of reading directly, with the minute hand, the decimal fraction of the hour. This is convenient in certain cases. Thus, under the same conditions, can be read with the central seconds hand, 0.177 h., corresponding, according to the first diagram, to about 10 3/4 m.

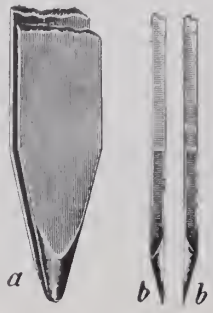
Finally, this graduation permits of obtaining, through a division by two, the decimal fraction of the entire day, otherwise called the decimal division of the day decreed by the convention. It can be seen on what division the prolongation of the hour hand passes; on our watches this hand is prolonged sufficiently to meet this graduation.

For instance, the hour hand passes by 0.177; this indicates that it is 0.177 of a half day; then the hand makes two turns per day, which is written $0.177 \times 1/2$; whence the rule—divide by two the decimal fraction indicated, which gives instantly 0.0885 of a day, or 8.85 *cès*, corresponding to about 2 h. 7 m. The decimal fractions of the day are much employed in astronomy.

It is seen that the graduation of the circle of the dial of an ordinary watch into 100 parts presents the greatest advantage for a large number of calculations. I therefore advise persons who are interested in problems of the decimal system to have a simple graduation in the hundredths placed on their watches, as in Fig. 1, without the indications of speed; then by constructing diagrams of the kind illustrated in Fig. 2, a large number of problems can be solved without other calculation.

## Bending up the Knee of Breguet Springs.

BY those who have little practice in the operation of bending the over coil, it is regarded as a difficult undertaking, and it is probably for this reason that there are so many auxiliary devices for this purpose. I have never yet, says Carl Nadich, in the *Deutsche Uhrmacher Zeitung*, seen the description of the following method published anywhere, although it is perhaps the simplest of all, requiring practically no auxiliary means outside of the tools which every watchmaker possesses and uses daily.



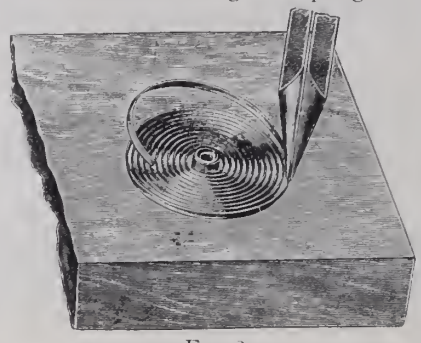


FIG. 1.

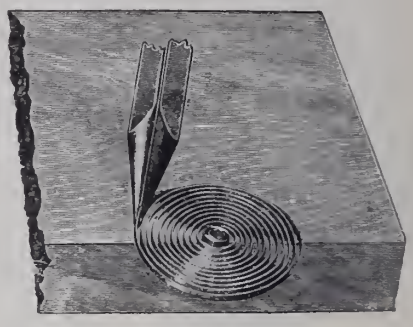

All that is necessary is to prepare a pair of strong tweezers a little differently than usual by making the two broad jaws perfectly flat and rounding them off a little at *a* in Fig. 1, but making them pointed sideways, as shown in *bb*, in Fig. 1. Beside this tool only an emery file is required, the handle, which is free from emery paper, being employed in the process.

After the balance spring has been "counted off" in the usual way and the place determined where the first bend has to be applied, the blade of the spring is seized at this spot between the noses of the tweezers and placed on the emery stick in such a manner that the blade of the spring at the bending place runs across the grain of the wood. Now take a hammer, and while holding the spring blade very firmly between the flat points of the tweezers, give the latter a few light taps with it on the upper end. This will cause the points of the tweezers to enter the wood and the blade of the spring held between them suffers a little dent forward, the degree of which can be gauged as desired by the number and strength of the taps with the hammer. The first bend is complete.

FIG. 2.

Now turn the spring around, grasp the blade at the spot where the second angle is to be, and repeat the above-described process, with the exception that in this case the points of the tweezers should be placed near the edge of the wood, so that the whole spring from the first bend protrudes over the emery stick finishing the elbow.

It is immaterial in this work whether the turn which is nearest to the extreme end of the spring is made first or last so long as the operation is carried out correctly. In the accompanying drawings (since the collet in Fig. 2 is represented, as seen from below) the outer bend is supposed to be the first and the inner one (compare Fig. 3) the second.

FIG. 3.

The whole operation is completed in a few seconds. Those employing the method for the first time are generally quite dumbfounded at the ease with which the bends can be executed in this manner. I should be pleased if by publishing these lines I had enabled some of my fellow-craftsmen to accomplish without difficulty what may have appeared to them heretofore to be a difficult job

## Notes on Watch and Clock Oil.

(Compiled for THE JEWELERS' CIRCULAR-WEEKLY from different authors.)

(*Continued from issue of Aug. 2.*)

According to the late Ezra Kelley, the oil taken from the porpoise and blackfish during the Summer months on the coast of Africa, above the equator, is found to contain less glutinous matter than that obtained in or about the St. Lawrence River, which fact is attributed to the difference of the food of the fish, which, in turn, affects the oil.

Sperm oil is the best known of all the lubricants and, for general purposes, is one of the most excellent. The large cavity in the head of the sperm whale contains oil and solid fat, from which the former is separated without heating, by pressure and crystallization.

Bone oil is made from the fat obtained from the leg bones of recently killed, healthy, young cattle, and the best method of treatment is given as follows, in Brant's "Animal and Vegetable Fats and Oils":

"Fill a bottle one-third full of the oil to be purified. Then pour clarified benzine in small portions upon the oil, close the bottle and shake until the benzine has disappeared. By again adding benzine and shaking, a complete solution of the fat is finally effected. That this has actually taken place is recognized by the fact that the contents of the bottle do not separate after long standing. The bottle is then exposed to a low temperature for several hours, a solid fat is found as a deposit on the bottom, and the lower the temperature the greater is the deposit. Alongside the bottle containing the oil, place another bottle with a funnel, the lower end of which is closed by a cotton stopper; after thoroughly shaking the bottle with oil in, pour the contents into the funnel; the fluid portion runs into the bottle, while the solid portion is retained in the funnel by the cotton stopper. The clear solution of bone oil in benzine collected in the bottle is then brought into a small retort, which is connected with thoroughly cooled receivers. Place the retort in a tin vessel filled with water and apply heat. The benzine readily distills off, leaving the purified bone oil in the retort."

Neatsfoot oil is largely used in the arts, being one of the best of lubricants. The best oil, that used for clocks, is extracted by placing the thoroughly cleansed feet of cattle in a covered vessel near the fire or in the sun. The oil thus obtained is clarified by standing before bottling. It was the practice of many old watchmakers to allow a large bottle of neatsfoot oil to stand in a position exposed to the direct rays of the sun in Summer and to the extreme cold of the Winter; then, after two or three years, on a very cold Winter day, to pour off such oil as still remained fluid, which was preserved for use.

(*To be continued.*)

Rockford Watches Speak for Themselves.

# THE HOWARD
## COMPLETE WATCH
## of 1905

The Howard Watch is the superlative expression of modern watchmaking, unequalled in time-keeping quality or exquisite finish. Four grades, all 16 line, that meet every requirement of the discriminating, from the serviceable timer to an exclusive watch for the most fastidious buyer. So manufactured, cased, packed and delivered that the dealer may make the most attractive display and sell with the greatest confidence.

The watch of *fixed price*. We name the retailing figure—a *fair* price—and absolutely protect it. *No cutting is permitted.* These watches are sold under an agreement that the price is to be maintained in every sale and with the understanding that violators will be refused further stock.

23 ruby and sapphire jewels (raised gold settings); adjusted to 5 positions, temperature and isochronism; breguet hairspring; micrometric regulator; gold train wheels; double roller; steel escape wheel; sapphire pallet stones; all steel parts highly finished; extra fine, hand-made, double-sunk dial; **timed in the case and certificate of rating furnished with each watch.**

**E. HOWARD WATCH CO., = WALTHAM, MASS.**

## Unique Sun Dial Showing Time at Fifteen Different Localities.

THE romantic and picturesque sun dial is coming to its own once more. Dial-making is again an industry reveled in by members of the arts and crafts circle, says a special contributor to an exchange. One wonders that anything so beautiful in itself and associated with so much of pleasing sentiment should have been allowed to die out. Its revival should be hailed as a sign of a new appreciation of the beautiful and fitting.

It was in days when interest in sun dials was lowest that Peter Hamilton, of Baltimore, conceived and executed the design for a dial unlike any other of which we have any knowledge, and which is now one of the attractions of the celebrated Druid Hill Park in that city.

This dial, beautiful from an architectural standpoint, is also a mathematical wonder, for it registers the time at 15 places, each far distant from one another. From its 15 faces can be read the hours at Rio Janeiro, Sitka, Jeddo, Jerusalem, Fernando Po, Cape Cod, Baltimore, Pitcairn's Island, Honolulu, London, Cape Town and San Francisco. The equatorial and polar planes, the latter with the motto, "sine umbra nihil," make up the 15 faces of this peculiar dial.

That he had constructed a wholly original sun dial, of which there is no duplicate, is a fact which surprised Mr. Hamilton, for he believed, while constructing it, that he was reproducing in essential points the famous dial at Glamis Castle, in Scotland, which is undoubtedly the finest in the world.

This latter timepiece is surrounded by Shakespearean romance and tragedy, and as Alice Morse Earle says in her "Sun Dials and Roses of Yesterday," even a pictured reproduction of this dial "speaks to us of Macbeth, the shadowy Thane of Glamis, and of the charm and magic of Shakespearean play."

There are over eighty dials in all on this famed timepiece, each of its 24 faces having from three to four dials each. Again, quoting from Alice Morse Earle: "This dial is certainly three centuries old, as it appears in a print of the castle, behind which it stands, previous to the year 1600, and was named in Earl Patrick's Book of Record of a date previous to 1695."

It was from a description of the Glamis sun dial, which is over 21 feet high, and handsomely carved, that Mr. Hamilton drew the plans for the dial which now stands in Druid Hill Park. Never having seen even a photograph of the Glamis dial,

SUN DIAL WHICH SHOWS THE TIME AT MANY DIFFERENT LOCALITIES.

Mr. Hamilton had only verbal descriptions to work upon, and he concluded that the many faces of the Glamis dial must speak the time at various points. Not so. The Glamis dial tells only Scotland time. Thus Mr. Hamilton's work is not a copy in any sense, but is original with him.

In an article in an old edition of the Encyclopedia Britannica Mr. Hamilton found the formula upon which he worked, as follows:

"If a horizontal dial were transferred from the place for which it was made to any other place on the earth's surface, and fixed there in a position parallel to its original position—that is, with its plane parallel to the horizon of the place for which it was made, its axis as before pointing to the pole of the heavens—there in its new position it will indicate the hour of the day at its original position, precisely as it did before it was removed."

It was in 1875 that Mr. Hamilton constructed his unique dial of sandstone. It stood in his yard for a number of years. In 1892 he presented it to the city of Baltimore. It was first placed in one of the smaller parks, and afterward removed to Druid Hill Park, near the Eutaw Place entrance. As time had begun to wear away some of the inscriptions, the Park Commission recently spent $500 to cover the surface with bronze plates and engraved them. This has been done under Mr. Hamilton's supervision, and the dial now bids fair to stand for centuries, a picturesque monument to its maker.

Another highly ingenious form of sun dial clock was recently exhibited at the Royal Society's rooms in London, says an exchange. It is the invention of Prof. Albert Crehove. The gnomen of the common dial is replaced by a bead fixed on a wire, the shadow of which is cast on the interior of a true cylindrical surface. On this surface figures of eight curves are drawn, marking standard noon for each day of the year. The cylindrical surface is inclined so that its axis, upon which the bead is fixed, is parallel to that of the earth. It thus represents the latitude of the place.

The shadow of the bead travels across the cylindrical surface parallel to or on one of the circles drawn thereon. These circles represent days of the month. Each hour described in the circle is always of the same length, and a scale of minutes engraved on the cylinder enables true mean time to be read off directly to a few seconds.

## THE - JEWELER'S - TIME-HONORED - SIGN.

EVER SINCE the advent of the watch in the latter part of the fifteenth century, the sign hung out by the majority of Jewelers has read, "Watchmaker and Jeweler"; and this has often been supplemented by a large representation of a watch hung in front of the store. Indeed, the watch is still the sign of the Jeweler.

The watch department should be the Jeweler's first care. Never were such good watches to be had as now. This house specializes the watch, rendering prompt and efficient service.

# STORE KEEPING DEPARTMENT

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with THE JEWELERS' CIRCULAR-WEEKLY regarding any advantageous device or plan which they are utilizing in connection with their business.

## An Attractive Establishment of an Omaha Jeweler.

ONE of the finest stores in Omaha, Nebr., is that of Albert Edholm, who a short time ago moved to the northeast corner of 16th and Harney Sts. For 15 years Mr. Edholm had been in business on N. 16th St., opposite the new post-office. He started in business when that part of the street began to boom, and while the necessity for a more central location has been obvious for several years, it is only since the first of January that the opportunity has afforded itself whereby the change could be made.

SECTION OF THE STORE OF ALBERT EDHOLM, OMAHA, NEBR.

In the front of the store are two large plate-glass show windows. The entrance is at the corner, and to its right are two more large display windows. The interior of the store is equipped with wall cases of solid walnut, the show cases being of plate glass with marble bases. All other fixtures and furnishings are of solid mahogany. The ceiling is elaborately frescoed in white and the pale shades of blue. The walls are tinted slate blue, with a painted border of yellow and blue flowers and green leaves. The floor is marble in diamond-shaped panels, these having a border of terrazo strips. At the rear end and to the right is the watchmaking department.

The diamond room is situated in the front directly back of the show windows. A novel idea is a small closet between the windows, which is used for keeping loose stones during the day. A low partition of mahogany separates this department from the rest of the store. Built on the outside of the petition is a seat upholstered in green leather. Stools with bronze stands and mahogany and leather seats are placed about the store.

The three elaborate combination chandeliers holding both gas jets and electric lights are of blue tinted iridescent mosaic glass. The glass forms immense half globes of light. The globes are suspended from ceiling by bronze stems and heavy bronze chains. Drop lights to match are suspended on each side of the room.

No expense has been spared in making this store modern in every respect.

## Window Card Calculated to Attract Customers

"MY jewelry store is located near the depot, on the main street of our city, where almost every one must pass to go to or come from the depot," remarked a western jeweler last week, "and I have found a sign which reads:

MISS THE TRAIN?
then have your
WATCH
set and regulated free.

to be the best window card I have ever made. I do not think it appeals particularly to those who have been unlucky enough to miss a train, for they are in bad humor, but that line in large type at the top of the card, attracts the attention of almost every one who goes to and from the depot. I have found that it causes them to compare their time and that a large proportion of those who take the train regularly have become regular customers on account of this sign. They have taken advantage of the offer to have their watches regulated free, and this has led to an acquaintance which has ripened into a sure thing for their business in my line.

"Besides these regular customers there is a large class of travelers who do not have the correct time, and are glad to have their watches regulated while here, and while I do not generally get either a repair bill or the sale of a new watch, I nearly always manage to sell a few souvenirs to such people before they leave.

"I have made it a point to put that card in the window just after the regular trains arrive each day for some time past, and place other cards in the window at other times. This little change for the special occasion was one of the things to attract attention, and people have come back at a later date, looking for the jewelry store with that particular card in the window, and their inquiries along the street have caused the sign to be so well known to my brother merchants that they know where to send them at once.

"At one time I would have thought this plan entirely impracticable because it was bound to cause a good deal of work, for which there was little chance of remuneration. I then thought that we did well to regulate the watches purchased of or repaired by us. The test, however, has proven that the possible repair of a watch is made all the more certain, and there has been a very large increase in the business

## Storekeeping Department.

of the repair department, and the acquaintance gained is something immense.

"We have always insisted on each person coming in to have his watch regulated, making note of the date and also of the day we wanted him to drop in again, so he had two memoranda which reminded him of our store. It has been found that these men nearly always become interested in the goods we have to offer by the time the watch is properly regulated, and as we always give them the impression that it is a pleasure to show how nearly correct we can make their particular watch, they do not hesitate to come in and talk to us about all kinds of matters, and we are naturally the first people these men think of when they have to buy a present of some kind. They come down and unburden themselves at once, and we generally sell the goods needed. This all comes from the friendship started with the watch regulating.

"It is a well-known fact that no man can go into business and make a success of it if he is depending solely upon his friends. At the same time it is an equally well-known fact that no man can long continue in business unless he has the ability to make friends. These friends, made in a business way, are the ones who continue good customers, and for the jeweler I think the watch repair department is one of the best means to make friends of this class. It takes time, but it takes nothing but time, unless the watch needs repairs, and then you get paid for what you do, and can afford to use both time and material.

"I have also found it paid to make a special bid for the watch regulating of the ladies. They almost invariably have watches which keep poor time, until they are caused to take more interest in their time-pieces by talking to us, then they take pride in being one of the few to really have the correct time. They never fail to talk about it, and the result is the instilling of the wish in other women of the desire to also be of the few who have correct time. She hunts us up and we take care to keep her interested from that time forward.

"Jewelers out our way have to come in competition with the department stores, where women take possession and pull most of the goods around to suit themselves. We must make our stores attractive to them in some manner, or we lose their trade. I have made this watch regulating scheme one of my hobbies, and it has been a paying one." F. A. P.

### A Unique Advertisement.

A NOVEL way of advertising is that adopted by the Harris-Goar Mfg. Co., Kansas City, Mo., which is distributing the words and music of a song entitled "A Square Deal," the words being descriptive of the establishment. The music, which is written in the key of E flat, is not such that might readily be accepted by a publisher of popular songs, but nevertheless it fulfils its purpose well.

The regular strain is written in waltz time.

"You can get a square deal, no less, no more, at the jewelry house of Harris & Goar. Let the merchants, princes, gamblers roar, or tell you instalment men *must* cheat, you get a square deal, no more, no less, the way they can do it they leave you to guess, but they are the people you will have from this on 307 E. 4th St."

### A Correction as to Some Old New York Jewelry Firms.

NEW YORK, July 28, 1905.

*Editor* THE JEWELERS' CIRCULAR-WEEKLY:

Referring to the article in the CIRCULAR-WEEKLY of July 26, "When New York's Jewelry Shopping was Done in the Bowery," there are several errors which I am desirous of having corrected.

The firm of A. C. Benedict & Co. is still continued at 28 Bowery on the same grounds that it has occupied for 87 years and I, the surviving partner, am now the head of the firm. One would infer from the article mentioned that nothing remained there but the name, but the business is still conducted as it was during the lifetime of Mr. Benedict with the assistance of the old employes who have been there from 20 to 30 years.

In the list of names mentioned of jewelers doing business on the Bowery in the '50s and '60s, the name of Wm. D. Briggs has been omitted.

Mr. Briggs was of the original firm of Ackerly & Briggs, who were originally, I think, 150 Bowery, corner of Broom St. Mr. Ackerly retired, and Mr. Briggs subsequently removed to 158, where he remained for a number of years and until he died.

There was also omitted in your article the name of Wm. S. Smith, who was quite prominent and who did business at No. 178. Also Martin Benedict, who was at 276, but retired from business along in the '50s, with ample means that carried him through the balance of his life.

The store of W. W. White referred to in your article was first at 68 Bowery, and is still continued as a jewelry store by F. Schneider.

Yours truly,
R. S. FERGUSON.

### Yet Another.

Tell me not in sneering manner
Advertising does not pay;
Rich are they who fling their banner
Boldest to the world to-day.

Advertising done in earnest,
Done with wisdom, heart and soul,
With determination sternest,
Always wins the wished-for goal.

Lives of many men remind us,
We to great success can climb,
If the reading public find us,
Advertising all the time.

Advertising with persistent
Energy to spread our fame,
Ever honest and consistent
In performing what we claim.

In the world's commercial battle,
In the rivalry of trade,
We must hustle, shout and rattle,
Ere impression can be made.

Not enjoyment, rather sorrow,
Is the certain end of those
Who are apt to let to-morrow,
Like to-day, unheeded close.

—*Business.*

## WHAT SOME JEWELERS SAY

*Catch phrases, descriptions and arguments which retail jewelers and opticians have used in their newspaper advertisements.*

When Jobe-Rose sells the gift the recipient is happy and well pleased—that's because there's a degree of exclusiveness which marks it distinctly different from all the others. The prices are right—Jobe-Rose Jewelry Co., Birmingham, Ala.

Suitable gifts for graduates. If you haven't made up your mind what to select for a graduation gift, perhaps these suggestions will help you: A good watch will almost surely be a welcome gift. Watches for boys and young men—every one warranted to keep good time; silver or gold cases; all prices, from $6.00 to $35.00. Misses' watches in dainty silver or gold-filled or solid gold cases, $5.00 and upward. In the matter of jewelry, you may choose from a fine assortment of rings, brooches, scarf pins, lockets, neck chains, etc., paying as much or as little as you choose. We have plenty and appropriate pieces of jewelry as low as $1. Then there are numbers of personal trinkets in sterling silver that make dainty gifts; 50 cents to $2.00.—W. W. Pearce, Wichita, Kans.

The best is none too good. Wedding gifts purchased at our store in sterling silver are the best. We deal in the best only. Variety is a specialty with us; looking over our line you will be convinced. It includes all the useful pieces, as well as many novelties suitable for wedding gifts. Largest stock of cut glass in the county. $2.50 for bon-bon dish is a leader with us, and can't be beat in price, style or quality.—Clark & True, Middletown, Conn.

The ruby is the birth stone for July. You find them here in any setting—gems that adorn. Going to the seashore or mountains? You need something new and good in jewelry—it is here—at the store where quality is the first consideration. Hundreds of tasteful and inexpensive things not found at other stores. Repairing done by men best in their line; no poor work goes out from Paul's, Norfolk, Va.

Diamonds.—Six reasons why you ought to buy them: (1) They are beautiful. (2) They're indestructible. (3) The prestige they give to the wearer. (4) Their constant increase in value. (5) Their salableness. (6) Their safety as an investment. A reason why you ought to buy them here.—Because our present stock (the largest in the State) was bought so reasonably that we can well afford to sell diamonds at lower figures than our competitors—and fine diamonds, every one of them. Come and see if this statement isn't a true fact. Albert Pfeifer & Bro., Little Rock, Ark.

## Robbing Peter to Pay Paul.

(Paper by S. B. MILLARD, Minneapolis, Minn., read before the American Association of Opticians, at Minneapolis, Minn., July 25, 1905.)

I HAVE been called upon by our president to assist him in filling up your programme, and I do it rather reluctantly, knowing that there are many optometrists present who could handle the subject with much more ease and convey to you better ideas than I can possibly do.

In my work connected with the State association, I have preached that when called upon for a paper to do the best you can, which I will endeavor to do and if I fall short in my attempt to interest you, kindly make allowances for my limited ability and give me credit for the effort I have made.

"Robbing Peter to Pay Paul" is my subject, and while it has nothing to do with Peter or Paul, it will show you I think that robbery is taking place within ourselves and does more injury to the human race than if you were met on the street corner by a "hold-up artist" and relieved of your cash, the artist caring little if it were your last cent. You call this robbery as the law would, or you can call it borrowing without your consent. The "artist" may be forced by the pangs of hunger to commit the crime, but he must be satisfied. Nevertheless it is a crime, and the only way to stop the borrowing is to supply the want.

Another illustration: Take a young man starting in business with a small surplus capital, he places his surplus in a reliable bank. Now, if business is not as it should be, he checks out some of the surplus, and should business continue in the same condition his "nest egg" becomes exhausted and he will go to his banker and borrow. Should he be so unfortunate as not to meet the obligations, he will "go to pieces" and be forced to settle, not as he would like, but as the bank will see fit to have him.

Now the case I am going to mention is a clear case of robbery as I have diagnosed it, and I think you will bear me out by the results I have and am obtaining. Even if I am not right, I cannot be farther out of the way than some of our leading nerve specialists in the northwest. This is the case as I discovered it, and while it may be nothing new to you all I think it will be interesting to a few of you. I submit this picture taken of the patient, who is 22 years old, a farmer by occupation, is bright mentally but has had very little schooling on account of his affliction.

The picture shows the starting of the spasm, which was with him at all times in different forms, it being utterly impossible for him to control it in the least; note how the face is distorted, the next instant his tongue would protrude from the mouth full length, then he would yell "whoa" until he could be heard for blocks then the spasm would repeat itself. This was his condition at all times, it even annoyed him while eating, and I assure you it was more annoying to any one who was forced to be in his presence. He being conscious of it himself it was doubly annoying to him.

I knew the young man in a way for a number of years, but my attention was called to him by seeing and hearing that he was apparently relieved of his trouble, and upon investigating the case found that a physician had given him the "Rest Cure." The treatment he received was being confined to a bed in a darkened room for, I think, nine weeks, and he came out apparently in a normal condition, but I noticed in a few weeks that he gradually became worse, and in a short time was the same as ever. Then I became interested as an optometrist, and I learned that he had visited some of the most noted nerve specialists in the west and his case was diagnosed by all of them differently, one very prominent physician stating that it was "chronic palpitation of the heart." I will say this was apparently a fact, as he had, while exerting himself, palpitation in its severest form. If he ran up a flight of stairs you could, as it were, hear his heart beat.

I suggested to a physician who had also become interested in the case, that there was a nerve leakage which had not been located, and suggested that it might be in the eyes, but I was informed that his acuteness of vision had been tested and found to be normal, but of course the mere fact that his vision was normal would signify nothing.

I was still convinced that Peter was robbing Paul and that the third pair of nerves was robbing the seventh, and after the seventh was exhausted he borrowed around among his friends, such as the 10th nerve and the 12th nerve; robbing the 10th of its stimulus caused the bad heart action, and by robbing the 12th he lost control of the tongue.

The case presented itself to me very plainly as being one of third nerve exhaustion, for why should the case recover while in the dark? The leakage must have been through the organs of vision, and in the darkness the stimulus which had become exhausted through the eyes would soon build up the third nerve, and when that was accomplished Paul returned to Peter all the stimulus he had borrowed, thus relieving the cells which had been robbed, as you know it is said there is "honor among thieves."

It is stated by some of our prominent optometrists that a great percentage of stimulus secreted in the brain-cells is exhausted through the eyes. This apparently is a fact, and if you consider what is accomplished by some of our blind citizens you will appreciate it. Look how they remember the voice, or the hand clasp of a friend. I have in my list of acquaintances a young man who is a law student in the University of Minnesota, who gains his knowledge from hearing his roommate read his lesson, and he can repeat it word for word while his classmate is compelled to study for hours. Would it be possible for him to accomplish this were he not blind? Did you ever hear of a person with good organs of vision being able to do this? It appears to me that it is easily explained, for not being able to read his lesson he sends no stimulus to the eyes, and not being forced to this he has just that much more retaining power.

Statistics show us that the longevity of the human race decreases from generation to generation. We will all admit that we are middle-aged when we should yet be young, and some of our learned people account for this fact by stating that we all dissipate too much both in pleasure and business, as you know a man can dissipate in business as well as pleasure. I doubt if we were all to live strictly as our physicians would have us, it would prolong life. With all the skill of the medical profession it seems as if they ought to accomplish this, but they have failed. They say we should eat this or that sparingly, we should not drink this or that, and yet we get weaker physically. Did you ever stop and think how much more reading we do than our forefathers? When I was a boy in school one of the punishments dealt out to me was being forced to get my lesson at home. Now what do you see? Young children taking home an armload of books every day, as the school hours have become too short to acquire their lessons in school. Might it not be just possible that present day people shorten their lives by too much use of the eyes? It looks reasonable to me, and when the stimulus is exhausted in one pair of nerves Peter robs Paul, and by so doing weakens certain organs which are essential to maintain life. With the amount of work thus forced upon us we must be in a normal condition, or there is a general breaking down, and if we have a refractive error the robbing process soon starts. You have all given prominent relief to some lady patient who informed you that she had regular sick headaches, and when they came on the only thing that gave her relief was lying down and putting a cold towel over her eyes. Now, was it the cold towel that relieved her? No! It was due to the fact that she could not see, and not being able to do so the third nerve stimulus soon built up and returned what it had borrowed, and when it was all returned the headache ceased. You stopped the robbery by a properly fitting lens which immediately gave relief.

It would be a very nice mathematical calculation, were it possible for us to compute nerve strain with figures. To be sure this can be accomplished as far as the figures are concerned, but do we all enter the world with the same amount of stimulus secreted? How many times will you find one patient with say 2.D of hypermetripia, who apparently suffers no exhaustion, while another with .50 diopter whose stimulus becomes exhausted in a few hours. It is accounted for only by the fact that one has a sufficient supply of stimulus while the other has not.

The case in question is one of chorea caused, as nearly all of them are, by nerve exhaustion, and as the supply becomes exhausted the robbery commences. I mistrusted in this case latent defects, and I was right in my judgment. For reasons best known to the patient, I was unable to induce him to have his eyes atropized, so I was forced by well known methods to develop the defect. I am not going to bore you with all of the "whys and wherefores" of this case, for had any of you come in contact with a parallel case, no doubt you would have accomplished the same results as I did, although your methods of procedure might have been different. I take notes from my prescription book: Vision, 20/20; internal, 10; external, 12; right superior and left inferior, 2; right inferior and left superior, 2. No refractive error developed with the fogging method. I spent considerable time trying to develop an error. On measuring the amplitude of accommodation I found the near point about 6½ inches, and as an emmetropia at his age should have been able to read the fine print at 4¼ inches, I drew the following conclusions: The curve of the wave on entering the eye at the point at which he *did* see was 6.50 M/C, and the curve of the wave from the point at which he *should* see would be 9.50 M/C. It demonstrated that he was 3.D. hypermetropia all latent. The fact that his adduction was lacking I ignored, as he had such nice convergence. This, however, ought to be taken into consideration, I admit. I prescribed a + 1 which gave vision of 20/60, and gradually developed the hypermetropia, and in a few weeks he was able to wear a +3. With these lenses I obtained practical results which were noticcable among his friends, still there was a great field for improvement. His face had ceased twitching and his tongue only partially protruded. I now tested the adduction and abduction, but with the same results. With Maddox rod I found 1° of exophoria. This I prescribed for and in a few days found I had developed 2° more, making a total of 3°, which I immediately prescribed, and his vision soon became about 20/20. A decided improvement took place in his appearance; he nearly always wore a smile, was agreeable to all with whom he came in contact, which was just the opposite of his former condition. He was formerly always in trouble, and many a boy can testify as to his temper. After he had worn the above correction, I tested his heart action with the most gratifying results. He could run 100

## Optical Department.

yards with no exhaustion and absolutely no palpitation of the heart, and I am told that he would work for days without making a noise. I submit his picture, taken about four months ago, showing how entirely different is his facial expression and his general appearance.

Before his eyes were corrected he was very careless in his dress, it being hard to induce him to make a decent appearance on the street, while of late he has been extremely careful in his dress, insisting on wearing better garments than he really could afford. In fact his whole character has changed. There were times when he would make a noise; he told me, however, that he could control it. I can testify to this, as I have heard him making considerable noise, but the moment he saw me he would cease it. He stated that when he saw me he thought of it, and as he had gained control of the facial organs he discontinued the noise.

In conclusion I wish to say that in your criticism of my paper and the manner in which I handled the case, remember it is hardly possible for two people to see things in the same light and I may have seen this case from an optical standpoint the way a gentleman judged "time" during the last holidays. He had been out with a few friends and had evidently imbibed a little too freely in "spirits frumenti," or some other intoxicant. He boarded an interurban car to go home and as the conductor came to collect the first fare he inquired how many miles it was from Minneapolis to St. Paul. He was politely informed by the ever obliging conductor that it was 10 miles. He sat in deep thought until the conductor came for the second fare, when he inquired how many miles it was from St. Paul to Minneapolis. The conductor thinking he was being imposed upon answered rather sarcastically, "I told you it was 10 miles from Minneapolis to St. Paul, and any fool ought to know it is 10 miles from St. Paul to Minneapolis." He heard the gentleman mumbling to himself, "Not necessarily. No, not necessarily; it's only one week from Christmas to New Year's, but it's more than a week from New Year's to Christmas." And they both were right, it all depending upon how you look at a case.

### The Insensibility of the Optic Nerve and Retina.

THE optic nerve and the retina are usually looked upon as being exquisitely delicate. When we think of the minuteness of the ethereal vibrations which produce vision, it seems marvelous that anything can exist so sensitively delicate as to be able to interpret these vibrations into visual perceptions; yet the retina accomplishes this with the aid, of course, of the optic nerve and the visual brain centers.

Recall having a nerve of a tooth exposed and a dentist touching it, and you will gain hereby a vivid idea of one kind of sensitiveness that most nerves possess, and one having only a superficial knowledge of nerves in general will be surprised at the following statement: The optic nerve and retina are totally insensible to pain. We can in the living subject touch, squeeze, cauterize, cut or entirely destroy the optic nerve without causing the least painful sensation, and it is thus insensible throughout its entire length.

In operating for cataract the needle has been passed to the bottom of the eye and the retina thereby irritated, but the only result was that the patient experienced an impression of flashes of light without the least sign of pain.

The insensibility of the optic nerve has also been repeatedly noted in surgical operations in which the nerve has been exposed.

A. H. Frandsen, Monmouth, Ill., has added an optical department.

### The Skiameter, its Advantages and Labor-Saving Qualities.

(Paper read by Herbert B. Wickins before the Buffalo Optical Society of Western New York, July 7, 1905.)

THE object of this paper is to explain the cross skiameter, its mechanical construction and labor-saving qualities. The instrument is binocular in form and similar in appearance to a pair of long-handled opera glasses. On the side of each tube is accurately marked the exact focal strength from zero to 6.D.

Back of each tube is an astigmatic dial, and just behind the dials are revolving disks containing a blank opening and three auxiliary spherical lenses of —1, —3, and —6. D. power. At the blank opening there are clips where the operator can add from his trial case any strength of lens required. The optical and mechanical principles of the instrument are very simple. They consist of two convex and two concave 7. D. cylindrical lenses mounted in cells with their axes at right angles to each other, thus creating the optical equivalent of two spherical lenses of + 7. D. and — 7. D. Each lens being slightly inclined on its axis from the perpendicular in order to prevent any reflection from entering either the patient's or the operator's eyes. The concave lenses are stationary, while the two convex lenses are movable, their cells sliding on rods and being controlled by a double cord, which is 40 inches in length. Thus we have from 0 to + 6. D. of spherical lens power in the tubes, and from — 1. D. to — 6. D. of spherical lens power in the revolving disks.

The pointers on the side of each tube show the kind and focal strength of the lens power used. These tubes revolve, thereby changing the axis of the cylinders. They also have small pointers for registering the exact degree. By a simple device the movable cells can be operated backward or forward, either together or separately, the locking and unlocking being accomplished by a slight side movement of the hand holding the cords. Thus through a mobile action any spherical or cylindrical lens power desired may be obtained with accuracy and precision.

The skiameter can be used for two distinct methods of shadow testing called "static" and "dynamic." When the "static" is used the instrument is arranged with a + 1. D. spherical lens. The refractionist holds his retinoscope 40 inches from the patient's eye, which distance is measured by the length of the cord attached to the instrument. The patient is requested to look over the examiner's shoulder at infinity, then the operator, by drawing the movable lenses outward, at the same time making a slow body movement with his mirror, will be enabled to obtain an exact correction of his patient's error in from 3 to 5 minutes of time, whereas, it takes much longer than this with a retinoscope and trial lenses.

The optometrist can use either the amplifying or fogging method. In correcting compound astigmatism, the operator notes the weakest meridian first and then the strongest. Or, after noting the weakest he can separate the cylinders and get the strongest cylindrical correction. The axis being secured by turning the tube to the proper meridianal degree.

The skiameter is also a practical substitute for drugs, producing an enlarged pupil without using a mydriatic, making it especially valuable in many cases where the astigmatism is irregular. The pupil is enlarged by drawing the tube lenses out. If necessary the pupil can be made still larger by rotating the auxiliary disk and causing artificial hypermetropia to be created. For proper corrections the minus is to be subtracted from the plus, or vice-versa. A plane mirror is the best kind to use with this instrument, in which case the shadow can then be said to be moving with motion in hypermetropia, and against motion in myopia.

In 1900, the inventor, Mr. A. Jay Cross, New York, while trying to improve his skiameter, discovered what he named the "dynamic" method, and which far excels the static method in its practical usefulness, especially so in cases of latent hypermetropia. The only change in the instrument made necessary for "dynamic" work is to neutralize the + 1. D. sphere in the tube lenses by a — 1. D. sphere of the revolving disk lenses. In operating the instrument, the patient is requested to look at a card placed on or near the operator's forehead, 40 inches away. In so doing it is known that a normal eye must be using at least 1. D. of accommodation and three degrees of convergence. A patient with latent hypermetropia under these conditions would be, of course, using 1. D. of accommodation and as much more as his total error called for. If the examiner advanced up to 20, 13, or 10 inches from the patient's eye, it will be seen that the normal accommodation, combined with the error, would call for a very great muscle tension. The adding of lens power by means of the binocular mobile action of the skiameter causes the accommodation to relax until it reaches the normal required for a perfect eye, the pointers on the tubes registering the full hypermetropia. All this being accomplished in a few minutes without distress or fatigue to the patient.

Two important points in both static and dynamic work are for the refractionist to know how to transpose his lens quantities quickly, and to read the action of his mirror with accuracy, which knowledge is gained only by practice and experience.

When you consider that the skiameter not only takes the place of drugs in enlarging the pupil, but that it also mechanically forces latent hypermetropia, or spasm, to relax, you can at once see its value to the refractionist. The skiameter and the retinoscope are the same to the skilled optometrist that the ophthalmoscope and mydriatics are to the oculist.

Any optician by careful study and practice can in a short time refract almost any error with the skiameter, no mater how complicated it may be, and do it with such ease and assurance that it affords much pleasure and satisfaction to both himself and his patient.

R. D. Springer, Duluth, Minn., recently had a narrow escape from being shocked by a live electric wire.

## Loving Cup Recently Presented to John H. Patterson, at Dayton, O.

A CITY of 100,000 people practically suspends business, decorates its buildings, sends a special train containing 100 citizens 40 miles to a neighboring city to greet a traveler returning home after a year's absence in touring around the world, escorts him through the principal business streets crowded with applauding people, presents to him a magnificent loving cup and 300 school children sing songs of welcome.

These conditions prevailed, according to the daily papers of that city, Monday, July 3, 1905, when John H. Patterson, president of the National Cash Register Co., Dayton, O., returned to his home. Mr. Patterson has never aspired to any public office or bid for public applause. He has, however, through philanthropic work and efforts to improve laboring conditions, won the esteem of his fellow townsmen.

The cup presented to Mr. Patterson is a splendid piece of silversmithing, which stands 16½ inches high, and is 15 inches wide, with a capacity of 27 pints. The ornamentation is modeled heavily and tastefully. The handles represent horns of plenty. The design is of a modern French character, and is thoroughly pleasing and artistic. The cup was designed and made by the Mauser Mfg. Co., New York, to the order of Anderton & Son, Dayton, O.

**T. B. HAGSTOZ, Ltd.,** Main Office, 709 Sansom St., Philadelphia, Pa.
SMELTERS, ASSAYERS, REFINERS.

[*Answers are also solicited from our readers to the questions published on this page.*]

QUESTION No. 1263.—**Construction of Pedometers.**—*What is a pedometer and how is it constructed? What is an odometer?* *R. A. B.*

ANSWER:—A pedometer is an instrument shaped similar to a watch, with a dial and one or several hands. It is intended to record the number of steps which an individual takes in covering a certain distance in a specified time. It is operated by a weighted lever lying in a horizontal position, pivoted at one end and kept in its normal position against the upper of two banking pins by a long curved spring so weak that the ordinary motion of the wearer's body causes the lever to continually oscillate between said banking pins. These oscillations turn by a mechanical contrivance, a ratchet wheel standing in connection with a number of wheels actuating the hands on the dial indicating the number of steps taken. A similar mechanism is also employed in the construction of a self-winding watch which is automatically wound by the motion of the wearer.

Odometers or hodometers are similar instruments, by means of which the distance traveled by a carriage or other vehicle is registered. In the case of a carriage it is usually a train of wheelwork attached to the axle and one of the wheels to the carriage. It registers the number of revolutions of the wheels of the carriage. This number is indicated by an index on a dial. A similar instrument, called a cyclometer which can be attached to a bicycle or tricycle is familiar to all.

QUESTION No. 1264.—**To Oxidize Brass.**—*Kindly give me a receipt for oxidizing brass, such as a brass watch chain.* *R. H. F.*

ANSWER:—Powder salammoniac and moisten with distilled or rain water, and apply the paste to the metal and then rub dry with bran or whiting; or wash the brass with rock alum boiled in strong lye in the proportion of one ounce to one pint. When dry rub or brush with tripoli. Either of these receipts will give brass the brilliancy of gold.

QUESTION No. 1265.—**To Temper Brittannia Metal.**—*Will you kindly inform me as to the best method for tempering Brittannia metal?* *Z. L.*

ANSWER:—Mix the component proportion of tin with a proportion of nickel, or increase the proportion of tin in the quantity of brass used.

QUESTION No. 1266.—**Lacquer for Silver Plated Ware.**—*Kindly give me a formula for lacquer for silver plated ware?* *C. W. W.*

ANSWER:—The only lacquer suitable for silver-plated ware is collodion, which is also extensively used by photographers. This lacquer is made of sulphuric ether and gun cotton. It is colorless and transparent and will not discolor the surface of silver plated ware.

QUESTION No. 1267.—**Soft Metal Turning Tools.**—*What shaped tools are best for turning Britannia objects? I have tried the diamond shaped, such as are used for brass, but they will not work well.* *T. A.*

ANSWER:—The best shaped turning tools for turning Britannia are made of machinist's scrapers, these are from one-half to one inch wide and one eighth to 3/16 of an inch in thickness, and are ground square on the ends. The shank is inserted in a handle about 12 inches long. Brittania cuts best and smoothest with the corners of the tool. For inside turning, of hollow ware, a template, 1-16-inch thick, and shaped to apply to the inside of the object to be turned, is fastened to a handle. This is also ground so the corners will do the cutting, or rather shaving off of the surface. After the metal is turned smooth and into the shape desired, the object is burnished, with soap and water, with a smooth steel burnishing tool.

QUESTION No. 1268.—**Loss of Metal in Dross.**—*How much per cent. loss is sustained in melting tin?* *E. T.*

ANSWER:—The loss of tin in melting is about three per cent. It depends upon the amount of stirring done, the more stirring and mixing the greater the loss.

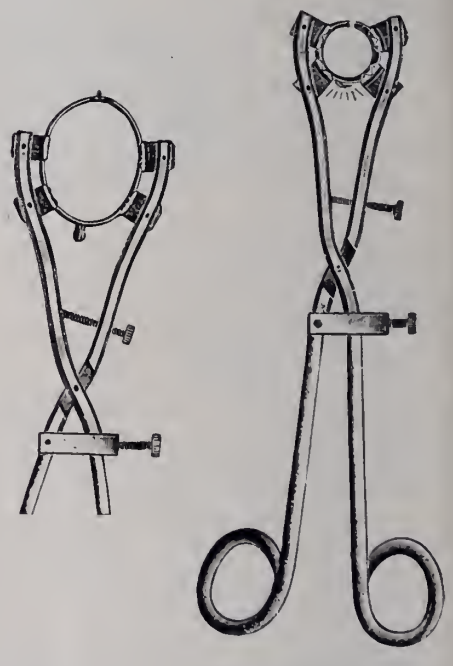
QUESTION No. 1269.—**Tinning Brass Rods.**—*How can I tin some brass wire rods?* *H. E. L.*

ANSWER:—Dip the brass so it will be chemically clean, then dip the pieces into soldering acid, and after this into molten tin and wipe off with a cloth before it becomes hard.

## General Hints on Stripping Gold and Silver.

(*Continued from issue of July 12.*)

*To Strip Watch Movements.*—To strip the gold from old watch movements, etc., first of all remove all screws, springs and steel parts, then cover the articles with a paste made of two parts of sulphur to one part of sal-ammoniac in vinegar, anneal in charcoal fire, and plunge into water acidulated with sulphuric acid, to be left therein for several hours, and before removing brush with a soft wire scratch-brush, when the gold will become loosened, and assume the shape of fine scales.



The water is then filtered, the remaining gold washed to remove all the acid, dried, some finely powdered borax and saltpeter of equal quantities added, and melted along with the filter, which will produce a button of solid gold.

*To Strip Old English Watches.*—Instances have been known where as much as two pennyweights of gold have been scraped from the different parts of an English watch movement of ancient manufacture, but such cases have been rare. In olden times such fine and costly watches were made by hand and mostly to order.

In fire gilding the quantity of gold deposited was tangible and hardly considered, but in later years, when the quantity of watches manufactured represented a commercial item the gilding was economically done, and any engraver who tried to strip the gilding from such watches would not find the operation satisfactory, and we would consider any speculation in this direction as unprofitable.

## Holders for Hard Soldering.

TO devise simple methods of hard soldering has been a task which has been tried repeatedly, says the *Leipziger Uhrmacher Zeitung*. The inventions have been frequently amended and improved, and the accompanying illustrations suggest a method which has been tried and approved for certain purposes. It has long been admitted that the fastening of objects to be soldered on pieces of charcoal has its drawbacks both as to defective workmanship and waste of time.

The tools shown herewith are jointed holders, which are fitted with jaws of asbestos and a most substantial ring can be soldered in this way without removing some of the jewels, and a band, such as the setting of an eyeglass, may be soldered with gold without any inconvenience.

# AN AGE OF METAL

THIS IS AN AGE of metal. The goldsmith and the silversmith will confirm this statement. Metal is supreme also in the industrial arts, no less than in the fine arts. In short, metal is everywhere the basis of *permanency*, and the medium of *artistic expression.*

The jeweler is more interested in artistic expression than in mere utility, though both may be combined. Above all, his goods must be *impressive.* These impressive creations are all wrought from a metal basis, of one sort or another. Thus, we say, "This is a Metal Age."

Fortunately, the metals available are wonderfully numerous, and wonderfully capable of artistic manipulation. Marble and bronze seem to have been created for the chisel of the sculptor. Antique brasses, hammered and burnished copper, yield to the touch of the inventive modeler. Lamps and electroliers shine forth the possibilities of light and color in every tint and shade.

A wide range of styles and finish in these achievements are now on exhibition in our warerooms.

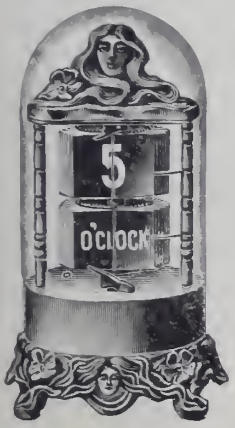
## THE RAMBLER'S NOTES.

WHAT THE RAMBLER SAW AND HEARD AMONG THE DEALERS IN ART POTTERY, CUT GLASS, BRONZES, ETC.

ART NOVELTIES IN POTTERY, BRONZE AND GLASS.



SINCE the removal of L. W. Levy & Co. to their new salesrooms at 580 Broadway, New York, they have fitted up their quarters so conveniently that buyers will be much pleased at the many facilities offered when they call to inspect the lines.

The concern occupies an entire well-lighted floor, 50 x 200 feet, on which the wares are shown to much advantage on long rows of tables, in cases and on shelves, about which the visitor may move, readily making his selections. One of the new lines comprises vases, jardinieres, fern dishes and other products in glass, mounted in bronze and brass. France, Austria and Germany were searched diligently by the firm's buyers in getting together this fine collection in which there is a wide variety. Another line that will attract attention is the gold-engraved glassware from Bohemia, in which will be found berry sets, punch sets, ice cream sets, bon bons, olive dishes, vases, smokers' articles and other articles. The glass is engraved, after which the gold is applied, and in some patterns, colors are added to represent fruits and flowers. The designs are neat and attractive, and the buyer looking for pleasing novelties will find it difficult to pass by these tables without placing an order.

*

NOVEL CLOCKS IN NEW STYLES.

AMONG the new patterns in "Plato" clocks, now being sold by the American Electrical Novelty Co., New York, one of the most pleasing is that depicted in the illustration herewith. The hours are shown by the upper set of plates and the minutes by the lower set. The word o'clock will be succeeded by the figure "1" at exactly one minute past the hour, and thereafter the figure changes every minute until the next hour arrives when the upper plate also changes. The clock is mounted on an ornamental base, and above the movement is an attractive female head, all parts above the base being enclosed in a glass case. While the mechanical part of all these clocks is similar, the variations in the cases and mountings is greater than ever, styles to fit all tastes now being shown.

*

RICH ASSORTMENT OF CARVED GLASS.

CARVED glass ware, in the styles which have of late been introduced to the trade by the Cristalleries de Baccarat, has met with much favor. Paul Durand, the American representative of this company is now in Europe arranging for the shipment of additional lines and new patterns in the same class of goods. The salesrooms at 43 W. 4th St., New York, already show a fine assortment of this ware. Its resemblance to rock crystal effects is evident, but the difference lies in the fact that in the carved ware the glass is of greater thickness and the cuttings deeper than in ordinary engraved glass. All the work of cutting is done, it is explained, with small oiled copper wheels of the same kind as are regularly used in engraving. To make the deep cuts and broad effects as well as the intricate and fine patterns, with these wheels, requires a high degree of skill on the part of the workman. The patterns include apples, pears, strawberries, cherries, grapes and other fruit, with leaves and vines. So cleverly have the engravers labored that the details of the designs are worked out in a surprisingly realistic manner; as an instance, when you look at the strawberries you see tiny dots to represent the seeds. In this ware are made punch sets, footed and other bowls, nappies, vases, decanters and a large variety of stem ware. Some of the patterns are shown not only in the white crystal, but also in colored glass. While sales are generally made for import, there are a few duplicates in stock.

## High Prices for Sevres China.

THE following items were among the treasures of the late Dowager Duchess of Abercorn, which were sold on June 18th: A tea service of turquoise Sèvres decorated with cartels, in which are painted colored roses by Neol, dated 1769. The service which consisted of an 11 in. ovai tray, two cups and saucers, a teapot, and a sucrier, fetched £305. An ecuelle and cover in turquoise-blue Sèvres, 65gns. Another, in turquoise-blue Sèvres porcelain, with gold ornamentation, painted with exotic birds in cartels, £700.

Other prices were £185 for a tea-set, £330 for a second, £199 for a two-handled cup and cover, £63 for a cup and saucer, all of Sèvres porcelain; a rose water ewer and cover of white Sèvres, standing 7½ in. high, with a deep oval bowl, 11 in. wide, fetched £735. After 220gns. had been given for an ecuelle and 250gns. for another, the auctioneer submitted an oval-shaped tureen, with pierced border, and a cover and its square pedestal, of *Bleu du Roi* and White Sèvres porcelain, gold ornamented, and painted with flowers by H. Provost, and mounted with fine chiseled ormolu (the whole 16 in. high). This found a purchaser at £1,400.

Later £735gns. was given for a shaped ewer, with its oval, deep stand of turquoise *Bleu du Roi* Sèvres porcelain, covered with a decoration of gold and painted with cartels, displaying detached flowers and fruit, letter dated 1755. Another, similarly described, brought 375gns.; a tea service of *Bleu du Roi* Sèvres 380gns.; the 17th century rock crystal ewer £100, and a Louis XV. *étui* £105.—*Pottery Gazette.*

A. D. Ralph, who recently purchased the stock belonging to Mrs. C. F. Stone, Machias, Me., began a sale of the same last week.

## Recent Reappraisements of Decorated China.

Cloisonne ware from Kaitsu Gomei Kwaisha, Yokohama, exported May 12, 1905, entered at Portland (File No. 35809); findings of Howell, G. A.: 2 pieces, vase, 36, entered at 6.50, advanced to 9.75 yen each; 4 pieces, do., 38, entered at 2.25, advanced to 3.375 yen each; 5 pieces, do., entered at 1.50, advanced to 2.25 yen each; 10 pieces, do., 41; entered at .85, advanced to 1.25 yen each; 8 pieces, do., 40, entered at 1, advanced to 1.50 yen each;, 3 pieces, do., 37, entered at 3.50, advanced to 5.25 yen each. Add cases.

Decorated china, etc., from Carlo Rodolfo Subert, Milan, exported Nov. 14, 1904, entered at New York (File No. 33779); findings of Sharretts, G. A.: 2 cappe capodimontes, entered at 250 lire for both, no advance; 7 piatti, entered at 80 lire, advanced to 140 lire for all; 1 mobile a pancia, entered at 60, advanced to 120 lire; 1 sofa intarsiatia, entered at 80, advanced to 275 lire.

Decorated china from Gebr, Paris, Huttensteinach, exported Dec. 24, 1904, entered at San Francisco (File No. 34611); findings of Howell, G. A.: Entered at discount of 15 per cent. Add case. No advance.

## The Rarity of Porcelain.

TO ask a number of collectors what is the rarest of European porcelains would probably be to fling the apple of discord into what should be a placid atmosphere, said an evening paper recently. It is probable, however, that in point of sheer curiosity, as distinct from quality, the Flemish porcelain of Terveureu would be a strong candidate for first place. The pottery was a purely private concern, founded by Charles of Lorraine, Governor of the Low Countries, early in the 18th century, in his own château, at a time when nearly all European sovereigns were founding schools of porcelain of their own, like Maria Theresa in Vienna, Louis XV. at Sèvres, and the Saxon kings of Dresden.

Charles kept everything of rich merit that came from the Terveureu ovens for his own collection, and when, at his death, the factory was closed, and his collection was dispersed, there were about fifty pieces of Terveureu. How many exist to-day?

## AMERICAN ARTISTS' WORK IN ECCLESIASTICAL GOLDWARE.

ALMOST chaste and artistically wrought golden ecclesiastical piece, which was viewed with admiration by goldsmiths, skilled jewelry workmen and the trade in general, was displayed, recently, in a show window of J. E. Caldwell & Co., 902 Chestnut St., Philadelphia. It was one of the sacred vessels used in the celebration of the mass in the Catholic Church, an ostensorium, or monstrance, 39 inches high and 18 inches in diameter at the sunburst.

It is the rare dignity of the piece, its total freedom from any suggestion of unnecessary elaboration of detail or extravagance of design, that makes it a fine example of the 20th century goldsmith's art and which has won from the clergymen of the archdiocese warm words of praise for the jewelers. No expense was spared, nor effort lost to make the ostensorium a notable piece. J. E. Caldwell & Co.'s artisans were at work upon it three months before it was fully completed and presented to the Church of the Epiphany, 12th and Jackson Sts., Philadelphia.

Like many other ecclesiastical pieces recently made for the Catholic Church this ostensorium was fashioned from trinkets, old family heirlooms and discarded pieces of jewelry contributed for the purpose by the parishioners, so that besides its intrinsic and artistic value, it is made almost invaluable to the congregation of the church by the sentimental interest which attaches to it. For the making of the ostensorium the Rev. William J. McMahon collected pieces of jewelry from tiny infants' gold bands to wedding rings, necklaces, watch fobs, chains, heavy chains, bracelets and the like.

The ostensorium is Gothic in design, and is richly chased with a circular design of cherubs heads around the center. The whole piece is made exclusively of gold, but the unette is of pure 24-karat gold. The triple rays of the sunburst are also of gold. A heavy gold cross surmounts the ostensorium. It is given an added brilliancy by five beautiful gems of golden topaz.

GOLD OSTENSORIUM MADE OF VOTIVE OFFERINGS.

This piece is only one of a number of ecclesiastical pieces, which have been made by jewelers of Philadelphia. Z. J. Pequignot has made several similar jewels, some of which have been wrought out of heirlooms. Peter Schmidt, a well-known German artisan, has also made several ecclesiastical pieces which have been described in THE CIRCULAR-WEEKLY.

### Some New Fashions in Jewelry.

STONES of the semi-precious order are used in many charming designs for pendants, bracelets and the like. The aqua-marine, the peridot and tourmaline are in high favor. Pretty slender gold necklets have long, drop stones of aquamarine.

The very fashionable gem and chain bracelets come in about half-inch flat effects, with oval or square cut stones closely spacing a couple of slender chains. There are unnumbered variations of this style. Squares, or ovals of gold arabesque are also used in somewhat similar manner.

The chain fashion runs side by side with the bracelet fashion. Long double chains are closely spaced with some one stone, giving a wonderfully decorative effect. Gems set in odd arabesques of gold are connected with golden chains into the required length.

Very handsome are the diamond collarettes in leaf and flower patterns, or in fancy bar designs.

# KEEP YOURSELF POSTED

about the watch-case business. Your customers expect you to know what's what. Incidentally, do you know that the **"Wadsworth Permanent"** challenges comparison for style and absolute durability? If "looks" count with you, you'll find good looks here—genuine "face values." And for permanency our cases are built on honor.

We don't expect to take all the money there is in the watch-case business. A reasonable profit based on cost is all we look for. No fancy prices. No paying for names. Don't pay for names. You're buying filled cases; buy them on their merits, using your own judgment. To your best judgment we commend our **"Permanent"** cases. Just investigate. There's business in it.

# "If It Burns Alcohol, We Make It."

Everyone who uses the Sternau Coffee Machine is happy, and begins the daily routine of work in a frame of mind that is "at peace with all the world."

Don't have to go back to the old coffee pot with Sternau's Machine, because of broken globes —the globes are interchangeable.

Poorly made coffee affects the temperament of every business man.

You no doubt appreciate the fact that a new article to be successful must be advertised.

Your customers know that you are a jeweler, but probably will not recall that you sell a new line of coffee machines.

It is necessary that you let them know this in order to sell the coffee machine. We have produced a good coffee maker, practical as well as ornamental, and you will find a ready sale for it.

We will assist you by furnishing you with cuts similar to those shown on this page.

## S. Sternau & Co.

MANUFACTURERS,

NEW YORK SHOWROOMS:
Broadway Cor. Park Place, Opposite Post Office.

OFFICE AND FACTORY:
195 Plymouth Street, Brooklyn, N. Y.

The noble Turk, the swarthy Arab and the indolent Mexican, long ago recognized the many excellent qualities of coffee. To them the Sternau Machine is a boon.

Nothing is more appropriate for a present than a Sternau Coffee Machine.

Coffee made in the Sternau Coffee Machine is an after-dinner luxury.

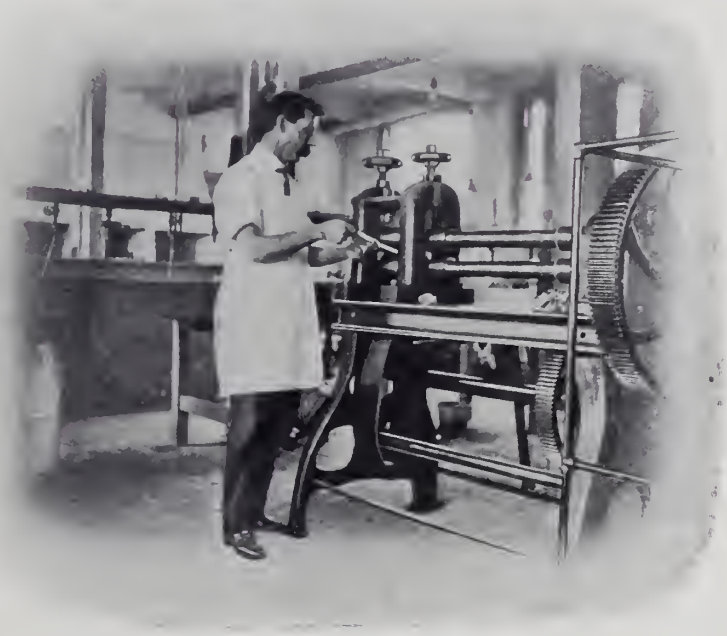
Varna: 8 packages engravers' material, $1,400.

Vera Cruz: 2 packages cutlery, $100.

---

Julius Selinger's new store at 820 F St., Washington, D. C., to which he moved a couple of weeks ago, is handsome, commodious and fully equipped. There are convenient departments for the optical business, watch and clock repairing and other lines.



An attractive and comprehensive catalogue, of especial interest to opticians, has recently been issued by the F. W. Gesswein Co., 39 John St., New York. The tools and supplies used by the optical trade to which it is exclusively devoted are presented in handsome illustrations, and the accompanying text describes the articles concisely and accurately, prices and terms being given. The catalogue comprises more than 50 pages, and is neatly printed and bound in red paper covers. A complete index of four pages will be found a valuable feature. The trade will be especially pleased to note that in this booklet, instead of presenting a portion of their optical tools and supplies, in connection with those of jewelers and others the company describes practically everything that can be desired by the optician in his work.

ILLUSTRATED SERIAL STORY OF

# Modern Ring Making

Life Studies of Larter Workmen

ILLUSTRATION NUMBER FOUR

THE METAL WORKER.

¶ Having the quality of gold desired, the fourth step of ring making is to work the gold to the proper thickness.

¶ Great care is necessary to do this so that the pattern may be brought out and give the ring proper weight.

¶ Powerful rolls help toward this end, so that when finished, all Larter Rings are properly proportioned and correct in weight.

¶ Retail Jewelers who have sold Larter Rings for years, will agree that we know how to make them.

# SPECIALTIES

• • • •

IT IS OFTEN WISE for a firm to limit itself to lines for which it has special facilities, and which prove most satisfactory to itself and its customers.

• •

For example, this firm does not make everything. It does not make rings. It does not make lockets. It does not make watch cases. There are a number of lines that are left to other manufacturers.

• •

But the lines we do make are artistically conceived and well made. Especially do our Vermicilli Decorations merit attention. There is a delicacy of arrangement and perfection of color that distinguish them from all other makes.

• •

We have distinctive showings in Hat Pins, Scarf Pins, Barettes, Back and Side Combs, Brooches, Waist Brooches, Waist Pins, Link Buttons, Studs, etc.

• • • •

## Customs Decisions on Jewelry, Precious Stones and Kindred Lines.

Decisions by the Board of United States General Appraisers, New York, in cases involving the duty on jewelry, precious stones and imitations, lenses and other products, were published, recently, by the Treasury Department as follows:

UNFINISHED FOBS—PARTS OF JEWELRY. Protests of Albert Lorsch & Co. against the assessment of duty by the Collector of Customs at New York. The articles covered by these protests consist of unfinished metal fobs composed of brass, being designed to be plated with gold, silver, or nickel, and being sold almost entirely to manufacturing jewelers. When finished they are commonly known as jewelry. The Board upheld the action of the collector in assessing the articles as parts of jewelry unfinished under Par. 434, Tariff Act of 1897.

KEYSTONES—PRECIOUS STONES DRILLED—GOLDSTONES—HALF PEARLS.—Protests of Rud. C. Hahn *et al.* against the assessment of duty by the Collector of Customs at New York. Protests sustained on the authority of G. A. 5,914 (T. D. 26,013), G. A. 5,915 (T. D. 26,014), and G. A. 6,089 (T. D. 26,-655), the merchandise being keystones of agate or onyx, precious stones drilled through, goldstones less than an inch in dimensions, and half pearls.

GOLDSTONES—JEWELRY SETTINGS. — Protests of Rud. C. Hahn & Co. against the assessment of duty by the Collector of Customs at New York. G. A. 6,089 (T. D. 26,-555) and G. A. 6,097 (T. D. 26,586) followed, relating to goldstones and jewelry settings.

IMITATION PEARLS, STRUNG.—Protest of Jas. E. Caldwell & Co. against the assessment of duty by the Collector of Customs at Philadelphia. Following G. A. 6,088 (T. D. 26,554), the Board held imitation pearls pierced and threaded to be dutiable as manufactures of paste under Par. 112, Tariff Act of 1897. This contention not having been made by the importers, the protest was overruled.

IMITATION PEARLS.—Protests of Albert Lorsch & Co. *et al.* against the assessment of duty by the Collector of Customs at the port of New York.

Same as American Express Co., above.

LENSES — IMITATION ROCK CRYSTAL.—Protests of Leo Popper & Sons against the assessment of duty by the Collector of Customs at the Port of New York. Protests sustained on the authority of G. A. 5,841 (T. D. 25,760), relating to imitation rock-crystal lenses.

LENSES—IMITATION PRECIOUS STONES.—Protests of Leo Popper & Sons. Same as protest of Leo Popper & Sons, above.

LENSES—IMITATION PRECIOUS STONES—STRUNG BEADS.—Protest of Leo Popper & Sons against the assessment of duty by the Collector of Customs at New York. The Board held certain strung beads to have been properly classified as manufactures of paste under Par. 112, Tariff Act of 1897, but sustained the importers' contention as to certain lenses composed of imitation rock crystal, which were held to be dutiable as imitation precious stones under Par. 435, on the authority of G. A. 5841 (T. D. 25,760).

GOLDSTONES — PRECIOUS STONES—ROCK-CRYSTAL BALLS.—Protest of Rud. C. Hahn & Co. against the assessment of duty by the Collector of Customs at New York. Protest sustained on the authority of G. A. 6,089 (T. D. 26,555) and G. A. 5,915 (T. D. 26,014), relating to goldstones and rock-crystal balls.

DRILLED OPALS.—Protest of Marcus & Co. against the assessment of duty by the Collector of Customs at New York. On the authority of G. A. 6,097 (T. D. 26,586), the Board held that certain opal beads, drilled through and ready for use in the manufacture of jewlery, were dutiable as precious stones cut but not set under Par. 435, Tariff Act of 1897.

IMITATION PEARLS.—Protest of Bruhl Brothers & Co. against the assessment of duty by the Collector of Customs at Providence. G. A. 6,088 (T. D. 26,554) followed, relating to imitation pearls.

IMITATION PEARLS.—Protest of American Express Co. against the assessment of duty by the Collector of Customs at New York. Same as protest of Bruhl Bros. & Co.

IMITATION PEARLS.—Protests of Overton & Co. against the assessment of duty by Collector of Customs at New York. Same as protest of Bruhl Bros. & Co.

GOLDSTONES.—Protest of Leeder & Bern-

kopf against the assessment of duty by the Collector of Customs at Providence. On the authority of G. A. 6089 (T. D. 26,555), the Board sustained the importers' contention that certain goldstones were dutiable under Par. 435, Tariff Act of 1897.

IMITATION PEARLS.—Protest of American Express Co. against the assessment of duty by the Collector of Customs at New York. G. A. 6,088 (T. D. 26,554) followed, relating to imitation pearls.

IMITATION PEARLS—HALF PEARLS.—Protests of A. Henius against the assessment of duty by the Collector of Customs of Providence. G. A. 6,088 (T. D. 26,554) and G. A. 5,914 (T. D. 26,013) followed, relating to imitation pearls and half pearls.

IMITATION PEARLS—HALF PEARLS.—Protests of Nordlinger & Mamluck against the assessment of duty by the Collector at New York. Same as A. Henius, above.

HALF PEARLS—JEWELRY SETTINGS.—Protest of Albert Lorsch & Co. against the assessment of duty by the Collector of Customs at New York. G. A. 5,915 (T. D. 26,014) and G. A. 5,914 followed, relating to onyx settings and half pearls.

## Interesting Exhibits of Jewelry and Plate to be Shown at the Toronto Industrial Exhibition.

TORONTO, Can., Aug. 11.—The collection of British art treasures and antique specimens of plate and jewelry to be shown at the Toronto Industrial Exhibition, was made under the personal supervision of Sir C. Purdon Clarke, director of the South Kensington Museum, and comprises articles dating from the Saxon or early Romanesque period down to within the last century and a half. The entire collection requires 24 large packing cases for its transportation. The following are a few of the most noteworthy pieces either on account of their artistic merits or their historic associations:

Hour-glass salt, a highly elaborate piece of work presented in 1493 to New College, Oxford. Height, 14½ inches, and diameter, five inches. It is silver-gilt with pyramidal cover, the stem being of hour-glass shape with spirally twisted flutes.

Anathema cup, 1481-82, from Pembroke College, Cambridge. A plain standing cup of silver-gilt, on a stem with a narrow band of Gothic ornamentation about the foot.

The Gloucester candlestick, *circa* 1,110 white metal gilt, with a round stem and a triangular base of very quaint design, and covered with Latin inscriptions. One of these sets forth that it was the gift of Abbot Peter to the Abbey Church of St. Peter, Gloucester. Its height is 23 inches.

The Wassail hour from Queen's College, Oxford, a 14th century relic, is a buffalo's horn, the rim of which is encircled by a silver-gilt mounting two and a half inches deep, and has two similar bands lower down resting on birds-claw feet. The word "waccey" is engraved on each band in Gothic characters. It is of English workmanship and is 19½ inches high.

The giant salt, 15th century, from All Souls College, Oxford, is formed of a circular facetted crystal in silver-gilt mounts, with a cover of cut glass, dome on the head of a huntsman.

The Valence Mary cup from Pembroke college belongs to the same period. It displays diagonal bands of elaborately executed repousse work and bears the arms of Humphrey, Duke of Gloucester. It was left by the Countess of Richmond, mother of King Henry VII, to Pembroke College, at her death in 1500.

Mercer's Hall, London, contributes the Leigh cup, 16 inches in height by a diameter of six and a half inches. It is ornamented with crossed bands, the divisions formed by which displaying alternate maidens' heads and flagons. On the corner are the arms of the city of London and the guild, the whole surmounted by a maiden holding a unicorn in her lap. A quaint metrical inscription indicates that it was presented by Sir. Thomas Leigh.

The ecclesiastical plate includes some specimens of Gothic chalices, only a very few of which are extant owing to their wholesale destruction by the Puritans. One of them was given by Bishop Cox to the College of Corpus Christi in 1507, and another dating 20 years later was the gift of Sir Thomas Pope to Trinity College, Oxford. Much interest also attaches to what are known as the Apostles' spoons, dated

about 1566, which were given by Archbishop Parker to Corpus Christi College, Cambridge. They bear the image of the Virgin Mary at the end of the handle. Other treasures given by the same Archbishop to the college consist of metal cups, tankards, etc., of handsome design.

A notable piece is the tankard called the "Roison" cup, dated 1570, contributed by Clare College, Cambridge, which is remarkably elaborate workmanship. The cup is mounted in silver-gilt and the drum enclosed in a filigree wire casing, the whole resting on three cherubs' heads. Its height is seven inches. Another fine tankard is furnished from the Ashmolean Museum, Oxford, and dated 1574. It is of silver-gilt, with straight sides tapering to the top and decorated with belts of egg and tongue ornamentation.

From the Tower of London is sent a portion of the crown regalia of Charles II, which strikingly illustrates the luxury of the period and the perfection to which the silversmith's art had attained. The most famous of these is the Royal Oak cup, dated 1676, given by King Charles to the Barber Surgeons' Co. It is in the form of an oak trunk, the branches and leaves covering the bowl on which are four shields bearing arms and inscriptions and four hanging acorns. The cover, displaying four shields of arms, is surmounted by a crown with orb and cross. It stands 18 inches high. The Pepys cup, dated 1677, 28 inches high, from Clothworkers' Hall, has a bowl enclosed with a casing of ornate pierced flower and scroll work, enclosing griffins and displaying a teazle and a ram. The foot shows the arms and crest of the noted diarist.

The Irish tankard, 1680, from Merchant Tailors' Hall, London, shows the head of John the Baptist in a charger, on the cover. Some ancient wine fountains, cisterns and punch bowls from Vintner's Hall, London, are notable as having been made for the great Duke of Marlborough.

The pieces representing ancient classic art include the golden candlestick from the Arch of Titus, and replicas of relics found at Thebes in gold and ivory, dating back 1500 years before the Christian era. The relics in pottery and porcelain include many vases of Greek and Roman origin, and some beautiful specimens of Etruscan and Samian ware. European decorative art of the middle ages is also very fully represented in this collection, which far surpasses in interest any similar display as yet atttmpted in this country.

---

The store of W. T. Oates, 508 W. 9th St., Little Rock, Ark., was entered by a negro, one morning recently, and robbed of $100 in collar buttons, pins, chains and other small articles. The thief forced an entrance through a rear window and escaped with the booty.

The jewelry stock of D. D. Shane, Grand Ledge, Mich., was partially destroyed by a fire which broke out a short time ago. The flames were due to the explosion of a gasolene lamp in the optical room, and spread so rapidly that in 10 minutes they had made a wreck of the place. Shane carried a stock valued at $10,000 and was insured for $2,000.

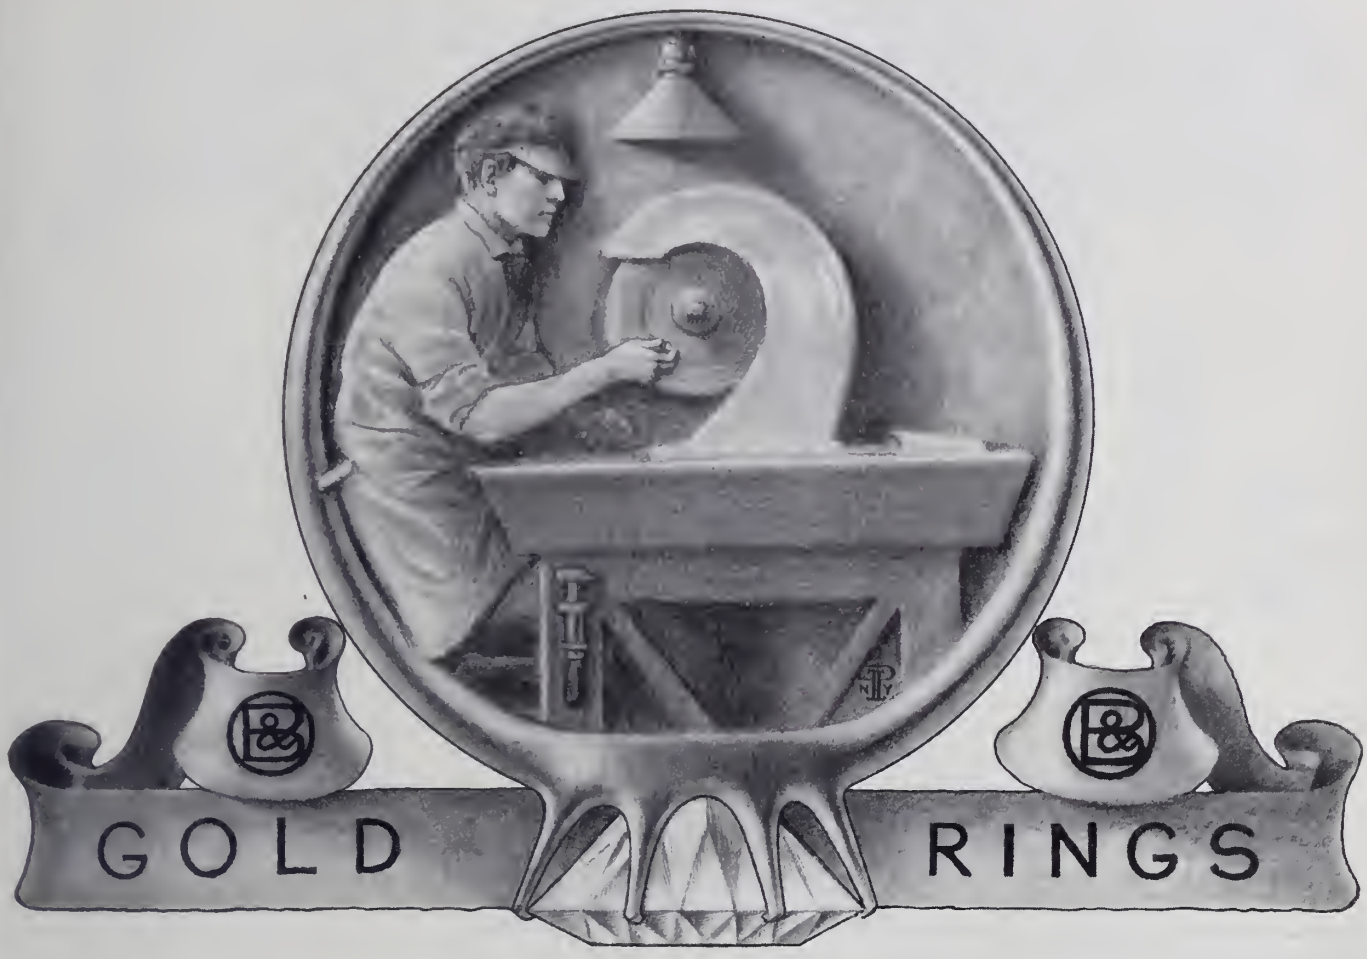
### Important Customs Decisions by United States General Appraisers.

Millinery cases, in which a question was involved as to what constitutes jewelry, were decided last week by the Board of General Appraisers, New York. The test came on the appeal of Samuel Schiff Co., and several hundred other protests depended upon its disposition. The Board decided that the Schiff ornaments were similar to the merchandise upon which the Board passed in a previous case that had been carried to the courts, and decided in favor of the importers. The collector assessed duty at 60 per cent. on the Schiff imports, classifying the merchandise under Par. 434 as jewelry. The contention of the importer was that the ornaments were dutiable at 45 per cent., under Par. 112 or 193, as manufactures, according to the component material of chief value. The Board agrees with the importers so that all the millinery cases will be decided accordingly.

The protest of G. Veeck, in relation to drilled opal balls, was sustained by the Board. The collector assessed duty under Par. 408, relating to beads, at 35 per cent. The contention of the importers which was sustained by the Board was that the duty should be 10 per cent. under Par. 435. The decision followed precedents.



Bort or diamond dies imported by Pitt & Scott, Ltd., was assessed at 10 per cent. under Par. 435 by the collector. The importers protested, claiming that the merchandise should be free. The Board sustained the protest, holding that the dies were similar to the merchandise involved in the case of the American Express Co., decided in favor of the importers. The Treasury Department had acquiesced in this decision.

Hordlinger & Mamluck's appeal from an assessment of 45 per cent. on an importation of imitation pearls, made of paste, was also sustained. The duty was fixed at 20 per cent., under Par. 435, in accordance with precedent.

### Death of Albert Comstock.

Albert Comstock, a customs lawyer, who was widely known to the wholesale jewelry trade of New York, died last Thursday, at his Summer home near Rangers Island, Lake George. He was in his 46th year.

Mr. Comstock was in early life a clerk in the Custom House, and his talent for grasping the distinctions in the Custom statutes and their application led him to apply himself to the study of law. He left the custom service to practice the profession and from the first his unusual ability was made manifest to the importers. One of his most important legal battles was in behalf of the principle that imports shall not be classified under an "omnibus" clause of the Tariff Law, if the similitude clause may reasonably be applied. The courts and the Treasury Department finally acquiesced in this view as a result of which a number of decisions followed in favor of the importers of precious stones and pearls. New questions concerning duties on pearls and half pearls came up subsequently and he took an active share in the cases as they arose. In 1895 Mr. Comstock established his home at Montclair, N. J. For several years he had

ISN'T it interesting to watch the evolution of an O. & B. Ring from a crude piece of gold? While our factory is equipped with every modern machine, every useful device necessary to manufacture our product—it requires time—yes, quite a deal of time, before the completed article is ready for the Jobber's inspection.

The Jobber, of course, has a different story to tell, and saves time through the excellence of our product. Our unlimited assortment of new designs makes his end a simple matter. If you want business this fall—Ring business—sell the O. & B. product.

been ill, and in January last he submitted to an operation for cancer. He was a member of the Montclair Club and the Outlook Club. His widow, who was before her marriage Miss Caroline Ranger, of Glen Falls, N. Y., and two daughters survive. The funeral took place from his late residence Sunday afternoon.

### Thieves Steal a Tray of Diamond Rings in Broad Daylight.

TORONTO, Ont., Aug. 9.—A most daring robbery was committed at the jewelry store of J. S. Smith, St. Paul St., St. Catharines, Ont., on Saturday. On the morning of that day two strangers entered the store and asked a young lady clerk to show them some gold chains. One of them fastened a chain in his buttonhole to get the opinion of the other as to how it looked and shortly afterward they left the store, the clerk not noticing that the chain had been retained.

During the afternoon two other strangers came in during Mr. Smith's absence and were waited upon by a young lady and an apprentice. When Mr. Smith returned he discovered that a tray of 56 diamond rings, valued at $1,650, had been taken from the show case, by reaching over and opening the door at the back of the case. The clerks state that they kept a close watch on the movements of the men while they were showing the stock and believe that a confederate must have slipped into the store and committed the robbery while they were engaged with the others.

Two men, one of whom is believed from the description to have been the man who got away with the gold chain in the morning, hired a "rig" in the neighborhood in the afternoon and were driven to Niagara Falls where they disappeared. The opinion of the police is that they had the diamonds.

The description of the two men who were driven to Niagara Falls is as follows:

The first was about five feet, 10 in. tall, weighed about 170 pounds, was thick set and had a prominent roman nose, light moustache and medium complexion; wore a rather loud blue bow tie, black slouch hat, and dark grey check suit of fine material.

The second was a little taller and slimmer than the first and wore grey clothes, somewhat lighter than the other, with cap to match. He was clean shaven.

The description of these two would conform with that of the two men who stole the watch chain in the morning. The two men who were in the store in the afternoon, Miss Upper describes as follows:

The first was five feet 10 in. tall, and had a dark complexion. He wore a christie hat, and a dark blue serge suit. He was about 35 or 40 years of age, and had a scar across his forehead.

The second was five feet, 10 in. tall, and had a dark complexion. He wore a christie hat, dark blue suit, and weighed about 175 pounds. He had a moustache, and was about 40 years old.

The Nebraska State Commission plans to have an exhibition in the State pavilion at the Lewis and Clark Exposition of the silver service which the state of Nebraska has presented to the battleship of the same name, launched last Autumn.

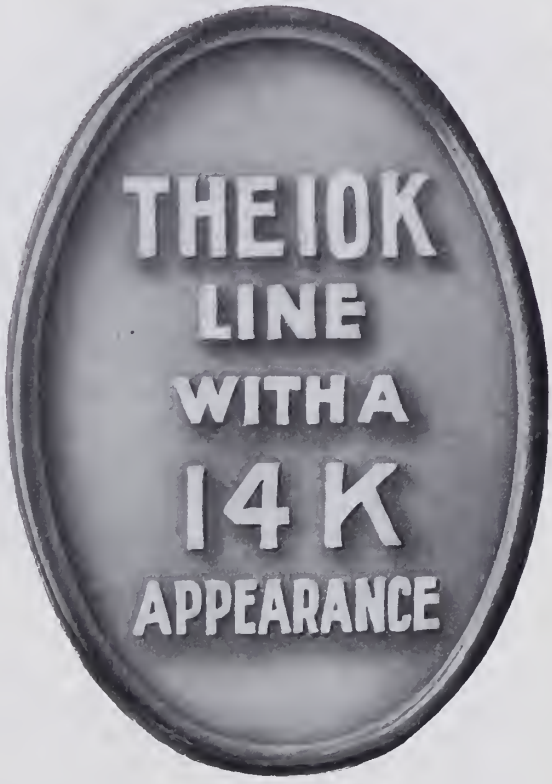
### Death of Aldridge B. Gardiner.

PROVIDENCE, R. I., Aug. 11.—Aldridge B. Gardiner, well-known among the older manufacturing jewelers in the city and formerly a member of the firm of J. W. Richardson & Co., died last evening at his home, 147 Elmwood Ave., from causes incident to old age. His death was comparatively sudden, as he had not been thought to be seriously ill up to a week before his death.

Mr. Gardiner was born in Wickford, R. I., May 26, 1821, and was the son of Beriah and Elizabeth (Hammond) Gardiner. He received his early education in Wickford Academy, coming to this city when he was 17 years of age. He learned his trade of jeweler with Hunt & Owen, an old-established firm, situated at that time where the firm of J. A. Foster Co. is now located. He associated himself with J. W. Richardson about 1865, the firm style being J. W. Richardson & Co., the concern being one of the first to manufacture society emblems and jewelry of a similar nature. He withdrew from the firm in 1895 and since that time had not been actively engaged in business.

Mr. Gardiner was married to Agnes Doughty Jackson, of Rockaway, N. J., June 14, 1854, there being three children from this union, John J., Annie R. and Laura C. The first named died in 1877, but the two daughters, wives of Frank T. Pearce and Judge Christopher M. Lee, survive. In addition to two daughters, two grandchildren also survive him.

The deceased was a member of St. John's Commandery, K. T., Royal Arch Chapter No. 1, Providence Council R. and S. M.; St. John's Lodge of Masons, Rhode Island Consistory, A. and A. S. R., Palestine Temple, Nobles of the Mystic Shrine, the West Side and Pomham Clubs. He was also active at one time in the First Light Infantry, and at the time of the Dorr War in Rhode Island turned out for service. At the time of his death he was the oldest Sir Knight in the local commandery.



### Bogus Railroad Man Tries to Get Watch from Rochester Jewelers and Lands in Jail.

ROCHESTER, N. Y., Aug. 14.—An attempt was made to swindle E. S. Ettenheimer & Co. one day last week. A man giving the name of William C. Smith entered the jewelry establishment early in the afternoon and said he wanted to buy a gold watch. He claimed that he was employed by the New York Central Railroad and that it was necessary for him to have an extra good time keeper. A fine watch, valued at $44 was shown to him. After examining it closely Smith requested that he be allowed to take the watch with him, saying he would pay for it when next he received his pay. The jewelers were not inclined to trust the man and told him to produce a friend, known to the firm, who would guarantee the payment of the watch. Smith said he would get a recommendation from his train despatcher, who is known to the firm. He left the store promising to return in a few hours.

The Ettenheimer concern then notified the police of the man's actions and two detectives were detailed to the store. A few minutes later Smith entered and presented

a letter, written on a New York Central letter-head, reading as follows:

MR. ETTENHEIMER, Jeweler:

This man, Henry B. Smith, has been employed in our service nine years, and is just now promoted to engineer and will have to have a watch to pass inspection. As he is not in shape to get one now, will you let him have it to carry until pay day, Aug. 12th. I recommend him and will pay you when I get his pay.

CHARLES F. PAYNE,
Eng. Dispatcher.

When the letter was read the detectives came from their place of concealment and asked Smith where he got the letter. He then began to contradict himself. The engine dispatcher was called up on the telephone and it was learned that he had given no letters to any one that day. Smith was immediately locked up.

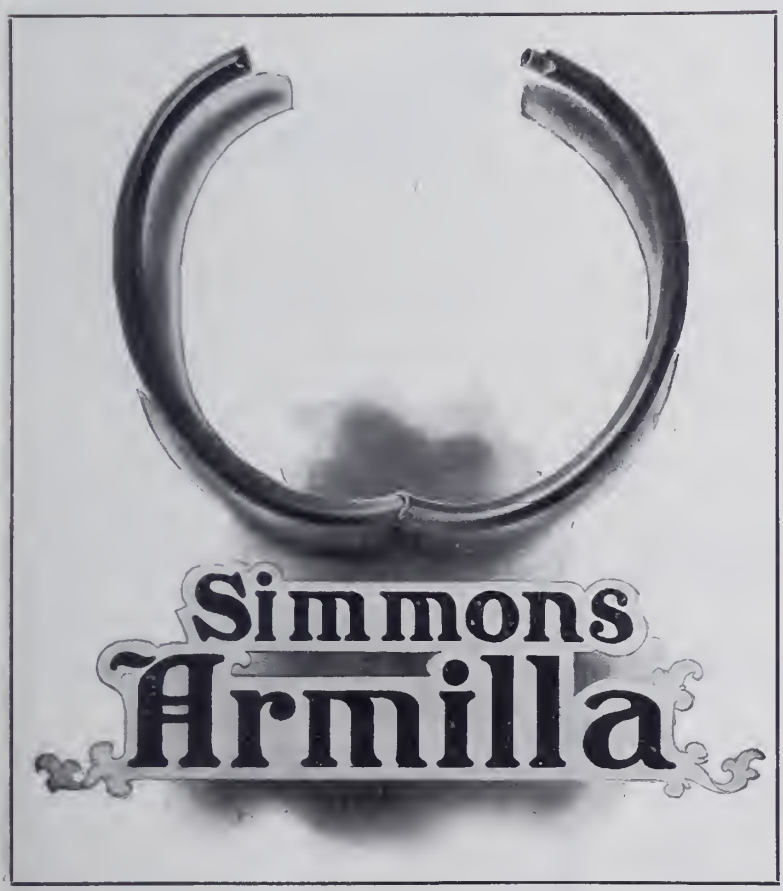
Smith was shortly afterwards identified by Don I. Danks as the man who had swindled him a few years ago out of two watches, valued at about $75. Smith was held for the next sitting of the grand jury. Danks will prosecute Smith after Ettenheimer is through with him.

### Involuntary Petition in Bankruptcy Filed Against Van Houten Bros. Jewelry Co., Newark, N. J.

New York creditors of the Van Houten Bros. Jewelry Co., manufacturers at 339 Mulberry St., Newark, N. J., last week filed a petition in bankruptcy against the concern. The petitioners were H. Z. & H. Oppenheimer, H. Nordlinger's Sons, J. B. Bowden & Co., all of New York. The claim of H. Z. & H. Oppenheimer was for nearly $900, and the claims of the other petitioners were for small amounts. The company for several months had been in the hands of a receiver, John S. Gibson, Newark, who sold the assets, realizing thereon about $4,000. The aggregate liabilities, it is believed, are about $20,000. The receiver has not yet disbursed the proceeds of the sale of the assets.

Some of the creditors suspect that special favors were extended by the jewelry company to the National Newark Banking Co., which has a claim for $5,600. The purpose of the present bankruptcy proceedings is to enable the creditors to make inquiries as to the transactions in which the banking company was interested, with a view to deciding whether or not there was any improper preference. Frank Benjamin, Newark attorney of the Jewelers Association and Board of Trade, filed the petition at Trenton, N. J., and further proceedings will be before a referee at Newark.

The business was established more than 35 years ago by Van Houten, Sayre & Co., the style subsequently being changed to Van Houten Bros., and in 1894 the present concern was incorporated. In 1901 there was a reorganization and new capital was obtained, the capital stock being increased to $70,000, of which $10,000 was preferred and not issued at that time. It was supposed that the company had a fair trade, and the first announcement of its financial difficulties was received with some surprise in the trade. The explanation now made is that business has been declining of late years.



George B. Lord has purchased the jewelry business of Howard Thomas, in Independence, Ia.

# *The Woman Who Wears*

the Simmons Armilla has the comforting assurance that her bracelet is artistically correct and will bear Dame Fashion's closest scrutiny.

In the matter of shape, style and design, the Armilla is all that the most fastidious follower of present-day fashions can possibly desire.

## *The Dealer Who Shows*

the Simmons Armilla early and prominently, can hardly fail to capture a good big portion of the unusual business in bracelets that will be done by the trade at large from now until Christmas.

Watch and jewelry jobbing houses generally, are ready to show the varied and beautiful designs in which the Simmons Armilla is made. There are three styles of finish—Roman, English and plain polished—and three grades of stock—gold-filled and 10K. and 14K. solid gold.

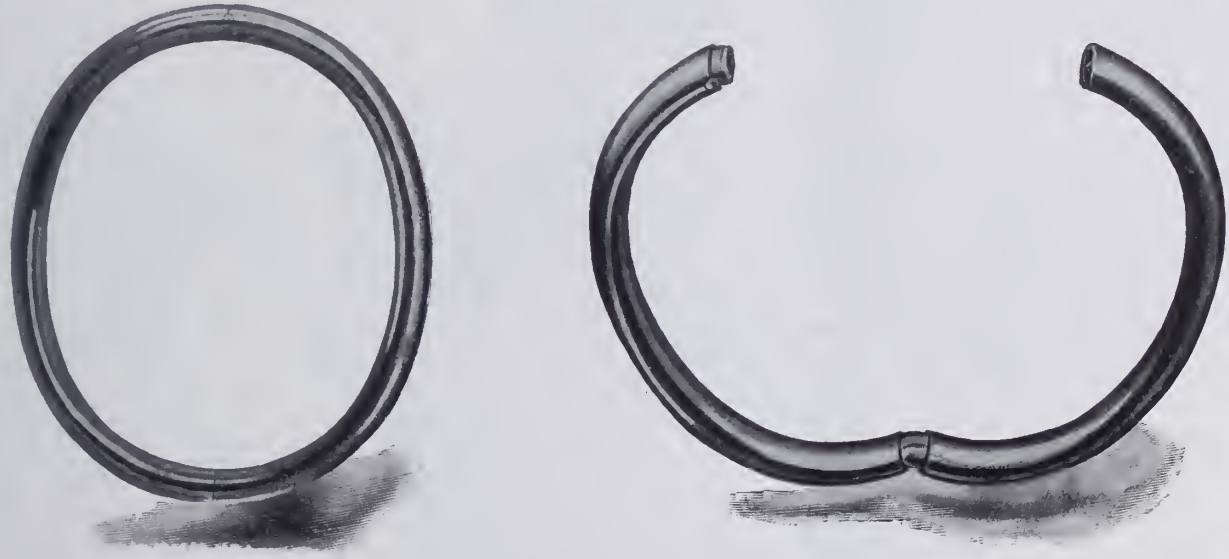
## Lewis Lowenthal Recently Arrested in Columbus, O., Now Awaiting Trial in Washington, D. C.

WASHINGTON, D. C., Aug. 11.—Lewis Lowenthal, alias Burnet Blum, alias Charles Glick, who was recently arrested in Columbus, O., on a charge of false pretenses, has been brought to this city and committed to jail to await the action of the grand jury. As previously reported in THE CIRCULAR-WEEKLY, Lowenthal passed two worthless checks here, one for $150 at the store of L. S. Kann, and for $50 on Louis Abrams, a retail jeweler located on 9th St.

Police officials here are deeply interested in the case of Lowenthal. Several communications have been received from police officials of other cities, giving details of his past record, and others asking that he be turned over to them. The most interesting information about him came from the Pinkerton detective agency. According to the data furnished by the Pinkertons, Lowenthal's real name is Samuel Miller, and he comes from a family in which three brothers are known in police circles. The record shows he entered a plea of guilty to a charge of forgery in Allentown, Pa., in 1898, and was sentenced to 30 months in the county jail. Last year, according to the report, he was arrested in Philadelphia and was charged with having made an effort to swindle a Philadelphia trust company. He was tried and discharged on a technicality, but was rearrested and placed under $1,500 bond.

From Wheeling, W. Va., comes word from Chief of Police Clemens that Lowenthal is wanted in that city for passing worthless checks on two merchants there, while William O'Brien, acting chief of police of Syracuse, N. Y., has asked that a fugitive warrant be sworn out for Lowenthal and that he be held until requisition papers reach here. The papers are being arranged and will be sent here as quickly as possible. Evidently Lowenthal is in for a pretty lively time.



The Pinkertons say Lowenthal is an expert penman and confidence man, and that he was associated with such men as Michael Test, alias "Bicycle Mike," and Michael Lehr. These men and George Miller, a brother of the prisoner, were taken into custody at Newark, N. J., in 1899, by Pinkerton detectives. A confession obtained from one of the men showed that the gang to which they belonged had operated in all the principal cities between New York and Detroit.

Ira Walter Johannes, oldest son of Ira Hardy Johannes, of the Ira H. Johannes Co., Washington, D. C., died at his residence on Chestnut Ave., Takoma Park, D. C., recently, after an illness which began two years ago this summer. At that time Mr. Johannes suffered an attack of typhoid fever, from which he never fully recovered, the disease leaving his system in such a weakened condition that his lungs became affected. Mr. Johannes was of a kindly disposition, and was well thought of by his friends and held in high esteem by his former employers. Mr. Johannes was in the 25th year of his age at the time of his death.

## Death of Frederick D. Heffron.

NORTH ATTLEBORO, Mass., Aug. 12.—Frederick D. Heffron, of the firm of Riley, French & Heffron, passed away at 5.15 this morning, at his late home on Church St., after an illness of about one year's duration. Bright's disease was the cause of death.

Last March Mr. Heffron began to fail, although nothing serious was thought of his illness at that time. He went South, thinking that a good rest would benefit him more than anything else, and spent three months at the Hot Springs in Arkansas. At the end of that time his health was so much improved that he took charge of the Chicago office of his concern, but after a few days found that he was not equal to the task and returned to his home in North Attleboro. He arrived here July 1. For a few days he felt so well that his many friends were elated, and it looked as though he would soon recover. He was obliged, however, to take to his bed about July 10, and notwithstanding that he had the best medical attendance it was possible to procure, including specialists from Boston and Providence, Dr. James Bryan of this town and two trained nurses, he grew worse as time went on. The end came peacefully and without pain.

Frederick D. Heffron was born in Fulton, N. Y., June 4, 1855, and was the son of Dr. Edward Heffron and Mrs. Cordelia Draper Heffron. He spent his boyhood days in Fulton, and entered Fallis Seminary, from which he was graduated with honors. After his graduation he was appointed a railway mail clerk at Cleveland, O., and showed such marked ability that he was promoted to the office of chief clerk in the superintendent's office at Washington, and remained here for some time. He resigned this office to accept a position as Western salesman for the firm of J. A. Flomerfelt & Co., and began his career in the jewelry trade. About 20 years ago Mr. Heffron took the position of Western salesman for H. D. Merritt & Co., of this town, but relinquished this at the end of two years to become a partner of William H. Riley and G. Herbert French, the firm becoming known as Riley, French & Heffron. Since that time he had acted in the capacity of Western salesman of the concern, and became well known and liked throughout the trade of the West, to whom the news of his death was a great shock.

Mr. Heffron was married in 1885, and is survived by a widow and daughter. He was a member of Bristol Commandery and Bristol Lodge of Masons, and of the consistory in New York. Besides being one of the best known jewelry manufacturers in the country, the deceased was considered the best salesman that ever went out of the Attleboros.

### L. J. Cowl Trading as Clapp & Cowl, Chicago, Goes Into Voluntary Bankruptcy.

Chicago, August 11.—Lindon J. Cowl, doing business as Clapp & Cowl at 68 Washington St., and 76 Madison St., filed a voluntary petition in bankruptcy Thursday, in the United States District Court in this city. The schedules which accompany the petition show the liabilities to be nearly $25,000, while the assets are valued at $22,000. Some of the assets are of doubtful value. William C. Niblack, of the Chicago Title and Trust Co., was appointed receiver under a bond of $20,000.

Among the creditors are the following: Chapin & Hollister Co., $115; De Roy & Wagner, $250; Codding & Heilborn Co., $83; Eisler & Laubheim, $443; Ehrlich & Sinnock, $154; B. S. Freeman & Co., $65; Engelfried & Weidman, $160; J. C. Hacker, $179; H. H. Curtis & Co., $362; Louis Kaufman & Co., $478; Providence Stock Co., $180; Stein & Ellbogen Co., $500; Bassett Jewelry Co., $700; William Bens Co., $238; F. & F. Felger, $900; E. A. Bennett, $350; Daggett & Robbins, $650; F. A. Hardy & Co., $483; Klipper Bros., $250; L. W. Levy & Co., $210; Keller Jewelry Co., $170; G. F. Moore, $110; C. F. Monroe Co., $100; Paye & Baker Mfg. Co., $130; Allsopp Bros., $250; F. P. D'Arcy, $100; American Ring Co., $900; J. S. Adler & Co., $60; Burley & Co., $30; F. C. Jorgensen & Co., $400; J. D. Bergen Co., $460; E. M. Weinberg, $170; Jennings Bros. & Co., $400; G. A. Webster & Co., $130; Julius Wodiska, $200; Watson & Newell Co., $75; Max Silverberg, $445; Schultz, Leiss & Co., $230; Schukerling Bros. & Co., $260; Saffir Bros., $275; J. H. Peckham & Co., $80; Riley, French & Heffron, $225; S. K. Huston, $496; Louis Manheimer & Bros., $410; H. F. Hahn & Co., $68; Wilprett & Saacke, $200; A. O. Kiefer, $200; J. H. Purdy & Co., $225; Dennison Mfg. Co., $200; Geo. Nichols, $150; Ring & Holstede, $40; Springfels Mfg. Co., $40; A. Hirsch & Co., $150; Jules Racine & Co., $350; Despres, Bridges & Noel, $900; Martin, Copeland & Co., $1,300.

The stock is valued at $12,000. The tools and fixtures in the two stores are valued at $4,500. The Hibernia Banking Association, for a loan of $2,500, holds notes and book accounts valued at $4,500. William C. Slatts, doing business as Slatts Collateral Loan Bank in the Champlain building, has advanced on diamonds and jewelry about $3,300, said to have cost $4,350. The stock has all been removed from 76 E. Madison St., where the rental is $625 per month, to the Washington St. store, where the rental is only $150 per month, and an inventory is being taken.

According to N. H. Hanchette, attorney for Clapp & Cowl, a number of causes contributed to Mr. Cowl's embarrassment. About two years ago Mr. Hanchette said that an employe stole about $8,000 worth of jewelry, which was never recovered. The fixtures for the new store on Madison St. cost over $3,000. The rental of the latter place was $7,500 a year and while only occupied since May last, yet the entire receipts from sales were not enough to pay the running expenses of the establishment. Some days the receipts were as low as $8. Up to 60 days ago Mr. Cowl had paid his bills in full but the continued drain on his resources, the attorney explained, had necessitated his filing the petition. Mr. Hanchette is of the opinion that a compromise with the creditors on a time basis will be the best means of a settlement most satisfactory to all.

There is a contingent liability which may cause serious trouble. Mr. Cowl took a lease on the Madison St. premises for 10 years from May, 1905, to May, 1915, at a rental of $7,500 a year. If the premises can be released no doubt a speedy settlement can be effected but should no release be effected then holders of the lease must be reckoned as a creditor to the extent of $625 a month.

The business was commenced in the Fall of 1892 by Caleb Clapp and Mr. Cowl, under style of Clapp & Cowl. Clapp, who did not put any money into the business, withdrew from active participation in the Fall of 1896, but the style of Clapp & Cowl was retained. Mr. Cowl invested a capital of $10,000 in stock. Cowl was originally engaged in the grocery business, then in the hotel business on Long Island, N. Y., and was also connected with the Sperry Electric Co. of Chicago before going into the jewelry trade. He is regarded here as one of the hardest working retail jewelers in the city. For over 15 years he has paid unremitting attention to his business and it is hoped that he will pull through.

**TWO SELECTIONS FROM OUR EXTREMELY CHOICE AND UP-TO-DATE LINE.**

We offer a buyer an assortment to select from which is larger and more varied than that offered by any other house in our line.

We manufacture under one roof complete lines of Silver Plated Hollowware, Hotel Ware, Ormolu Gold Clocks, Jewel Caskets, Picture Frames and Novelties of every description.

No. 350. "THE BREAD WINNER." Length 12½ in.

# The Silver Standard

ESTABLISHED IN 1847 BY ROGERS BROS.

Vol. I August, 1847. (Double Number) No. 5

## GUMMED STAMPS FOR LETTERS.

### FRANKLIN AND WASHINGTON HONORED.

THEIR PORTRAITS APPEAR ON THE FIRST ISSUES OF POSTAGE STAMPS BY UNITED STATES.

### 1847 MADE MEMORABLE.

THE Post Office Department has just issued five cent and ten cent gummed stamps, for attaching to letters to be carried over the postal routes.

The five cent stamp bears the portrait of Franklin, our first Postmaster General, and the ten cent stamp that of Washington, each bearing above the portrait the inscription "U. S. Post Office," and below the amount "5 cents" and "10 cents," respectively.

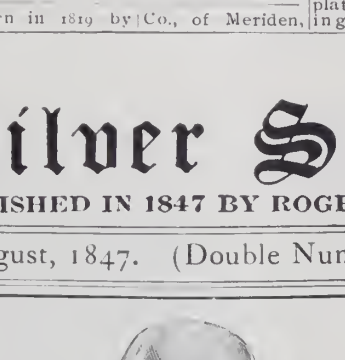
These stamps carry letters according with the rates established by Act of Congress 1845, which are as follows:

For each letter weighing ½ oz or fraction thereof,

Under 300 miles 5 cents.

Over 300 miles 10 cents.

They will be cancelled by the postmasters, who will simply make pen scratch lines across the face of the stamps, thus doing away with the usual prepay receipt heretofore written on the letter. The stamps will greatly facilitate the work of the postmasters, while being a great convenience to the public.



Great Britain issued the first postage stamps in 1840. a 1 P. Black, and a 2 P. Blue. Each bears an engraving of the young Queen Victoria who ascended the Throne three years previously.

Brazil then issued a 3 R, 60 R and 90 R series, in 1843, and has just followed these by seven new stamps from 10 R to 600 R; but the ones we have seen are very plain, simply showing the amount in large figures, within oval lines. The stamps just issued by our government show finer engraving than those of Great Britain or Brazil.

We understand that the Canton Administrations of Zurich, Basle and Geneva have also issued stamps and it is probable that the stamp system will soon be used in France, Italy, Germany and other nations.

It may not be too much to predict that the use of postage stamps may lead the way to an international postage agreement that may make it possible to send letters from country to country at a universal rate, thus bringing the nations closer together in commercial and friendly relations.

The introduction of these stamps with many other improvements in the Postal Service are due to the energy and zeal of Postmaster General Cave Johnson, whose portrait and a short sketch of his life accompanies this article.

POSTMASTER-GENERAL CAVE JOHNSON.

CAVE JOHNSON was born in Robertson County, Tennessee, Jan. 11th, 1793. He received a liberal education at Cumberland College, and in 1811 raised a company among the students (of which he was made Captain), and which he offered to General Jackson, who refused their services; advising them to return to their studies. He studied law in the office of W. W. Cooke until 1813, when he served as Deputy Brigade Quartermaster in his father's brigade of Tennessee Militia in the campaigns of 1813 and 1814. He was admitted to the bar in 1814 and practiced at Clarksville, Tennessee. He was elected Prosecuting Attorney for his Circuit in 1817; was a Democratic Representative in the 21st to 24th Congresses, 1829 to 1837, and in the 26th to 28th Congresses, 1839 to 1845. When Mr. Polk became President two years ago, Mr. Johnson was invited into his Cabinet as Postmaster-General, which office he has very efficiently administered.

IVORY COMB FACTORY, JULIUS PRATT & CO.

## 1847 A BIG YEAR!

### MORE IVORY COMBS MADE IN MERIDEN THAN EVER BEFORE.

### BRITANNIA BUSINESS GROWING.

#### OTHER LEADING INDUSTRIES.

THE manufactories of Meriden constitute so prominent a part of the country's product that one naturally feels some curiosity to know something of their origin, and present condition, as their total sales now amount to about $1,000,000 a year.

Of all of them, none is more interesting than the Ivory Comb industry, whether one regards its origin and growth or the great beauty of the production and the systematic work of the mechanism of the machinery employed.

According to the best means of information, ivory combs were first made in this country by Andrew Lord of Saybrook, about sixty years ago. He cut out the "plates" and the teeth by hand with a hand saw; a slow and expensive process. John Graham, of Boston, and Mr. Tyron of Glastenbury, made ivory combs about the same time, on a small scale; the latter person used machinery. Ezra and Elisha Pratt, of Hartford, also manufactured the article about fifty-five years ago, cutting the teeth by hand, like Mr. Lord. Abel Pratt, of Saybrook, made ivory combs fifty-one years ago. He sawed the "plates" by hand, and two hundred and fifty was considered a good days work; whereas by the present improved process four thousand can be sawed out in a day by one man. He cut the teeth, however, with circular saws and machinery moved by hand and afterwards by wind. Ezra Williams also commenced the same business in Saybrook soon after Mr. Pratt, and began to saw the "plates" with machinery moved by water power. This establishment has continued to the present time, and is now known by the name of George Read & Co. Great improvements have been made there in the machinery, and at one time nearly all the ivory comb business in the country was done by that firm. Various other attempts to carry on this business have been made, most of which have not succeeded. At the present time, all the ivory combs made in America are manufactured in Connecticut, and nearly two-thirds of the whole are made in Meriden. The business was commenced in this

We are indebted to Gleason's Pictorial, the Rev. Geo. W. Perkins' "History of Meriden," and others, for the material used in "Silver Standard," August 1847.

### Slayers of Detroit, Mich., Pawnbroker Make Full Confession.

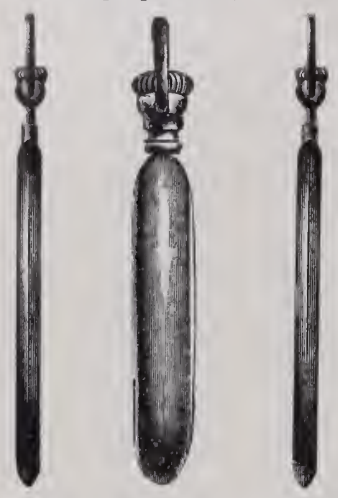
Detroit, Mich., Aug. 12.—Through the medium of the "sweat box" Capts. McDonnell and Baker last night obtained a complete confession from Harry Johnson, who, with Harry Parker, murdered pawnbroker Joseph Moyer and looted his store at 42 Monroe Ave., on the night of July 28. Parker, who is said to have studied for the ministry, broke down and practically corroborated every statement of his accomplice.

It appears the crime of robbery was premeditated, although both prisoners strenuously maintain they had no thoughts of murder. They prepared for the crime by purchasing a hammer handle, getting blacksmith Dell E. Young, 25 Barclay Pl., to fill the end with lead. This weapon, Johnson declared, was to be used to render the pawnbroker unconscious. Before going to Moyer's store the pair imbibed heavily.

According to the confession, Parker entered the store first, with the hammer handle concealed. Parker walked down the store, meeting Moyer near the center. "Then I heard what you would call a dull, sickening thud," said Johnson to Capt. McDonnell. "A terrible struggle took place as Moyer fought for his property. Parker hit him over the head time and again but Moyer refused to give up. He was to blame for his own death. I stuffed the diamonds and jewelry into my pockets. Then we dragged Moyer into the back room, took the keys from his pocket, opened the safe and I grabbed a bundle of money. Although in a dying condition, Moyer tried to make an outcry, so we ran out the back door and jumped the fence, going through a cordon of police on their way to posts.

Parker and Johnson washed up at the Cliff House where they had a room, paid the landlady and walked to the house of Johnson's sweetheart on Cass Ave. Then they left Detroit on the night boat for Cleveland, walking right through the police drag-net. They went to Buffalo to take in the races and pawned about $400 worth of the jewelry, which has been recovered. They were later arrested in Cleveland while attempting to dispose of more jewelry.

HARRY JOHNSON FROM PHOTOGRAPHS BY DETROIT POLICE.



HARRY PARKER FROM PHOTOGRAPHS BY DETROIT POLICE.

YOU can readily understand that the retail jeweler appreciates watches of merit when we tell you that from January 1st, 1905, to July 1st, there were more Illinois Springfield adjusted watches manufactured and sold than in any previous six months in the history of the company.

## Schedules for Jewelry and Kindred Lines in New Japanese Tariff.

WASHINGTON, D. C., Aug. 12.—The Japanese tariff of this year provides that the dutiable value of imported articles shall be the actual cost of the articles at the place of purchase, production, or fabrication, with the addition of packing charges, cost of transportation, insurance, and all other charges incurred up to the arrival of the articles at the port of importation. In the event that an article is dutiable under more than one rate of duty, it is to be assessed according to the highest of such rates. Special war duties are imposed in certain instances and these became operative July 1 of the present year. Japan also levies various rates, a general and a "favored nation,"—under the latter the United States is classified.

These war duties are not to be assessed upon goods coming with authorized certificate of origin from any country enjoying the "most favored nation" privileges.

The following are the rates of duty of interest to the trade:

Barometers, 10 per cent. ad valorem; war duty, 5 per cent.

Binocular glasses:
In barrels, covered with leather or japanned; 15 per cent. ad valorem; all other, 20 per cent.

Spy glasses, opera glasses, monocular and binocular field and marine glasses:
Constructed with or mounted in shell, mother-of-pearl, ivory, gold, silver, platinum, nielles (inlaid), enamelled or otherwise or other precious materials of fancy or luxury; or garnished with precious stones or pearl, .3735c each; all other kinds, .1245c each.

Clocks, standing and hanging, and parts thereof, 10 per cent.

Compasses and chronometers, mariner's, and parts thereof, 10 per cent.

Microscopes and parts thereof, 10 per cent.

Spectacles and parts thereof, 10 per cent.; war duty, 10 per cent.

Telescopes, 10 per cent.

Watches, watch cases and accessories:
Gold and platinum, 30 per cent.
Silver and all other, 25 per cent.

Watch movements and fittings therefor, 15 per cent.

Studs, sleeve and cuff buttons or links:
Of gold or platinum, set with gems or otherwise, 30 per cent.; war duty, 20 per cent.
All other, 25 per cent.

Ivory or tusks, elephant, .226c per kin, or 60.0 grammes, or about 1 1-3 lbs.

Ivory or tusks, elephant, waste, 10 per cent.

Ivory or tusks, narwhal or unicorn, 10 per cent.; war duty, 5 per cent.

Ivory or teeth of walrus or seahorse, .0557c per kin.

Tortoise shells: Shells and marginal shells, known as hoofs, .606c per kin.
All other kins, .06 per kin.

Tortoise shells, waste, 15 per cent. ad valorem.

All other tusks or teeth of animals, 10 per cent.; war duty, 5 per cent.

German silver, plate, sheet, rod and wire, $3.776 per 100 kins, war duty.

Platinum: Ingots, 5 per cent.
Bar, rod, plate, sheet or wire, 10 per cent.

Gold and silverware, not otherwise provided for, 35 per cent.; war duty, 10 per cent.

Gold and silver plated ware, not otherwise provided for, 25 per cent.; war duty, 10 per cent.

Pencils in gold or platinum cases, 30 per cent.; war duty, 10 per cent.

Pen-nibs, of gold, 30 per cent.; war duty, 10 per cent.

Amber, unworked, 10 per cent.; war duty, 10 per cent.

Amber, worked, 20 per cent.; war duty, 10 per cent.

Coral, worked or otherwise, 30 per cent.; war duty, 10 per cent.

Diamonds, glaziers', 10 per cent.; war duty, 5 per cent.

Ivory, manufactures of, not otherwise provided for, 20 per cent.; war duty, 15 per cent.

Jewelry, 35 per cent.; war duty, 10 per cent.

Imitation of jewelry, 30 per cent.

Small articles of luxury used for personal adornment, made principally of common metals, such as aluminum, aluminum bronze, nickel, German silver, argentine, copper, steel, zinc, lead, tin, iron, etc., or also of jet, hardened wood, beads, shells, horn, celluloid, bones and other similar common materials:
(1) Gilt, silvered, treated with aqua fortis, burnished, polished, varnished, tinned, enamelled, oxidized, or nickeled, garnished with "vitrification," enamelled (cloisonné) or not, false pearls, corals, both genuine and false, imitation precious stones, 10 per cent.
(2) Garnished with mother-of-pearl, ivory, tortoise shell, gold and silver plated, if the value of the garnitures or plating does not surpass the value of the principal composition, 10 per cent.
(NOTE.—Jewelry most commonly used are rings, colliers, bracelets, ear pendants, medals, medallions, broaches, combs, ornamental hairpins and hatpins, brelogues, buckles, hooks, snuff boxes, buttons (not common), coulants, purses, handles and ferrules of sticks, umbrellas and parasols, coins (sequins), pencil cases and generally other small articles of adornment not mentioned.)

Precious stones and pearls, 35 per cent.; war duty, 10 per cent.

Precious stones and diamond imitations, 30 per cent.; war duty, 10 per cent.

Toilet or dressing cases, 25 per cent.; war duty, 10 per cent.

Tortoise shell, manufactures of, 25 per cent.; war duty, 10 per cent.

Articles, not mentioned, unmanufactured, 10 per cent.; war duty, 5 per cent.

Articles, not mentioned, manufactured, 20 per cent.; war duty, 10 per cent.

## Jeweler Brutally Murdered.

### Chicago Policeman Accused of Stealing Watches, Shoots Mathais Mamer, and Then Commits Suicide.

CHICAGO, Aug. 12.—Oscar Benson, a policeman, shot, and instantly killed Mathais Mamer, a jeweler and repairer at 140 W. Harrison St., Thursday. The shooting was the result of charges made against the policeman accusing him of the theft of three watches.

Nicholas Kittin, a pensioner of Mamer's, claimed he saw the officer take the watches one night while Mamer was in the rear of his store eating his dinner. Mamer pressed the charge against the officer and asked for immediate action. A day was spent in looking for the missing watches, but as they were not found, the policeman was notified of the charges against him.

About 3 o'clock Thursday Benson entered Mamer's store and spoke to Mamer, who was behind the counter. He demanded to see Kittin, the man who first accused him. Mamer explained that Kittin was sick in the rear room and could not be seen. Pulling his revolver the officer sent a bullet through the glass screen, behind which Mamer was sitting. The shot went wide and the officer ran around the end of the counter behind which Mamer had dropped and sent a bullet crashing into the latter's brain, killing him instantly. The officer then entered the rear room and shot Kittin, though not with fatal result, then turned and shot himself to death, completing the awful tragedy. Sam Seger, a watchmaker for Mamer, was in the store at the time of the murder.

Mamer was 52 years old and has a brother, Chris, who is a west side politician and clerk of the Supreme Court of Illinois. Mamer had been in business on Harrison St. for 17 years. Several times he had complained to the police that he had been robbed and two years ago claimed to have been robbed of $5,000.

Funeral services were held Monday, 9 A. M., at the residence of his brother, 158 Throop Ave. and later at St. Francis Roman Catholic Church. The interment was at St. Boniface cemetery.

### Schedules in Bankruptcy of Thos. J. Bradley, Newark, Filed by Creditor.

NEWARK, N. J., Aug. 11.—Helen McConville, one of the creditors of Thos. J. Bradley, lately doing business at 372 Broad St., to-day filed schedules of his assets and liabilities in the United States District Court of New Jersey. These schedules are as complete as could be ascertained at the time. There are practically no secured creditors. It is estimated that there is about $2,000 worth of merchandise on hand and that an unknown amount is owing Bradley by his customers. The amount of cash assets is also unknown.

The unsecured creditors in schedule are as follows: Chapin & Hollister Co., $102; F. & F. Felger, $321; R. L. & M. Friedlander, $2,492; Louis L. Grey & Co., $71; A. Jaffe & Son, $1,469; A. L. Hodes, $566; H. Levinsohn, $135; Chas. M. Levy, $108; Martin, Copeland & Co., $269; Helen McConville, $5,000; Louis C. Moss, $201; Peckham Seamless Ring Mfg. Co., $87.58; A. Rosenberg, $346; Wm. I. Rosenfeld, $75; Waterbury Clock Co., $172; Weizenegger Bros., $206; Zimmer Bros. & Co., $1,517; Schwarzkopf & Dorer, Ltd., $159; Bioren Bros., $110. The total amount of unsecured liabilities, as filed, is $13,416.18.

Bradley, who was forced into involuntary bankruptcy, is out of town, and a warrant for his arrest for contempt in divorce proceedings, begun by his wife, was issued two weeks ago.

Edwin G. Adams, 164 Market St., Newark, is the referee in bankruptcy in charge of the case and it was with him the schedules were filed.

### Patent Office Decides Case Arising Over Description of Trade-Mark.

WASHINGTON, D. C., Aug. 14.—A case has recently been decided in the Patent Office on a petition asking for relief from the Examiner of Trade-Marks, in which he objected to the words of description used by an applicant for registration upon the ground that they were indefinite, and for articles which were not of the same descriptive property and therefore required a division of the application.

The objection of the Examiner was based upon a previous decision in which the question of the limitation of a single trade-mark was considered, and the conclusion reached that a trade-mark should not include merchandise which is not of substantially the same descriptive properties, this conclusion being that the scope of the right acquired by registration was not different from the right which, to be invaded by the infringer, would have necessitated the infringer to have used the mark on merchandise of substantially the same descriptive properties as those described in the registration.

The trade-mark in question was for jewelry and jewelers' sundries. The petition was dismissed for the reason that it is thought that a requirement for division by the Examiner in Trade-Marks, by parity of reasoning, amounts to the refusal of the rights of the applicant to register his trade-mark with the breadth claimed by him, and that such a ground of division is a rejection of a portion of his claimed right and must be considered as a refusal of registration as claimed by him; it could therefore be appealed but not reviewed.

The Examiner suggested the use of the term "badge" in place of the term "insignia," showing that the former term is more definite in meaning and more widely used. In view of the fact that the applicant stated his intention to amend his application by adding the terms "emblems and bages," it would seem unnecessary to continue the use of the word insignia, and as to that part of the petition the action of the Examiner was affirmed.

J. C. Derby, Concord, N. H., has just completed extensive improvements in the interior of his store at 30 Main St.

A. Galagher, Cresson, Pa., has decided to discontinue business and expects to dispose of his entire stock before September 20.

Complaint was made to the police of Brockton, Mass., a few nights ago because some miscreant with a diamond scratched "S. W. B." in big letters on the show window of U. C. Smith's jewelry store. Many random lines still further defaced the glass.

### Death of Paul Jander.

COLUMBUS, O., Aug. 10.—Paul Jander, a well-known German citizen of Columbus, and a jeweler at 189 E. Main St., who dropped dead of heart disease, Monday, Aug. 7, as published, last week, was playing cards with some friends when he fell back in his chair and expired before a physician could be called.

Mr. Jander was a director of the Cecelian Maennerchor, a member of the choir of St.

THE LATE PAUL JANDER.

Mary's Catholic church, and was active in various Catholic societies. He was the organizer of the largest court of Catholic Foresters in the city, St. Joseph's Court of St. Mary's parish, and the funeral was held under the auspices of that society Thursday morning, requiem high mass being celebrated by Rev. Otto Von Lintel.

Before going into the jewelry business for himself, Mr. Jander was for a long time connected with the old Columbus Watch factory.

---

W. A. England, Worcester, Mass., has sold out and will retire.

J. H. Grant & Son, Troy, Pa., recently closed out their stock. The elder Mr. Grant had been actively engaged in business in that territory for over 50 years.

### Arrests Made on Smuggling Charges. Government Officers Active in Chicago as Well as Canada.

Dispatches received Monday in New York said that the Chicago police had made two arrests on the charge of smuggling diamonds. There was a suspicion that an organized gang of smugglers is at work, with headquarters in the western city. Henry Hoffman is the name given by the man who was first arrested. He was found in a saloon in conference with L. J. Bohl, employed by a local jeweler. The police have not, as yet, preferred charges against Bohl, but are holding him, pending an investigation. The officers engaged in the case are reticent and there are hints of further developments.

In THE CIRCULAR-WEEKLY last week was published a report from Montreal that Secret Service agents of the United States government were at work in that city, ferreting out smugglers. It was suspected that a gang was making an organized effort to bring diamonds into the United States by way of Canadian cities without paying the duty.

New York diamond importers who were seen by a reporter of THE CIRCULAR-WEEKLY said that they had not noticed any circumstances which would indicate an unusual amount of smuggling. Leopold Stern, of Stern Bros. & Co., said: "There is now and always has been, I suppose, a certain amount of smuggling. The diamond merchants of New York have, from time to time, when they obtained information, placed it before the Government officials with a view to checking the efforts of the smugglers, which have a tendency to injure the legitimate trade. These complaints always receive prompt attention, and the Government officers are quite vigilant. It must be understood, however, that they are laboring under difficulties as their number is small, when you consider the extent of the field which they protect. As far as I have heard there have been no circumstances indicating more smuggling of late than is usual. The activity at Montreal and Chicago may be due to complaints on the part of some people in the trade who may have obtained information that awakened their suspicions."

---

W. H. Jones has gone out of the jewelry business in Belgrade, Mont.

### Death of Ebenezer Hancock.

ELGIN, ILL., Aug. 9.—At the death of Ebenezer Hancock in this city last week there passed away the pioneer watch factory foreman of Elgin, Mr. Hanchck having been connected with the Elgin National Watch Co.'s factory here for more than 40 years. Deceased was taken ill on the night of the 50th anniversary of his wedding, and died Aug. 3, at his home, 365 Raymond St.

Mr. Hancock was born Aug. 9, 1831, and as a youth served an apprenticeship in the machinery and brass finishing trade. After working at his craft for a while, in the Fall of '54 he went to Waltham and was engaged at the watch factory there for nine years. In March, 1865, he came to Elgin and took a position in the watch factory here, becoming the first foreman of the first balance room. He remained in Elgin for the rest of his life.

Deceased was highly esteemed by all who knew him and was well known throughout this section. He was a charter member of the Illinois branch of the Sons of the Revolution and a member of the Ancient Order of United Workmen, organized in 1876. He is survived by a widow, a son and a daughter. The funeral services were held Sunday.

---

### Illness Causes Frank E. Smurr, Martinsburg, W. Va., to Make an Assignment.

MARTINSBURG, W. Va., Aug. 9.—The assignment of Frank E. Smurr, a well known jeweler of this section, came as a distinct surprise to many of his friends here, and much sympathy is expressed for him in his trouble. Mr. Smurr has been ill at his home for over a year, and being unable to give his business his personal attention found that he had become involved to such an extent that it was necessary to make a general assignment for the benefit of his creditors, in order that his affairs be straightened. The liabilities and assets have not yet been made public, but will be announced as soon as the inventory is complete.

Mr. Smurr is a young man about 33 years old, and began business in February, 1900. He carried a moderate stock, but by his ability, energy, and industry was building up a good trade when he was taken ill.

# Special Notice.—*Our order department will not be affected by the quarantine.*

Send your orders to New Orleans to be passed upon, and wherever quarantine restrictions interfere, goods will be shipped from our temporary St. Louis office, or from our New York office. *There will be no serious delay*, our friends and customers can depend upon our well-established reputation for promptness.

LEONARD KROWER, 536 and 538 Canal Street NEW ORLEANS, LOUISIANA.

## The Diamond Markets.

ANTWERP, Aug. 2.—The month of July ended with the diamond market in a rather quiet condition, as several celebrations which took place here on the occasion of the 75th anniversary of the freedom of Belgium, during which King Leopold visited Antwerp, did not help business.

The event of the fortnight was the increase in the price of "bort" of one franc per carat and certain flat, rough goods were influenced by this advance. Large sales were made in defective stocks at better prices than heretofore.

The safe deposit department of the Diamond Club of Antwerp was opened for use July 15. This feature of the club will be a most useful one to our merchants and brokers, as it permits them to have goods to any amount, always on hand. The establishment is open from 7 o'clock, morning, till 7 o'clock evening.

Many foreign merchants were here during last fortnight, among others being: Messrs. Berman and Lindenborn, New York; Messrs. De Hoop, Hekster, Amsterdam; Messrs. Rutstein, Siedenberg, Long, Mansberger, Rapoport, S. Walk; Peosner, Warsaw; Mr. Muller, Nurenberg; Messrs. De Haan, Matheossian, D. Van Praag, Max Koscher, E. Weil, Fonnes, Rubbens, Kandel, Simon Van Moppes, all of Paris; Messrs. Robinson and Max Horowitz, London; Mr. Goldberg, Trkoutsch; Mr. Van Gulk, Goch; Mr. Djafaroff, Moscow; Mr. Friedlander, Manchester; Mr. Lichtig, Cracovia; Messrs. S. Aronet and Albert Ventura, Constantinople; L. Mayer, Yassy; Mrs. Elia Benhaim, Beyreuth; Mr. Ohanian, Le Caire; Messrs. Kahn and T. Pollak, Moscow; Messrs. Vita Israel and H. Michalson, Montreal.

AMSTERDAM, Aug. 2.—There has been no change in the conditions influencing the diamond trade. The general tone of the market is quiet, owing to the holiday season. Large salaries continue to be paid to polishers and cleaners and in consequence, it often happens that they do not work Mondays.

There were practically no foreign merchants at Amsterdam last week, all the sales made being on behalf of local firms.

LONDON, Aug. 1.—Rough diamonds of large and clean qualities remain very much in demand. Continental houses continue purchases from the "syndicate" at the usual prices. Rumors of another advance, which were current at the beginning of July, have not been confirmed up to date.

PARIS, Aug. 2.—The French diamond market is still inactive. Regular qualities of stones, which usually found buyers during the entire year, are now refused until September. The majority of our merchants are enjoying their holidays now and will not return until next month when good business is expected, especially in six faces and roses of brown and white shades.

Augustus P. McConahay & Son, Van Wert, O., have dissolved partnership. The business will be continued under the name of McConahay & Myers.

*TWO MAIDEN LANE, NEW YORK.*

## Newark.

Adolph Anthierans, 62 years old, a jewelry workman, living at 36 Sixteenth Ave., dropped dead of heart disease a short distance from his home, Thursday night, while returning from a walk with his wife.

Fire, originating in oily waste in a boiler room, caused about $2,500 damage, Friday, in the factory of the Mockridge Jewelry Co., 46-8 Oliver St., Newark. The blaze was discovered by a watchman. When the firemen arrived the flames were shooting from the windows. After a hard fight the flames were controlled but were not entirely subdued for nearly two hours. A number of concerns in the same building suffered damage by water. Among them were the Columbia Mfg. Co., makers of silver novelties, and G. Muller, engraver. All the losses are covered by insurance.

Andrew O. Kiefer, a local manufacturer of jewelry, was in an automobile accident Saturday night, at which time he and several friends had narrow escapes from death or serious injuries. Mr. Kiefer took a party of three Newark men with him for a ride in his automobile from his home to Woodbridge. While going along Rahway Ave., a board in the bottom of the car became loosened, one end catching in the front wheels and throwing the machine into the air. As it came down it turned a somersault and fell on a wagon. The occupants of the automobile were thrown out. Mr. Kiefer was unhurt, but two of his friends sustained slight injuries.

## New Stores and Enterprises.

R. B. Ustick has just commenced business in Merkel, Tex.

J. S. Troop has engaged in the retail jewelry business in Scammon, Kans.

P. E. Anderson, Arcata, Cal., has opened a branch store in Blue Lake, in the same State.

Lewis S. Grimm, Jewel, Kans., has opened a branch establishment in Ramona, Ind. T.

A retail jewelry establishment was recently opened at 219 Wisconsin St., East Somers, Wis.

John Hardin, Evanston, Ill., vice-president of F. A. Hardy & Co., will shortly open a branch factory in Aurora, in the same State, for the manufacture of optical goods.

The Colonial Bronze and Silver Co., Kingston, N. Y., was incorporated at Albany, N. Y., Monday, with a capital of $25,000. The directors are Ernest J. Binch, Otto Fisher and M. A. Silkworth.

The H. W. Hunter-Hoecker Co. was incorporated, last week, in the State of New York to manufacture and deal in optical and surgical supplies with a capital stock of $25,000. The incorporators were: Alexander Shaw, Berton G. Baird and John Hoecker, Jr.

It is reported that a factory for the manufacture of silver-plated ware is being built at Killbuck, near Salamanca, N. Y.

Ed. A. Shepard, Clarinda, Ia., recently sold out to W. C. Cramer, who took possession Aug. 1. Mr. Cramer has installed the stock in new and more commodious quarters.

## Omaha.

Chas. Wolf, with the Shook Mfg. Co., is ill.

Fred Brodegaard & Co. have just installed handsome new show cases.

E. I. Jones, watchmaker for S. W. Lindsay, is confined to his home by illness.

P. E. Flodman and O. Dalin have gone on a two weeks' fishing trip to Center City, Minn.

Jos. P. Frenzer and father left last week for a three weeks' trip through Yellowstone Park.

Miss Emma Quinn, with the Mawhinney & Ryan Co., is enjoying her vacation on the northern lakes.

Mr. Walker, Gibbon, Nebr., and Mrs. P. W. Napier, Decatur, Nebr., were in this city, last week, buying stock.

Albert Edholm is back from a visit to old friends in New York and Spring Lake, N. J., and C. B. Brown and wife have returned from a trip to Racine, Wis.

Albert Kaas, with S. W. Lindsay, has gone on a two weeks' vacation with friends in the State. Albert Winter, also with S. W. Lindsay, is home from a two weeks' vacation in the western part of the State.

L. A. Borsheim, of Brown & Borsheim, who is visiting friends in Geneva, Wis., recently broke his leg below the knee, while engaged in playing a game of croquet. He writes that he will not be able to return home for at least eight weeks.

The Reichenberg-Smith Co. was awarded the contract, last week, to furnish the silver service for the battleship *Nebraska*. There were four other designs furnished, but the Judges decided that the design furnished by J. E. Caldwell & Co., Philadelphia, for the Reichenberg-Smith Co., was their first choice. The contract calls for delivery of the service by Nov. 1.

At the meeting of the Board of Supervisors of Harrison County, Aug. 7, the matter of paying the costs in the Dennison trials was taken up. The board decided to request the county attorney, L. W. Fallon, when he returns from his vacation in Ohio, to collect from the Jewelers' Protective Union and the Omaha Civic Federation, the $800 already paid by the county, as Fallon always claimed that these organizations would pay. Fallon will not be allowed by the board to prosecute the second case at the expense of Harrison County. He will not be allowed to prosecute the case at all until all costs for the past and the future cases are advanced. Public opinion in Harrison County caused the board's action.

---

W. A. Johnson & Son, jewelers at Santa Paula, Cal., have been succeeded by the Santa Paula Jewelry Co.

An unknown negro was shot and killed early one morning, about a week ago, while attempting to loot the store of Charles Price, Jacksonville, Ill. The negro, when slain, had in his possession about $200 worth of plunder.

I. Popkin, who has been established in Franklin, La., the past 15 years, has erected an up-to-date fireproof building on Main St., that place, and will move into the new store on or about Sept. 15. His stock will be considerably enlarged owing to increasing business.

## Baltimore.

Jacob Katz, of J. Katz & Co., was in New York, last week.

John W. Mealy & Sons Co. have moved into their handsome new home on Lexington St., west of Charles.

The will of Henry S. Lewyt was admitted to probate in the orphan's court here. He left $3,100 to charity and named his wife as executrix of the estate.

The old Town Merchants' and Manufacturers' Association will leave this week on their annual August tour North. J. George Gehring is chairman of the committee of arrangements.

The Merchants' rebate movement, which has been used for several seasons by the Merchants' and Manufacturers' Association, is proving as successful this year as in the past. One-half of the fare of each Southern merchant who buys $1,200 worth of goods before Oct. 1 is paid. About 75,000 unique folders, giving all the details of the scheme, have been distributed through the south, Ohio, and Pennsylvania.

John F. Bishop, who pleaded guilty in the Criminal court, Wednesday, to the larceny of jewelry valued at $1,100 from Jacob Castelberg & Sons, was sentenced to one year in the penitentiary by Judge Dobbs, last Saturday. When he pleaded guilty Bishop, who is about 30 years old, stated he was employed as a salesman and as several customers who had signed contracts with him did not come up to their promises, he pawned the jewelry and paid on the bill in order to keep his sales up. The method kept getting him deeper and deeper in debt until a friend, he says, induced him to play the races and recuperate, but this last effort only made things worse. He stated he had not been benefited by a piece of jewelry he had taken. His young wife was in court and testified in his behalf. So was his mother, but she was so overcome by her son's position that she could not speak. Mr. Castelberg interceded in Bishop's behalf, hence a light sentence was the outcome.

### Jewelers' Gold Bars Withdrawn and Exchanged at New York.

*Week Ended Aug.* 12, 1905.

The U. S. Assay Office reports:

| | |
|---|---|
| Gold bars exchanged for gold coin | $249,369.94 |

## Trans-Atlantic Voyagers.

TO EUROPE.

J. Mayer, of Dreyfus & Mayer, New York, sailed to-day on the *Kaiser Wilhelm II.*

George Brabander, Toronto, Can., will sail Sept. 2, on the *Minneapolis.*

A. Henius, of the Bruhl Bros. & Henius Co., New York, sailed last Saturday on the *St. Paul.*

FROM EUROPE.

I. Guntzburger, New York, returned recently.

Edward Boote, New York, sailed last Saturday on the *Caledonia* from Glasgow.

M. Bauman, of L. Bauman Jewelry Co., St. Louis, sails from Europe, to-day, for home.

Mr. and Mrs. Samuel F. Sipe, Pittsburg, Pa., arrived last Tuesday on the *Kaiser Wilhelm II.* On the same boat was Prosper Clust, of Dieges & Clust, New York, with Mrs. Clust and Miss Adelaide Clust.

President Goode, of the Lewis and Clarke Centennial Exposition, Portland, Ore., has issued a statement showing his findings in regard to the recent complaints made against the Walter Reed Optical Co., which, it was alleged, had been charging more than a fair price for goods sold at the concern's booth on the grounds. In his decision President Goode holds that no fraud has been practiced by the company. Walter Reed, of the concern, has been engaged in the optical business in Portland for about 20 years.

Rogers, Whiteside & Blank.

### Involuntary Bankruptcy Proceedings Begun Against Harry Levinsohn.

Involuntary bankruptcy proceedings were begun yesterday against Harry Levinsohn, a jobber in jewelry and silverware, 39 Maiden Lane, New York. The petitioners were Harry Lehr, who holds a claim of $1,184 for merchandise sold since December, and Abraham Berrent, who claims that on Aug. 1 he loaned $100 to Mr. Levinsohn.

The charge is made in the petition that between Aug. 7 and Aug. 14, Levinsohn surrendered assets to the amount of $20,000, to favored creditors, on alleged antecedent indebtedness. It is set forth that the total number of creditors is less than 12. Leonard Brown is attorney for the petitioners.

Mr. Levinsohn, who is a young man, has been engaged in the wholesale business for several years.

P. C. Hall, Saybrook, Ill., has decided to leave that town and go to Denver, Colo.

P. M. Christenson, Exira, Ia., is erecting a new building at that place, and hopes to have it completed by September. The building will be occupied by Mr. Christenson as a first-class retail jewelry establishment.

## News Gleanings.

W. H. Jones, Belgrade, Mont., has discontinued business.

J. H. Childs has purchased the business of F. W. Thommee, Del Rio, Tex.

E. E. McNeal, Athens, Ill., has moved his stock into the Parish building.

A. W. Bluhm has taken charge of the store of C. G. Reim, New Ulm, Minn.

The store of Mrs. E. M. Anderson, Pensacola, Fla., is being entirely renovated.

John Jurgenson, Owatonna, Minn., was married recently to Miss Margaret Scheele.

O. A. Lindenmeyer, Sergeants Bluff, Ia., has bought the stock of F. D. Lantz, Sloan, Ia.

P. F. Sharick, Ashland, O., returned home last week from a business trip to Cleveland.

Wm. F. Tate has admitted his son as a partner in his jewelry business in Cranbrook, B. C.

W. C. Boggs, Fort Dodge, Ia., is moving his stock into larger quarters, which he is fitting up with new fixtures.

Charles H. Reynolds, Alpena, Mich., has considerably improved the exterior of his retail jewelry store on Second Ave.

Charles E. Crane, of Crane Bros., Lake City, Minn., has gone east on a business and pleasure trip. He will be absent about two weeks.

Jalbert & Farrington, Woonsocket, R. I., have erected a large new timepiece on the sidewalk in front of their store at 160 Main St.

S. W. Eckley, Peoria, Ill., who recently purchased the stock of A. J. Schifeling, 331 S. Adams St., that place, has begun to dispose of the stock at auction.

Announcement has just been made of the marriage of Wm. S. Pitt, Oelwein, Ia., and Miss Margaret Wood, of the same place. The ceremony took place July 24.

Walter Priebe has resigned his position with the L. A. Orr Co., Rochester, Minn., and will go to Spokane, Wash., where he expects to follow the same business.

Eleven watches, two dozen rings and several watch chains, besides a number of other small articles, were stolen recently from the store of S. S. Griffith, Conroe, Tex. There is no clue.

The jewelry store of S. D. Melick, Stroudsburg, Pa., was closed recently by the Sheriff on executions in favor of Mrs. E. P. Melick for $500; Geo. E. Dowling, $119, and Mrs. M. Moore, $100.

John Rhoads, a jeweler of Marion, O., who has been arrested several times for intoxication, was last week requested by the Mayor to leave town at once, or serve a sentence in the work house.

H. E. Cobb, who has charge of the jewelry department in the establishment of Westveer & Brenner, Waterloo, Ia., has been appointed local watch inspector for the Illinois Central Railroad.

The retail jewelers of Fort Dodge, Ia., last week closed their establishments one afternoon in honor of the presence of Gov. La Follette, of Wisconsin, who delivered an address at the Chautauqua.

Jacob Dannenbaum, Houston, Tex., has sold his business to P. C. Doehring. Mr. Dannenbaum was formerly in the employ of the J. J. Sweeney Jewelry Co. The new purchaser has made extensive improvements in the store.

Peter Lund, who for about 28 years worked as a silversmith, died recently in Laredo, Tex., aged 88 years. The deceased had fought against the Americans in the Mexican War, and later had aided the Mexicans in repulsing the French, and overthrowing the Maximilian government. Although he had at one time amassed a small fortune, he died destitute.

Charles E. Hight, Mount Pleasant, Mich., recently sold out to George A. Foland and Frederick Russell, who will continue the business under the name of Russell & Foland. Mr. Foland has been connected with Mr. Hight as chief clerk for the past five years. Mr. Hight intends to locate somewhere in the west in a climate which will be more conducive to his good health.

J. A. Brolin, a watchmaker of Braham, Minn., recently committed suicide in the jail at Mora, Minn., by hanging himself by a rope made from his shirt. Brolin had been on a spree and went to a dwelling where he opened fire on the members of the family, discharging 10 or 11 revolver shots, but without injuring anyone. One of the family managed to get away and ran for help. Brolin followed, but soon gave up the chase, returned and brutally beat an aged woman with the butt of the revolver. He was finally overpowered and placed in jail, but not until he had set fire to the house. It is supposed that a sense of what he had done came to him in jail and he proceeded to commit suicide.

The store of William J. Burkhardt, 308 E. 5th St., Dayton, O., was entered about

LEATHER

LARGE —AND— VARIED STOCK

WE SAVE YOU the time and expense of a trip to Europe. Right here we are displaying not only an impressive line of our own make, but also the best and newest imported effects made to order for us in accordance with our suggestions, in Europe. Ours is the handsomest and largest showing ever seen in this country.

To ensure prompt shipments, orders should be placed now, whether for immediate or future delivery. Trade conditions make it an advantage for customers to make provision for the season as early as possible.

**Gold Medal, Highest Award St. Louis, Mo., 1904.**

**P. W. LAMBERT & CO.,** 64-66 LISPENARD STREET, NEW YORK.

JAMES O'NEILL, 17 Thurlow Block, San Francisco, Cal. S. ABRAHAMS, 157 Hutcheson St., Montreal, Can.
WILL S. ADAMS, Palmer House, Chicago, Ill.

**JEWELRY STORE FIXTURES**

EXCELLENT DESIGNS, Good Honest Work, Moderate Prices.

**JAMES S. BUSH, Manufacturer, 189 BROADWAY, NEW YORK.**

a week ago by thieves, who stole $200 worth of jewelry. Entrance was gained through the front door by means of a skeleton key. The entrance is illuminated by a large electric light, but notwithstanding that fact no one noticed the work of the intruders. The local police department was rather severely censured for its laxity in reporting the crime.

E. A. Lees, Bellingham, Wash., has sold out

Sarah E. Swartz, Hughesville, Pa., died recently.

John H. Sutherlin, Ladoga, Ind., has discontinued business.

S. G. Schell, St. Thomas, Mo., is now at Meta, in the same State.

David G. Shaner, Mowcaqua, Ill., has sold out to Colbert & Tolson.

N. F. Stedman, formerly of Waveland, Ind., has moved to Ladoga, Ind.

The George W. Green Co., Brooklyn, Mich., has gone out of business.

Russell D. Bush, Ceresco, Nebr., has been succeeded by J. S. Livesay.

J. V. Kotas, Wilber, Nebr., is now located at Milligan, in the same State.

N. D. Randall, Evans City, Pa., has moved to Zelienople, in the same State.

Thurber Bros. have purchased the business of Earl R. Hout, Warrensburg, Mo.

George Prescott, Mexia, Tex., has failed. No particulars have thus far been received.

Carl H. Keuscher, Mahanoy City, Pa., died recently, and the store has been closed.

O. O. Simpson, formerly at Blackburn, Okla., is now at Ralston, in the same State.

J. B. Kimball has succeeded to the business of W. B. Kimball & Co., Waukesha, Wis.

Webster H. Barragar, Sheboygan Falls, Wis., will shortly retire from the jewelry business.

Eaton & Co., Allen, Mich., have dissolved, and the business will be conducted by Carp D. Eaton.

Henry Van Cleave, formerly of Russellville, Ind., moved recently to Ladoga, in the same State.

The firm of Silas P. Houser & Co., Lincolnton, N. C., moved recently to Rutherfordton, N. C.

Francis Wansky, Eureka, Cal., died recently, and the business will be continued by his son Francis Wansky.

The Hayes Jewelry Co., Norfolk, Nebr., has dissolved, and the business will be continued by Charles S. Hayes.

James Cramer, Clarinda, Ia., has admitted his son into partnership, and the firm style will be James Cramer & Son.

Mr. Huffman, of Collins & Huffman, Wellsburg, N. Y., has retired, and the business will be continued by Coley L. Collins.

The Brazeau-Hannon Jewelry Co., Grand Rapids, Wis., has been formally dissolved, and the business will be continued by E. A. Hannon on his own account.

Abraham Present, a Syracuse, N. Y., jeweler, has brought suit in the Municipal Court of that city charging David Grody, a pawnbroker, with the conversion of a diamond ring valued at $125. Present alleges he sold the ring on installments under a contract by which the title remained in him, and that the purchaser, after a payment of $17, pawned the ring with Grody. Grody, it is alleged, turned the ring over to a third party and Present now sues for its value.

# THE GIANT OF COLLAR BUTTONS

## IN QUALITY, IN SALES.

The Standard American Collar Button.

**Millions of Krementz One-Piece Collar Buttons made, and are sold all over the world.**

**WHY?** *Because* of their HIGHEST QUALITY, BEST CONSTRUCTION, GIVING THE MOST WEAR AND GREATEST COMFORT and their IRON-CLAD GUARANTEE.

To verify this we invite the trade to read **"The Story of a Collar Button, with Illustrations,"** which may be had **FREE** for the asking, and to try the experiment suggested on page 5 of that booklet, by which all may easily determine the exact amount of 14 K. gold in Krementz plate.

**Extract from "Printers' Ink," Nov. 23, 1898.**

The Little Schoolmaster now suggests, to every pupil in his class, to send a two-cent stamp to Krementz & Co., 49 Chestnut Street, Newark, N. J., and ask to be favored with a copy of their leaflet. "The Story of a Collar Button." Afterward, if any pupil will send to *Printers' Ink* another leaflet, new or old, that is half as good as this one, or that approaches it in excellence, the deserving student will be rewarded with one of *Printers' Ink's* souvenir spoons as an acknowledgment of his discovery and contribution. "The Story of a Collar Button" is the best piece of advertisement construction that has come to *Printers' Ink's* attention in the year of our Lord 1898.

**Should you wish to utilize this booklet to increase your collar button business, we will, on receipt of your order, print your card upon and send you a quantity of them.**

**The several qualities of Krementz One-Piece Collar Buttons are stamped as follows, ON BACK.**

Patent Sustained by United States Supreme Court.

**Quality and Construction have made Its Reputation.**

**All Krementz Collar Buttons—of every quality—are manufactured by**

# GORHAM SILVER

## TO THE VICTOR THE SPOILS!

¶ Not the least important feature of modern sporting and athletic meetings is the prize which rewards the successful contestant. On the choice of this, much care and attention are always bestowed.

¶ The Gorham Manufacturing Co.'s unrivalled facilities for the designing and fashioning of such special pieces, ensures an absolutely complete stock of trophies, appropriate to any occasion.

¶ In addition to an unrivalled assortment of Solid Silver Punch Bowls, Loving Cups, Vases and Centre Pieces, attention is especially directed to an exclusive showing of attractive reproductions of Old English Black Jacks. The bodies of these are of solid leather, lined with red copper, the mounts of Sterling Silver, including shields for monograms or inscriptions. Despite their careful workmanship, the prices are most moderate.

| The Principal Precious Stone Mines of Siam | 98 |

IN his recent speech before the Republican State Convention in Virginia, Secretary Shaw of the Treasury Department is quoted as citing the establishment of the diamond cutting industry in this country as one of the effects of the present Dingley Tariff law, and in the course of his speech is quoted as saying that the admission of rough diamonds free and the present duty of 10 per cent. on cut stones is giving work to 2,000 diamond cutters. It is unfortunate that Secretary Shaw did not study the figures of his department and see that the 10 per cent. duty on cut stones with rough stones on the free list, has been the schedule of all recent tariff acts with the exception of the Wilson bill, for he would have learned that it was the silly provision taxing cut diamonds at 25 per cent. with 15 per cent. duty on rough, enacted by Congress in the Tariff Law of 1894 that established the diamond cutting industry in this country at the same time that it established another —the gentle art of smuggling—to an extent that almost abolished all revenue derived from precious stones and came near putting the legitimate importers into bankruptcy. The Secretary should also know that the number of diamond cutters now at work hardly exceeds 500. The establishment of the diamond cutting industry in this country is a dangerous example for either Republican or Democratic politicans to cite as proving the beneficial effects of their existing or proposed tariff policies.

**A Decidedly Favorable Showing.**

AS far as statistics in all branches of the industry can show, the past year in the jewelry trade has been one of progress and development. This applies practically to every one of the many branches which go to compose this art industry, for though some lines have progressed more than others, all show a healthy tone, and comparisons with previous years are in none, unfavorable.

The record breaking figures of the statistics of the importations of precious stones at the port of New York, published July 5, showed, as nothing else could, the great demand that has existed in this country for fine gems of all kinds, and the figures of the importations for the entire year, made public by the Treasury Department, last week, are also interesting as they show this in somewhat greater detail. In the rough diamonds including stones for mechanical purposes, such as glaziers' diamonds, watch jewels, etc., the increase in the amount imported was from $8,776,000 in the fiscal year 1904, to $10,391,000 in the fiscal year just ended, while the increase in cut diamonds was from $10,028,000 to $17,019,000 in the same periods. In other precious stones rough or uncut there was an increase from $89,490 in 1904, to $278,700 in 1905, while in cut precious stones and pearls there was an increase from $4,070,000 to $5,625,000. In manufactures of gold and silver there was a decrease from $2,049,000 to $1,304,000, which shows a decided advantage for this country inasmuch as there was less competition than usual by foreigners, and the same is true to some extent of clocks and parts thereof which decreased this year from $621,000 in 1904 to $487,000 in 1905. In watches, materials and movements we find a slight increase in importations—from $2,369,000 in 1904, to $2,480,000 in 1905.

The American export trade in jewelry and kindred lines, while not very prosperous of recent years, also shows a slight increase during 1905. In clocks and parts thereof we exported $1,192,000 in the past year as against $1,186,000 the year before; in watches and parts thereof we exported $1,124,000 in the past year as against $1,095,000 in 1904, while jewelry and manufactures of gold and silver show total exports of $1,419,000 for 1905, as against $1,366,000 in 1904, and plated ware shows $703,783 for 1905 as against $693,618 for 1904.

As far as the United States merchants' control of the Canadian market is concerned the figures just published by the department of Trade and Commerce in Canada show that the preponderance of American goods in the clocks, jewelry and manufactures of gold and silver imported into the Dominion remains as great in proportion for the 11 months ended June 1, last, as during the same period the fiscal year of 1904. Inasmuch as the total importations of clocks and jewelry into Canada showed a slight decrease in amount, it is not surprising that a very slight decrease is to be found in the amount of American goods included in the figures. In manufactures of gold and silver, where a slight increase was shown, a similar increase was indicated in the amount of American goods imported. The figures for these 11 months show that out of $1,116,176 worth of clocks and watches taken by Canadians, our manufacturers supplied $835,570 as against $33,150 by Great Britain and $247,456 sent by all other countries. Out of the total importations of jewelry $767,175 our manufacturers supplied $609,745 as against $73,748 from Great Britain and $83,682 from all other countries. In the manufactures of gold and silver out of $455,616 our manufactures supplied $294,196 as against $103,040 from Great Britain and $58,380 from all other countries.

**Jewelry Failures During July.**

COMMERCIAL failures generally in all lines throughout the United States during the last month showed a big decrease, both in number and in defaulted indebtedness, over July of the preceding year, as is well brought out by the statistics compiled for *Dun's Review*. According to that authority the total commercial failures of the month were 1,786, as compared with 1,907 in July a year ago, the liabilities amounted to $6,100,000, as against $8,800,000 for the year before.

An equally good showing is made by the figures for the jewelry trade. According to this authority there were but eight failures among jewelers last month, and the total liabilities were but $11,495, or an average of $1,412. How much below the average this falls may be seen from the fact that there were 12 failures in July, 1904, with liabilities of $49,377; nine failures in 1903, with liabilities of $31,922; nine failures in 1902, with liabilities of $53,257; and six failures in 1901, with liabilities of $50,795.

## New York Notes.

M. B. Klein, of Klein & Eisenstein, will spend August at Arverne, L. I., with his family.

Luther Hyde, manager of the Maiden Lane store of Reed & Barton, is enjoying a couple of weeks' vacation.

One of the members of the August Grand Jury, which began its labors last week, is Gyulo Armeny, diamond importer, 90 Nassau St.

Leo Wormser, of the Julius King Optical Co., will return about Labor Day from an extended vacation passed amid the cool breezes of Canada.

Charged with abandonment of his wife, Rudolph Jacobs, a clockmaker, was arrested last week in Brooklyn, and held in $500 bail. He went to jail as he was not able to furnish a bond.

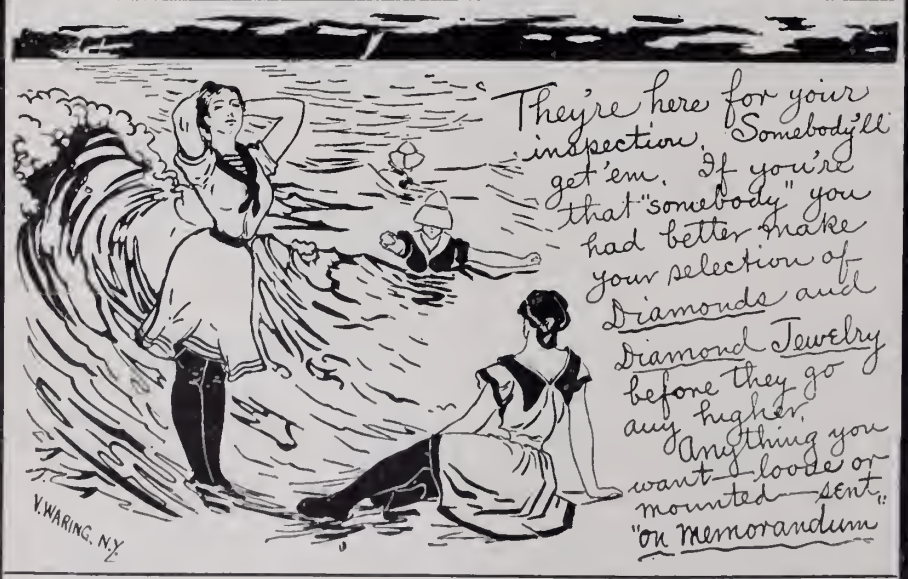
Miss Gertrude Barron, who for some time was associated as bookkeeper with Bruhl Bros. & Henius Co., was married recently to R. Noel, and sailed with her husband on the *Kronprinz*. Mr. and Mrs. Noel will reside abroad.

Creditors of Goldman & Miller, umbrella handle manufacturers of 100 Center St., whose financial difficulties have recently come to the surface, are outside of the jewelry trade, the debts being mostly on notes and for material furnished.

Samuel Orbach, the bankrupt jeweler of Utica, N. Y., was arrested in New York one day last week, and taken back to Oneida County, where he will be held for trial on the charge of perjury, for which he was indicted. Orbach came to New York after giving bail, but one of his bondsmen wishing to withdraw from the bond caused the jeweler's rearrest.

Several charges of larceny were made last week against a man variously known as Henry Meigel, or Henry Joeckel, or Louis Stutz, who was arraigned in the Lee Ave. Court, Brooklyn, and held for further examination. One of the complainants is Otto Ransweller, Graham Ave., who says that he accepted a check for $90 in payment for a small article of jewelry, and paid over the change to the prisoner. The check proved worthless.

It is expected that early in September reports will be ready on the part of sub-committees appointed by the Executive Committee of the National Association of Cut Glass Manufacturers. Among the subjects which this committee is considering are questions in relation to price standards, discounts and other selling terms. A general meeting of the organization will probably be held soon for the purpose of receiving these reports and acting upon the recommendations.



George Schilling, who was city salesman in charge of the New York office of the Bristol Mfg. Co., at 3 Maiden Lane, died recently after a lingering illness at his home, 1301 Putnam Ave, Brooklyn. He was 29 years old, and had been employed by houses in the Maiden Lane District since his 15th year. He was held in deserved respect by all who had been associated with him as employers and fellow employes. A wife and two infant children are bereaved by his death. A subscription for their benefit has been started in the trade, and is in charge of John R. Greason & Son, 22 John St., who will receive any money that is sent to them, and turn it over to the widow by Sept. 1. It is believed that an amount will be collected that will be of real aid to the family.

According to a story related in the Harlem Police Court last Thursday, Samuel Liebermann, a jewelry workman of 25 E. 110th St., recently won about $10,000 playing pinochle with Maurice Jasnogrodsky, a real estate dealer, who previously was known as the "Pinochle King of Harlem." The real estate man on the last day they played lost $300, and after accusing the jeweler of cheating, caused his arrest. The judge said that there was no evidence of wrongdoing for which he could hold Liebermann.

Diamond importers and gem experts have had their attention called to an article written by E. L. Hews, of Tonopah, Nev., and published in several of the Western papers, the subject being, "Why I believe there are more diamonds to be found in Nevada than in South Africa." He says that he has found in the Tonopah district many broken stones lying near the surface and has also found the blue matrix with which diamonds have been associated. He believes that at a greater depth are wonderful supplies of the stones. He says, in justification of his prediction, that the carbonized area of Nevada is larger than any other the world knows at present, and the original volcanic disturbances in the State are everywhere in evidence. The experts in this city, including G. F. Kunz, of Tiffany & Co., incline to the opinion that Mr. Hews will be disappointed in his expectations. They say that no discoveries thus far made indicate that diamonds will ever be found in Nevada in sufficient quantities to have any commercial importance.

Since the discovery in Philadelphia that an employe of the Keystone Watch Case Co had been stealing gold clippings and selling them to the "mint," there has been some talk in the trade as to why more strict regulations are not enforced on the part of "Uncle Sam." A reporter called one day this week at the United States Assay Office in New York and inquired what restrictions, if any, are enforced to prevent dishonest people from using the mint as a "fence." One of the officials said to THE CIRCULAR-WEEKLY reporter: "Most of the men who come here with gold and silver bullion are known to us, as they come frequently on the same errand, and we learn that they are regularly engaged in legitimate business; but new accounts are constantly being opened. If a man presents some gold or silver to us and there is nothing suspicious about him or the metal we have no reason to inquire as to how he acquired possession of it. We would be going outside our instructions to do so, and I do not believe we would have any right to make such an investigation. Of course, if there is something on the surface that is suspicious we can investigate, but ordinarily we take the metal as it is offered. No change in our policy will be made, unless different regulations come to us from Washington. If the authorities there desire to send instructions requiring more circumspection on our part in accepting goods, we, of course, would be guided accordingly. When we take gold we assay

it, and return the value later in either bars or coin, as the owner may select. In the case of silver we convert it into bars and return it to the owner in that form. If the owner is a manufacturer he may use the bars in his business, and if not he may sell them."

Edward Boote sailed Saturday from Glasgow on the *Caledonia*, after visiting the English china and glass works, which he represents in New York.

In the note last week telling of the alterations at 1395 Broadway, an error was made inadvertently referring to Henry Silberfeld & Co. as the owners. Mr. Silberfeld is in business alone at this address.

The sympathy of their friends in the trade is extended to Laubheim Bros., 65 Nassau St., owing to the death of their sister, Mrs. H. Gross, which occurred last Sunday at Atlantic City. The firm's office was closed yesterday, the day of the funeral.

Elizabeth Adelia Conklin, widow of Samuel H. H Penton, who was for a number of years a watch case manufacturer in the Maiden Lane district, died last week at her home, 68 Hancock St., Brooklyn, at the age of 68 years. Mr. Penton died in 1900.

In rebuilding its passenger terminal in Hoboken, the Lackawanna Railroad contemplates the construction of a central tower 225 feet high with a large clock, whose faces will be lighted by electricity at night, making it one of the sights around New York.

Chas. Foehl, manufacturer of jewelers' and opticians' tools at 95 Lorimer St., Brooklyn, reported to the police Saturday night that during the absence of the family from his residence, 351 Flushing Ave., his housekeeper, Catherine Ammon, had committed suicide by cutting her throat.

David Lahey, a 22 year old burglar, who was serving a term of one year in the Kings County Penitentiary for breaking into the jewelry store of Levy & Dreyfus, 495 Fulton St., Brooklyn, and stealing a quantity of jewelry, committed suicide last Saturday by strangulation. In this and other burglaries Lahey was associated with a negro named Matthew Butler, who is now serving a four-year term in Sing Sing.

Seven gold watches and 16 diamond rings were found in the possession of a man arrested for intoxication several nights ago. He said that he was a jewelry salesman, that his name was William Dwyer, and that he lived at 414 W. 42d St. The police gave him his liberty after warning him that even Broadway is not a safe place for a man loaded with wine and diamonds. Several robberies have occurred on that part of the street where he was arrested.

Jewelers and opticians joined with other merchants in Grand St. in holding a mass meeting last Friday night to protest against the condition in which the street has been placed, as a result of excavations conducted by the Metropolitan Street Railway Co. Some of the business men on the street say that because of the earthworks, thrown up in front of their stores, their business has been practically at a standstill. One of the daily papers gave interviews with a number of the merchants. L. Litke said that his jewelry and clock business had been injured to a considerable extent. I. Weinstein said that while the wholesale trade was not affected yet his retail jewelry business certainly suffered. Joseph Zweigel said that when there are no cars there are no customers, and this sufficiently indicated that his jewelry business has been depressed. At the Peerless Optical Co.'s store the statement was made that hardly any of the uptown customers now call. N. Cohen, optician, said that not 1-10th of the old customers now trade with him. The railway company has promised to expedite the work so that the car service may be resumed at an early date.

The executive offices of the J. D. Bergen Co., 38 Murray St., New York, are to be moved to the factory building at Meriden, Conn. Offices and works were for 20 years located together, and about eight years ago the removal of the former to New York took place. President J. D. Bergen and his associates recently concluded that advantages will be obtained by going back to the old order of things, thus concentrating the business. Mr. Bergen, who has been living in New York with his daughter and his son, Tracy Bergen, will again take up his residence in Meriden. R. H. Keller, the New York office manager, will also make his headquarters at Meriden. The Murray St. quarters will not be abandoned by the company, but will be used for show rooms, and will be in charge of Charles Bergen, a brother of the president of the company. The changes will be made next month.

Burglars almost succeeded in gaining an entrance to Harry Zimmerman's store, 390 Columbus Ave., New York, last Friday night. They took out a pane of glass from a window, which enabled them to drop from the street into the cellar. Here, secure from observation, they were enabled to work with an auger and a small saw, intending to cut out a square in the floor above them. They selected a spot directly under one of the jeweler's counters and were almost ready to remove the wood preparatory to going up into the store, when

their plans were spoiled by May Zimmerman, the jeweler's niece. It happened that Miss Zimmerman, who also acts as his cashier, while on her way home that night, decided to stop into the store. Her uncle had been ill at home for a day or two, suffering from the effects of the heat, and she felt a special responsibility to see that everything was all right in his absence. While she stood for a moment in the store she caught a glimpse of the auger sticking up through the floor a few inches from her feet. With a scream she rushed out of the store to find a policeman, and while she was looking up and down in the hope that an officer would appear, two men, one of them apparently a negro, ran out from the shadow of the building, and hurried towards the grounds of the American Museum of Natural History, which is almost opposite the store. Policeman Cavanaugh, who happened along just then, gave chase, but the men made their escape, and although Miss Zimmerman gave to the police as good a description of their appearance as she could, no arrests have yet been made.

Theodore T. Goerick, instructor in metal chasing, has been added to the staff of teachers at the Pratt Institute, Brooklyn.

N. Langford, watchmaker at 51 Maiden Lane, has removed to 2665 Broadway, near 101st St., where he will continue a repairing business.

The American Jewelry Co., doing a jobbing business at 296 Church St., has dissolved and the business will be continued by Max Barish under the old style.

Schwartz Bros., 1368 Broadway, near 37th St., reported to the police Wednesday, that thieves had broken into their store the night before, and had taken away jewelry valued at $1,000. The store is between two places of business which are open all night, and faces the Marlborough Hotel. The burglary was committed by removing a heavy iron gate in front of the window, and breaking a hole two feet square in the plate glass window. The police were surprised when they were notified that burglars so successfully operated in the heart of Broadway, where people are passing at all hours. The police say that, judging from the appearance of the plate glass window, the thieves used tape or putty, tracing an outline of the hole they intended to make, and then removed the glass by breaking it with a hammer or other heavy instrument. The thieves took from the show window gold watches, gold rings, brooches, pencils and other jewelry valued altogether at $1,000. This is the fourth time in five years that burglars have entered this store.

Several youths recently broke into the store of Hyman Fredericks, 1514 Third Ave., and stole rings, brooches, bracelets and other jewelry valued at several hundreds of dollars. The police were notified and detectives Regan and Wildnauer, of E. 88th St. Station, were assigned to find the burglars. They noticed that several young girls in the Yorkville district wore considerable jewelry, and Regan, becoming acquainted with one of the maidens, learned where she got a handsome pair of bracelets. She said that Edward Stevenson, 14 years old, of 179 E. 85th St., had made her a present of the articles. Stevenson was arrested, and after learning that the girl had been telling things he confessed that he and several others had robbed the jewelry store. He also told where a portion of the loot was concealed, behind two loose bricks half way up the dumbwaiter shaft in the house where he lives. Other arrests were then made as follows: Wm. Oates, 16 years old, 214 E. 84th St.; James Sutherland, 18 years old, 163 E. 65th St., and Michael Glihn, 17 years old, 1555 Third Ave. It is said that the four youths had been lavish in their gifts of stolen jewelry to the girls in their part of the city. The prisoners were held by Magistrate Steinert, in the Harlem Court, in $2,000 bail each for trial. Stevenson was sent to the Children's Society.

M. Goldofsky has removed his jewelry stock from Houston to Galveston, Tex.

Nathan Cohen, of Cohen Bros., Allentown, Pa., who has been sojourning at Atlantic City, N. J., is expected home in a few days.

### Bankruptcy Proceedings Instituted Against Jacob H. Loevenhart, St. Louis, Mo.

ST. LOUIS, MO., Aug. 14.—Involuntary bankruptcy proceedings have been instituted in the Federal courts here against Jacob H. Loevenhart, 814 Olive St. Loevenhart, according to the petitioners, is conducting his business under the style of the Remoh Jewelry Co., making a specialty of Remoh diamonds.

The petition was presented by the National Jewelry Case Co., of New York; Samuel Epstein, of St. Louis, and the Star Publishing Co., publishers of the *Star-Chronicle,* an afternoon paper, also of this city. The claim of the National Jewelry Case Co. is for $280.50; that of Mr. Epstein $300, and that of the *Star* $20, for advertising.

This business was started some years ago, at 714 Olive St., and on May 1, 1899, was moved to the present location. A lease was taken until May, 1905, at an annual rental of $4,000. Loevenhart also conducted a store at Louisville, Ky. He asked for no credit in this city, but kept an account with the Union Trust Co.

### Death of Henry N. Scidmore.

NORTHVILLE, N. Y., Aug. 9.—Henry N. Scidmore, who conducted a jewelry store here for about 40 years, died at the home of his daughter in Johnstown, N. Y., Sunday, aged 75 years. He had been suffering from paralysis.

About two years ago Mr. Scidmore moved from here, where he had been a prominent and highly respected resident, to Johnstown. He is survived by three daughters and one brother.

### A Recent Exhibit of Watchmen's Clocks.

THE illustration herewith shows the booth of the Newman Clock Co., Chicago, in which the concern exhibited its various styles of watchmen's clocks at the recent exhibition of the American Railway Appliance Association held at Washington, D. C.

EXHIBIT OF NEWMAN CLOCK CO., AT THE AMERICAN RAILWAY APPLIANCE EXHIBITION, HELD AT WASHINGTON, D. C.

The exhibits comprise not only the stationary clocks, but also the regulators for keeping a record of watchmen and employes.

The Eagle Jewelry & Drug Co., Winnemucca, Nev., last week, lost considerable stock by a fire which swept over that place, doing damage amounting in all to about $80,000.

According to a report of the German Consul at Paris, cases and works for watches and clocks to the value of $3,863,750 were imported into France from Germany and Switzerland in 1903. The manufacture of French watches, which is chiefly carried on in the department of Daubs, employs over 10,000 workmen. American manufacturers of cases and other parts of watches should give attention to this French market, as they surely can, in some lines at least, successfully compete with the Swiss and Germans.

## Optical Notes and Briefs.

T. F. Farrell, optician, Marysville, Cal., has just returned from a short visit to Oroville.

O. O. Osborne, Lodi, Cal., was a recent San Francisco visitor, calling on the supply houses and making extensive selections for his stock.

Dr. J. C. Coomes, an aged optician of La Crosse, Wis., who recently attempted suicide at Preston, Minn., on account of despondency, died about a week ago, at the poor house, in Preston.

J Jessop, senior member of J. Jessop & Sons, San Diego, Cal., is taking a month's vacation, dividing his time between the Yosemite Valley and the Lewis and Clark Exposition, at Portland, Ore.

Dr T J. Randall, optician, Los Angeles, Cal., is now in San Francisco, securing optical supplies and making the acquaintance of the dealers in this line of merchandise. Dr. Randall is on his way home from the Portland fair.

Forest Nelson, son of C. W. Nelson, an optician, was drowned while swimming in the West Bathhouse, Kansas City, Mo., Aug. 8. He was formerly in charge of the optical department of the Emery, Bird, Thayer Dry Goods Co., that city.

Final arrangements are being made by President Bestor and Secretary Sumeriski, of the Rochester Optical Society, Rochester, N. Y., for the outing of the organization at Newport, Saturday, Aug. 19. A program of sports has been arranged and a baseball game is also listed. The optometrists will be given a ride on the bay and lake and in the evening will take the steamer for Sea Breeze and Ontario Beach.

H. L. Holling, with the California Optical Co., San Francisco, Cal., will leave in a few days for a trip to Southern Oregon. Much of his time will be devoted to hunting and fishing, as the deer hunting season will soon be at its height in that section. C. L. Luckey, with the same concern, is spending an enjoyable vacation in the Southern part of the State.

The Southern California Optical Society was organized at Burbank Hall, Los Angeles, Cal., recently, and the following officers were elected: President, L. Apffel; vice-president, J. W. Fuller; secretary, T. N. Dychus, and treasurer, J. C. Fleming. The society will endeavor to enforce the law requiring all opticians to register.

An action has been taken by Elisha Morell, optician, against the Montreal Optical Co., and Samuel Grant, alleging that the defendants are conspiring together to refuse to sell him optical supplies and instruments, in order to ruin his business and prevent competition. The plaintiff's action involves a legal question as to what constitutes a combination in restraint of trade. In the present case the declaration is filed that there is a conspiracy between the wholesale dealers above mentioned and Mr. Grant to prevent the plaintiff buying the necessary instruments, and, that, by reason of defendant's action, he has been unable to carry on business and has suffered a damage in the sum of $5,000. Mr. Morrell states that the defendants would not sell anything to him, in spite of his offer to pay cash. A further action is taken against Prof. Grant, individually, in which it is alleged that by an advertisement in the papers, the plaintiff is described as a charlatan, and the quality of his goods is decried. The plaintiff, therefore, asks $500 damages.

Members of the Ohio State Board of Examiners, recently appointed by the Ohio Opticians' Association with a view to promoting the efficiency and knowledge of opticians generally throughout the State, held a consultation at Dayton, last week, and decided that the first examination shall be held some time during February or March, 1906. This is the first effort at anything like State supervision. The committee has selected five books, and to all members of the association who will simply read them through will be given a "reader's diploma," under the seal of the State association. Those who desire may study them and take the examination next year, and an average of 70 per cent. in answering the questions of the examining board will entitle them to a student's diploma. F. W. Wallis, 5 N. High St., Jas. B. White, of the White-Haines Optical Co., and J. C. Eberhardt, constitute the board.

John Hutchins was arraigned in the city court, Bridgeport, Conn., Wednesday, charged with stealing a $2,500 automobile, belonging to E. H. H. Smith, president of the E. H. H. Smith Silver Co. Hutchins was discharged, the case against him having been dismissed, owing to the laxity of the statutes in this regard, it having been decided by the court that the prosecution could not be pressed, inasmuch as the accused had returned the machine.

## Boston.

Daniel Wetzler, a salesman in the employ of J. S. Round & Co., this city, who was arrested a short time ago on the charge of peddling jewelry without a license at Atlantic Mill Gate, Lawrence, Mass., has been discharged, his attorney affirming that the Court could not convict him, as the evidence showed that he merely took orders for the samples which he carried and displayed.

Judge Barker, of the Supreme Court, on Friday last, found George E. and Guy C. Stillings, who have figured in court proceedings considerably during the past six months in connection with the affairs of the Preferred Mercantile Co., guilty of contempt of court. They were each sentenced to serve one year in the county jail. Disobedience and evasion of the order of the court, directing them to turn over all property of the company to the appointed receiver, brought them before the court on the contempt charge.

Alfred A. Linscott, Quincy, the retail jeweler who was recently charged with the larceny of watches and jewelry left with him for repairs, was before the court in Quincy again Thursday, charged with larceny of more than $100 from Patrick Fleming in December, 1903. It is stated that Fleming gave Linscott $1,000 prior to a trip abroad to purchase for him a draft upon a foreign exchange; that Linscott failed to do so; that he agreed to make restitution and has paid only $400. Fleming wants the balance. Linscott was held for trial Aug. 30.

IRONS & RUSSELL,

The name that is synonymous with

EMBLEMS.

We make only the best in **PINS, BUTTONS AND CHARMS, Solid Gold and Rolled Gold Plate.**

Also **"20th CENTURY" GOLD SHELL CHARMS. The nearest approach to a gold charm possible.**

## Philadelphia.

Wm. J. Brand, of M. Sickles & Sons, is enjoying a holiday sea voyage to Boston.

Mr. Leach, of Robbins & Appleton, New York, made a thorough canvass of the local trade, last week.

F. B. Wathier, 405 Broadway, Camden, engaged last week the services of John Warner as watchmaker.

Wm. Williams, with C. H. Byron, 735 Sansom St., spent the week at Avalon, N. J., on a pleasure trip.

Al. Gallischick, watchmaker for Jas. M. Parker, Jr., 116 S. 12 St., has returned from a vacation to Atantic City.

Mr. Klaussman, of the jewelry department of N. Snellenberg & Co., sailed, last week, for Europe, to purchase goods.

E. M. Bracher, 929 Chestnut St., departed last week, on a trip through the South and West, not to return until September.

Fred. Scheuler, president of the Philadelphia College of Horology, left the city, Friday, for a vacation trip to Boston by sea.

T. J. Mooney, an influential member of the Jewelers' Club, has given up his business in this city and removed to Washington, D. C.

E. E. Dale, watchmaker, formerly with Fred. Scheuler, has accepted a position with F. C. Bolte, Jr., 912 Atlantic Ave., Atlantic City.

C. F. Weiss, the Lilliputian watchmaker, with Lit Bros., and known as the "littlest watchmaker," is spending a holiday at Atlantic City.

E. J. Weider, Jr., Pennsburg, Pa., was a visitor to the Sansom St. trade, last week, and was welcomed by his old associates in business here.

A. J. LeJambre has just returned from a pleasant fishing trip on Chesapeake waters. He was the guest of the Messrs. Eisenlohr, on their handsome private yacht.

David Berry, formerly in business for himself, on Moyamensing Ave., but later with the old firm of H. Muhr's Sons, has opened up a retail store at Seaford, Del.

J. L. Clark, refiner, smelter and dealer in old gold and silver, removes in September, from 727 Sansom St. to 805 Sansom St., where he has quarters better adapted to his business.

John Lang, diamond dealer and proprietor of the handsomest jewelry store in Atlantic City's Boardwalk, is reported to be critically ill, at his home, in this city, threatened with typhoid fever.

Improvements and extensions demanded by an increasing volume of business are being made to the factory under the management of Russell Bros., of the wholesale establishment of M. Sickles & Sons.

Philadelphia jobbers were kept busy, last week, explaining to watchmakers the reason for an all round increase in watch glass prices. The manufacturers' advance was promptly followed by a jobbers' advance.

Max Einhorn, head of the watch repair department of M. Sickles & Sons, returned last week, from his vacation, but limping, as the result of injuries sustained by being in a runaway accident in Worcester, Mass.

The stock, fixtures, good will, etc., of the business of the late Henry Euler, 716 Sansom St., which has since his death, last Fall, been conducted by his brother, is to be disposed of at public auction some time next month.

Cornelius O. Nathans, one of the oldest pawnbrokers of the city, died, last week, at his Summer cottage in Atlantic City, from a stroke of apoplexy. The pawnshop at 200 N. 9th St. was established in 1830, by his grandfather. He succeeded his father, Moses Nathans, in the business. He lived at 614 N. 16th St.

Confessing his guilt to the larceny of 1,000 pennyweight of gold from the Keystone Watch Case Co., Isaac Andres was sent to the county prison for a year, by Judge Andenried, last week. Andres had been an old and trusted employe of the company. He stole gold in small quantities and melted it down. As bullion he and his father sold it to the Mint. His father, E. B. Andres, of Erie, Pa., an old soldier, was arrested for receiving the stolen goods from his son but the evidence against him being very weak the case was not pushed and he was acquitted of the charge.

The Philadelphia Jewelers' Club gives today, its annual mid-Summer clambake and outing and everything points to a most enjoyable time for the 200 odd guests who have responded to the invitations. This year the clambake will be given at Bustleton, at an old farm house. A specially chartered steamer will carry the club members and their friends from the city up the Delaware to Bustleton. A band of music has been engaged to enliven the occasion and the same toothsome sea food will be served by the caterer who arranged last year's clambake at Lincoln Park. The event this year has been arranged largely by Joseph Cadwallader and William H. Long. The festivities will be fully reported in the next issue of The Circular-Weekly.

Reed & Barton, last week, bought several houses and parcels of land adjoining the factory on Danforth St., Taunton, Mass., to allow for a large future extension of the plant and for better precaution against fire.

H. G. Earley, Northville, N. Y., was recently swindled by a sharper who got the better of many people in that vicinity. The man represented himself to be a school teacher, and purchased a watch, for which he gave a check that afterwards proved worthless. The watch had an 18-size movement, 17 jewels, number 1,833,322, and a filled case, 3,225,575. The swindler was about five ft. 8½ inches in height, quite stout, weighed about 200 pounds and wore a straw hat and light suit.

## Pittsburg.

Samuel F. Sipe returned last week from his trip to Europe. He was accompanied by his wife.

S. F. Roberts has gone to Shelter Island, Long Island, with his family, to spend the remainder of the Summer.

The following out-of-town merchants visited Pittsburg, last week: Henry Ziliken, Wellsville; E. A. Bloser, New Kensington, Pa.; F. H. Hayes, Washington, Pa.; Charles H. Honess, Asheville, N. C.

According to present arrangement the watch engravers employed in the watch shops at Canton, are to be given the place of honor in the Labor Day parade, to be held in Pittsburg, Sept. 4. A large number of men will come here from Canton.

An offer of $300,000 has been made for the property occupied by J. C. Grogan & Co., Fifth Ave. and Market St. The Grogan firm has a lease on the building, which runs for some time. The price offered is higher than any previous price offered for property in that vicinity.

A unique letter was received by the George B. Barrett Co., last week, from Richard Robinson, of the H. F. Barrows Co. He enclosed clippings from Japanese and Russian papers, announcing that he had a matter of great interest to unfold to the members of the Barrett firm, which the clippings would explain. The Barrett's are looking for interpreters.

Two women who claimed to be agents for Rogers & Bro., and who said they were selling silverware, but, who are believed to be impostors or thieves, caused much excitement here, last week, by renting a room in a private house for several nights and then passing a lot of property out of their bedroom window at 12 o'clock at night to male accomplices. They fled when their work was discovered.

A man who gave his name as Samuel Fertile, arrested by Detective George Cole the other day, had in his possession 10 watches and 16 gold rings, one of which contained a two-carat diamond. At the time of his arrest Fertile was trying to dispose of his jewelry among the residents of Lawrenceville. He is being held pending an investigation and in the hope that some jewelry concern may be able to identify the property.

Geo. Smith, alias Howard Hall, was captured in Graf & Niemann's building, Sunday, by police officers after seven hours' search of building. Smith had packed large quantities of silverware and other stock to make away with them. He had removed his shoes and coat and secreted himself under a stairway on the second floor, where found. Two accomplices of the prisoner escaped. The robbery was discovered by the porter of an adjoining store where thieves had knocked the combination off the safe to blow it.

G. Harvey Wattles, a well-known jeweler, will probably be made the defendant in a suit, which, it is alleged, is to be entered against him for maintaining a rooster, which a Mrs. Mary B. Lane alleges disturbs her rest by its early crowing. The matter has attracted considerable attention, and has been written up in the newspapers. Mr. Wattles naturally intends to protect the rights of his bird. No suit has as yet been entered, but the attorney for Mrs. Lane, to whom she has made complaint, says that he will file a bill to restrain the jeweler from maintaining what he terms to be a private nuisance.

Oliver K. Bear succeeds Eskridge L. Bear, at Allegheny, Pa.

The fourth trade excursion of the Merchants' and Manufacturers' Association was run last Thursday and Friday, when 129 merchants made a tour of the Monongahela valley on the steamer *Island Queen*. The vessel went up the Monongahela river as far as Brownsville, 54 miles from Pittsburg, stopping at all important points. The association carried its own band and caterer. The party stopped at hotels at Brownsville over night, returning to Pittsburg Friday night. Among the local jewelers who took part in the excursion were: Henry A. Barrett, of the George B. Barrett Co., and H. M. Ward, of the Heerren Bros. & Co. The association will tour eastern Pennsylvania next October, going as far East as Huntington, Pa.

A. J. Heiman, Barberton, Ill., is building a two-story brick block on Tuscarawas Ave. When completed his jewelry store will be situated on the first floor and the second floor will be rented out in offices.

At a recent meeting of the Board of Trustees at Saratoga, N. Y., a petition was presented, signed by the local jewelers, asking that the board take measures in regard to the peddlers of cheap jewelry and optical goods, who frequent the sidewalks of that town. It is expected that action will be taken at an early date.

## North Attleboro

W. H. Bell and family are at Nyatt.

William Chisholm has returned from a trip to Newport News.

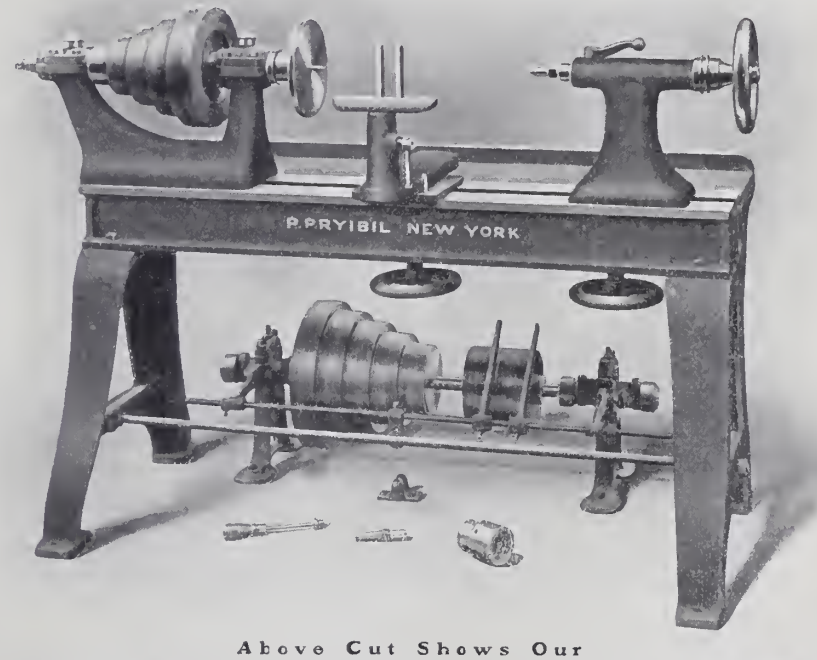
Ira Richards returned, Friday evening, from a business trip to Boston.

John McMillan is home after a trip in the interests of C. Ray Randall Co.

Frank Maintien, of Maintien Bros. & Elliott, is erecting a cottage house.

Work was resumed at the factory of W. H. Bell & Co., Monday, after a shut-down of one week.

George Semple, New York representative of the W. & S. Blackinton Co., is spending a few days at Cottage City.



Mr. and Mrs. Theron I. Smith left, Thursday, on a trip to various places about Matunuck. The journey was made by carriage.

A new rolling mill has been installed in the factory of R. Blackinton & Co. It is the largest in town and will be used to roll silver.

The factory of the H. F. Barrows Co. closed Thursday for the rest of the week. Louis D. Barrows, of this concern, is spending his anual vacation at Wareham, Mass.

William Baldwin, assistant foreman at the T. I. Smith Co. factory, was badly injured last week. A heavy roll of stock dropped on his right foot, breaking a bone and causing severe bruises.

C. B. Warner, Tuscola, Ill., has sold out his jewelry store to J. Homrighous, Arthur, Ill.

Vol. LI. CHICAGO, WEDNESDAY, AUGUST 16, 1905. No. 3.

## Chicago Notes.

L. A. Pickard is on a vacation in Wisconsin.

Frank Jansen, with the Darche Electric Clock Co., is on a business trip through Michigan.

Otto Young was among the passengers of the *North Lana,* sailing from this city on Aug. 12.

J. T. Brayton, western manager for the Julius King Optical Co., visited New York last week.

Frank H. Challen, representing the Ohio Cut Glass Co., is on a six weeks' trip to the Northwest.

Max Noel, of Despres, Bridges & Noel, who underwent an operation at the Alexian Brothers Hospital, last week, is reported to be improving slowly.

Charles S. Hungerford left here last week, for St. Louis, where he will visit his brother. From there Mr. Hungerford will go to Colorado and the Pacific Coast for a lengthy stay.

J. M. Fitzgerald, second assistant manager of the retail jewelry department of Marshall Field & Co., has resigned from his position to accept a responsible post in the East.

Friday, a customer bought a gold ring for $650 from the branch store of Herbert L. Joseph & Co., in the Chicago Savings Bank building. Later the customer returned and claimed the ring he bought was not gold and had arrested the salesman, who he claimed, sold the ring to him. The case comes up this week.

The many friends of Theo. Kuehl, of Geo. Kuehl & Co., manufacturers of cuckoo clocks, will be glad to learn that he is again at his desk every day. Mr. Kuehl sustained some slight injuries about six weeks ago while a passenger on the fast train which was wrecked at Mentor, O., and is yet slightly nervous from the shock he received.

Mrs. C. K. Landow, wife of C. K. Landow, wholesale jeweler, 42 Madison St., had a lucky escape, last week, from two bandits. Mrs. Landow, while returning from a lake excursion given by the W. C. T. U., of which she is a prominent member, was alighting from a Metropolitan elevated train at Western Avenue, when she was seized from behind and had a diamond drop earring torn from her ear. Her outcries frightened the robbers, who fled after dropping the earring in their flight. The earring was subsequently returned to Mrs. Landow, whose injuries were painful but not severe.

Wm. B. Drackett, in the jewelry business here and formerly a member of the firm of Drackett, Clock & Jehlinger, is suing the village of Glencoe for $25,000 damages in consequence of his arrest for auto scorching, last Saturday. Mr. Drackett was passing through Glencoe with his daughter, who had suddenly been taken ill and was hurrying home as fast as he could go. He was detained three hours in a justice shop and in consequence of this detention says he despairs of his child's life. The driver of the machine was fined $25.

N. E. Wathier, of Jos. P. Wathier Co., at 178 W. Madison St., is receiving the congratulations of his friends on his lucky escape from a murderous assault attempted upon him Tuesday morning, Aug. 8, when according to his custom for many years he opened his store at 7 A. M., that morning, a stranger entered and pointing to the regulator on the wall asked Mr. Wathier if it indicated the correct time. Mr. Wathier replied in the affirmative as hundreds of people ask this question in the Wathier store every day. As Mr. Wathier stooped over to place a tray of lockets in the window the stranger pulled an iron chisel, over a foot long, from his pocket and struck Mr. Wathier a crushing blow on the left side of his head. Though stunned and bleeding freely from the wound Mr. Wathier partially recovered and being a man of powerful physique, grappled with his assailant who broke from him and fled, after leaving a black cloth bag behind him, in which he would have placed his plunder, had he accomplished his fell purpose. Mr. Wathier is suffering slightly from the after effects of the attack but is able to attend to business. Mr. Wathier, Saturday, called at police headquarters, and looking over the photographs on record there, picked out one as the photograph of the man who attacked him. The original of the photograph, known as James Hickey, was arrested and identified by Mr. Wathier as his assailant.

## Minneapolis and St. Paul.

TRADE CONDITIONS.

The outlook for all business is much improved, as the crop seems to be fairly well assured. The rust scare which was causing a great deal of alarm to the mercantile and other interests, seems to have been unfounded. While rust has appeared on the wheat in many places, it seems that it is not serious, nor has it apparently damaged the yield or quality. Of the early threshing the quality of grain is distinctly above the average for several years past. The outlook is that the remainder of the crop will turn out well up to the average quality.

H. N. Prince, formerly with S. H. Clausin & Co., Minneapolis, has resigned.

E. B. Nelson, who was formerly in business in Southeast Minneapolis, has opened a store at 1535 E. Franklin Ave.

Among the out-of-town retailers who called on the jobbing trade in Minneapolis recently, were B. A. Tibbetts, Clark, S. Dak.; Mr. Swarthout, Pine Island, Minn.; L. Diacon and wife, Chaska, Minn.; G. E. Scott, Hibbing, Minn.; Mr. Knapp, of the Knapp Co., Osage, Ia.; E. J. Swedlund, Atwater, Minn.; C. Swedberg, Hopkins, Minn.

The jewelry department of the New Store, a department store, Minneapolis, reports the loss of a diamond by a man who called for diamond rings, and looked over a number of them. Finally the clerk discovered that one was missing, and said so, whereupon the alleged customer took to his heels, with the clerk in hot pursuit. The thief made his escape.

The traveling salesmen who visit the smaller towns in the Northwest find it uncomfortable traveling on the Great Northern and Northern Pacific roads at present. The railway telegraphers on these roads are on strike, and the roads are being operated as well as possible with the help which can be secured. The result is that a number of stations are closed and without operators, and signals and orders for trains are uncertain. Delays are frequent. Express matter to stations where the operator was agent is frequently to be delivered without receipt. Freight matter is thrown off without being receipted for, and is left on platforms to be taken up by the receiver without his giving a receipt of any kind whatsoever.

# TO THE JOBBING TRADE

The Four Reasons Why.

1. Quality guaranteed.
2. Faultless finish.
3. Styles are in keeping with wide awake demands.
4. Sold on a margin that appeals to large users of diamond jewelry and diamond mountings.

## SHIMAN BROS. & CO.

IMPORTERS AND MANUFACTURERS,

87 Maiden Lane, N. Y.

LONDON: 50 Holborn Viaduct.

AMSTERDAM: 2 Tulp Straat.

FACTORY:

1, 3, 5 Gold Street.

## Kansas City.

TRADE CONDITIONS.

Business is keeping the jobbers and employes busy. Travelers and the mails are bringing orders in faster than the jobbers can send them out in regular working hours. Collections are very satisfactory.

The trade here has been notified by T. L. Basket, that he has moved from Unionville, Mo., to Chillicothe, Mo.

Ed. Dunning, Kansas City, Kans., is building a costly home. He will be the best housed jeweler in Kansas.

F. D. Reynolds, a Kansas City buyer, has sold his business in Topeka, Kans., and relocated at Cedar Rapids, Ia.

C. B. Norton, president of the C. B. Norton Jewelry Co., has returned from a fishing trip at Star Lake, Minn.

Louis Meyer, president of the Meyer Jewelry Co., is a frequent visitor to Excelsior Springs, the Spa of America.

L. P. Ilkenhan has sold his stock and good will in his store in Annondale, a Kansas City suburb, to T. L. Ricksecker.

F. J. Nevins, manager of the material department of the Meyer Jewelry Co., is spending a two weeks' vacation in Colorado.

H. C. Attwell, an expert watchmaker in the employ of Harry B. Carswell, of this city, is going to Denver, Colo., in the hope of benefiting his health.

Miss Violet Hunt is the "company" of F. W. Hunt & Co., retail jewelers of Lebo, Kans. She buys the goods and often visits this city for that purpose.

Henry S. Zinn, Hutchinson, Kans., returned from a visit to his extensive mining interests in Colorado last week. He stopped off here on his way home.

E. E. Richards, western representative of the Rogers Silver Plate Co., returned to his office in Kansas City last week, from a successful selling trip into Kansas and Nebraska.

John T. Warner, Holdenville, Ind. T., will soon move into handsomely furnished quarters. He has invited to the opening the Kansas City travelers who have his territory.

The firm of Lee & Robinson, Corning, Ia., has been dissolved. Mr. Lee remains with the business and Mr. Robinson has engaged in business at Sumner, Ia. Both are Kansas City buyers.

J. D. Foy, Cameron, Mo., has just finished some very remunerative sheep shearing contracts in the west and northwest. He controls a patent clipping machine. Mr. Foy visited the Kansas City jobbers last week.

V. G. Cuthbert, western traveling representative of Otto Young & Co., Chicago, brother-in-law of Harry B. Carswell, the Walnut St. retailer, returned to Kansas City last week from a vacation visit to the old folks in Ohio.

Noble R. Fuller, a junior member of the Edwards & Sloane Jewelry Co., is spending a vacation in Colorado. Leo Ludwig, another junior, is resting at Walker, Minn. Henry Metzger, of Margolis & Metzger, is with Mr. Ludwig.

S. H. Woodstock, president of the Woodstock-Hoefer Watch & Jewelry Co., and Mrs. Woodstock, returned to Kansas City last week. During their absence they visited St. Paul, Seattle, Tacoma, Portland and San Francisco.

Frank Pfeiffer, son of Joseph S. Pfeiffer, the oldest retail jeweler in Parsons, Kans., became a benedict last week. He and his bride passed through this city on their way to Colorado, where a part of the honeymoon will be spent.

An invoice of diamonds valued at $40,000 was cleared through the Kansas City custom house by the Jaccard Jewelry Corporation last week. This is said to be the largest importation of diamonds in the history of the Kansas City trade.

The stock of the W. C. Cannon Jewelry Co., which was bought at bankruptcy sale for $30,000 by the Kansas City State bank to protect a claim of $23,000, is being sold at retail. Charles Russell, a veteran retail jeweler of this city, is in charge of the sale.

J. W. Dutton, assistant general inspector of the Webb C. Ball Watch Co., Cleveland, O., official time inspector of the Frisco railway system, paid a "checking" visit to Kansas City last week. Harry B. Carswell is the company's representative in Kansas City.

A Kansas City jeweler recently wrote a St. Louis manufacturing plant to send him two or three good jewelers, there being no idle men of that class in this city. The St. Louis firm replied that there was also a scarcity of jewelers in that city and that there were openings for several good workmen there.

Over a year ago the Woodstock-Hoefer Watch & Jewelry Co. shipped a diamond ring belonging to a retailer's customer by the Pacific Express Co. It was lost in transit and the owner filed a suit against the retailer, the express company and the shipper to recover the value of the ring, $300. The suit is still pending. Last Thursday Louis Jennings, 18 years old, wagon boy in the employ of the express company, was arrested and charged with the theft. He confessed. The ring, which he had sold for $10, was recovered.

Among the retailers in this city recently, not elstwhere mentioned, were the following: R. C. Everts, Weatherford, O. T.; A. J. Carruth, Herington, Kans.; Mr. Rhodes, of Rhodes & Scott, Nevada, Mo.; L. C. Kisling, Osborne, Kans.; T. S. Mendenhall, Burr Oak, Ia.; Richard Miller, McPherson, Kans.; C. B. Libby, Weir, Kans.; Otto Burkland, Osawatomie, Kans.; W. A. Meyer, Lawson, Okla.; M. C. Rosenfield, St. Joseph, Mo.; A. Rosenfield, Leavenworth, Kans.; R. O. Shenanger, Weston, Mo.; R. B. Erwin, Chandler, Okla.; Miss Hicks, representing W. G. Glick, Junction City, Kans.; B. G. Gustafson, Lawrence, Kans.; S. J. Huey, Excelsior Springs, Mo., and W. T. Hindman, Hutchinson, Kans.

At the New York office and salesroom of the Rochester Stamping Co., 25 West Broadway, is now displayed for the benefit of Fall buyers a most artistic as well as useful line of metal goods. H. B. Crawford, the New York representative, has taken particular pains to gratify the wants of those buyers in quest of novel and artistic chafing dishes. These are displayed in many varieties, with figure decorations suggestive of the good things to be cooked therein. Together with this full line of chafing dishes and accessories are to be seen a complete assortment of punch bowls, sugars and creams, trays, jardinieres, etc.

ESTABLISHED 1854 INCORPORATED 1898

CHICAGO.

23-25 Looijersgracht Amsterdam, Holland.

## San Francisco.

TRADE CONDITIONS.

Local trade continues to improve and this week sees a very fair business being transacted, both by wholesale and retail houses in the city. Traveling representatives report that conditions throughout the country are excellent and that there seems to be no reason why a good Fall and holiday trade should not be expected.

G. C. Wilkins, Red Bluff, Cal., is in the city selecting stock.

Henry M. Abrams, manufacturers' agent, is now on the road with his samples.

Harry Schmalz has purchased the store of Mr. Aufricht at 1189 O'Farrel St.

S. H. Friend, a diamond broker, has just returned from a buying trip in the east.

Geo. H. Cook visited San Francisco last week. Mr. Cook has stores at Prescott and Phoenix, Ariz.

The Diamond Palace is further ornamenting its already magnificent front by erecting a new sign.

W. A. Green, of Carrau & Green, leaves shortly for a trip to Europe, where he will buy diamonds for his firm.

Sidney Weinshenk, of the Alphonse Judis Co., is in the city, having just returned from a very successful trip.

S. S. Ballard, Jerome, Ariz., stopped off in San Francisco a few days last week, on his way to the Portland fair.

John A. Black, Tuscon, Ariz., is in San Francisco calling on the jobbing trade and selecting a line of Fall goods.

J. D. Kennedy, Hilo, H. I., is making a brief stay in San Francisco before starting on a trip across the continent.

R. F. Allen, of Morgan & Allen Co., has just returned from a trip to Los Angeles and through the southern territory.

Harry Sterling, a jeweler of Ledro Diego, Mex., is at present sojourning in San Francisco and getting acquainted with the trade.

L. S. Chopard, Petaluma, is at present calling on the jobbing trade of San Francisco, making selections for his Fall and holiday stock.

Mr. Rasmussen, Ventura, Cal., passed, last week, through this city on his way to the Lewis and Clark Centennial Exposition at Portland, Ore. He will visit other points in the northwest before returning home.

M. Adelsdorfer, local agent for the Wm. L. Gilbert Clock Co., is taking a short vacation in Santa Barbara. He will go directly from Santa Barbara to Los Angeles, where he will start on his first Southern trip of this season.

C. Wardman, a jeweler of Borad St., was found to be missing when officers went to serve an order of replevin on him a few days ago. Later it was reported that he had been seen walking along the track near Cutter, a station about 15 miles south of here.

## Pacific Coast Notes.

F. A. Keener, Eureka, is convalescing from a serious illness.

J. B. Williams, Susanville, Cal., is reported to be seriously ill with typhoid fever.

C. H. Wright and H. H. King, Eureka, Cal., have gone on an extended fishing trip.

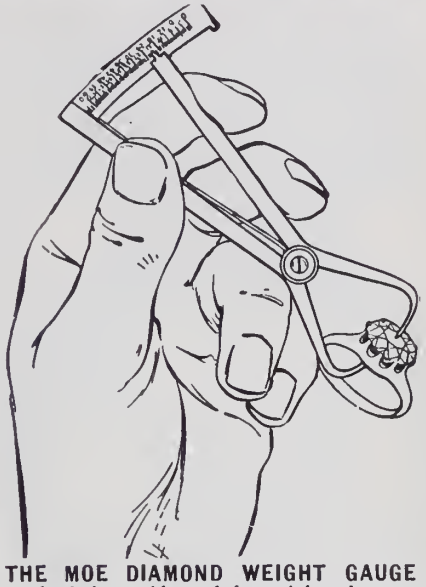
P. E. Anderson, Arcata, recently opened a branch store in Blue Lake, which will be in charge of his son.

In a fire which occurred recently at Connell, Wash., F. Fredericksen, a jeweler of that place, lost considerable stock.

L. Kamstra, Solomonsville, Ariz., is reported to have recovered from his recent illness, and is able to attend to business.

Samuel Dickson, Fortuna, Cal., is now settled in his new store, which is one of the most attractive establishments in Humbolt County.

Manson & Bay, San Bernardino, Cal., have just installed a large American electric clock in the waiting room of the new Central depot.



Herman Teuful, Chicago, made a short visit to Hoisholt Bros., jewelers of Watsonville, Cal., last week, on his way to the fair at Portland, Ore.

McClure & Streiff, Lakeport, Cal., have dissolved partnership by mutual consent, Mr. McClure continuing the business. Mr. Streiff is undecided as to where he will locate again.

S. Greenleaf, who was at one time engaged in business in Modesto, Cal., died at the Agnews asylum a few days ago. Mr. Greenleaf was 60 years old, and had been in poor health for some time.

I. Frohsin has succeeded Herzfeld & Frohsin, Alexander City, Ala.

Exact size of special charm recently made for jeweler who could find nothing large enough to suit his customer.

## The A. P. Craft Co.,

Manufacturing Jewelers,

**INDIANAPOLIS, IND.**

Emblem Goods. Special Orders.

## Indianapolis.

TRADE CONDITIONS.

In order to advertise Indianapolis, the Commercial Club is distributing 100,000 illustrated booklets, containing numerous views and many facts concerning the city's location, transportation, population, beauty and health. The jewelry trade is exploited in detail. The jewelers of the city join with the other merchants in thinking that the wholesale publicity will work to the good of the city.

Charles H. Haner, Richmond, Ind., was greeting friends in this city last week.

Helen Reed, daughter of J. H. Reed, is spending a month in Paris, Ill., and Chicago.

Roy Neighbors, of the A. P. Craft Co., is spending his vacation with his parents at Hope, Ind.

John Wimmer is making extensive improvements in his store and workshop on N. Pennsylvania St.

Carl L. Rost and wife have returned from a two weeks' stay at Petoskey and other Michigan resorts.

E. M. Craft, of the A. P. Craft Co., and Mrs. Craft have returned from Bass Lake, where they spent two weeks.

Ikko Matsumoto has moved to the Fitzgerald building, Market St. and Monument Pl., where he occupies the third floor.

David S. Gribben, of Gray, Gribben & Gray, and family are visiting relatives and friends in the southern part of the State. A. W. Gray, of the same firm, has just returned from a two weeks' visit at Madison.

While in this city last week Charles E. Wintrode exhibited a pin, on the head of which was engraved every letter of the alphabet and the name "C. E. Wintrode." Each letter is distinct, being perfectly legible beneath a magnifying glass. Mr. Wintrode secured the curio in Winton, Ia.

Among the out-of-town jewelers who visited the local manufacturers and jobbers last week, were Mrs. Bernard Maier, Edinburgh; George W. Clemmons, Greenwood; J. Alfred Miessen, Cicero; F. Pennington, Knightstown; John W. Hudson, Fortville; J. Henry Smith, Greenfield; D. S. Whitaker, Lebanon, and J. F. Harding, Brownsburg.

## St. Louis.

E. C. Weidlich, of William Weidlich & Bro., has returned home after an extended trip in the east.

James J. Burke, president of the Brooks Optical Co., made a short business trip out of town last week.

A. L. Bauman, president of the L. Bauman Jewelry Co., has returned from a trip through Kansas and Missouri.

C. Percy Hutchinson, vice-president of the Whelan-Aehle-Hutchinson Jewelry Co., has returned from a well-earned vacation trip.

Goodman King, president of the Mermod, Jaccard & King Jewelry Co., is expected back from New York some time this week.

W. F. Drexmit, assistant general agent of the Keystone Watch Case Co., with headquarters at Chicago, was in St. Louis several days last week.

The Mermod, Jaccard & King Jewelry Co. is showing in the Broadway windows a prize silver cup to be given at the picnic of the United Railway employes Aug. 30 and 31.

Meyer Bauman, of the L. Bauman Jewelry Co., who has been in the diamond markets for the past several months, leaves Paris on the homeward trip Aug. 23, with Mrs. and Miss Bauman.

Frank Ricketts, of Charleston, Ill.; H. W. Foerste, Okawville, Ill.; John Koetting, Ste. Genevieve, Mo., and M. Miesch, Muskogee, Ind. T., were among the visiting jewelers in St. Louis last week.

Frederick W. Drosten, of the Frederick W. Drosten Jewelry Co., 7th and Locust Sts., is now in Saragota for a few days. He will proceed thence to Albany and New York. He will be absent from St. Louis for several weeks.

J. Auer, who has been traveling through the south for the Bauman-Massa Jewelry Co., with headquarters at Birmingham, Ala., who was in St. Louis last week, will start out again this week for a trip through Illinois, Indiana and Kentucky.

Simon Van Raalte, of S. Van Raalte & Co., with Abe Cohen, of St. Louis, recently purchased 15 parcels of improved real estate, comprising in all 58 houses, being a part of the estate of the late Ellen J. McKee, who also owned the controlling interest in the St. Louis *Globe-Democrat*. The purchase price was $266,000 cash.

Fluckey & Fluckey, Chambers, Nebr., have dissolved, and Lafe Fluckey will carry on the business alone.

Leonard L. Lockley, formerly in business at Rock Springs, Tex., has moved to Carrizo Springs, in the same State.

Illustration one third size.

## Cincinnati.

Joseph Mehmert is renovating his quarters in the Glen block.

Joseph Noterman, of Joseph Noterman & Co., is visiting his parents at Hendersonville, N. C.

C. C. Stoner, of Lindner & Co., Carlisle building, is home attending the Stoner family reunion.

D. Gradison, 20 Emery Arcade, is in New York, where he will combine business and pleasure for a week.

Edwin Gebhardt, of Gebhardt Bros., Lion building, with Mrs. Gebhardt, is taking an outing at Glen Springs, Ky.

Charles Cook, Jr., & Bro., have moved from 532 Race St. to larger and more commodious quarters at 42 W. 6th St.

J. H. Moore, well known here among the trade, is opening a jewelry office on the second floor of the Finton building at 5th and Vine Sts.

William Prener has about completed the furnishing of his retail store at 5 W. 7th St. Cards are out announcing his opening day Aug. 16.

H. A. Wadsworth, of the Wadsworth Watch Case Co., Dayton, Ky., and family, are enjoying the waters of Esculapia Springs, Ky.

Harry Dieters, of Joseph Hornback, 11 W. 5th St., and Miss Anna Fandel, of Boston, Mass., were married the past week at Covington, Ky.

Albert Meseke, watchmaker for W. P. Carruthers, at Oberlin, O., and wife, stopped here the past week on their way home from Seymour, Ind.

A. A. Spiegel, of the Gustave Fox Co., is about to leave on a business trip to Texas. Leonard Fox, of this house, is spending a few weeks recreation at Lake Beulah, Wis.

Cincinnati friends have received cards announcing the approaching marriage of Emile J. Schweizer, Selina, Ala., and Miss Mae Wilson, New Duluth, Minn., which will take place Aug. 31.

Hugo Lindenberg, of Lindenberg & Fox, Wiggins block, has returned from a southern trip on account of the yellow fever quarantines. Edgar Fox, of this house, leaves for a trip north this week.

F. G. Wittlinger, Middletown, O., with his family, visited the trade here on his way home from Florida. J. S. Swigart, of the Swigart Optical & Watch Co., Toledo, also called on friends here during the past week.

Two young women called at W. A. Davidson & Co.'s jewelry store, 3 Emery Arcade, Thursday, to see some rings and purchased one for $2. After they had left the store Mr. Davidson discovered that they had substituted a cheap ring for one of much greater value. The women were not known to him and escaped without difficulty.

Out of town buyers, not elsewhere mentioned, who made purchases here during the past week include, W. Naifeh, Hickman, Ky.; M. L. Aron, Springfield, O.; Richard G. Tafel, Louisville, Ky.; Clay Henry, Ironton, O.; Ed. Holaday, of H. C. Reed, Blanchester, O.; A. Bergeda, Nashville, Tenn.; Frank Fullilove, Owenton, Ky.; A. B. Wahl, Indianapolis, Ind.; Albert Rolef, Lockland, O.; Mr. Ireland, New Milton, O., and M. W. Goodman, Hamilton, O.

## Columbus, O.

H. E. Tuller, manager for Krouse & Co., leaves this week for a 10 days' vacation at Atlantic City.

J. C. Goodman, of Goodman Bros., will return this week from Muskoka Lakes, Canada, where he has been enjoying a month's vacation.

Wm. G. Harrington, of Harrington & Nonnenmacher, will visit New York the first week in September to buy goods. The firm will commence to invoice this week.

Mrs. Maud Smelzer, wife of Stanton Smelzer, has filed suit in the Common Pleas Court against Myer J. Daniels, jeweler and pawnbroker, seeking to recover $500, which she says her husband lost in gambling rooms which she alleges are run by the defendant. G. J. Macklin, a hotel keeper, is defendant in a similar suit for $900. Neither has filed an answer as yet.

McD. Bailey, traveling salesman for Goddard, Hill & Co., Pittsburg, was in Columbus, last week, and while here called at the police station to get from the rogue's gallery a photograph of Charles Glick, who is held in jail here awaiting an order from the United States Courts for his return to Washington, D. C., where he will face a charge for obtaining goods under false pretenses. The Pittsburg firm is looking for a man whose methods are the same as those credited to Glick. Mr. Bailey happened to be in Pittsburg at the time Goddard, Hill & Co. had their trouble, and he says he recognizes the photograph of Glick as that of the man wanted. He forwarded the picture to his firm.

R. M. McDonald has purchased the jewelry stock of J. R. Kincaid, in Cisco, Tex.

In the recent big fire in Connell, Wash., the F. Fredericksen jewelry stock was damaged to the extent of $400.

Max Elbe, Tonawanda, N. Y., has been made the defendant in a charge preferred against him by R. F. Pickert, who alleges that Mr. Elbe violated the lottery laws. When arraigned before U. S. Commissioner Tucker, about a week ago, Mr. Elbe pleaded not guilty.

## Canada Notes.

TRADE CONDITIONS.

Owing largely to the great influx of Summer tourists local trade has been very active, especially in souvenirs and jewelry novelties. Prospects for the Fall trade are highly encouraging, as every indication points to large harvests, both in Ontario and the West.

Jonas Goldinger, Toronto, has given a renewal bill of sale for $235 to C. Greishman.

George Brabander, Toronto, Can., will sail Sept. 2, on the *Minneapolis* for the purpose of buying in Europe lines for his Spring trade.

W. K. George and W. K. McNaught, Montreal, have returned home from their trip to England and France with the Manufacturers' Association.

John McKay, who was recently arrested, for breaking into a jewelry store on St. Catherine St., Montreal, and other places, has been sentenced to six months in jail.

The store of George E. Culp, Caledonia, Ont., was badly wrecked recently by an explosion of acetylene gas in a bakery next door. A number of persons were injured, including Mr. Culp, whose injuries were not serious.

William S. Ziller, of Ryrie Bros., Ltd., Toronto, Ont., who accompanied the Canadian Manufacturers' Association excursion to England, returned last week. He is enthusiastic over the cordial reception which the party met with in Britain.

Out-of-town buyers calling on the Toronto (Ont.) trade last week included G. M. Rioch, Kenora, Ont., formerly Rat Portage; C. D. Frost, Peterborough, Ont.; E. H Newman, Owen Sound, Ont.; W. E. Kelly, Goderich, Ont., and J. McClelland, Kirkfield, Ont.

The Goldsmiths Stock Co., Toronto, Ont., has secured from the Wilkes estate a lease of the portion of the building adjoining its present place of business, lately occupied by the Fancy Goods Co., Canada, an offshoot of the business of Robert Wilkes & Co., the predecessors of the Goldsmiths' Stock Co. This ensures its continuance in the premises where its business under different firm names has been carried on for about 60 years. Extensive alterations in the premises, including the three upper floors of 48 and 50 Yonge St., providing for modern equipments and the extension of facilities in all departments, are being carried out, which will give the company 14,000 feet of floor space. It is noteworthy that the site, despite the business changes, of over half a century, still remains a centrallly advantageous one for the business.

August Levy, a watchmaker of New Orleans, La., accused of embezzling an antique clock left by customer to be repaired, surrendered to the police Wednesday, and was held in default of bail on this and another charge of similar character.

Hugh Seidenfaden, employed by Letzler, Lorch & Co., Louisville, Ky., met with a peculiar accident Wednesday while on his way home. He was struck across the bridge of the nose by an electric light globe which fell from the pole. The glass severely cut him about the nose and he will bear the scars for life.

## Harrisburg, Pa.

TRADE CONDITIONS.

Local jewelers are anticipating a nice business in the novelty and souvenir line during Old Home Week, in October. A fund of $25,000 is being raised to properly celebrate the event.

P. G. Diener and family left Monday for a two weeks' stay at Atlantic City.

Abe Englander, watchmaker, has entered the employ of his uncle, H. C. Claster.

P. I. Beltz, watchmaker for P. G. Diener, Market St., is camping along the Susquehanna River.

E. L. Egolf, formerly in business in this city, has gone to Providence, R. I., to take a position with Stevens & Co.

H. C. Claster will remove to his newly purchased home at 3d and Peffer Sts. about Sept. 1. He has sold his home at 1015 Green St. to Frank Hoy.

William P. Denehey, 206 Market St., and wife have returned from a six weeks' trip to Duluth, St. Paul, Yellowstone Park, San Francisco and the Lewis and Clark Exposition at Portland.

F. E. Commings, who received $1,000 from H. C. Claster for vacating his present store property at 411 Market St. by Sept. 10, expects to begin an auction sale this week preparatory to transferring the business to his new store at 14 N. 4th St. Mr. Commings had been in business at 411 Market St. for about 30 years and his present lease would have expired April 1, 1906. Mr. Claster has leased the building for 10 years from that date and will make some improvements before opening a pawnbroking establishment there. He will continue his present jewelry store at 4th and Market Sts.

A down-town jeweler was talking with the CIRCULAR-WEEKLY correspondent Saturday evening about the steady advance in diamond values during the past few years, and during the course of the conversation displayed a diamond ring on one of his fingers, saying: "That stone, weighing about three carats, I sold a few years ago to a gentleman in this city for $300. The other day the owner secured a $200 loan on it, giving the ring as security. According to present prices, it is now worth $450. Before the advance began five or six years ago, I had an opportunity of buying a salesman's sample line. Had I done so and held the diamonds until the present time, I could have cleared $10,000 on the deal."

## Lancaster, Pa.

Charles G. Rhoads, jewelry repairer with Harry Weber, is on a camping trip.

H. A. Peters, of the H. S. Meiskey Co., spent a few days last week in New York and at Brighton Beach.

D. F. Fryinger, Groffs, and Mr. Brubaker, of Kaufhold & Brubaker, Columbia, visited Lancaster last week.

The H. S. Meiskey Co. is negotiating for the building on West Chestnut St. lately occupied by L. C. Reisner & Co.

G. E. Fleisher, head watchmaker for Ezra F. Bowman's Sons, is on a two weeks' vacation trip to Altoona and Pittsburg.

The work of raising a fourth story on the Hamilton Watch Co.'s main building began Aug. 7. This entire floor will be devoted to the finishing department.

Willis B. Musser, of Philadelphia, formerly of the Non-Retailing Co., this city, and until recently with the Keystone Watch Case Co., was in Lancaster last week.

Anthony Bowers, a Pittsburg jeweler, is visiting his sister in Lancaster, his old home. James Fox, Rocky Mount, N. C., also spent last week in Lancaster among old friends.

Among those on board the steamer *Kershaw* en route from Baltimore to Boston, which was on fire last week off the Delaware Breakwater, was John B. Roth, Jr., of this city, and his wife. They escaped injury.

L. C. Reisner, of the defunct firm of L. C. Reisner & Co., has reopened the jewelry manufacturing department of the late firm and the establishment will be under his personal supervision. He has retained most of the old force of this department.

A fire at Taylor, Tex., recently did damage estimated at about $1,800 to the stock of Fritz Braun, who deals in jewelry, clocks, watches and gramophones and also conducts a saloon and lunch counter. He had no insurance.

*Illustrated Price-list on application*

Eddy Street
Providence, R. I.

## Providence.

Among jewelry buyers in town last week were C. E. Fisher, Minneapolis, and P. Hermes, Chicago.

Among the imports at the Port of Providence last week were six packages of imitation precious stones from Bremen and one package of clocks from Liverpool.

John C. L. Shabeck, who was formerly located at 110 Exchange Pl., has now removed to 7 Beverly St., increased factory accommodations being deemed desirable by him in the transaction of his business.

The jewelers as well as other business men have been caught in the summer exodus for excursion fields and for the remainder of the month many of them will continue to be absent from their business haunts.

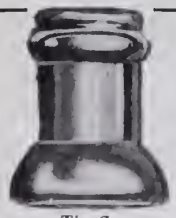
John K. Bogie, who was one of the buyers for the Boston Store and who died suddenly Saturday morning as the result of an apoplectic stroke received Friday, was a caller at the home of George W. Dover at the time when he was stricken.

An addition 40x115 feet is said to be under contemplation for the Champlin building, Chestnut and Clifford Sts. A larger engine has been installed in the building and other improvements calculated to please the tenants have been made.

Articles of incorporation of the Vennerbeck & Clase Co. have been filed at the office of the Secretary of State, the concern being capitalized at $40,000. The officers of the concern are C. M. Vennerbeck, president; A. S. Vennerbeck, treasurer and general manager; R. J. Shoemaker, Jr., secretary. The company is formed for the purpose of engaging in the manufacture and sale of jewelry and for the transaction of such other business as may arise in connection therewith or is incidental thereto. The incorporation of the firm followed a series of severe losses in the personnel of the establishment, the latest being the comparatively recent death of Charles F. Vennerbeck.

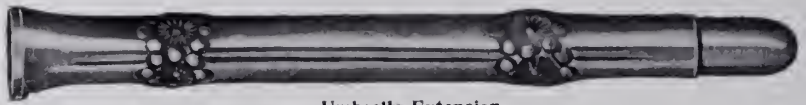
Local importers have at last won the case against the Government in which the importation of certain precious stones figured. Several thousands of dollars in duties will be demanded and this sum will undoubtedly be granted. These cases involved the question of the classification of imitation pearls. The importers contended that these stones were imitation precious stones and said that they were subject only to a duty of 20 per cent. ad valorem. The Government's contention was that "they were manufactures of paste," and under this classification duty of 45 per cent. of their value was collected.

## Attleboro.



Ernest J. Qvarnstrom, of Carter, Qvarnstrom & Remington, has been on a visit at Portsmouth, R. I.

Charles Lyons, of the Torrey Jewelry Co., left last week for a long trip, going first to Washington.



Albert S. Ingraham, of A. S. Ingraham & Co., and George H. Sykes, of Sykes & Strandberg, last week joined the Summer colony at Harwichport, Mass.

The census report issued every five years was made public last week. The figure of local population is 12,702, as against 11,335 in 1900. This is openly ridiculed all over town, as no one can be found willing to admit the true total is under 14,000. The selectmen in public interviews declare the figure is far below the correct aggregate, and diligent newspaper men have found many places where the enumerators to all appearances did not call.

The effort recently made to induce a large Attleboro manufacturing house making novelties and ladies' ornaments to move to Southbridge, Mass., has been abandoned for the time being. During the hot

# DAMM & BLOCK, BUFFALO, N. Y.

weather the efforts of the Fall River Board of Trade to get some Attleboro jewelers to move to its city seem also to be relaxed.

Good progress has been made replacing the water tank which fell from the roof of the D. E. Makepeace Co.'s building.

There is quite a little feeling expressed among the jewelers at the discovery that one of the leading salesmen, on his recent trip, registered at hotels in other parts of the country as from Providence. This matter was fought out vigorously nearly 10 years ago, when an aggressive campaign of newspaper publicity and club and office discussion was waged. At the close the unanimous opinion was reached that it was foolish for a small army of Attleboro jewelry drummers to bestow gratuitous advertising on Providence, which it did not need, when at the same time they were trying to build up the reputation of Attleboro. Since then it has been the custom for the salesmen to remember their own town, not merely at hotels, but in every instance where they had occasion to tell where they were from. It is believed that when the majority of the salesmen came over to this practice the results could be traced on the ledgers of Attleboro houses.

## Connecticut.

D. C. Barrows, Willimantic, has now completed the removal of his store fixtures into a new store in the Fuller Block.

The Morgan Silver Plate Co., Winsted, has decided to postpone the construction of its proposed factory addition until several months hence.

W. E. Pierpont, formerly engaged in business in the Hosly block, Branford, but now located in Naugatuck, spent Sunday in the former town, where he was visiting old friends.

The William L. Gilbert Clock Co., Winsted, is building a 17-ft. retaining wall in the bank east of the Still River, preparatory to erecting a five-story brick factory addition.

The E. Ingram Co., Bristol, has just broken ground for its new factory to be erected in the rear of the movement shop. The new building will be used for the enameling department.

A fire broke out in the factory of the R. Wallace & Sons Mfg. Co., Wallingford, early Thursday morning, but was extinguished before causing any serious damage. The fire was due to one of the lacquer ovens catching fire.

All the departments of factory "E" International Silver Co., Meriden, began Saturday afternoon to work 59 hours a week. This is the first time in several years that the big shop started working Saturday afternoons until after Labor Day or the first week in September.

Dr. Percy L. Clark, Chicago, Ill., president of the National Self-Winding Co., was in Bristol Saturday, and while there made the announcement that his firm intended to move its factory from Forestville to Champagne, Ill., where a new factory is being erected. The new structure will afford room for the manufacture of clock cases, as well as the movements.

Morris A. Green, Waterbury, has brought suit against R. R. Halpern, for $300 damages, which he alleges resulted from a statement made by the defendant in favor of the financial standing of his brother, Harry Halpern, to whom Green sold two diamond rings valued at $220, and who suddenly left Waterbury after having received the gems on trial without payment.

The body of the late Myron S. White, who was at one time with the Charles Parker Co., Meriden, and who died recently at his home in Brooklyn, N. Y., of heart disease, was brought to Meriden for interment in Walnut Grove Cemetery, August 7. A handsome tomb will be built for the remains. The deceased had been at one time manager of the New York office of Landers, Frary & Clark.

Henry J. Sevy, Battle Creek, Mich., will continue the business formerly conducted at that place under the firm name of Henry J. Sevy & Co.

**A Press and They're On!**

MAGIC NUT
For Ear Buttons, Scarf Pins, etc.

A GLANCE at the illustrations will show that this device consists of an arrangement of two small discs. It holds firmly on perfectly smooth wire. Adjusted by simply pushing on the wire; removed by inserting finger and thumb nail between discs and pulling. Made in 18K., 14K., and 10K.; also in 14K. Rolled Plate; and in Sterling Silver and Aluminum. Small in size but great in utility.

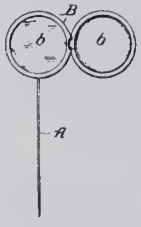
A LIST OF THE LATEST PATENTS GRANTED BY THE UNITED STATES AND GREAT BRITAIN AND UNITED STATES PATENTS THAT HAVE EXPIRED.

## UNITED STATES PATENTS.

ISSUE OF AUG. 1 1905. (CONTINUED)

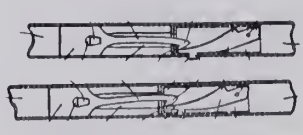
**796,399.** ALARM CLOCK. JOSEPH E. BLITHE, Upland, Pa. Filed Sept. 30, 1903. Serial No. 175,197.



A device comprising a casing having the opening at the top containing a clock having a winding lever normally in circuit with a bell, the opening

at the center containing a magnet and contact and the opening at the bottom containing the battery, connection within the casing from the battery to the contact, and from the battery through said clock to said winding lever, and means extending without the clock to operate said winding lever and thus disconnect the same from the contact.

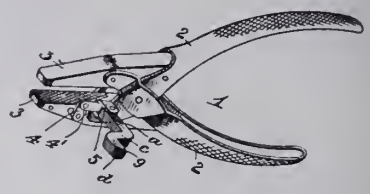
ISSUE OF AUG. 8, 1905.



**796,480.** HAT PIN. IRA E. WEEL, Cleveland, O. Filed May 7, 1904. Serial No. 206,796.

In a hat pin, a stem, and a head secured thereto comprising two hinged parts adapted to register in a closed position, and having mirrored surfaces.

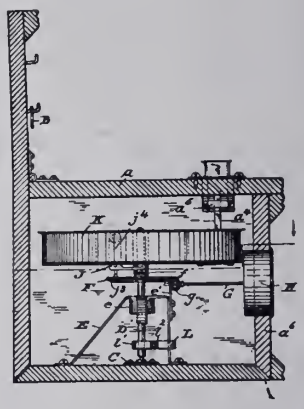
**796,490.** SEPARABLE FASTENER. HENRY R. BAKER, North Attleboro, Mass., assignor to the R. F. Simmons Co. Filed May 23, 1905. Serial No. 261,772.



A separable fastener of the class described comprising two engaging portions, one member comprising a tube, a wall upon the end of the tube

provided with an opening, a lever pivotally mounted in the tube, a spring arm fixedly mounted in the other portion, a wall pivotally connected with the spring arm and provided with an opening through which the spring arm passes, and a hook upon the free extremity of the spring arm adapted to engage the inner surface of the tube wall.

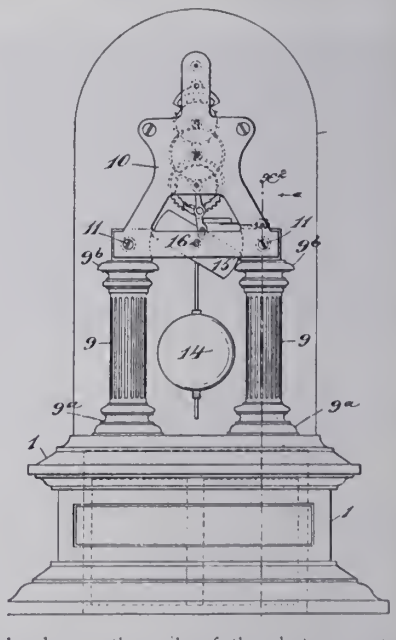
**796,647.** OPTICIAN'S STRAP-FORMER AND GAGE-PLIERS. ZEBULON F. HIGHSMITH, Sumter, S. C., assignor to John S. Durle, Washington, D. C. Filed Nov. 21, 1903. Renewed Jan. 16, 1905. Serial No. 241,351.



A strap-forming tool, consisting of a pair of pliers 1; a short strap 4, secured to the edge of one of the jaws; another short strap 4, having one end hinged to the other end of said strap 4; a hinge-bearing 5, pivoted to the free end of the last-mentioned strap, and blades 6, 7, 8, and 9, hinged in said bearing, the free end of each being

turned down, and formed into noses *d*, adapted to fit between the jaws of said pliers.

**796,532.** TIME-RECORDING DEVICE. ALBERT D. RAY, Cleveland, O., assignor to the National Clock Co., Cleveland, O. Filed Oct. 6, 1904. Serial No. 227,332.

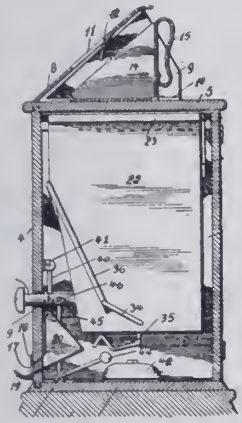


In a time-recording device, the combination of

a receptacle provided with a plurality of compartments, a rotatable support, upon which said receptacle is mounted, means for driving said support, and positive means for adjusting said receptacle upon said support and in the direction of travel thereof.

**796,701.** ELECTRIC CLOCK. RAGNAR CARLSTEDT, Jersey City, N. J. Filed Sept. 1, 1904. Serial No. 222,960.

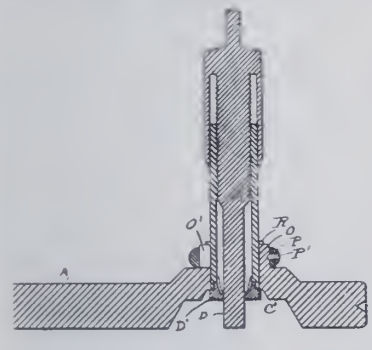
An electric clock having a base, two hollow columns, supported on said base, an electromagnet having its pole-pieces supported on the tops of



said columns, the coils of the electromagnet, inclosed in the respective columns, and a frame for the clock mechanism supported on said pole-pieces.

**796,875.** MATCH BOX. ARTHUR E. SMITH, Geneva, Pa. Filed Feb. 11, 1905. Serial No. 245,306.

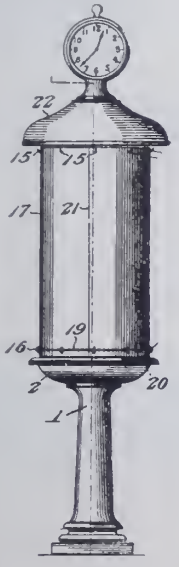
The combination with an inclosing casing, of a container removably mounted in said casing, and having a partition forming the bottom of the container and provided with a groove forming a



match-seat, and having notches registering with said groove, a rock-shaft journaled in the walls of the container with its ends extending beyond said walls, fingers carried by said rock-shaft, the front wall of said container being capable of being pressed inwardly, and means carried by said front

wall to engage the extending ends of the rock-shaft to actuate the latter and cause the fingers to enter the said notches and eject a match from the match-seat.

**796,903.** MICROMETER-GAGE ATTACHMENT FOR LATHES, &c. William A. Farrar, Whitman, Mass. Filed Mar. 13, 1905. Serial No. 249,876.



A device of the character described comprising a holder having centering-sockets in the ends there-

of and a recess in the side intermediate the ends thereof in combination with a micrometer-gage mounted upon said holder at right angles thereto, the spindle on the micrometer passing through the holder into the recess therein.

**796,937.** ADVERTISING DEVICE. Richard O. Scheel, Philadelphia, Pa. Filed Jan. 14, 1905. Serial No. 241,147.

An advertising device comprising a rotating cylin-

drical support, a flexible receiving element to envelop said support, means for supporting the upper end of said element, and means for locking the lower end of said element upon said support.

## DESIGNS.

**37,503.** LOCKET. Gibbs Mason, New York, N. Y., assignor to Wightman & Hough Co.

Filed June 12, 1905. Serial No. 264,962. Term of patent 3½ years.

## TRADE-MARKS.

PUBLISHED AUG. 8, 1905.

[The following trade-marks have been adjudged entitled to registration under the act of Feb. 20, 1905, and are published by the Patent Office in compliance with Sec. 6, of said act, which provides: "Any person who believes he would be damaged by the registration of a mark may oppose the same by filing notice of opposition, stating the grounds therefor, in the Patent Office, within 30 days after the publication of the mark sought to be registered, which said notice of opposition shall be verified by the person filing the same before one of the officers mentioned in Sec. 2, of this act. If no notice of opposition is filed within said time the Commissioner shall issue a certificate of registration therefor, as hereinafter provided for."]

Ser. No. **855.** FOUNTAIN PENS. Boston Fountain Pen Co., Boston, Mass. Filed Apr. 8, 1905.

A representation in perspective of the old Massa-

chusetts State-House, with the representation of a fountain-pen of enormous size, as compared with that of the State-House passing entirely through and projecting on both sides of the State-House.

Ser. No. **2,012.** WATCHES, WATCH CASES AND WATCH MOVEMENTS. The Crescent Watch Case Co., New York. Filed Apr. 17, 1905.

The representation of a star and crescent, over

C.W.C.Co.

which appear the letters and abbreviation. "C.W.C. Co.," separated by periods.

Ser. No. **2,230.** WATCHES. The Hampden Watch Co., Canton, O. Filed Apr. 19, 1905.

The representation of a human hand grasping a figure representing Father Time.

Ser. No. **2,298.** WATCH CASES. The Dueber Watch Case Mfg. Co., Canton, O. Filed Apr. 19, 1905.

The representation of a pennant having upon

1. 1. Snap complete.
2. 2. Outside of Snap.
3. 3. Inside of Snap.

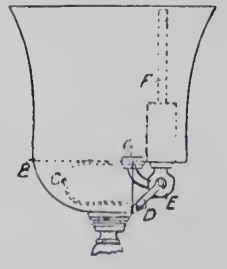
(Abridgments of Specifications, 1904, from *The Illustrated Official Journal.*)

**8,125.** PRISMATIC TELESCOPES, ETC. L. Bunger, Schmargendorf, near Berlin. April 8.



The figure shows in side elevation a frame in which the prisms of a telescope, etc., can be adjustably mounted. This frame consists of two leaves *l*, $l^{11}$ which are slotted and engage with one another rectangularly so as to admit of axial adjustment. These leaves carry horizontal plates

*s*, $s^{11}$, each of which carries a prism between springs and stops. The lower prism, for instance, is pressed down on to its seat by a spring S, against a stop $a^{11}$ by a spring 10 (at the back), and against the leaf $l^{11}$ by a spring 12 on a hinged leaf $b^{11}$ held by a catch 14, which is released to introduce the prism. The frame is adjusted in the casing upon tubes passed temporarily in by the eyepiece and objective openings. The holes through which the fixing-screws pass are made large.

**8,141.** COMMUNION CUPS. J. Panton and J. Brown, Edinburgh. April 9.

A communion cup is made to discharge a fixed quantity of liquid into a smaller cup as required.

On a false bottom B is fixed a receiver F with a supply pipe G in which is fixed a three-way cock E actuated by a lever D and a spring C. The receiver F is emptied by the lever D being pressed up by a cup placed underneath.

## The Emerald Mines in Colombia—Their Ownership and Operation.

WASHINGTON, D. C., Aug. 11.—The celebrated emerald mines of Muzo, Colombia, are owned by the Government and are among its most valuable assets. Colombia is seeking a loan in foreign markets with which to carry on operations in the mines. Mr. Lloyd-Owen, a well-known expert, was employed by the Government and made a very elaborate report, a copy of which was furnished the State Department by Mr. Russell, United States minister at Bogotá, and from which the following paragraphs are taken:

*Situation.*—The Muzo mines are situated in the State of Boyaca, and are about one and one-half hours' ride on mule back from the small town of Muzo, which at present seems in a state of stagnation, but was formerly of considerable importance. Muzo can be reached by three days' hard riding on mule back over very bad roads from Zipaquira, the terminus of the Northern Railway, and about two hours' railway journey from Bogotá.

*Area.*—The area of emerald bearing ground at Muzo is very large; it has never been properly explored and tested, but undoubtedly extends over many square leagues of country, the Government property alone, which forms the district around the Muzo mines, being estimated at 40,000 hectares (98,840 acres), of which a large portion is emerald bearing.

*History.*—The mines have probably been worked for over 1000 years: First by the Indians, then for some 300 years by the Spaniards, and since then by various persons or syndicates under some arrangement with the Colombian Government. Most of these arrangements or leases were for short terms, and each party working the mines got out as many emeralds as possible without regard to the future opening or working of the mine. As a result each party left the mine blocked with débris for his successor, who in turn got what emeralds he could without thinking of the future of the mine. Naturally under this system, although many emeralds were obtained, and some parties did well, the general output of gems was not large, compared with what can be produced in the future with a better mode of working.

*Formation of emeralds.*—Under great heat and pressure, due no doubt to further and subsequent volcanic action, these various minerals in the fissures or veins have crystallized in different shapes and forms, according to the various minerals contained in any particular vein or fissure. Under favorable circumstances the most beautiful deep-green emeralds have been formed in these small veins, the green color being undoubtdly due to the presence of chrome in sufficient quantity. In other veins the emeralds are found of a light-green color, due, no doubt, to the fact that there was not chrome enough present to give the deep-green color.

*Formation of emeralds and crystals.*—Again in other veins no chrome was present, and as a result the crystals are pure white or colored red or yellow by oxide of iron. Many of the crystals are pure silica and others have various minerals combined with the silica. Thus many kinds of crystals have been formed in the veins, according to the varying circumstances. But the general tendency in these emerald bearing rocks is to form crystals of emerald of more or less green color, and the quality of the emerald, if it is clear and free from flaws, depends upon its size and color, the darker green being the most valuable.

*Position of present workings.*—The present workings on the Muzo emerald mines are situated near the end of a long deep valley, which end is shut in by a cross range into the valley. In the time of flood the water washes the débris from the mines down the valley, but in dry weather the force of the water is not sufficient to clear away the débris, which soon accumulates and may in time stop the working of the mine.

*Thickness of emerald bearing strata.*—The thickness of the emerald bearing strata at the present workings of the Muzo mines varies from 100 to 200 feet. Although some emeralds are found in the upper strata the amount is inconsiderable and practically all the emeralds are found in the lower strata.

*Removal of overburden.*—All this means that immense quantities of barren rock and strata have to be removed in order to get at the emerald bearing ground by open workings, and as it would not pay to remove this overburden by hand labor the agency of water is employed. The present system is as follows: A small stream of water, coming down the mountain side above the workings, is intercepted and caught in a tank, when this tank is full the water is released, and rushing down and through a long winding ditch finally comes to some of the débris and washes it down the valley, where it accumulates until washed away by the stream from the cross hills. This arrangement answers fairly well in wet weather and for working on a small scale only.

*Removal of overburden in advance of workings.*—In order to insure a regular supply of emeralds, it is important and necessary that after the present accumulation of débris has been removed work should at once be commenced to remove the overburden from the next portion of emerald bearing ground proposed to be worked, and this should be pushed on as fast as possible during the wet season when water is available. There should never be less than 12 months' work of emerald bearing strata exposed and clear of débris. This, of course, means an expenditure of capital, but it would pay well in the long run and insure a more regular supply of emeralds.

It is stated by the expert that the production of the mines for the period included between May 1, 1904 and January 31, 1905 was as follows, stated in carats: First-class emeralds, 262,518; second-class, 467,690; third-class, 22,700; fourth-class, 16,000. These figures give a total of 768,938 carats sent to Bogotá in the period named. Of the relative value of the several classes of emeralds shipped to Bogotá the expert says:

It will be noted that one-third of the emeralds sent from the mines are considered first-class there, but I understand that a considerable proportion of these when examined by an expert are reduced to the second or third class; on the other hand, it may happen that emeralds considered second-class at the mine may be found on examination to be first-class. In making my estimates I do not take into account the second or third or fourth class stones, nor do I estimate anything beyond the average for the exceptionally large stones of high quality which are sometimes found and which bring such high prices. I consider it would be a fair estimate to say that 10 per cent. of the emeralds sent from the mines are first-class. These in cutting will probably lose one-half their weight. Taking this as a basis of calculation, the profits of the Muzo mines for the last 10 months' work for which I have the production should not be less than the following and may be more: Ten per cent. of the production, 76,893 carats; allow one-half for cutting, 38,446 carats; production, estimated value, £153,784; less wages and other expenses at mines, £10,784; net profit, £143,000 ($695,910.)

*Low-class emeralds should be destroyed.*—I am strongly of the opinion that after an expert or a committee of experts has carefully examined the lower class emeralds the stones which are not worth a fair price per carat should be destroyed in the presence of a committee, and emeralds of value should be carefully weighed, described, numbered, and entered in a book kept for the purpose, so that a record may be kept of every emerald of value. To destroy the low-class emeralds might be a loss of money for a time, but would be a gain in the long run as it would have many advantages.

*Future profits.*—With reference to the future profits of the Muzo mines, if my recommendations are carried out and the mine is managed with skill, energy and honesty, the results should be as follows: An average output of 100,000 carats per month, a reasonable estimate, would be equal to 1,200,000 carats per annum; taking 10 per cent. of these as best quality would leave 120,000 carats; loss of one-half in cutting leaves 60,000 carats; 60,000 carats at £4 per carat, £240,000; deducting for cost of working mine, staff, and contingencies, £40,000, should leave a profit of £200,000 ($973,300) per annum.

I would also point out that by opening the old workings on the other side of the valley another and probably productive and profitable mine might be opened. But the area of emerald bearing ground is so large at Muzo that the only limit to the production of emeralds, if required, would be the quantity that could be sold without reducing the price seriously.

In conclusion, I may say that in the Muzo emerald mine the Republic of Colombia has a magnificent property, which should conduce to the prosperity of the country for generations to come.

---

The Churchill Jewelry Co., Pueblo, Colo., has filed an appeal from a recent decision of a police magistrate declaring the concern guilty of conducting a pawn brokerage business without a license, and imposing a $100 fine.

THE HOROLOGICAL REVIEW

## Parisian Art Work in Bronze Clocks.

A TIMEPIECE notable for its beauty and artistic qualities is the handsome clock of gold bronze and tortoise shell presented by Marquise de Pompadour to Frederick II. The clock, which is illustrated herewith, dates from 1760. It is the work of Stollewerk in Paris and measures 2.63 meters with the pedestal. It is now preserved at the Marble Palace in Potsdam.

The use of artistically wrought clock cases as a decoration of private dwellings originated in France at the close of the 17th century. It was around the year 1657 that in consequence of Huygens' invention the house clocks with weights were more and more abandoned and gave place to the mainspring clocks, whose works were inclosed in more or less richly ornamented and artfully wrought cases. Small transferable clocks with horizontal motion, as well as clocks in the shape of monuments of chiseled and gilt bronze, were already known in the 16th century, and many of them may be found in the various art collections. A regular manufacture of artistic ornamental clocks for the mantlepieces, however, was not commenced until the 18th century. The finest works of this kind, executed by eminent artists and made of the finest material, are partly in the possession of rich aristocratic private families or else exhibited in museums.

Of many of them reproductions were made, however, at all times, and as the decorative style of the present era also takes kindly to replicas of the ornamental clocks of the 18th century, we will pass in review a few of the most interesting specimens with a description of the original models.

One of the handsomest mantle clocks of that period was the work of the famous artist, Saint Germain, during the reign of Louis XV. Like the original, the reproduction is 80 c.m. high. Its base represents a grotto, which contains a chime in the center inclosed in a box. The music box closes in front with a glass door in an ornate prettily curved frame bearing a small shield. The artistic treatment of the space above and below the dial has for its theme Venus bewailing the death of Adonis. The form of the young hunter in a fine pose is stretched out over all sorts of rocks. On the right a dog is raising himself up to him and over his head are affixed a shield and quiver. Behind the body of Adonis and over a grille-work is the clock mechanism. On both sides running up from the base and around and over the dial are plants and arabesques and on top reclines in a half-sitting posture the goddess who, leaning forward, mournfully regards the dead body.

GOLD BRONZE CLOCK PRESENTED TO FREDERICK II.

Two smaller clocks, one of them Louis XIV., the other Régence, were originally intended to be affixed to two brackets fastened to the wall. Their reproductions are adapted to be hung up. Both are imitations of the work of Charles Boulle, the inventor of incrustations of tin, brass and tortoise shell in wood.

The Louis XIV. clock shows on the pedestal rich arabesque ornaments in the masks and female heads between. The oblong wooden case and the round frame of the dial are inlaid with tortoise shell and tin. At both sides of the dial are two small socles with flower vases of bronze, and on the upper dome, likewise worked in inlaid wood and with bronze decorations, a bronze figure is seen, in a running attitude and blowing a trumpet.

Embellished with mosaic work of the Boulle style is a clock which is affixed over a column on feet. The column is square, a little wider above than below, and the lateral surfaces are covered with mosaic work. The work of art holding the dial is made of gilt bronze and represents Apollo's sun carriage. The original of this timepiece is in the Louvre Museum at Paris.

## Some Remarkable Flat Watches of the Present Day.

VARYING criticisms have been published from time to time representing the opinions of experts and commercial interests on the policy of manufacturing flat and extra flat watches. As a matter of interesting news and a further contribution to the elucidation of the subject the reproduction of illustrations with explanations from a Swiss contemporary, the *Revue Internationale d'Horlogerie*, may be in order. Says the journal: "There are evidently serious objections to the liberal production of extra flat watches of poor quality because it is scarcely possible to construct such pieces without the most thorough care, which involves great expense. But it goes without saying that the carrying of flat watches involves less inconvenience with wearers than do thick ones. A short experience in carrying both will readily decide the question. The manufacture of flat watches of the best quality is simply a question of admirable skill, mechanically the making of masterpieces beyond criticism.

"In continuation of what we have already published on this subject, the house of Georges Meyer, Chaux de Fonds, which makes an important specialty of these pieces, has shown several different styles and sizes and in different stages of completion. The total thickness of these, including the glass, varies from 3 to 5 mm. for regular watches and 7 to 8 mm. for the more complicated specimens. They are thought worthy of being photographed and reproduced here in their actual sizes.

"All the movements of these samples are made in a mechanically perfect manner and of a finish beyond criticism. They are all made entirely by hand by workmen who may be proud to be able to call themselves 'watchmakers.'

"It is only just to state that for parts of a like delicacy it would not be possible in most cases to use mechanical devices.

"We have been tempted to measure some of the principal parts of these extra flat watches of Mr. Meyer. According to these measurements the total thickness of a movement of 19 lignes does not exceed 1.3 mm., and the following are the thicknesses of different pieces:

| | MM. |
|---|---|
| Height of barrel | 0.8 |
| Thickness of wheels | 0.1 |
| Thickness of escape wheel | 0.08 |
| Thickness of cut balance | 0.3 |
| Thickness of jewels | 0.15 |
| Height of spring | 0.15 |
| Thickness of ratchets | 0.1 |

"These figures show the difficulty met in the execution of such work, which requires a clear general design and a mathematical precision to lay down such dimensions, where fractions of hundredths of an inch are of account in obtaining remarkable results.

"At a time when horological productions of indifferent qualities overcrowd the markets, it must be noted with satisfaction that an effort has been begun to manufacture horological works of real merit."

## Notes on Watch and Clock Oil.

(Compiled for THE JEWELERS' CIRCULAR-WEEKLY from different authors.)

(*Continued from issue of August 9, 1905.*)

OLIVE oil has been used as a lubricant since the early days of horology, the older writers giving many methods of treating it. It is obtained from the fruit of the *Olea Europea*, one of the jasamines, which grow throughout southern Europe, northern Africa and other tropical countries.

For the preparation of the finest oils, known as "virgin oil," only the pulp of olives picked by hand is used. The pulp is packed in strong linen and the oil is compressed by twisting the linen together. The pulp sometimes contains as much as 70 per cent. of oil. Its last traces of adhering acid are removed by vigorous and repeated shaking with one hundredth part of its weight of caustic soda lye. After the mixture has stood for several days a large quantity of water is added and the oil floating on the top is poured off. Though the oil is now free from acid, it still contains coloring matter and other substances which would prove injurious. It is then mixed with very strong alcohol, 10 parts of the former and two of the latter, and thoroughly mixed by shaking. The bottle containing the mixture is then placed in the sun and the mixture shaken several times a day. In the course of two or three weeks the oil will have become white as water, when it is withdrawn from the alcohol, on the surface of which it floats. The purified oil is placed in small bottles, tightly corked, and kept in a dark, cool place.

## English Watch Manufacturers Seriously Disturbed by American Competition.

WASHINGTON, D. C., Aug. 10.—It is stated, on the very best authority, that a unique condition of affairs confronts the English trade in watches. Improvements have been made all along the line of manufacture, and still complaint is made that the trade is rapidly dying out. There is serious talk now of trying to amalgamate all the factories under one general management, and see if in that way expenses can be cut down and business put on a profitable basis.

A brief review of the industry in England may not be without interest. The chief center of the industry is Prescott, Lancashire, where for centuries it has been the one craft of the place on which all energies have been centered, and the work was carried on in different small establishments, each making a specialty of its own particular part. This remained the case until about 20 years ago, when it was found that trade was leaving the town, and that Swiss and American makers, working on a large scale and with elaborate machinery, turned out cheaper and better watches at prices with which the small producers could not compete. This was also true in Clerkenwell and Coventry.

The Lancashire men determined to put up a stiff fight for the trade, and funds were raised for the erection of a large and splendidly equipped factory. This was placed in charge of the former leading local maker, and nothing was lacking on the part of the company to insure its success. Much of the necessary machinery was made in Prescott, where there are some very expert toolmakers, and the world in general was searched for improvements which were adopted as soon as they were found to be practicable. In some ways this venture was a complete success. A watch was produced that for cost and quality would stand comparison with the best of its rivals. It is claimed that the Prescott watch is as good as the American. The actual cost of manufacture when the factories are running full time is found to be lower than it is in this country. This brought the English article into renewed popularity, the factory was enlarged, and soon Prescott was furnishing employment to more than 1,300 people, and upward of $1,500,000 was invested in the plant and its equipment.

From this point on it is claimed that American competition has gradually squeezed the life out of the trade until at the present time not more than 500 hands are employed, and it is further claimed that there is serious danger of the total extinction of the English watchmaking industry.

The claim is made by the English manufacturers that the American "combine," whatever they embrace in that generic term, can fix whatever price it pleases owing to our high protective tariff. On the other hand, in England there is no import duty. It is also stated that American makers are systematically making a dumping ground for a certain percentage of their output on the English markets at prices sometimes much less than is asked for at home.

The report goes on to say that an effort is going to be put forth to get legislative action which will in a measure protect the home industry from this unfair competition.

# A Watch with a Sentiment

In naming our new O-size complete watch Betsy Ross, we have paid a pretty tribute to the interesting widow whose nimble fingers formed our first and most enduring national emblem—"Old Glory,"—and at the same time we gave *you* this cue for selling: the Betsy Ross Association has nearly a million members, while nearly every other American woman entertains the sentiment of regard for Betsy Ross' memory that must make this watch immensely popular.

# Betsy Ross

**Complete 0-Size Watch**

is the best value in its class to-day; 7 jewels, pendant set, nickel movement of high grade, in a Boss 20-year filled-gold case. Little room to say more than that in praise. The Betsy Ross is a watch with a sentiment, and in every way worthy of the association. Now in the hands of all the jobbers, and selling *very freely*.

## Niello in the Decoration of Watches.

(Translated for THE JEWELERS' CIRCULAR-WEEKLY from *La Fédération Horlogère Suisse.*)

NIELLO, termed also Russian or Tula enamel, from the city in which it first appeared, has the effect by its deep blue-black, of producing a strong contrast with the light background of the silver article which it decorates.

This process has many important advantages which make it practical and inexpensive. It possesses desirable artistic and durable qualities. To understand its value, it suffices to consider the technical principles on which its industrial employment for watch cases is based. The design, which is to appear in blue-black, is hollowed on the silver article by means of the graver or stamp, the grooves are then filled with niello and the piece is fired and polished. The niello parts then present considerable thickness, since the decorative substance adds perceptible bulk, as may be seen in Figs. 1 and 2.

Ordinary enamel is simply an application to the silver, owing to the silicates which are its base. Niello, on the contrary, is composed of metallic sulphides of lead, silver and copper, and penetrates the metal. In fact, when the solidification of the niello, on its passing through the fire, is taking place, a sulphuration of the silver with which it comes in contact is produced, and then a real chemical soldering is obtained, so that the nielloed parts are actually embodied with the watch case.

The adhesion of the decorative substance due to its incorporation with the metal, and the fact that the niello is itself malleable on account of the lead it contains, allow of bending the nielloed objects without detaching a particle of the niello itself, as may be seen in Fig. 3, which represents silver plates that have been bent after applying niello.

The niello undergoes no deterioration. Consequently its other qualities are a perfect adhesion to the silver, malleability and freedom from cracking or splitting.

As the metallic salts constituting the niello melt at a comparatively low temperature, there is no risk of deforming the articles on their passage through the fire. It is readily seen that this is especially advantageous for watch cases, since with niello there is no fear of imperfect closing edges such as are frequently found in cases whose decoration makes necessary a passing through fire at a high temperature, as is the case, for instance, with enamel.

The chemical action of the sulphides of the niello on the silver of the article being indispensable to the success of the operation, it follows that the process is not applicable to common metals. It is therefore impossible to make articles similar to those of niello-silver out of non-precious metals. The owner of a niello and silver watch case is on this account not liable to meet with the same article in common metal, as is often the case with other articles. It is only the silver case that is decorated according to the principles we have indicated, that has the qualities which distinguish true niello, whereas the imitations made of steel, German silver or other metal are not niello, as they cannot be obtained except by processes affording less solidity, such as those of oxidation and enameling.

Fig. 1.

Owing to the properties of niello and the way in which it is applied, a nielloed watch long retains the appearance of a new one, and this is its chief advantage. Owing to its thickness, the decorative substance withstands the friction of the pocket for many years, so that no change in the design becomes perceptible. After wear the polish is merely somewhat deadened, which does not impair the appearance. The gray spots that sometimes appear on the niello when the article is under glass, disappear when subjected to the friction of the pocket. They may be easily removed by rubbing with soft linen slightly oiled.

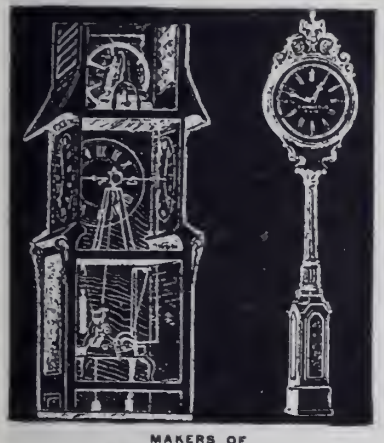
## THE - JEWELER'S - TIME-HONORED - SIGN.

EVER SINCE the advent of the watch in the latter part of the fifteenth century, the sign hung out by the majority of Jewelers has read, "Watchmaker and Jeweler"; and this has often been supplemented by a large representation of a watch hung in front of the store. Indeed, the watch is still the sign of the Jeweler.



The watch department should be the Jeweler's first care. Never were such good watches to be had as now. This house specializes the watch, rendering prompt and efficient service.

## An Attractive Chicago Jewelry Store.

THE illustration of the new store of Kleiner & Hein, 206 E. North Ave., Chicago, shows very clearly the general interior arrangement. The size is 20 by 50 feet, ceiling of corrugated steel, tinted green and richly gilded, and fixtures of golden quartered oak. In the front, but not shown in the illustration, are two watchmaker's benches, one on each side of the store. They are ornately trimmed to match the fixtures.

INTERIOR VIEW OF THE STORE OF KLEINER & HEIN, CHICAGO.

In addition to the electroliers, the store is lighted by incandescent lamps, placed in the cornice of the side and rear wall cases.

This firm was organized Jan. 15, 1902, and is composed of Wm. C. Kleiner and Chas. C. Hein. Both are progressive and enterprising young men, and not only take pride in keeping their stock attractively displayed in the show windows and cases, but they also make a careful study of the goods which are particularly adapted to the requirements of the trade in their locality.

## Make The Customer Feel He Is No Stranger.

TEACH your clerks the cash value of that short word "Mister" when coupled with the name of a customer—particularly the chance or occasional customer who does not expect to be called by name, says a writer in *Printers' Ink*. Have you ever been recognized and called by name in a store, and by a clerk with whom you did not feel at all acquainted—by a clerk whom you had no recollection of having met before? Didn't it please you in spite of yourself? Didn't you warm a little toward the man and the store? Don't encourage any undue familiarity, but do everything you can to impress upon your selling force the importance, to them and to you, of remembering and correctly connecting names and faces, and of using names at the right times and places. It is particularly uncomplimentary and provoking to a regular, though, perhaps, infrequent, customer, to have the clerk ask his name and address time after time; especially by contrast with the clerk in another store who says, "Same address, I suppose, Mr. Jones, number 14 W. Broad St." All other things being equal, people prefer to trade where they feel acquainted; and the salesman who wants to make the most of himself will cultivate a memory for the names and faces of customers and, if possible, remember the customer's tastes in the kind of goods carried in his department.

If a customer indicates a preference for any particular clerk, that clerk should wait on him or her whenever possible. The customer will spend more money and with less attention, if served by a clerk who is entirely agreeable and who understands his or her tastes and peculiarities. The petty jealousies which often result among other clerks, when such preferences are shown, should be squelched without ceremony, and the jealous ones should be told to watch the object of their envy with a view to learning and putting into practice at every opportunity, those good qualities which lead to such popularity. Lots of customers who are cranks are quite as well aware of it as is the salesperson who serves them, and are therefore all the more appreciative of patience and efforts to please. The right salesperson can often turn a chronic crank into a very desirable and easily pleased customer, and that faculty is worth cultivating. Even the customer who fails to find the article wanted can be made to feel under obligations and to try the store again just through kindly, pleasant treatment.

## Co-operation and Organization.

NO matter how cheap the price, how good the quality or how popular the merchant, the ultimate success of a business depends on co-operation and organization. There must be a head who is responsible for the conduct of the store. Immediately under this head come the men who are in turn responsible for those under them. An organiztion worked out on these lines will result in success for the merchant and harmony among the employes. Usually the manager needs to exercise but an advisory function to control the general policy of the store. A system once set in action runs of its own accord, it reaches to the uttermost details and with the right kind of a man at its head it becomes a living thing, not a mere mechanical machine. The life of an organization is but the reflection of the personality of the man at its head.—*White's Sayings.*

# RETAIL JEWELERS ADVERTISING

*The use of this department is open to every retail jeweler and optician. Forward for criticism your newspaper ads., booklets, catalogues, novelties, circulars, etc. Ask advice and offer suggestions. Replies in these columns are unbiased. Make letters as full and particular as you desire. Every letter and ad. sent will receive full attention, though the publication of the matter may sometimes be delayed several weeks.*

## How Diamonds are Advertised.

DIAMONDS form one of the most important items in the retail jeweler's stock, and yet they are probably the most difficult to talk about convincingly in local advertisements.

Several merchants have, however, hit upon ideas which are clever, in the way of attracting the attention of customers to their diamond stocks, and we illustrate a few advertisements now running in local newspapers.

Marx & Bloch, Portland, Ore., say "Better than a savings bank. Invest your money in diamonds. They are steadily advancing in price."

J. H. Heiman uses large special type for the word "Diamonds" and tells the people of Cleveland, O., that he sells diamonds at import prices, thereby saving customers from 20 to 30 per cent. This style of type for headlines has been used for many years by jewelers.

Wm. T. Rae & Co., Newark, N. J., print a brief announcement in the center of cut of a ring, and tell buyers to come to them for diamonds, as their assortment is very large.

M. W. Hall, Waterbury, Conn., prints a short instructive paragraph and says he carries in stock only perfect diamonds.

J. N. Mulford, Memphis, Tenn., says that "cash wins" at his store, and that as he gives no credit he can give his customers an advantage in price.

In the illustration on Page 91 are shown the efforts of jewelers who attract attention to their announcements through "type display" and catchy headings.

C. L. Byrd & Co., Memphis, Tenn., in speaking of their new diamond jewelry, bring out the point that all their stones are American cut of true color and perfect.

The Palamountain Co., Charlotte, N. C., starts its advertisement with "For one minute" and then invites an inspection of its stock.

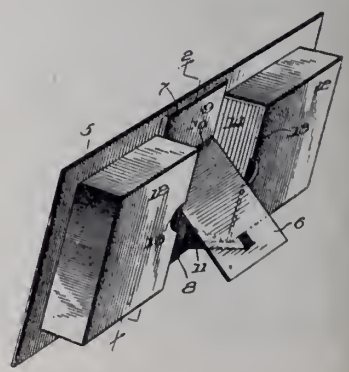
The Bonnet & Ross Co., Columbus, O., says that diamonds retain their popularity among polite people, and that it is a treat for customers to look over its line of unset stones when shopping.

F. Rolshoven & Co., Detroit, Mich., catch the eye with "Diamonds of quality" and "Lowest prices in the city."

Walter Powell & Sons, Cumberland, Md., offer some "good advice" and then mention that their diamonds are sold at a small margin of profit.

A. B. Griswold & Co., New Orleans, La., say that they have on hand a package of unset diamonds which are extremely fine in quality, and that they will mount any stone at a certain price.

Rogers, of Gloversville, N. Y., briefly tells why diamonds should be examined and selected by daylight.



The modern idea of all advertising, is to aim first to catch the eye of the reader and then to favorably impress his brain by a brief, bright, convincing and yet honest statement of your proposition. Don't try to tell your whole story in a small space in your local paper, by filling the space with solid type and thereby missing the eye of the reader.

Jewelers' advertising should be so worded and displayed, that the announcement will induce persons to call at the store for further and full information concerning the goods advertised.

## A Novel Display Card.

ONE of the most recent patents in the way of display cards and trays was that granted a short time ago to Alec Bauer, Chicago, which is shown in the illustration below.

According to the official description the device comprises a card bearing two boxes on the back of the card, separated from

A RECENTLY PATENTED DISPLAY CARD.

each other and opened at their inner adjacent sides. There is a hinge support on the back of the card between the boxes arranged to cross the open sides between the top and bottom to prevent the removing of articles from the boxes while the card is supported in its tilted position.

The patent has been assigned to the corporation of Bauer & Black.

L. M. Bond has closed out his jewelry business at Judsonia, Ark., and moved to Purdy, Mo.

## Retail Advertising Department.

### Making The Small Merchants' Advertising Pay.

NO matter how small an amount of advertising is done it needs a carefully thought out plan to make it effective and to secure the best results from it. I am sure that the lack of this planning beforehand is what causes the merchants in smaller cities and towns to say that advertising may be a good thing for others but it never paid them.

Conversation with many has brought forth the often expressed idea that while advertising has built up the big department stores in metropolitan centers selling the same kinds of goods at the same prices—the reason why it had paid these stores and did not pay the country merchant is because environments were better suited to selling goods in the city. Advertising paid there because there were so many people from whom to draw trade and there were daily papers in which to advertise.

It is not, however, due so much to population or mediums, as the small merchant has beguiled himself into believing. The truth of the case is this: the merchant in the small town inserts his advertisement in the local paper, or distributes his circulars, and then awaits results, considering this initiatory advertising enough to force the sale of goods at once without further effort on his part. He has not thought ahead far enough to see that the insertion of the advertisement is but one link in the chain. There are other things that must be done to make this advertising seed yield a harvest.

In the first place every clerk in the establishment should know the contents of the advertisement thoroughly to be able to talk concerning it understandingly, and should be instructed to make a special effort to bring notice to the goods advertised to every customer who enters the store. There is no need to force the goods on a customer, because notice can be brought to them very easily without resorting to such procedure.

The windows should be trimmed in accordance with the goods advertised, the store interior should be decorated likewise; and instead of endeavoring to conceal the real bargains which are offered in the advertisement, and on which perhaps only a small profit is realized, a lavish display should be made. Everything that will help the advertising to win out should be brought into exercise.—*C. H. Osborne in Printers' Ink.*

J. K. Moore, Wenatchee, Wash., has sold out his jewelry and optical business to Howard Thompson, Independence, Ia., and returned to his old home in Ohio.

## What Is Presbyobia?

(Paper read by E. C. Roberts, Red Wing, Minn., before the Convention of the American Association of Opticians, held at Minneapolis, Minn., July 27, 1905.)

AMONG this great assemblage of some of the most inquisitive, studious and progressive optometrists and ophthalmologists of the country, I presume there are some besides myself who have felt that the present definition of presbyopia, as used by many writers, is very elastic, if it can be said to define a positive condition. And it is with the view of bringing to your attention what seems to me to be a very uncertain and indefinite meaning conveyed by this word, which defines what appears to me to be a definite and positive condition, that I have chosen this subject for discussion.

Hyperopia, myopia and astigmatism are defined in a way that is positive, and are not easily taken for any other condition than the one intended to be represented, while according to some writers the condition presbyopia might be considered as existing or not, according as the eye is hyperopic or myopic.

Hyperopia is defined as an abnormal refraction of the eye, due to a too short anterio-posterior diameter, the focus of parallel rays of light being behind the retina.

Myopia is defined as defect of vision due to a too long anterio-posterior diameter of the eye, the focus of parallel rays of light being in front of the retina.

Astigmatism is defined as a visual defect due to unequal curvature of the refractive media, whereby the focus of rays of light coming from a point will not converge to a point on the retina.

Hartridge, whose works a short time ago were considered an authority which the student must first study and learn when beginning the study of optometry, says: "Presbyopia may be arbitrarily stated to exist when the binocular near point has receded to 22 cm., and this occurs usually in the emmetrope at about the age of 45." Does Hartridge refer to the recession of the near point in an emmetropic, or an artificially made emmetropic eye, or to the recession of the near point regardless of the refractive condition of the eye? He does not say.

In another place Hartridge tells us that this recession of the near point, or failure of accommodation, begins not later than the 10th year.

Now, if presbyopia is to be considered to exist when the binocular near point has receded to 22 cm. regardless of the refractive condition of the eye, then in high degrees of hyperopia, presbyopia may be said to have set in in early childhood, or that hyperopia and presbyopia are synonymous when referring to near vision.

Accepting this as a definition, I have in my records a case of presbyopia in a young man of 20 years. The refractive condition of this case was O. D. Hm. = 10.00 D., O. S. Hm. = 11.00 D., and although he had been able to read without a refractive correction in his early childhood, the near point had receded beyond 22 cm. and the accommodation was not equal to the task of near work; but with the correction for hyperopia the binocular near point was restored to normal, or to the near point of the emmetrope. Therefore I think you will bear me out in saying that this was not a case of presbyopia, but one of simple hyperopia, and that the definition of Hartridge is incorrect, or at least incomplete.

Tscherning says: "The amplitude of accommodation diminishes in a very regular manner with age. The diminution begins to make itself felt at the close of infancy. It is so regular that, beginning at 25 or 30 years, we can frequently determine the age of the patient to almost one or two years. At the age of 47 or 48 this diminution begins to manifest itself in emmetropes, by the appearance of presbyopia. In hyperopes the presbyopia makes its appearance sooner. It appears later in low myopia and myopes of high degree never become presbyopic, although the amplitude of accommodation diminishes in them as in every one else. In emmetropes it is very rare to find an exception to the rule laid down above, unless the pupil is very small. Therefore if the patient reads without glasses when over 50 or 55 years old, he must be myopic if the pupil is of ordinary size.

So, according to Tscherning, the effect of hyperopia on near vision is presbyopia, while the effect of myopia on near vision is a decrease in the amount of or the absence of presbyopia. Emmetropic eyes are the only ones that have any constant relation to each other in so far as presbyopia is concerned.

Tscherning's idea of presbyopia appears to include refractive errors, and not to have been limited to a physiological change in the lens, which latter alone constitutes presbyopia. It appears to me that the commonly accepted definition of presbyopia must have originated before the refractive conditions of the eye were understood, and that these comparatively modern writers have used this definition without consideration or thought, and that this defintion should be considered obsolete.

Gould's Medical Dictionary defines presbyopia as a senile failure of accommodation, a condition reached at about 45 or 50 years of age, in which from growing inelasticity of the lens of the eye (failure of accommodation) the near point of distinct vision is removed to an inconvenient distance from the eye, with consequent diminution in the size of the retinal image.

This eminent writer considers that senility plays a part in presbyopia. I shall have to ask, when does senility begin? When does the crystalline lens reach maturity? This recession of the near point begins in early childhood if not in infancy, and surely senility does not begin in the crystalline lens, while every organ and tissue of the body, and the body itself, has hardly begun to develop, much less to mature.

In an article read before the American Medical Association and printed in several optical journals since then Dr. George M. Gould says: "The age at which a presbyopic correction should be given, depends on the pre-existing refractive error. The old rules as to 45 years of age and so forth are nonsense. If the patient has two diopters of hyperopia the presbyopic correction will be needed much earlier than if he is emmetropic. If he has myopia the necessity will arise later, as is well understood. But astigmatism creates a greater indefiniteness and especially if it is unequal or unsymmetric. Anisometropia further complicates all rules and makes them still more indefinite. The onset of troublesome presbyopia also depends on whether the ametropia has been corrected or not for years previous."

In this, Dr. Gould infers that uncorrected hyperopia is presbyopia. Why then is not corrected hyperopia a corrected *presperopia?* And if presbyopia is a senile condition, why does the myope not become presbyopic as early in life as the hyperope? Is myopia indicative of perpetual youth and is this the reason why senility does not take place in the myope? I believe that quite the reverse of Dr. Gould's dictum is nearer the truth as to the effects of hyperopia and myopia on the advent of presbyopia.

In another article by Dr. Gould, reprinted from "American Medicine" in journals devoted to optometry, the doctor says: "We are prone to forget that presbyopia really begins with the beginning of life, as the recession of the near point commences in infancy."

We can hardly believe that so eminent a man as Dr. Gould does not know that senility cannot begin in infancy, and if the doctor knows that such a thing cannot possibly be true, then we must consider that his use of language hardly befits him in the position he occupies as one of our leading writers and teachers.

These writings show us that students must not place implicit confidence in the teachings of any one writer, but must study them all; and instead of believing, simply because the ideas are advanced by some eminent man, we should study the condition and the physiological effect, and let our mature reason decide what we are to accept as true.

In the writings of Dr. Gould we find frequent insinuations regarding the incompetency and illiteracy of the present optometrists. I fear that if we accept the writings of some of our eminent men as infallible, we surely are incompetent. And if the medical schools in their four long years of instruction, have failed to impress upon the minds of such men as Dr. Gould what really constitutes the condition known as presbyopia, they would do well to take the short, insufficient course of one of our optical schools and I will guarantee that they will teach them that senility does not begin in infancy.

In early infancy the crystalline lens is very soft and pliable and it requires very little effort of the ciliary muscle to focus the infant hyperopic eye to a point much nearer than 22 cm., but as we advance in life the crystalline lens slowly becomes firmer and more solid, slowly losing its elasticity until the ciliary muscle can no longer change the form of the lens sufficiently to focus rays of light coming from a point 22 cm. from the eye. It is true, clinically, that a patient suffering from a considerable degree of hyperopia will complain of the same subjective symptoms, relative to near vision, as will the presbyope; but presbyopia is a physiological condition whose nature is an increasing inelasticity of the lens, while hyperopia is an entirely different condition and one which can easily be differentiated by objective methods, and should under no circumstances be confounded by careful and scientific optometrists.

For practical conveniences of understanding, there ought to be a point at which the crystalline lens can be considered to have reached maturity. This maturity cannot be defined by the location of any specific near point, since this would necessarily involve a consideration of the refractive condition of the eye and the functional capacity of the ciliary muscle, as well as the physiological change in the crystalline lens upon all of which the location of the near point depends, since the change in the crystalline lens is gradual, beginning in infancy and continuing until about the 70th year, when the lens has become firm and solid, so that the ciliary muscle can no longer change its refractory condition. It is evident that the fixing of this point of maturity should depend solely upon the amplitude of accommodation.

Five "D" of accommodation is accepted by many of the best optometrists as the amplitude required for comfortable near work. This allows the eye, when duly corrected for distance, to do ordinary near work without accommodative explanation and the accompanying asthenopic symptoms.

Accepting this as the minimum amount of amplitude of accommodation consistent with prolonged use of the eyes, at the reading distances, when the amount of accommodation has diminished to 5 "D," the lens might be said, or defined, to have reached maturity; and when the amplitude of accommodation, the result of normal, physiological change in the crystalline lens, has diminished

## Optical Department.

glow 5-"D," it should be considered and de-nced as "presbyopia," a condition usually reached about the 45th year.

Dr. Gould said that if the patient had two di-ters of hyperopia the presbyopic correction will needed much earlier than if he is emmetropic. n my experience this has not been the case. The perope of two diopters, who has never worn a rrection for his refractive error will, upon aching maturity of the crystalline lens, have a ypertrophied ciliary muscle, and upon receiving s refractive correction will not need a presby-ic correction until the ciliary muscle is re-uced to its normal state, or the presbyopia in-eased until the hypertrophied muscle can no nger focus the lens without fatigue.

Referring again to Dr. Gould's paper, the doctor id: "If he has myopia, the necessity for a pres-yopic correction will arise later." This is true the refractive error is not corrected; but if you rrect the refractive error of a myope of two opters at 45 years of age, and the myope has t worn a correction previously, you will find the resbyopia is there, and it will need correcting; nd in correcting myopes of high degree you will nd a condition very much like presbyopia, long fore they have reached the age of 40. This is cause of paresis of the ciliary muscle. This uscle never having been used, is so weak that young adults it cannot focus rays of light com-ng from a point 22 cm. in front of the myopic ye artificially made emmetropic.

Therefore we must consider that a presbyopic rrection will not be needed as early in life in a yperope of one or two diopters, who has never orn a correction, as in the emmetropic eye; be-use the ciliary muscle is hypertrophied, over-eveloped, consequently abnormally strong, and n yet focus the eye at 22 cm. with the refractive orrection on.

The myope, should he begin to wear a re-active correction as he approaches the presby-pic age, will need a presbyopic correction arlier in life than the emmetrope, because of aresis of the ciliary muscle. The ciliary muscle aving had little or no work to do, is abnormally eak and not capable of focusing the already ardening crystalline lens.

This hardening of the crystalline lens which uses the recession of the near point and leads ventually to presbyopia, proceeds about equally in ll eyes where pathological conditions do not in-erfere; and when a patient near the presbyopic ge applies to us for glasses, we must correct the fractive error. Then barring pathological changes, ypertropby or paresis of the ciliary muscle, we ill find the presbyopia about equal in all eyes at given age. It is true that in practice we find yopia and hyperopia in combination with pres-yopia, but the one condition is not the other and hould not be so considered, for presbyopia is an ndividual entity.

Presbyopia should be defined as that degree of hysiological change, characterized by hardening r solidifying of the crystalline lens, which will ender a normal ciliary muscle incompetent to ccommodate an emmetropic, or an artificially nade emmetropic eye to a point 22 cm. from that ye.

---

The works of T. A. Willson & Co., Read-ng, Pa., will be closed during the week, ntil Aug. 21, in order to give the employes heir annual vacation and make general re-airs to the plant.

The official eye specialist of the Lake Shore Railroad, Dr. D. A. Goodrich, is mak-ng trips in cabs of the company's engines or the purpose of making examinations f the eyes of engineers, which will be more atisfactory to them. They have been com-plaining that the official has confined his nvestigations to indoor tests. The engi-neers hold that he should examine them nder their actual working conditions. Be-cause of this, Dr. Goodrich is riding with engineers in cabs so as to judge in that way how good the eyesight of the drivers may be for signals, semaphores and switches.

## Dynamics of the Ocular Muscles.

By John C. Eberhardt, Dayton, O.

(*Continued from issue of July* 19, 1905.)

LATENT ASTIGMATISM.

THE hypothesis presented by the writer some years ago, which has recently been reiterated by some of our leading authorities "that the desire for self-preservation which dominates the human functions may by a spasmodic activity of the ciliary result in an irregular contraction of the crystalline lens, and thereby neutralize a corneal asymmetry," was found to be the solution of the case cited. It will be well to emphasize at this point that the case under consideration had been previously refracted under a mydriatic, thus proving that ciliary spasm may baffle even the powerful drugs employed in producing cycloplegia, which, thanks to modern optometry, will in the future be banished from use in purely refractive cases.

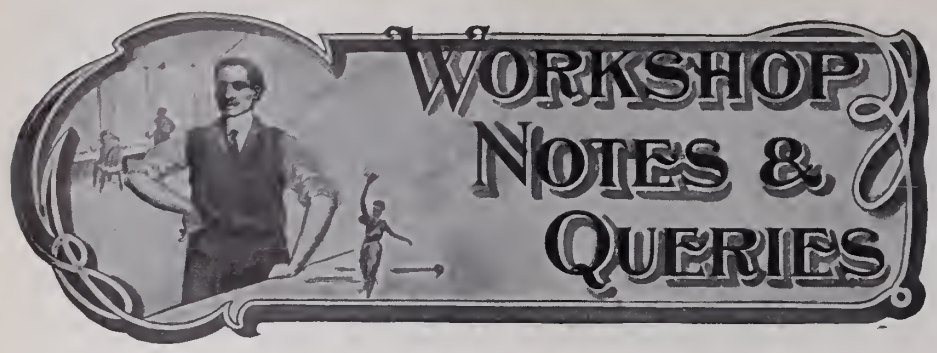
In the case here quoted, left eye was arbitrarily supplied with a + .75 cyl. ax. 90, right eye with a + .25 sphere, for constant wear, the same formula with + 1.00 spl. added to both eyes combined with 2° prisms bases in being used for near work for the purpose of repression. Various modifications of these lenses during a period of three months resulted in establishing a condition of comfort with marked improvement in physical conditions, refractive tests revealing + .50 sph. in right eye and + .50 sph. ⊂ + 1.00 cyl. ax. 90° in the left eye, amplitude of accommodation being five diopters in both eyes. This correction has been worn since then with comfort for constant use, and, what is most significant, the tendency toward ptosis of the left lid has entirely disappeared, as have all former neuralgic symptoms.

These results are due not only to the correction of the existing refractive error, but to the systematic stimulation of the entire group of ocular muscles by properly directed and persistent exercise, whereby these subnormal functions have not only been brought up to a satisfactory condition of efficiency, but the general tone of the nervous system has been indirectly improved, demonstrating that a comprehensive knowledge of ocular physiology and the therapeutic value of lenses and prisms, enable the optometrist along purely physical lines to establish and maintain that ideal ocular condition essential to the accomplishment of vision at minimum expenditure of energy, the value of which cannot be underestimated. This, because it is a well-known law of neurology, that nerve equipoise underlies and is absolutely essential to health, and consequently any functional abnormality which necessitates an excessive expenditure of energy must contribute to the impoverishment of the nerve centers involved, thereby impairing collateral functions as well and leading to those conditions known as nerve reflexes in all their perplexing phases.

OCULAR CALISTHENICS.

This leads up to the subject of the value of properly directed physical culture. For the past 2,000 years the value of a sound and well-developed physique has been recognized by the pedagogues of the civilized world, and during the past decade interest along these lines has been stimulated in our great educational centers.

It is generally conceded that this work has a well-defined and essential place in modern education, and specially trained and educated instructors are now available to intelligently outline and direct essential exercise devised to supply individual needs. Neither does any one now question the right of these physical culturists to prescribe and direct the various exercises devised to combat the effects of city life and the resultant physical sub-development.



The optometrist is confronted by similar subnormal conditions undoubtedly induced by the demands of our modern educational systems. During childhood nature sends to the various parts of the human body nutrition, not only for the purpose of enabling its functions to perform their work and to replace wasted tissue, but also to contribute to their development; if therefore owing either to a sub-development or to an abnormality a function is forced to exhaust its supply of nutrition, it does so at the expense of its own development and possibly that of its collateral functions as well, the same applying to the excessive expenditure of energy involved under similar conditions.

If therefore when such deficiencies are encountered, methods can be devised and their application intelligently directed by the optometrist, whereby the sluggish circulation is quickened, shrunken nerve conduits are dilated and nerve centers so stimulated that impoverished or depleted functions again receive an adequate supply of nutrition and energy, enabling them to perform their part in the complex human mechanism in a normal manner, the optometrist who thereby contributes to that condition of equipoise essential to health and comfort, is simply aiding nature in throwing off the effects of our so-called advanced civilization and our abandonment of a more close communion with nature.

In taking up this phase of optometry it is assumed that the physiology of the ocular functions has been carefully digested. It will be well always to bear in mind that a muscle in itself is not a factor, and that the appellation of "weak" or "strong" as applied to a muscle is an absolute misnomer. One might as well speak of a gallon measure being stronger than a pint measure because its capacity is greater, for a muscle is but a receptacle for energy, which in the human body we term nerve force. We know that the arm kept long in the bandage becomes emaciated and shrunken, as do all the muscles it contains. By patience this useless member is gradually brought back to activity, systematic and persistent demands upon nature resulting in again sending life-giving blood to the impoverished member, thereby building up wasted muscle cells as well as tissue and re-establishing a free transmission of energy to the various tendons, thereby ultimately enabling them to regain their efficiency.

As has been pointed out in preceding chapters, anemia is one of the characteristic symptoms found in conjunction with muscular insufficiencies, therefore it would seem reasonable that any means which will stimulate the circulation will have value in neutralizing these deficiencies.

(*To be continued.*)

[*Answers are also solicited from our readers to the questions published on this page.*]

QUESTION No. 1270.—**Silver Lost in Finishing.**—*If I deposit five drops of silver on an article, how much loss would there be in finishing the same, in rinsing, burnishing and buffing?* *S. L.*

ANSWER:—To estimate the actual loss of silver would be difficult unless the plated piece were weighed. But the silver that comes from the plated piece is considerably more than is usually supposed. This is demonstrated in some of the large manufactories where all the various wastes are utilized in such a manner that the silver is recovered. The first operation, after leaving the plating vat, is the rinsing in cold water. This water is soon charged with silver and cyanide so that it can be added to the plating vat as solution. The second rinsing in hot water also leaves traces of silver in it. Then comes the scratch brushing, the brushes and liquid used soon showing silver which, however, is difficult to save. The next operation is the burnishing, which in time rubs off some of the silver, as the burnishing water is known to contain silver. The final rouge buffing takes off a larger percentage of silver than any of the foregoing. A barrel of rouge, lint and waste from the buff room is usually worth about $15.00 at the refiners. So it is seen that there is a slight loss at every operation and it may be estimated at 10 per cent. after leaving the plating tank. This loss of silver is only a loss to the purchaser, and may be considered as a gain to the manufacturers.

QUESTION No. 1271.—**Silvering Before Soldering.**—*I have some Britannia parts to which I solder brass pieces, afterwards silver plating the finished article. What I want to know is how can I prevent the Britannia part from discoloring in the dip which is necessary so the brass will take the silver?* *B. B.*

ANSWER:—Brass requires a little different treatment than Britannia in silvering. It is best to treat the brass pieces first to a light coating of silver before soldering. In doing this it is necessary to do all the buffing on the parts before soldering. After the parts are soldered together the treatment then for the silver plating is the same as though the piece were all Britannia requiring no acid dip at all.

QUESTION No. 1272.—**To Oxidize Iron Castings.**—*I have some heavy iron castings which I would like to oxidize and electroplate with brass. I have a receipt for oxidizing copper but cannot get it to take on brass. Would you kindly assist me?* *A. B.*

ANSWER:—Cast iron objects are not suitable for treatment like forged or pressed iron or steel articles on account of their rough surfaces and their internal porous conditions. As an example it may be stated that cast iron can be soft soldered only after having had its pores filled with copper or some other suitable metal by friction.

QUESTION No. 1273.—**To Test the Fineness of Scrap Gold.**—*How can we determine the fineness of an ingot of gold which has been melted by a dentist and sent to us for credit? In most cases the color of these ingots is all right for 22 karat, but quite often when we come to roll the ingots out we find there is enough solder in them to make them crack and fail to roll.* *F. & Co.*

ANSWER:—No scrap gold can be tested for its fineness by any means known unless it has been properly melted. Such scrap gold will not crack in rolling or forging unless such rolling or forging is excessively done. Testing needles and the touchstone may be used with properly graduated acids, for gold from six to eight karats upwards to 16 and 18 karats. Aqua regia (one-third muriatic and two-thirds nitric acid) chemically pure and well mixed at a temperature of about 100°, will turn any gold below 18 karat a black color. Gold finer than 18 karat will turn brown when touched with aqua regia, and the lower grades will turn a still darker color of brown proportionately. Gee, in his *Jewelers' Assistant*, says: "Many of our readers will require to know, by reason of the necessities of their vocation, how to ascertain approximately the value and purity of the various articles of gold occasionally brought under their notice in trade. This can be done by the use of test needles, which are to be bought from assayers and material dealers. They consist of 10 or 12, and in some cases more, little slips of metal, to the ends of which are soldered pieces of gold of known standards, from seven karat up to 18 karat. With these and a good touchstone—a piece of black basalt—a fairly correct opinion can be formed of the quality of any gold alloy. The usual nitric acid testing mixture is also employed as an adjunct to these; in the higher qualities aqua regia is used as the test acid, because nitric acid does not act upon gold alloys of those qualities, and therefore gives no such indications by change of color as is to be seen in the lower qualities. To operate with the test needles, rub the article to be tested upon the stone till you have a clear gold-like stripe about the width of a shilling in thickness, then alongside of it rub one of the testing needles which you suppose to be about the same in quality, and apply to both at the same time a drop of the testing acid. The inferior quality will change color first under the action of the acid, and if very low in quality the streak will disappear almost immediately. The process is continued by trying the needles, higher or lower, as the case may be, till one is found whose action is the same under the acid as the alloy being tried. A full set of test needles are very useful in a business where there is often inquiry as to the quality of gold articles, and with little practice and experience nearly correct results can at all times be arrived at. It is not safe to express an opinion as to the quality of gold by inspection only, color being in that case the principal guide, and in the present advanced state of preparing alloys of gold it cannot be depended upon in any way as thoroughly sound and reliable evidence."

QUESTION No. 1274.—**Etching on Copper.**—*I have some copper pieces that I want to etch. How should I proceed?* *T. S. L.*

ANSWER:—Two preparations are necessary for etching on copper, the first a ground for the covering, the second a mordant for the etching. The ground is a solution of beeswax in turpentine, decanted until no sediment remains, and to which is added one-sixth of its volume of Japan varnish. The mordant is made with hydrochloric acid 100 grammes, chloride of potash 20 grammes, and water 880 grammes. The water is warmed and the chloride of potash perfectly dissolved in it first. Chemically pure acid should be used. Clean the copper perfectly, best by polishing, then darken the plate by pouring a kettle of the mordant over it. Rinse and dry, then pour over a little of the ground, keeping as even a surface as possible. When this is dried, which takes about 10 hours, apply a second coat of the ground. Before this dries, smoke the surface with twisted tapers, and when dry it will be ready to etch on. Draw the design or lettering with a pointed tool, taking care that the tool cuts through the ground. Then pour the mordant over the copper. Place the copper in a dish large enough to cover the parts to be etched, as they should be immersed in the mordant for five or six hours. If there are to be fine lines, they must be cut in after the shaded lines have been partly etched. When finished rinse in water and remove the ground with alcohol.

QUESTION No. 1275.—**To Restore Filigree Silver Color.**—*We have a number of filigree Mexican silver pieces that are very much tarnished. How may we restore their color?* *T. B. & Co.*

ANSWER:—To bring back the silver whiteness, first wash the article in a solution of 1 oz. of liquid potassa and 20 ozs. of water. Rinse and then immerse in a mixture of salt one part, alum one part, saltpeter two parts, dissolved in four parts of water. Let them remain for five minutes, wash in cold water and dry with chamois leather.

# THE CONNOISSEUR

*Devoted to Art Pottery, China, Marbles, Bronzes, Cut and Decorated Glass Ware, Bric-a-Brac, Lamps, Art Metal Wares, Fancy Goods and Kindred Lines.*

## THE RAMBLER'S NOTES.

WHAT THE RAMBLER SAW AND HEARD AMONG THE DEALERS IN ART POTTERY, CUT GLASS, BRONZES, ETC.

GRACEFUL CHINA SETS AND NOVELTIES.

IN the china that Bawo & Dotter, 26 Barclay St., New York, are offering to the trade is a coffee set that is much admired for graceful lines and tasteful ornamentation. The shapes are quite out of the ordinary, commending them to buyers who are looking for something different from what they see in the acres of china always before their eyes in the marts today. In the same line are tea pots and sugar and cream sets with elaborate decoration, the gilding being specially noticeable. A shaded green tint is overlaid with pretty sprays of roses, which are about as close to nature as you can expect to find in china. The dealers who may be looking for the odd and grotesque will also find here quite a few new ideas. The musical steins, which play the "Star Spangled Banner," "Die Wacht am Rhein" and other patriotic airs while they are in use, will appeal to people who enjoy music, art and liquid refreshment combined. Another line includes squirrels, robin red breasts, and other examples of animal and bird life, fashioned in china and made to serve a useful purpose as pitchers. There are several other classes of comical productions that will surely help in drawing trade during the holiday season.

*

PROPOSED CONSOLIDATION OF AMERICAN POTTERIES.

IN the pottery district of New York there is naturally some guessing as to what will be the outcome of the movement for consolidating the domestic plants. The early impression of some observers was that the $40,000,000 syndicate would fail as did others in past years who have tried to consolidate the American potteries, but as the promoters met with some encouragement in the pottery centers the opinion gained credence that they may ultimately succeed in their efforts. It is said that the syndicate offers to pay $5,000 in cash for each kiln and also to buy the book accounts, wares and materials on hand, on a basis that seemed liberal to some, at least, of the owners. The Philadelphia bonding house, which took the initiative in the negotiations, according to talk in the trade, represents some of the western potters. It was said recently that more than half of the existing kilns are pledged to enter the merger. The understanding is that in the beginning no effort was made to include the art potteries, but that later attention will be given to them also. Western associations, which in former years maintained price schedules, went to pieces some months ago, it will be recalled. Since then the business, in some lines, has been on a rather unsettled basis. This condition, it is said, disposes a part of the potters to treat with the syndicate more liberally than they would under other circumstances.

*

CLOCK USED FOR WINDOW ATTRACTION

PEOPLE as they pass by, have paused, recently, to admire the clock movement shown in the window of Harris & Harrington, 12 Barclay St., New York. This is an Elliott movement, identical with those used in the handsome hall clocks seen in the salesrooms, except that everything not essential has been taken away, so that the observer may see exactly how the works are operated. The movement is mounted on a mahogany base and covered with a glass case. Quite naturally the exhibit was especially interesting to clock makers, watch repairers and jewelers, many of whom spent some time in studying the mechanism. It is not necessary for a man to be an expert in order to appreciate the beauty of this simple yet effective combination of machinery, and it is well-known that nearly everyone likes to look at the works of a clock. For this reason this little exhibit was really an excellent show window advertisement, attracting more attention than do some much more pretentious displays.

*

SUMMER STYLES IN FINE FANS.

CHAIN fans have sold well during the Summer months, and a continuance of the demand is expected, according to information received from Ignaz Strauss & Co., 621 Broadway, New York, who are showing a new finish in ivory fans which has met with much favor in the trade. It is claimed that this finish comes a little closer to real ivory in appearance than anything previously offered. Mother of pearl fans continue popular. Among the fans which have pleased the trade of late are those of sandalwood, the odor being an agreeable recommendation to the fair sex. The decoration is largely in gold and spangles, with hand-painted tops, floral designs predominating as in past seasons. It is believed that the extremely warm weather this Summer increased the retail business in fans to such an extent that the manufacturers will feel the effects in a favorable way before very long.

### How Smugglers Attempt to Send Jewelry Through the Mails.

JEWELRY SMUGGLERS being the subject of discussion, Deputy Collector John H. Storey, who has charge of the seizure room in the United States Appraisers' building, according to a *New York Sun* reporter, pointed over his desk to a row of books with such titles as "It's Never too Late to Mend," "Toilers of the Home," "The Governor's Garden," and "Sketches from Life."

When a visitor shows wonder at the presence of such literature in a business-like office Major Storey selects at random any one of the volumes, and, opening it, reveals a big hole in the middle of the pages through half the book's thickness.

"That is where people put jewelry that they send through the foreign mail," says the Major. "Every year yields a full harvest of watches, necklaces and pendants sent that way. Most persons seem to be under the impression that mail matter is sacred and won't be scrutinized when it comes from abroad; but as a matter of fact every package that comes by that means into this country is subject to examination. If we find any object concealed with the evident intention of evading duty it is summarily seized and sold at auction some time later.

"Now, this copy of 'Sketches From Life' is a very cheap edition, yet it left Europe worth its weight in gold—for it contained a fine chronometer. This 'Toilers of the Home' conveyed a necklace, with a note that read, 'Dear Nell, I hope you will like the book.'

"I'm afraid the sender of that little remembrance is angry with Nell for not acknowledging its receipt."

M. Hardin & Co., Grant, Ia., have moved their stock into new quarters.

### The Principal Precious Stone Mines in Siam.

ACCORDING to H. G. Scott, director of the Siamese department of mines, sapphires and rubies are the only gems the working of which is of any importance in Siam, though spinels, zircons, garnets and topaz are also produced to a small extent. Of the two forms of corundum, sapphires are very much more abundant and more largely worked than rubies. Siamese sapphires form a considerable proportion of the world's supply of this gem.

Statistics, however, are not available, as there is no export duty on the gems, and the work is carried on by numerous small parties of men and even individuals, who dispose of their findings to a number of traveling traders. Siamese rubies do not command a good price, as those of good color are mostly small, while those of good size are of poor color.

It is believed that any real good stones which are found are sent overland to Burma and sold as Burmese rubies. Practically all Siamese sapphires come from the district of Phailin in Battambong. Rubies are worked in a small way in the same district; but the chief ruby workings are in Chantaboon and Kratt. The gem mining districts are, for the most part, exceedingly unhealthy; this fact being a great bar to European enterprise in this line.

W. H. Pegram, a colored watchmaker and jeweler, who has a store at 2104 Jefferson Ave., Newport News, Va., accidentally shot Max C. Ward, a friend, while showing the latter a 32-calibre revolver, recently. Pegram did not know the gun was loaded and handled it carelessly. It went off, firing a bullet in Ward's head. A physician extracted the bullet and the injured man is on the road to recovery.

# To Visiting Jewelers.

No trip to the city, whether for pleasure or business, is complete without a visit to the great art centers of the metropolis. 'Tis a welcomed relief from the noise and bustle of the business world to stroll among the fascinating creatures of the artists' fertile brain. And if the jeweler will wend his way to our galleries, we can make it both pleasurable and profitable for him, for among our vast collection of the choicest art goods are many exclusive pieces that will strongly appeal to him and to his customers. He will view in all their entrancing beauty the highest conceptions of the leading artists of the world, sympathetically and understandingly executed by master craftsmen.

Our new importations for the fall season, gathered by our representatives among the leading art centers of Europe, display a greater wealth and wider variety than has ever before been exhibited by any house. Only a personal inspection can convey an adequate idea of the exceptional excellence of our display.

A cordial invitation is extended to the trade to call.

## MODERN GERMAN ART AS EXPRESSED IN RACING TROPHIES.

AMERICAN silversmiths who examined the photographs of the cup given by Emperor William as the trophy in the recent sailing race across the Atlantic, say that the product is assuredly a fine example of German handiwork. According to the newspaper reports the cup cost $5,000. The design was suggested by the Emperor, this being another instance of the versatility for which he is so much admired.

While it cannot be said that striking originality is displayed in the design, yet the form and ornamentation are dignified and graceful. The shape is that of an urn. Female figures are on either side, extending as supports to the handles. On the front of the cup is a medallion of the Emperor. Laurel wreaths ornament the handles and are draped on the upper part of the cup, emblematic of the award of victory.

Details of the race, which took place in the latter part of May, are still fresh in the public mind. The cup was won by the schooner *Atlantic*, so that the United States again demonstrated the superiority of her boats and her amateur sailors in contests of speed on the water. The time from Sandy Hook to the Lizard was a new record for boats of this class. The exact time was 12 days, 4 hours, 1 minute, 19 seconds, the average speed being 10.57 knots an hour. The *Atlantic* had fine weather a part of the distance, but also encountered storms so violent that at times oil bags were strung to break the top of the waves.

German ambitions were pleased with second place obtained by their boat, the *Hamburg*, and the English rejoiced because the *Valhalla* was third.

---

No small attention is attracted by the efforts made by certain Attleboro (Mass) manufacturers to beautify the surroundings of their factories. This season a move started last year has made much headway.

THE KAISER'S CUP, RECENTLY WON BY THE *Atlantic*, IN THE RACE FROM SANDY HOOK TO THE LIZARD.

### Some Facts About Ivory.

IT is a curious fact that notwithstanding the marked advance in the price of ivory in recent years, the volume of sales has not diminished, but has actually increased. Tusks have been selling in the markets of London and Antwerp at an advance of about 50 per cent. over the prices charged a few years ago.

The causes which have led to this advance in price are very interesting. It is not due to any artificial manipulation of the markets in the great centers, nor is it due to increased demand or scarcity of elephants. For the cause we must look to the heart of Africa, where a spirit of genuine "commercialism" is manifesting itself among the natives. Their wealth is in ivory, and they have learned to value it as such. Indeed, the wealth of leading men among the natives was once commonly counted in tusks. They would say of a dusky capitalist of this kind that he was worth so many tusks, just as one in this country would say that a man is worth so many dollars. Of course, that was a natural phase in the development of a primitive people. The Redman estimated his riches in wampum, and the Laplander in furs. They often would part with their possessions for a few beads or trinkets. They did not know the value of a dollar. Certainly it can no longer be said of the natives of Africa that they do not know the value of money. They have learned. Thus it comes that the "heathen in his blindness" is not so "blind" as has been supposed.

Increased transportation facilities and telegraphic communication have brought Africa into closer touch with the rest of the world. It is said that a native may be working 1,000 miles in the interior, and yet he can quote you the cash value of tusks in the Antwerp or London market. Moreover, he is on the defensive. He is suspicious of political moves made by European powers with the ostensible

# The REPAIRING

## END OF YOUR BUSINESS IS THE MOST IMPORTANT PART OF IT

More people come into your store to leave work than to purchase goods.

Almost every one of your good customers became so through your repair department.

Progressive jewelers know this and concentrate their efforts on the repair department of their business. They give it the most prominent place in their stores; they emphasize it in all their advertisements; they keep themselves and their employes thoroughly informed on the costs of all kinds of work, new ideas and methods; they are courteous and accommodating to repair customers; have all work ready when promised; and do only such work at home as they can do well.

They send all the rest to us.

We devote our entire time, energy, capital, and twenty-five years' experience to this important branch of the jewelry business; employ and educate the best help that can be obtained; systematize and inspect the work, and use every modern method to produce the best work promptly at reasonable prices.

It is to your interest to do business with us, it is to our interest to have you.

Let us work together.

## Some Facts About Ivory.

(*Continued from page* 1.)

purpose of "civilizing" him. For example, the King of Belgium has set on foot certain adventures in East Africa, announced as having certain humanitarian and sociological objects in view. These and similar proceedings are regarded with misgivings by both the natives and the press, and it is more than hinted that the real object is to get hold of the ivory trade. Consequently the natives assume a defensive attitude, being determined to protect what is of most value to them. The importer and manufacturer may deplore this condition; but they must admit that it is "business."

Of course, it is a far cry from Africa to the United States, and yet there is a very good market for ivory in this country. Alert and enterprising buyers are always on the lookout for opportunities to pick up good tusks. If Bostock or Barnum & Bailey ever chance to have an elephant die on their hands in this country, it is not a dead loss to them by any means. It is likely that an energetic buyer of ivory will be bidding for it before the carcass is cold.

American manufacturers confine themselves mainly, though not exclusively, to such workings of ivory as are appropriate for toilet goods. The process of manufacture is a delicate one, requiring considerable skill. A tusk weighing, say, from 75 to 125 pounds, is bolted to a moving table, on which it is sawed into plates. During this stage the tusk has to be kept thoroughly wet down to prevent burning, as ivory is very hard and a good deal of heat is generated by the friction. From these plates or flat pieces various rough shapes are sawed out, according to the forms or designs which are to be perfected later on. In sawing out these shapes care has to be taken to avoid spots or blemishes in the ivory, and at the same time guard against wasting valuable material. To be able to do this with good judgment and discrimination is one test of a good workman in ivory, and the number of men who are competent to do this kind of work is very limited. Indeed, ivory-working seems to be a "select" sort of craft, into which but few are initiated.

It is hardly necessary to recount to readers of THE CIRCULAR-WEEKLY the various uses of ivory. Its durability has, doubtless, had something to do with its adoption for various purposes. It is used for articles of mere utility, for articles combining utility with beauty, and for works that are purely artistic—*objets de virtu*. Every one is familiar with such products as ivory billiard balls, chess men and checkers. In earlier days the knightly hunter had his powder horn of ivory, and the devout maiden carried an ivory crucifix when she went to pray. The same substance has been wrought into vases, boxes and even articles of furniture and musical instruments. Ivory toilet goods were found in the ruins of Pompeii, and these may be seen at the Royal Museum at Naples.

As to the use of ivory, the modern American seems to agree with the ancient Roman. As above intimated, there is a large demand in this country for ivory to be used in toilet goods.

THE COMMENTATOR.

ILLUSTRATED SERIAL STORY OF

# Modern Ring Making

Life Studies of Larter Workmen

ILLUSTRATION NUMBER FIVE

THE DROP HAND.

¶ The die complete, the gold ready, the fifth step in ring making is to bring the die and gold together. We use powerful drops that force the gold into the die. ¶ Everyone knows the superiority of wrought iron over cast iron in durability and wearing qualities.

¶ Larter rings are all wrought and none are cast, therefore it is needless to say, they must be superior to many others made; this is another reason why Larter rings sell.

¶ Made for Man, Woman or Child.

A useful little novelty for holding collar buttons is a round silver box, representing a stiff collar with tie, the cover setting in below the top of the box.

*

Among the ever popular flower pins shown, one of the prettiest is a single violet of transparent, pink enamel, with long gold stem, mounted as a safety pin.

*

Very smart are the green enameled serpent bracelets with diamonds in the head and with ruby eyes. Gold-band engagement bracelets are filled with permanently locking catch.

*

A very unique and handsome ring displays a ruby heart bordered with diamonds and topped with a larger diamond. New cross-over rings show two stones, as a sapphire and diamond.

*

Platinum is now used not only for delicate chains and mountings for diamonds, but also as the foundation of fancy crosses in open work set with diamonds, and on arabesques framing a very pale stone, as a light aquamarine in a brooch.

*

Up-to-date settings are designed to bring out the beauty of the important stones as much as possible. The contrast between a large colored stone and the diamonds or pearls which surround it, is one means to this end now in much favor.

*

Round and various shapes and original designs are also seen in very attractive brooches of open gold arabesque, set with a large, central stone, as an emerald or star sapphire. Some new hat pins are balls of plain gold surrounded by a band of pearls.

*

Very attractive adjuncts to dainty ribbon belts, are the silver girdles in the stylish festoon effect, consisting of a row of cupids, with festoons of flowers between, all in oxidized silver. The folds of ribbon are thus ornamented and held firmly in place while being but slightly concealed by the girdle.

*

Costly corsage ornaments are especially graceful and charming, in which festoons

of leaves and flowers are manipulated in diamonds in conjunction with large pear-shaped pearl pendants; Marquise or pear-shaped diamonds, emeralds, or rubies are also used as pendants in this style.

*

Elaborate berry designs are seen in some ice-cream sets consisting of a large, low silver dish, or a salver with special forks or spoons.

*

Small glass dishes in bowl shape are used in serving musk-melons. The guttroon and shell edge is seen on some otherwise plain entrée dishes of silver. ELSIE BEE.

## Jewelry, Clocks, Watches and Optical Goods Exported from New York.

WASHINGTON, D. C., Aug. 16.—The following were the exports of jewelry, silverware and optical goods, clocks, watches and kindred lines from the Port of New York for the week just ended:

Antwerp: 6 packages clock making machinery, $1,793; 2 packages watches, $100.

Bahia: 15 packages cutlery, $1,042; 2 packages watches, $369; 2 packages jewelry, $254; 31 packages clocks, $530; 1 package optical goods, $108.

Barcelona: 1 package jewelry, $150.

Berlin: 10 packages clocks, $268.

Bombay: 39 packages clocks, $805.

Bremen: 2 packages plated ware, $321; 2 packages watches, $850; 7 packages scopes and views, $238.

Callao: 3 packages cutlery, $101.

Calcutta: 7 packages clocks, $160.

Cape Town: 2 packages silverware, $260; 10 packages clocks, $459.

Christiania: 7 packages clocks, $231.

Genoa: 20 cases scopes, $1,750; 3 packages cutlery, $657; 6 packages clocks, $200.

Glasgow: 94 packages clocks, $554; 4,757 pieces nickel, $78,405.

Hamburg: 2 packages plated ware, $162; 3 packages optical goods, $508; 1 package jewelers' sweepings, $200; 4 packages clocks, $200; 1 package jewelry, $500; 4 packages cutlery, $1,878; 6 packages jewelry, $399.

Hamilton: 7 packages clocks, $106.

Havana: 2 packages jewelry, $258; 3 packages cutlery, $378.

Havre: 6 packages jewelry, $1,235; 1 package silverware, $400; 1 package cutlery, $159.

Hongkong: 22 packages clocks, $370.

La Guayra: 1 package jewelry, $150; 5 packages clocks, $150.

Liverpool: 1 package silverware, $975; 2 packages watches, $200; 75 packages clocks, $1,102; 4 packages jewelry, $251; 4 packages silverware $4,781; 4 packages watches, $1,235; 1 package jewelry, $500.

London: 64 packages clocks, $1,802; 1 package gold leaf, $819; 38 packages clocks, $579; 1 package scopes and views, $276; 1 package silverware, $200; 4 packages cutlery, $1,015; 15 packages scopes and views, $1,500; 6 packages watches, $1,019; 3 packages thermometers, $193; 1 package watches, $100.

Lisbon: 21 packages clocks, $188.

Montevideo: 1 package silverware, $162.

Naples: 1 package jewelry, $475; 1 package jewelry, $800.

Panama: 4 packages plate ware, $484.

Para: 8 packages cutlery, $577; 12 packages clocks, $205; 1 package jewelry, $150; 3 packages watches, $702; 1 package optical goods, $100.

Rotterdam: 941 pieces nickel, $1,569.

Shanghai: 124 packages clocks, $1,946.

Sheffield: 8 packages sweepings, $1,000.

Southampton: 5 packages optical goods, $2,414; 3 packages watches, $293.

Smyrna: 18 packages clocks, $148.

Stockholm: 5 packages clocks, $108; 1 package silverware, $140.

Valparaiso: 6 packages cutlery, $182; 2 packages watches, $515; 6 packages clocks, $175; 18 packages plated ware, $370; 3 packages watches, $1,107; 1 package jewelry, $704; 3 packages plated ware, $287.

Verona: 4 packages clocks, $191.

Vigo: 1 package plated ware, $300.

Wellington: 19 packages clocks, $251.

## Clocks, Watches, Jewelry and Plated Ware Shipped to American Possessions During the Past Year.

WASHINGTON, D. C., Aug. 16.—Government statisticians have completed the compilation of statistics showing the commerce of the United States with its non-contiguous territories in clocks, watches, jewelry, etc., during the fiscal year ending June 30, 1905, with comparative figures for the fiscal year 1904, as follows:

ALASKA.—Clocks to the value of $5,603 were shipped to Alaska during the fiscal year just ended, as against a value of $2,891 for the fiscal year 1904. Watch shipments in 1904 amounted in value to $643, increasing to $953 in 1905. Jewelry shipments show a marked increase in 1905 as compared with 1904, the value of these shipments in 1905 being $41,001 as compared with a value of $17,177 in 1904. Plated ware shipments increased six fold, the value for 1904 being $1,020, and that for 1905 $6,203.

HAWAII.—There was a decline in the shipments of clocks to Hawaii in 1905 as compared with the shipments in 1904, the figures being $12,941 and $9,729, in 1905. The decline in watch shipments during these periods was most marked, the value for 1904 being $13,335, while for 1905 these shipments were valued at only $1,865. Jewelry shipments increased a few thousands in value during these periods, the shipments for 1904 being valued at $182,477, increasing to $186,454 in 1905. On the other hand plated ware shipments declined in value from $61,999 in 1904 to $52,668 during 1905. On the whole the Hawaiian trade in the lines mentioned has been somewhat unsatisfactory during the fiscal year just ended.

PORTO RICO.—A general increase in the shipments of the lines under consideration in 1905 is to be noted in the figures for Porto Rico. Clock shipments increased from $3,015 in 1904 to $3,373 in 1905, watch shipments from $1,635 to $2,354, jewelry from $6,424 to $8,886, and plated ware from $5,753 to $6,745.

PHILIPPINE ISLANDS.—The shipments of clocks to the Philippines increased in value from $1,672 in 1904 to $5,165 in 1905, while watch shipments decreased from $8,493 to $1,759 during these same periods. Jewelry shipments showed an increase from $1,065 in 1904 to $2,367 in 1905, while plated ware shipments increased from $828 to $3,672 during the same periods.

---

In denying the application of a certain firm for the registration of a trademark, on the ground that it too closely resembled a mark already registered, the Commissioner of Patents recently pointed out that under Section 5 of the new Trademark Law (Act of Feb. 20, 1905,) it is clearly the duty of the Patent Office to refuse registration whenever in its opinion the applicant's mark so nearly resembles a prior registered mark as to mislead purchasers as to the origin of ownership of the goods upon which the two marks are used. It is not necessary that the marks be identical, but only that there be such resemblance as to be likely to lead parties to purchase the goods of the applicant supposing them to be goods produced by the registrant.

### Hard Fight Over Preliminary Examination in Bankruptcy Proceedings Against Harry Levinsohn.

Promptly upon the filing of the bankruptcy petition against Harry Levinsohn, wholesale jeweler, 30 Maiden Lane, New York, mentioned in the last issue of THE CIRCULAR-WEEKLY, a sharp legal battle was begun. In a preliminary examination, Mr. Levinsohn, under advice of counsel, refused to answer questions in relation to the conduct of his business, or the disposition of his assets, on the ground that replies might tend to incriminate or degrade him.

Leonard Bronner, attorney for two creditors, who began the bankruptcy proceedings, a few hours after the petition was filed, asked for the appointment of a receiver. Judge Holt, of the United States District Court, named Lindsay Russell, fixing his bond at $15,000. In the affidavits presented by Mr. Bronner, it was said that the assets now include $19,000 in stock, and $10,000 in accounts. It was charged that stock valued at $16,000 had been removed and sold.

An unofficial estimate of the liabilities is $70,000, which includes borrowed money and real estate mortgages. There is said to be $28,000 due on mortgages and for borrowed money, of which total $15,000 is secured. The State Bank of Grand St. holds a $13,000 mortgage on a Lexington Ave. apartment house in which Levinsohn has an interest. This building was bought in June last by Levinsohn and Abraham Rosenthal at a price not stated and subject to mortgages amounting to $50,000. The merchandise accounts are estimated at $42,000.

Taking advantage of a section of the bankruptcy law, which provides for an immediate examination in cases where there is danger of the assets being dissipated or there is a suspicion of such a contingency, Mr. Bronner obtained from United States Commissioner Alexander subpœnas requiring Mr. Levinsohn to appear Thursday with his bookkeeper, Moses Feinberg, and his salesman, Mr. Goldberg. The witnesses were on hand before the Commissioner at the appointed time, and were accompanied by Marx & Miller, their attorneys. Mr Bronner appeared for the receiver and the petitioning creditors. Mervyn MacKenzie was present in behalf of the Jewelers Association and Board of Trade, several of whose members are creditors.

Mr. Feinberg was called to the stand first, and after giving his name and answering several other routine questions, refused to reply to others which had to do with the care of the books, the method of keeping them, and the whereabouts of the assets. Mr. Feinberg said that he was only an employe. He refused to answer on the same ground that was later advanced by his employer—that the replies might tend to incriminate and degrade him.

Mr. Levinsohn was then called, and his examination was a practical repetition of that of the bookkeeper. Questions in relation to the stock, other assets and the books he absolutely refused to answer, under the advice of his counsel.

The salesman then testified, and he replied to all questions, but denied having any knowledge on the subjects that the law-

yers were desirous of exploring, so that the testimony he gave added no information to what was already known.

The lawyers having argued considerably pro and con, as to the legal rights of the witnesses in refusing to answer questions, Commissioner Alexander said that a somewhat new question was involved upon which he did not wish to pass. Therefore he invited the lawyers to go before Judge Holt, who was then holding court, in order to get his decision.

Judge Holt heard the case at once. Mr. Bronner argued that in the case of the bookkeeper, who was merely an employe, there was absolutely no ground for him to claim privilege. If anybody were incriminated and degraded it would be the employer, the lawyers contended, so that the statute could not be used to shield the bookkeeper from answering questions. In relation to Levinsohn, the lawyer argued that the statute did not give him the right to refuse promiscuously to answer all questions bearing on his business. In order to enjoy the privilege, Levinsohn must show, said the lawyer, that the particular questions would, if answered, tend to incriminate or degrade him. If the privilege were extended to the degree claimed by these witnesses, it was said, then all bankrupts could decline to give information. and there would be practically no opportunity to probe conditions and learn if the failures were honest or not.

Mr. Marx said that it was possible for a bookkeeper to be in collusion with his employer, and, therefore, he might be incriminated and degraded. The witnesses, he said. were privileged from replying to any and all questions, except those the refusal to answer which seemed on the surface to be frivolous. In the case of the questions which his clients had refused to answer, Mr. Marx said, there was no frivolous character about the refusals.

In the bankruptcy examinations, Mr. Marx said, the opposing attorneys before the inquiry concludes, generally try to show some fraud, and so, instead of waiting for that stage of the proceedings, he had advised his clients to refuse at the beginning to answer any of the multitude of questions, replies to which might afterward be turned against the witnesses.

The Judge, after hearing the arguments, gave the lawyers until yesterday to submit briefs, and adjourned the examination until next Friday. Affidavits were also submitted yesterday on a motion made by Mr. Bronner, requiring Mr. Levinsohn to turn over his books to the receiver.

Several of the creditors, it is said, held a conference with Marx & Miller in relation to the settlement, and it is possible that a compromise will be arranged. Mr. Marx said that the Lexington Ave. house, if sold by the receiver, would yield no assets for the creditors. In case of a settlement, the attorney said, his client's equity would doubtless bring something. Mr. Marx said that there is a disposition on the part of Mr. Levinsohn's friends to help him if acceptable terms were arranged.

---

A recent note from Europe stated that the ornaments and precious stones owned by the Shah of Persia are now valued at about $35,000,000.

ISN'T it interesting to watch the evolution of an O. & B. Ring from a crude piece of gold? While our factory is equipped with every modern machine, every useful device necessary to manufacture our product—it requires time—yes, quite a deal of time, before the completed article is ready for the Jobber's inspection.

The Jobber, of course, has a different story to tell, and saves time through the excellence of our product. Our unlimited assortment of new designs makes his end a simple matter. If you want business this fall—Ring business—sell the O. & B. product.

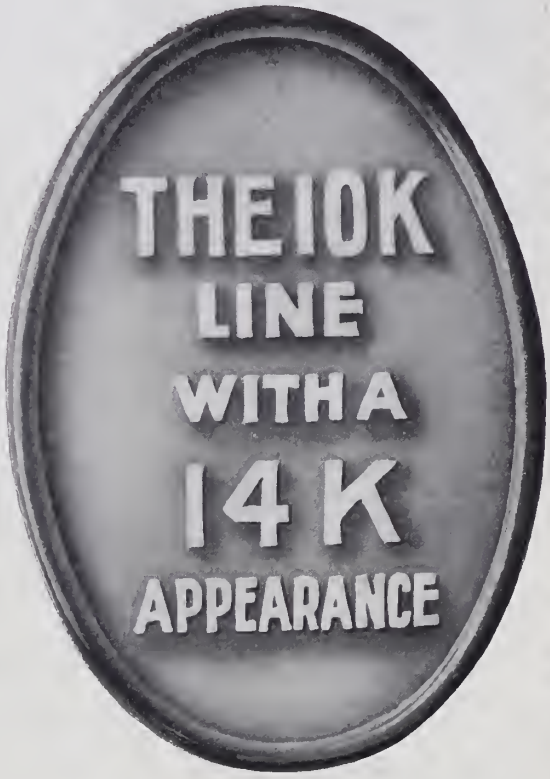
## Jewelers Warned to be Careful in Dealing With Swindlers Who Offer Bogus Checks.

From reports which have come to THE CIRCULAR-WEEKLY from all sections of the country there seem to be at the present time more attempts to swindle jewelers by means of bogus checks than usual at this season of the year, and the members of the trade are therefore cautioned to be exceptionally careful in accepting checks, drafts or postal orders of any kind from customers whom they do not know.



In the last issue of THE CIRCULAR-WEEKLY appeared a note telling how H. G. Earley, Northville, N. Y., was swindled out of a watch by an alleged school teacher who gave him a check which proved to be worthless, and a note was also made to the effect that Charles Glick, arrested in Columbus and taken to Washington, for swindling jewelers in that city, had been identified as the man who had passed worthless checks on Pittsburg firms, further particulars of which appear in another column of this issue. Since then THE CIRCULAR-WEEKLY has received word of a check swindler operating in the vicinity of Jamestown, N. Y., and another who has been working in the vicinity of Melrose, Mass.

Word was received by the Jewelers Security Alliance Thursday from F. G. Nordstrom, Jamestown, N. Y., to the effect that a man had attempted to get about $130 worth of jewelry from him by means of a false check, but was unsuccessful. Mr. Nordstrom says that the swindler represented that he was a bank inspector and had been recommended by the president of the First National Bank of Jamestown. Nordstrom says he selected a diamond valued at $93 and also a $40 watch, paying for them with a check. He wished to take the goods with him, but Mr. Nordstrom refused to permit this and said he would deliver the goods. Mr. Nordstrom immediately made an investigation and discovered the check was worthless, but the swindler had escaped in the meantime. The man is described as of medium height, 40 years of age, with black hair and mustache, and wore a gray suit and a straw hat.

From the Pinkerton Detective Agency the Security Alliance also received word that W. A. Smith, Melrose, Mass., believed that an attempt was to be made on him to get goods in a similar way. Mr. Smith was called upon by a man who purchased a watch, paying for it with a check for $8.50 on the Wakefield National Bank at Wakefield. The man gave his name, said he was a salesman of a concern on Albion St., Wakefield, and gave the bank as reference. Although the check proved to be good, Mr. Smith made an investigation and found the bank knew nothing of the man, and that the man was not known in Wakefield, nor was any such concern as the one he claimed to represent known in the town. The man called later on Mr. Smith and tried to purchase a diamond, saying that he wanted a perfect stone. Mr. Smith told him that he had no such stone in stock, and the man left, saying that he would call again, telling Mr. Smith to get the stone for him. Mr. Smith and the Pinkerton Agency both believe that the man passed a good check

on the jeweler for the purpose of obtaining a standing, and that he contemplated giving a bogus check later for a valuable gem. This man is described as about 45 years of age, 6 feet high, slender build, brown hair and mustache, and having the first joint of the fore finger of the right hand missing. He wore a blue mixed suit of clothes.

Jewelers who may be visited by the above-described men are cautioned to be careful and obtain cash in advance.

### Third Quarterly Public Sale of Ivory at Antwerp, Belgium.

ANTWERP, Aug. 6.—The third quarterly ivory sale commenced Aug. 1 and finished Aug. 2. The following quantities in kilos passed under the hammer: 38,244½ of Congo (hard); 942½ of Congo (soft); 18,384 of Angola; 1,042½ of Ambrize; 6,189 of Gabon; 232 of Cameroon; 444 of Senegal; 1,610 of East African (soft); 65½ of Egypt (hard); 695 of Egypt (soft); 163 of Abyssinia; 37½ of Mozambique; 270 of cut pieces; 45 of hippopotamus teeth, or a total of 71,364½ kilos. This week 63 kilos of tortoise shells also sold, making a grand total of 71,427½ kilos. How this compares with corresponding sales of previous years may be seen from the fact that 59,292 kilos were sold in 1904, 70,334 in 1903, 71,171 in 1902, 72,207 in 1901, 77,699 in 1900, 72,908 in 1899, 35,559 in 1898, 71,733 in 1897, 53,408 in 1896, 62,000 in 1895, 43,083 in 1894 and 63,055 in 1893.

The prices just realized showed a slight reduction from the former market of about 2 to 3 francs for large teeth and of ½ to 2 francs for oversizes and bangles. The light qualities showed the least depreciation. The scrivellous ivory, on the contrary, sold at firm prices, and teeth for billiard balls and similar articles realized 1 to 2 francs per kilo in advance of the old scales. The prices of the soft ivory declined from the market scale of six months ago, also showing a decrease of 2 to 3 francs. In this also teeth for billiard balls went up to 70 francs per kilo, showing an advance of 5 to 10 francs per kilo over the old rate.

The actual stock on hand is about 865,000 kilos against 104,500 kilos in 1904, 132,000 in 1903, 135,726 in 1902, 127,000 in 1901, 95,000 in 1900, 102,000 in 1899, 79,211 in 1898, 70,000 in 1897, 57,000 in 1896 and 144,000 in 1895.

The next quarterly sale has been fixed for Monday, Oct. 30.

L. E. Whitmore, Daingerfield, Tex., has been succeeded by Chambers & Co.

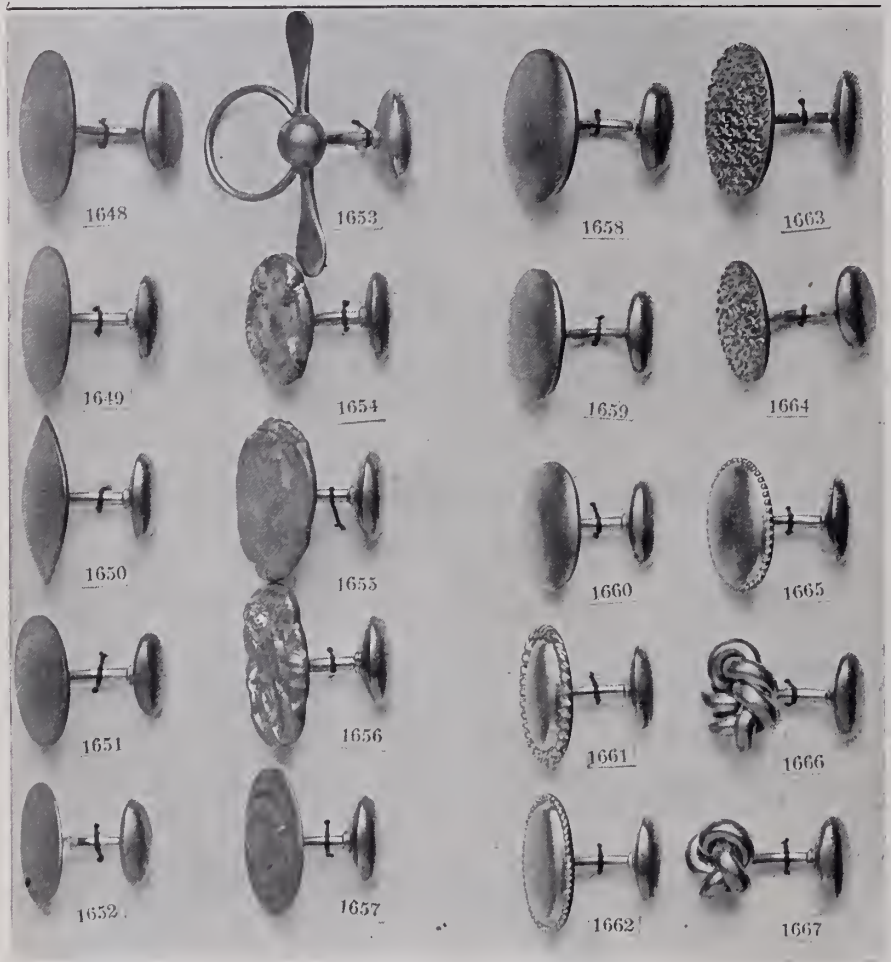
A WOMAN who has any idea of getting a bracelet needs only to be shown the Simmons Armilla to be convinced that it's the very bracelet she wants.

The Armilla is easily the winning bracelet idea of the year, and with a decided demand for bracelets existing, and the Fall season in sight, it ought to interest practically every jeweler in the land.



Leading wholesale watch and jewelry houses are now showing the Armilla in a first-rate variety of patterns, affording choice of chased or plain styles, and of three finishes—Roman, English and plain polished. It is made in gold-filled stock, and in 10k. and 14k. solid gold.

A very attractive easel card for displaying the Armilla at the counter or in the window will be furnished free on request.

### Death of Jacob A. Wineburgh.

UTICA, N. Y., Aug. 20.—Many were the expressions of sorrow when it was learned that Jacob A. Wineburgh, of Joseph Wineburgh & Sons, 32 Genesee St., had died last night. "Jake," as he was better known among his thousands of friends, was always hailed as a good fellow, and to the jewelry trade, by which he was always highly regarded, the news of his death caused great surprise. The cheeriness of his nature was manifested in the sick room when intimate friends were permitted to visit him during his final illness.

Deceased will always be remembered by his friends as a big-hearted, generous, pleasant, whole-souled man of whose nature it was characteristic to say naught except that which was good of any man. If he could not speak well of a man he always maintained a silence that would have done honor to a diplomat, for such he was in his business life. It is not unfair to say that Mr. Wineburgh was, without a doubt, the best jewelry salesman in Utica. He had an inborn tact and a manner that made him liked by customers, friends and acquaintances.

Mr. Wineburgh was born in this city in 1861, the eldest son of Joseph Wineburgh. After acquiring a business education, Mr. Wineburgh started in the business for which he had a natural aptitude. While a young man he entered the employ of Charles H. Schiller, then Utica's leading jeweler, who had a store at Liberty and Hotel Sts. Mr. Wineburgh later engaged with the late William S. Taylor, who was engaged in the jewelry business here for over half a century and whose death occurred recently. About 25 years ago, Mr. Wineburgh and his father opened a store at 32 Genesee St. and the firm was successful from the start. About 10 years ago the elder Wineburgh became incapacitated because of illness, and Mr. Wineburgh, together with his brothers Hyman and Edward Wineburgh, continued in charge. The success of the firm was largely due to the confidence which patrons reposed in the house. Salesmen who have ever visited Utica will join with Mr. Wineburgh's many Utica friends in paying tribute to his many virtues. Few men were endowed with such a capacity for making friendships. Few had such a sunny disposition and few were so generous in impulses and so charitable towards humanity in general. Few possessed such a cheerfulness of spirit which most trying conditions could not disturb. Together with these characteristics, Mr. Wineburgh possessed a spontaneous and ever ready wit which made him pleasant company on all occasions.

Mr. Wineburgh was united in marriage to Miss Theresa Cohen 16 years ago and her death occurring during the same year, he never remarried. He is survived by his parents, two brothers, Hyman and Edward, and two sisters, Mrs. I. Marks, of Bradford, Pa., and Mrs. M. A. Workman, of Montreal, Can.

Deceased was a member of Utica Lodge No. 33, B. P. O. E. Oriental Lodge, No. 224, F. and A. M., Imperial Council R. A. and the Arcanum Club and Masonic Club. His funeral will take place on Monday.

## Howard Hall Pleads Guilty to Breaking Into Pittsburg Jewelry Store.

PITTSBURG, Pa., Aug. 16.—Howard Hall, the young man who was caught in the Graf & Niemann building, at 210 6th St., last Sunday afternoon, by detectives, after a seven-hour search of the building, pleaded guilty to entering a building with intent to commit a felony, and was held in default of $1,000 bail for court. There is no doubt but that Hall, who is said to be a member of the Gardner gang of thieves, had planned to rob Graf & Niemann, as well as other firms in the vicinity.

Hall and his two accomplices, who are still at large, gained entrance to the store of George F. McDonald, a confectioner, whose place of business adjoins that of the jewelry firm. Hall had removed his shoes, coat and hat and placed them in the building. The other men had knocked the combination off the safe in the McDonald

place, while Hall was at work in the store of Graf & Niemann. The appearance of McDonald and the porter of the store frightened the robbers, and all escaped but Hall, who without shoes, coat and hat, could not leave the building, because he would be sure of capture in that state of dress. He took refuge in a stairway on the second floor and was only discovered by Inspector R. H. Robinson, of the Pittsburg police force, by accident.

Hall had entered the Graf & Niemann store through the cellar. He had packed a lot of silverware to carry away and also quite a number of umbrellas. When searched a pair of gold eyeglasses and $15 in money was found on his person. He was committed to jail to-day to stand trial in September.

### Jeweler Who Fled from Berlin After Swindling Creditors Believed to be in This Country.

Word has been received by this journal from the Goldschmiede-Werkgenossenschaft, Berlin, that a local jeweler had left that city a few months ago with about $10,000 worth of jewelry and precious stones which he obtained from creditors under false pretenses and fraudulent representation. As the man obtained long credit in some instances, it is believed that he has come to the United States with his booty, and as he is an experienced goldsmith and jeweler, it is thought that he may attempt to establish himself in business here or find a position with some large manufacturing or retail jewelry establishment.

The man about whom the warning is sent is Richard Muller, a native of Stettin, Germany. He studied in Berlin for some time and finally started in business for himself, doing the finest of jewelry work. His last address was Gustave Freystagstr. 2, Schoneberg, from which place he disappeared May 12. For nearly four years he enjoyed the confidence of the trade, but owing to bad associates neglected his business and family, and finally disappeared with jewelry valued at about 40,000 marks.

The facts given herewith were furnished by the Goldschmiede - Werkgenossenschaft, Berlin, Oberwasser-Strasse 14, Berlin C. 19, the secretary of which will be deeply obliged to anyone who can give a clue as to Mr. Muller's present whereabouts. The man is of medium height, has a fair complexion, but has dark hair and wears a small mustache.

Commemorative of their 40 years' successful business existence, Herpers Bros., 18 Crawford St., Newark, N. J., manufacturers of settings, have within the last week sent to the trade a handsome booklet containing the history of the firm from the time of its commencement, in 1865, to the present date. Some interesting information is contained therein, among which the statement that prior to 1865 settings were not an article of manufacture in this country, and while they were obtainable in France few were ever imported. The portrait of F. J. Herpers, the founder of the house, is reproduced on the first page, and many both interesting and useful facts can be gleaned from the booklet.

## Chas. Glich Arrested at Columbus Identified as Man Who Swindled Pittsburg Jewelers.

PITTSBURG, Pa., Aug. 16.—Charles Glich, who, as reported in THE CIRCULAR-WEEKLY, was arrested in Columbus and taken to Washington, D. C., where he is wanted for swindling jewelers, is also wanted in Pittsburg. So far as known Glich is charged with swindling two local jewelry firms, Goddard, Hill & Co., and Spandau Bros. About a year ago Mr. Hill's attention was called to Glich's plan by reading the account of his arrest in THE CIRCULAR-WEEKLY, and he at once communicated with Superintendent of Detectives Thomas M. McQuaid, of this city. The superintendent secured a photograph of Glich from the Rogues' Gallery at Columbus, and Mr. Hill identified the man upon being shown his picture.

CHAS. GLICH, ALIAS "LOWENTHAL," ACCUSED OF SWINDLING WASHINGTON, D. C., AND PITTSBURG, PA., JEWELERS BY MEANS OF BOGUS CHECKS.

While in Pittsburg Glich (if he is the man wanted) went by the name of R. Herr, proprietor of the Herr Credit Co., with headquarters at 715 Fifth Ave., a place of business occupied by another firm with which "Herr" had no connection. He bought considerable stock from Goddard, Hill & Co., and appeared to get in the good graces of the firm. One day Mr. Hill, becoming interested in the man, asked him how he was getting along, and shortly afterwards he exhibited his bank book, of the Anchor Savings Bank, showing apparent deposits of $450. That day "Herr" bought considerable goods, the cost value being $55, and tendered a check for a much larger amount, but the check was returned to the firm because there were no funds to pay it, "Herr" having put the figures in the book himself. Mr. Hill says that he is willing to spend considerable money to bring Glich back here.

The man swindled Spandau Bros. out of $10 and may have duped other concerns. It is believed here that Glich has carried on his scheme all over the country, starting in this city in a small way. His place of residence here, in Wylie Ave., as given to the Anchor Bank officials, was fictitious, because there was no such number. "Herr" disappeared from here a year ago and was not heard of until his arrest in Columbus.

## Mud Rush Stops Work at the New Premier Diamond Mine in the Transvaal.

KIMBERLEY, South Africa, July 15.—A telegram from Pretoria, through Reuter's Agency, received on Wednesday, says: A report reached town yesterday that the big tailings dam at the Premier Mine had burst, with the result that the Pretoria District Diamond Mine, situated at the lower level, has been submerged by the rush of mud.

A representative of the Pretoria *News* visited the scene of the occurrence, and found that a mud rush on a tremendous scale had taken place. It appeared that the Premier dam, which contained a huge accumulation of tailings in a semi-liquid state, had burst its walls on Saturday night. A roar was heard by those in the vicinity, but the cause was unknown till the following morning, when it was found that the scene of the District Mine workings was nothing but a sea of mud, which had spread several miles down the valley.

The rush of mud carried down great rocks and boulders, which tore up the tram lines and overturned trucks and blotted the workings out of sight. Fortunately no one was on the workings at the time, hence there was no loss of life.

It will probably take weeks to clear the obstruction.

---

New York diamond merchants have received in the last week letters telling of the accident in the Premier Mine. It was said, in these advices, that the stock which went up with a bound after the finding of the 3032 carat diamond several months ago, fell as soon as the report of the disaster was received. Several New York men, who are familiar with mining affairs, expressed the opinion that months and perhaps a year will be required to repair the damage, and the company will be for a considerable time out of business, as the mine will yield no diamonds.

### Philadelphia Watchmaker Attempts Suicide but is now Recovering in the Hospital.

Philadelphia, Pa., Aug. 18.—Charles Scott, a watchmaker, who has worked for well known jewelers throughout the country, has gained much notoriety this week. He is now in the Philadelphia Hospital under treatment for alcoholism. He was removed to this institution after he had, as the police and local newspapers assert, attempted suicide by cutting his wrists and turning on the gas in his room at 1018 Walnut St. He was found there partially dressed but unconscious lying in a bed with the gas escaping from a wide open jet.

Scott was rushed to the Jefferson Hospital nearby and brought to without much trouble. The physicians found that his condition from alcoholism was alarming, and he was sent to the Philadelphia Hospital for treatment for alcoholic dementia. His ultimate recovery is looked for.

Scott is now reported to be doing well. At the time the police declare he attempted suicide he was out of employment. He had worked only recently for H. M. Bolte, Jr., in Atlantic City. For a year or more previously he was employed by Charles Wacher, 706 Chestnut St., and has been in Philadelphia and vicinity working for various jewelers about five years. His home is said to be in Frankford, Ross County, Ohio.

The firm of Gabriel & Fried, Mobile, Ala., has been succeeded by the Gabriel Jewelry Co.

### Customs Decisions and Treasury Rulings Relating to Clocks, Gems and Kindred Lines.

Washington, D. C., Aug. 18.—The Treasury Department has advised the Collector at Cincinnati, O., that the Department's regulations of April 11, 1905, establishing a rate for the allowance of drawback on clocks manufactured by Bawo & Dotter, or Harris & Harrington, of New York, from imported materials, have been extended, so far as applicable to cover the exportation of chiming and striking hall and mantle clocks manufactured by the Herschede Hall Clock Co., of Cincinnati, with the use of imported movements and parts, in accordance with their sworn statement, dated Aug. 12, 1905. This statement is now on file in the Collector's office at Cincinnati.

The following decisions by the Board of United States General Appraisers, New York, are promulgated:

Bort.—Protest of Pitt & Scott, Ltd., against the assessment of duty by the Collector of Customs at New York. United States *v.* American Express Co. (T. D. 26490) followed, relating to bort.

Drilled Opal Balls.—Protest of G. Veeck against the assessment of duty by the Collector of Customs at New York. On the authority of G. A. 6097 (T. D. 26586), the Board held opal balls, drilled through and ready for stringing, to be dutiable as precious stones cut, but not set, under Par. 435, tariff act of 1897.

Imitation Pearls.—Protests, etc., of Nordlinger & Mamluck, *et al.* against the assessment of duty by the Collector of Customs at New York. G. A. 6088 (T. D. 26554) followed, relating to imitation pearls.

## Newark Workmen Charged With Stealing Gold—Police After Men Who Encourage Theft.

NEWARK, N. J., Aug. 21.—Detective-Sergeant Peter Christie, of police headquarters, is making efforts to locate one or more men who are encouraging jewelry factory employes to steal gold scraps and filings and even manufactured articles. They buy the purloined property for a small portion of its value, and sell it at a considerable profit.

Two employes were arrested last week for stealing from Allsopp Bros., Orchard and Camp Sts., Newark. The men arrested were Thomas Haslin, 39 years old, of 42 W. Clinton Ave., Irvington, and Harry Haslin, his brother, 44 years old, of 20 Elm St., Newark. The former has for five years been in the employ of Allsopp Bros. as a ring maker. Harry Haslin has been for a number of years in the employ of Long & Koch, at 14 Oliver St. He is also a ring maker. A charge of larceny has been made against each, Thomas being held in $1,000 bail and Harry in $300 bail, to await the action of the Grand Jury.

Nearly two years ago the firm of Allsopp Bros. became aware that it was losing considerable quantities of gold filings and scraps. Thomas Haslin was suspected. Then the thefts ceased. Some time ago the firm again became aware that it was being robbed.

The firm notified Acting Chief of Police Scriba. The latter sent Detective-Sergeant Christie to the factory. On Wednesday, when Haslin turned in his filings at night, they weighed five pennyweights. The shortage in the weight of the rings on which he had worked during the day was 26 pennyweights, and it was figured that he had pocketed the difference of 21 pennyweights. On Thursday evening he turned in 3½ pennyweights of filings instead of 23 pennyweights.

After these facts were ascertained Haslin was called into the office. As Detective-Sergeant Christie began to search him, Haslin drew from one of his pockets a small tin box containing 19½ pennyweights of gold filings, and handed them over with the remark: "I guess that's what you want."

Haslin refused to tell where he disposed of the stolen gold, though he intimated that he might later give the name of the purchaser.

After Haslin had been locked up, Detective-Sergeant Christie took his keys and went to his house. Here filings valued at $100 was found in three packages.

Besides the filings, one of the packages contained a broken gold locket. This resulted in the arrest of Harry Haslin on the charge that he had been robbing his employers, Long & Koch, and giving the gold to his brother to sell. The locket was identified by Long & Koch as the firm's property.

### New Buildings of Tiffany & Co. and the Gorham Mfg. Co. Ready to be Formally Opened.

Much activity is noted on Fifth Ave., New York, where the jewelry colony is about to be augmented by the addition of the Gorham Mfg. Co. and Tiffany & Co. The expectation seems to be that each of these companies will open its new building before Sept. 1. There was talk of one or both buildings being opened on Monday of this week, but the interiors were not quite ready. A representative of THE CIRCULAR-WEEKLY yesterday took a look at the two buildings. It was evident that little work remains to be done before the doors may be officially opened for business.

The exterior of the Gorham Mfg. Co.'s massive structure of granite at the southwest corner of 36th St. and Fifth Ave. has been complete for several months. The permanent windows have been in place and even the awnings are now in position. The great marble columns, graceful arches, and figures in bas relief, are much admired by pedestrians. In the store on the ground floor two rows of white columns support the elaborately carved white ceiling. Besides the show cases encircling the walls there are in the center two oblong formations of cases. There is an entrance on Fifth Ave., and on 36th St. is another.

Across the avenue, at the southeast corner of 37th St. and Fifth Ave., arises the fine marble palace of Tiffany & Co., two stories below and seven above the ground. Some of the temporary windows have not yet been replaced. As you walk along Fifth Av. you get glimpses of bronzes and other works of art peeping from the second story windows. The windows of the ground floor are still painted, and it is understood that some of them are to be cut and reformed, but this work will be done expeditiously. There are two entrances on Fifth Ave., and two on 37th St. A glance at the inside of the ground floor reveals a magnificent store brilliantly lighted as the daylight streams through the vast windows. Columns of German marble support the ceiling. These cases, which come from the Tiffany Studios, were each made from special designs, and are in great variety. They are of teak wood, with inlaid brass ornamentation, heavy plate glass and German marble bases. The floor is of teak wood, brought from India in large sections, and so skillfully joined that the connection cannot be traced. A corps of workmen were putting the finishing touches to this part of the building.

---

Samuel Orbach, the bankrupt jeweler who as reported last week was taken in custody in New York on the demand of one of his bondsmen and later returned to Utica, N.Y., has at last been admitted to bail again. Orbach's lawyers hunted for another bondsman, but being unable to secure one Orbach spent several days in jail. Last week Orbach's son-in-law produced $1,500 in cash which was accepted as security for Orbach's appearance, when wanted, and he left for New York at once. Orbach is charged with perjury in swearing to an affidavit on a bail bond for $2,000 for a local gambler.

FALL, 1905 FALL, 1905

## Philadelphia.

W. C. Jones, New Egypt, N. J., was a visitor to the trade in this city last week on business.

L. C. Reisner, Lancaster, Pa., visited Philadelphia last week to settle some business matters.

J. F. Thoman, 715 Broadway, Camden, N. J., contemplates disposing of his store at 211 Kaighns Ave.

The annual clambake of the Philadelphia Jewelers' Club brought into the city many out-of-town retailers.

F. L. Shaw, 530 Market St., Camden, N. J., opened his new store at 548 Federal St., Camden, last week.

Augustus Smith, watchmaker for John Kensler, 1020 Chestnut St., is spending a vacation at Atlantic City.

The Gorham Mfg. Co. secured judgment for $120.45 in the local courts last week against J. W. Allison of this city.

Harry Clark Barry resumes his duties at M. Sickles & Sons, this week, after a holiday with his family at Wildwood.

Dan I. Murray, the well known auctioneer, is conducting a sale for Caldwell S. Johnston, 1027 Boardwalk, Atlantic City, N. J.

Robert Coates, manager for L. P. White, 7th and Chestnut Sts., returned last week from a hurried business trip to Buffalo, N. Y.

The Retail Merchants' Association of Philadelphia in annual meeting this week will inaugurate a systematic war against the issuing of trading stamps. Exactly what steps are to be taken is yet to be determined.

Fred Scheuler, president of the Philadelphia College of Horology, returned last week from Boston and has gone to Wildwood, N. J.

Z. J. Pequignot, 1322 Chestnut St., advertises a reward for the return of a green bag containing money and valuable papers lost Aug. 12th.

Charles S. Flood, of the Rowley Mfg. Co., accompanied by his wife will spend the remainder of the month in Atlantic City, where he has gone for recreation.

Wm. H. Russ, Washington, N. C., stopped off in Philadelphia last week to make purchases of local jobbers while on his way to an Atlantic Coast resort on a pleasure trip.

S. W. Hart, Kennett Square, Pa., had as his guest last week D. C. Hart, his brother, who was enjoying a vacation from the store of F. B. Wallen, Camden, by whom he is employed as watchmaker.

Owing to the scarcity of silver bullion the Mint in this city is not making any gold or silver coins. It is expected that by October the accumulation will warrant a Treasury Department order for resumption of mintage.

Victor Binder, 11 S. 9th St., makes a trip this week to Atlantic City in the expensive touring car of C. S. Spaulding, a millionaire Baltimorean. Mr. Binder was entered Saturday in the swimming races at Lafayette, Pa.

Simons, Bro. & Co., one of the oldest manufacturing jewelry firms in the country, are to be incorporated under the old firm name Sept. 11. Application for the charter has already been made to Governor Pennypacker. The incorporators will be the three brothers, Frederick M, John F., and Edward S. Simons.

Fred T. Barry, late with W. W. Fulmer, diamond mountings, 124 S. 8th St., now has the New York Office of S. O. Bigney & Co., and the Bristol Mfg. Co. Mr. Barry has been widely known and much liked in this city's trade. He is of a family probably better known to Philadelphia jewelers than any other. His father is a manufacturing jeweler on Sansom St., a brother, Henry C., is with M. Sickles & Sons in a responsible position, and others in the family are actively engaged in the trade. One brother, James Barry, was, until his death, in New York a few years ago, secretary of the Jewelers' Club from its inception. Mr. Barry leaves Philadelphia for the scene of his new activity with the well wishes of a host of friends left behind.

*TWO MAIDEN LANE, NEW YORK.*

## Lancaster, Pa.

A. L. Moyer, manager of the Non-Retailing Co., is at Atlantic City.

Howard Keagy, with H. R. Yergey, Columbia, is back from a trip to New York.

Samuel C. Zellers, a former Lancaster jeweler, now of Atlanta, Ga., is visiting friends in this city.

Jacob Esch, Intercourse; S. H. Miller, Mt. Joy, and Ab. Sharick, Millersville, were among the buyers in town, last week.

James Boyd, formerly a jeweler of Columbia, was among the sufferers by a recent fire at San Francisco, in which he nearly lost his life.

William Benzhof and A. R. Willetts left for Cuba last Saturday, with a view of opening a small jewelry store in some favorable locality.

The handsome property, at 163-165 N. Queen St., in which is located Louis Weber & Son's jewelry store, has been sold by the owner for $40,000.

Morris Felker, a New York watchmaker, who was hurt a couple of weeks ago, in a railroad accident near Lancaster, has been discharged from the hospital and sent home.

Abraham Hirsh, a wealthy business man of Lancaster, formerly a jeweler of Sunbury, Pa., died here last week, aged 70 years. He was a brother of the late Leopold Hirsh, Philadelphia, who was formerly his partner.

There are at least half a dozen large villages in Lancaster County, with a thickly settled country roundabout, which have no jewelry establishments, not even a clock repairer, and there seems to be a chance here for the merchant looking for a new location.

## Rochester.

E. J. Scheer, of E. J. Scheer & Co., is on a trip to New York.

The police last week arrested a suspicious person who has turned out to be one Ernest Adams, a noted pickpocket and "penny-weighter." Adams's record will be looked up, as it is thought he is the man who has successfully stolen rings and diamonds from several jewelry houses in this vicinity.

## Pittsburg.

TRADE CONDITIONS.

There is every indication, according to many of the local dealers and especially the wholesalers, that the coming Fall will he the banner season in the jewelry business in this city. Nearly every wholesale house in Pittsburg is husy and the retailers report excellent trade, especially for August. The weather during the last two weeks has been an important factor, being favorable for good business. There is a demand for jewelry of a general character and everyhody sees good times ahead. The road salesmen are sending in large orders for goods of almost every description.

Charles O'Brien is in New York on a business trip for O'Brien & Co.

George P. Christy, of West, White & Christy, has been in Rochester, N. Y.

P. C. Gillespie has left for Atlantic City to spend several weeks hunting and fishing.

J. Alexander Hardy of the Hardy & Hayes Co., who with his wife, has been on an extensive trip throughout the west, has recently returned to this city.

The following out-of-town buyers were in Pittsburg, last week; H. E. Shuber, Wheeling; Kessler Bros., New Kensington; E. A. Bloser, New Kensington; A. F Stauver, Wheeling; John Linnenbrink, Rochester; A. C. Graul, Sharpsburg; Henry Zilliken, Wellsburg; A. Merz, Sewickley.

Henry A. Barrett, of the Geo. B. Barrett Co., who for the last 18 years has lived in New Brighton, about 25 miles from Pittsburg, where he maintained a fine country home, has sold his property and has moved to Sewickley, a fashionable suburb of Pittsburg, where he expects to locate permanently. He has quarters at present at the Park Hotel.

A. A. Gillespie arrived in New York Thursday from Europe and will come to Pittsburg this week. Gillespie Bros. had quite a dispute with the Adams Express Co. over the collection of certain charges on the diamonds which Mr. Gillespie bought while abroad, and after several days of negotiation, the controversy between the firm and the express company was finally settled. Gillespie Bros. asserted that they had been overcharged.

The affairs of the Prosser Optical Co have not as yet been settled and the store in 6th St. is still in the hands of the Sheriff. The court has not as yet approved of the sale of the company's stock. The goods were attached by the agent of the building on a $500 claim for rent. R. E. Prosser, who was manager of the company and who has opened offices in the Smith Block, just across the street from his former store, refuses at present to make any statement regarding the affairs of the company.

## Savannah, Ga.

S. E. Theus, of Theus & Co., will visit New York soon, accompanied by his wife and son, Master Charlton Theus.

R. Van Keuren, of R. Van Keuren & Co., with Mrs. Van Keuren and Miss Van Keuren, has gone to New York on a business and pleasure trip. Mr. Van Keuren was the victim of a painful accident, last week. In attempting to catch a small electric fan, which was falling from a table at his home, one of the fingers of his right hand came in contact with the leaves of the fan, which cut the member in a painful manner.

## Harrisburg, Pa.

Mrs. George A. Hutman is ill at her home, 1703 N. 3d St.

L. A. Faunce, of 1314 N. 3d St., has gone on a trip to Atlantic City and New York.

The local jewelry fraternity was represented at the first annual outing of the Harrisburg and Lancaster Elks at Penryn Park, Aug. 18.

J. P. Woland, whose store is at 448 Cumberland St., was called to Millersburg, this county, last week, by the critical illness of his aged mother.

Dr and Mrs. J Walter Park have gone on a fishing trip to McDougal Lake, St. John's, and Frederickton, Canada, and expect to be absent until Aug. 31.

Ferdinand T. Plack, of 1326 N. 6th St., had the misfortune to fall on a flight of stairs the other day and cut a severe gash in his forehead. He is able to attend to business.

Walter McCormick, who sold his jewelry business on N. 6th St. some months ago and took a course at a Chicago optical college, has returned to Harrisburg and opened an office at 612 Dauphin St.

A charter was issued at the State Department, last week, to the Pittsburg Watch Co., capital $10,000, to engage in the sale of watches, jewelry, etc., in Pittsburg. Of the capital stock $9,000 is given to Thos. G. McGregor and David P. James for the stock in their Pittsburg store. The par value of the stock is $50 per share, and the directors are: Thos. C. McGregor, president; Mildred E. McGregor, David P. James, Harry D. James, the last-named being a resident of Chicago.

## Columbus, O.

F. C. Blenkner returned home Monday from a week's vacation at Monroe, Mich.

Edward Sensenbrenner, Circleville, was in Columbus last week buying Fall stock.

E. J. Goodman, of Goodman Bros., started Friday for a two weeks' outing in Canada.

H. J. Heimberger spent several days in Cincinnati on business last week, returning home Friday.

A. H. Bancroft, of the Bancroft Bros. Co., went to New York Friday for a 10 days' vacation.

R. N. Whitford, of the Hofman Jewelry Co., returned Friday from New York, where he had gone to purchase Fall stock.

O. J. Fuchs, Chillicothe, will remove shortly from 78 N. Paint St. to new and larger quarters in the Foulke Block, on S. Paint St.

Henry Dolan, formerly employed by W. H. Gunsel, Lake Andes, S. Dak., has sued the latter for damages to the amount of $1,100. Dolan was arrested on a charge of stealing a quantity of silverware and jewelry. At the time the charge was made Dolan held an unsatisfied judgment against Gunsel for salary claimed to be due him. Dolan charges in his complaint that Gunsel placed the goods which he was charged with having stolen in the place where they were found in order to cast suspicion on Dolan and had him arrested to avoid paying the judgment.

**PARIS, FRANCE.**

## North Attleboro.

TRADE CONDITIONS.

The fact that the manufacturing jewelers have been hiring help during the past week is taken as an indication that there is a good Fall trade ahead. August is always a dull month, as it is the time of the year that buyers and salesmen take vacations. This being the case, any increase in the help is apt to be more of an act of preparation for the trade anticipated. While this increase in help is an excellent sign, it is not the only straw that indicates good times. A jeweler who returned but a short time ago from an extended trip through the West and Northwest, "the live ends" of the jewelry trade, says it will take a miracle to keep business down this Fall. Out West they are talking nothing but prosperity, and there is money in abundance.

F. M. Sturdy, of J. F. Sturdy's Sons, has returned from a vacation spent at Nantucket.

Percy Clap, the New York representative of the Daggett & Clap Co., is spending a few days at his home here.

Clarence E. Settle, New York salesman for the Estate of O. M. Draper, has been in town for the past few days.

H. A. Gardner, Plainville, has purchased the stock of the jewelry plant of Charles Chase, of that town, and will enter the manufacturing business.

E. E. Rockwood left Wednesday for Maine in the interests of A. H. Bliss & Co. After concluding his business he will go into camp at Nollsemic Lake.

All the shops in the Riley building were closed Aug. 14, owing to the death of Frederick D. Heffron, of the well-known firm of Riley, French & Heffron. During the hour of the funeral all business in town was suspended as a mark of the esteem in which the deceased was held by his fellow-townsmen.

The tangle in the affairs of the Mason-Ruggles Co. is being straightened out. The keeper who was in charge of the factory for several weeks has been discharged and affairs are now assuming a more optimistic outlook. It has been stated by an interested person that there is a probability that the firm will be reorganized and continue business.

George S. Semple left Thursday for New York, where he will take up his duties as New York representative for the W. & S. Blackinton Co., to fill the vacancy caused by the transfer of Mr. Shannon, the former representative, who assumes the position of western salesman for the firm of Riley, French & Heffron to succeed the late Frederick D. Heffron.

## New Stores and Enterprises.

A. A. Case will shortly open a store in Troy, Pa.

Wm. F. Baer is a new jeweler in Granite Falls, Minn.

J. N. Post recently started in business in Manitou, Colo.

T. L. Basket contemplates opening a store at Chillicothe, Mo.

Ben L. Stack has opened a watchmaker's shop in Mattoon, Wis.

Porter and Price Mayo have opened a store at Battle Creek, Mich.

Nicholis Van Kammen is about to open an optical store in San Mateo, Cal.

F. C. Lawrence has engaged in the watch and jewelry repairing business in Renton, Wash.

Edward Hainz, formerly engaged in business in Muskogee, Ind., has opened a store in West Salem, Ill.

Frank Yaseen, formerly of Pittston, Pa., recently engaged in the retail jewelry business in Berwick, Pa.

C. Jones, formerly with J. E. Ketchem, Morrillton, Ark., has commenced business on his own account in Casa, Ark.

The Elgin Jewelry Co. was recently incorporated in the State of Iowa, with a capital stock of $15,000, the main office being in Keokuk.

The Wm. H. Brine Co. has opened a general store at 25-27-29 Tremont St., Boston, Mass., and will carry a line of jewelry. Henry C. Brine is president and general manager of the concern.

The Midelburg-Moses Jewelry Co. has been incorporated in Baltimore, Md., to deal in jewelry, with a capital stock of $25,000. The incorporators were C. A. Midelburg, S. A. Moses, F. L. Moses and Isaac Loewenstein.

The Luce Electroplating Co. is a new concern, which was recently incorporated in Binghamton, N. Y., with a capital stock of $5,000. The incorporators were Norman Luce, Clark S. Tallman and Linley E. Sturdevant, of Binghamton, and Wm. E. Ross, F. Paul Hahnemann and Myrtle M. Luce, of Union, N. Y.

J. G. White, Medford, Ore., has sold his jewelry business to Burnett & Elwood.

## Canada Notes.

H. D. White, Fredericton, N. B., has gone out of business.

James Goodyear has purchased the business of J. A. Floyd, New Liskeard, Ont.

Maud McGachey was arrested, a short time ago, in Toronto, Ont., charged with stealing a ruby ring from Munn & Co., of that place. The girl had pawned the ring for $20 at a local pawnbroker's.

P. W. Ellis, of P. W. Ellis & Co., Toronto, Ont., who was recently appointed a member of the Hydro-Electric Power Commission, charged to investigate and report on the water powers of the province, adopted for the development of electric energy, returned Thursday from a tour of the commission in northwestern Ontario, during which he visited Kakaleka Falls, near Fort William. M. C. Ellis, of the firm, has just returned, accompanied by Mrs. Ellis, from a two-weeks' trip up the Saguenay.

On Saturday afternoon George Kessler, general manager of the Saskatchewan Colonization Land Co., was arrested in Toronto, Ont., on the charge of stealing three diamond rings, two gold watches, a chain and a gold locket, valued at about $600, from a man named Schneider at Wetaskiwin, Alberta. It appears that Schneider gave Kessler the goods to dispose of and was willing to take $400 for them. A telegram was found on Kessler from Schneider, refusing $200 for the jewelry. Kessler failed to send either the cash or the goods to Schneider, and the latter thereupon took action. Kessler was held to await the instructions of the authorities at Wetaskiwin.

A banquet was given Aug. 18 by the Canadian Manufacturers' Association to their president, W. K. George, President of the Standard Silver Co., Toronto, at the National Club, in recognition of his devices in connection with the tour in Britain of a party of members of the association. About 140 were present, the chair being occupied by Vice-President R. N. Ballantyne, of Montreal. Mr. George, after replying in fitting terms to the personal tributes paid him by Geo. D. Drummond, said that the reception of the party in England had been most cordial and enthusiastic. In the discussion of trade questions he had explicitly declared their position on Protection, pointing out that to build up Canada it was necessary to establish industries to give work to the people and attract foreign capital. To accomplish this it was needful to have a protective tariff first against the United States, which otherwise would crush out the younger industries. He had pointed out that it was equally necessary to have a tariff against Britain, one at least that would equalize any disadvantages with which Canadians had to contend.

MEMORANDUM ORDERS SOLICITED.

## Newark.

A tramp, giving his name as John Baldwin, Alleghany, Pa., was arrested, last Saturday, at Madison, N. J., while he was trying to sell solid gold rings at $1 each to pedestrians. In his pocket was a bag, containing diamond rings and pins and a pearl necklace, all valued at $1,500. He refused to say where he got the jewelry.

John B. Wood, of Chas. F. Wood & Co., New York, has sued Joshua Brierley for $5,000 for slander. The case grows out of political differences. Mr. Wood is alderman of the 11th Ward and the Republican leader in the Newark Common Council. The defendant, who recently retired from the Board of Health, criticised Alderman Wood, intimating that he was too closely identified with the interests of the Public Service Corporation. The alderman claims that certain of the statements made by Brierley were untrue and slanderous.

Creditors of Wm. Rubin, 17 Main St., Paterson, N. J., met last Friday afternoon, at his request, in the Astor House, New York. Attorney Grumbauer, representing Mr. Rubin, offered a compromise at 25 per cent. The statement, presented by the attorney, indicates that the debts aggregate $5,000. The principal reasons given for the jeweler's troubles were that floods had injured his trade by keeping people away from the store for long periods of time, and that he had been unfortunate in giving credit. The representative of the Jewelers Association and Board of Trade, who was present in behalf of creditors, contended that a larger percentage should be paid, if a composition is made. After discussion it was agreed to that 33 per cent. should be paid. Of that percentage 33⅓ per cent. is to be turned over in cash this week, of the remainder 10 per cent. will be in notes, due at six months, and 10 per cent. in 12-month notes, all notes to be indorsed by a responsible owner of real estate. Under the terms agreed upon Mr. Rubin will continue in business, and says that he will conduct a cash trade after this.

Jewelry valued at $75 was recently stolen from the store of Z. M. Sever, Palouse, Wash., by a man whom Mr. Sever had accidently locked in the store. When the jeweler entered his establishment the following morning he found that a panel in the back door had been broken open, allowing the intruder to escape with the plunder.

## Optical Notes and Briefs.

J. N. Creighton, optician, has just opened optical parlors on Hastings St., Vancouver, B. C.

Ernest Cushen, Warsaw, N. Y., was recently admitted to membership in the Buffalo Optical Society.

The San Antonio Optical Parlors were recently opened in the Moore building, San Antonio, Tex., by Dr. Sachs and Dr. T. F. Hogan.

F. B. Ackerman, Yreka, Cal., was recently in San Francisco, Cal., where he has been purchasing supplies for his optical establishment.

Albert E. Charlesworth, of the Charlesworth Optical Co., Detroit, Mich., has returned from a vacation and business trip to Mackinac Island and Chicago.

Frank C. Toepp, South Bend, Ind., is remodeling the rear of his establishment, which will be used as an optical department. It will be conducted under the management of Charles Schnell.

Mrs. Paul T. Carrington, wife of Dr. Paul T. Carrington, optician, Bangok, Siam, was a recent visitor in San Francisco, Cal. Mrs. Carrington has been spending some weeks visiting in the United States and on the return trip stopped a few days in this city where she has a large list of friends.

The Oregon State Board of Examiners in Optometry held a business session in Portland, Aug. 9, Dr. C. W. Lowe presiding, Herman W. Barr, secretary, and E. O. Mattern was present. The Board decided on a course of examination, and will hold an examination at an early date, notice of which will be given later. One hundred and fifty practicing opticians have sent in their applications, which have been passed upon by the Board.

The Johnston Optical Co., Detroit, Mich., gave its six traveling salesmen July for vacation purposes. They started out on the road again last week, covering these territories; C. M. Scammel, Michigan and Northern Ohio; Geo. A. Douglas, Indiana and Southern Ohio; W. B. Gordon, large towns in nine states; F. E. Dodge, Iowa and Nebraska; J. P. King, Texas, Arkansas, Colorado and Oklahoma; W. E. Ennis, Wisconsin, Minnesota and Dakota.

Joseph Goldstein, a pawnbroker of San Francisco, Cal., was tried before Judge Cabanniss, recently, and found guilty of violating the State Optometry law. Judgment was suspended for one month, presumably to await the decision of the Supreme Court, regarding the case of Bert Lissner, optician, Oakland, Cal., who is being tried on a similar charge. The measure is unpopular among certain opticians throughout the State and the outcome of the Lissner case is looked forward to with considerable interest, as it is believed that a precedent will be established which will virtually quash the law, or at least result in its complete revision.

# DIAMONDS.

## Items from Here and There.

Elmer L. Yeargin has removed from Ada to Konawa, Ind. T.

M. Goldofsky has moved from Houston, Tex., to Galveston, Tex.

E. E. McNeal, Athens, Ill., has moved his stock into the Parish Building.

Ben. L. Gittelson, Minneapolis, Minn., has been succeeded by S. Gittelson.

M. I. Goldstein has sold his jewelry business in Great Falls, Mont., to I. Goodman.

W. T. Brown has moved from Woodville, Miss., to Natchez in the same State.

The Eagle Drug & Jewelry Co. has succeeded J. G. Kepler, at Winnemucca, Nev.

H. E. French, Hudson, Mass. has just moved into the new store fitted up for his occupancy.

W. F. Tate has admitted his son to partnership in his jewelry business in Cranbrook, B. C.

W. G. Wood & Sons is the name of the new firm succeeding W. G. Wood, at Swainsboro, Ga.

At Clinton, La., Charles Gott & Co. have been succeeded by the Clinton Jewelry & Mercantile Co., Ltd.

The Puritan Mfg. Co., wholesale jewelers of Iowa City, Ia., has sold its factory, only, to the Phinx Mfg. Co.

C. Van der Elsen has succeeded to the business heretofore conducted by Benj. F. Humphrey, at Centerville, Ia.

J. B. Whitlock, Eufaula, Ala., has just completed extensive improvements in the interior and exterior of his store.

Charles S. Wahlstedt, Elk Point, S. Dak., and Mrs. Helen L. Miller were recently united in marriage. The couple spent two weeks at Lake Okoboji.

Frank Wuerth recently returned from the east to Leavenworth, Kans., with an entirely new stock for his jewelry store in the Espenscheid building.

Charles I. Bierderman, Mexico, N. Y., has disposed of his jewelry and optical business and moved to Oneonta, where he will be associated in business with his father.

G. H. Lake, Lewiston, Idaho, recently lost a considerable amount of his stock by a fire, which swept over that place and destroyed property valued in all at $70,000.

The medals for the athletic events of the Orange County Fair were recently exhibited in the jewelry store of A. M. Ambler, Middletown, N. Y., and attracted considerable attention.

The clock expert of the B. & M. R. R. has taken out the timepiece in the Salem, Mass., station, which has not run regularly for two years. A new clock will probably be installed.

E. P. Vandenburgh and son, Haverstraw, N. Y., while out driving recently, were thrown from their carriage after colliding with a runaway horse. Both escaped with a few slight bruises.

F. H. Howard, a retail jeweler, of La Cygne, Kans., recently shot and killed his brother-in-law, George Hudson, after a quarrel in his store. Howard declared that he shot in self-defense.

A sidewalk show case in front of the Goldstein-Weisser Jewelry Co.'s store, 311 Main St., Peoria, Ill., was robbed, recently, of an opera and field glass. In stealing the articles the thief had to open two Yale locks.

## *LETTERS TO THE EDITOR.*

### How Gem Imports at New York Compare to the Total for the Entire Country.

*Editor* THE JEWELERS' CIRCULAR-WEEKLY:

Comparison of the national import statistics as to gems for the year ending with June, 1905, and the figures given out by Gen. Geo. W. Mindil, the jewelry examiner at the Public Stores, New York, indicates a great preponderance in the imports at New York, and also the commanding position of diamonds in the precious stone industry. The figures given out from Washington for diamonds, other precious stones, pearls and jewelry manufactures of gold and silver make a total of $35,065,158. This total, according to persons who are familiar with Government statistics, is supposed to include all the precious stones, including diamonds, and all the pearls that come into this country in any form, except samples that are sent here for examination by the custom experts, and which then are returned to foreign countries. Rough stones, cut stones, bort and other diamonds used for mechanical purposes are also included.

Gen. Mindil's figures show that in the same year the total importation of precious stones and pearls at the port of New York amounted to $33,223,164. It will be observed that the total for the entire country exceeds that of New York alone by only $1,841,994.

The national statistics indicate that of the total for the year rough diamonds, cut diamonds and bort amounted to $27,858,022, and this does not take into account the value of diamonds which may be included in the classification of manufactured jewelry.

An expert, who was interested in this comparison, on looking over the figures said: "Without doubt Gen. Mindil's figures are absolutely accurate. It is known, as every dollars' worth he records passes through his department, that New York receives a very large proportion of the precious stones and pearls brought into this country. I would not be surprised if anybody claimed that New York receives 90 per cent. of all. The showing made by the remainder of the country is a little less than I should expect. But government statistics have been known before now to err or at least to be so compiled that the totals are not in accord with the tables of the individual lines which compose them.

Sincerely yours,
G. M. F. A.

James Cramer, Clarinda, Ia., moved recently to the Gates building, where he has better facilities for his increasing business.

The City Jewelry Store was opened recently with a new stock at 60 Monroe St., Grand Rapids, Mich. An optical department is one of the special new features.

The City Hall clock of Detroit, Mich., has just undergone extensive repairs. The method of lighting is being improved, and instead of the interior illumination, each dial will have an outside light.

In the show window in the store of C. H. Daley & Co., Danbury, Conn., is to be seen a silver watch, which is nearly the size of an ordinary tea saucer with a dial four inches across. The watch belongs to a resident of Bethel, Conn.

# Quaker City Jewelers Enjoy Clambake.

**Members and Guests of Philadelphia Jewelers' Club Attend Annual Midsummer Outing at Burlington, N. J.**

PHILADELPHIA, Pa., Aug. 18.—The leading members of the Philadelphia Jewelers' Club and their guests, to the number of 160 (according to the official count) participated in the annual clambake festivities Wednesday afternoon, Aug. 16. The clambake was after the fashion of the previous affairs of the kind, and as good a time was had, if not better, than ever before.

Though a midsummer outing of a Philadelphia jewelers' club, there were present men of the trade from all parts of the east, fraternizing as only jewelers can when they gather together for a merry, care-free, heart-whole time of it. These August outings are annually looked forward to with eager expectancy by the entire trade of the east, especially as the trade mark of the Philadelphia Jewelers' Club is admittedly the guarantee of a royal good time.

Though the skies were overcast with lowering clouds, and the day Fall-like as to temperature, few of the "regulars" absented themselves, and there were many bright, cheerful, new faces. Every arrangement for the convenience and comfort of the guests had been made by Wm. H. Long and Joseph Cadwallader, who perfected all details.

The start for the scene of the clambake oddly enough, inland, on an old farm at Burlington, N. J., was made from Chestnut St. wharf at 1 o'clock in the afternoon. Here waited a specially chartered steamer with a band aboard and refreshments galore. L. P. White, just back from an extended pleasure tour of Europe; A. J. Le Jambre, and Messrs. Long and Cadwallader, were early on hand to welcome all guests, and the time of waiting for the boat's start was agreeably occupied with handshakings, greetings, introductions, and the exchange of the customary amenities, so that all were made to feel entirely at home.

The up-river ride was delightful, passing some of the prettiest of the Delaware's banks. The time was passed in a lively fashion with singing, dancing and story-telling. No one was made to feel that he was a stranger, and each party which made regular trips down a certain mysterious hatchway had a new-found friend to initiate on every trip. By the time Burlington was reached, and Mr. Cadwallader, as ever a thoughtful, genial host, had supplied everyone with transportation, the keynote of good fellowship had been sounded.

The trip to the scene of the clambake was made even more interesting and agreeable by the transfer of the guests from the boat to special trolley cars which whirled them through the quaint, old-fashioned Jersey village and through verdant pastures and picturesque landscapes to the old farmhouse some miles beyond. How the old town was awakened from its Rip Van Winkle quietude, the cows, horses, sheep and dogs startled by the joyous shouts and

ARCHIE RUTHERFORD,
President.

cries of jewelers is best left to be told by those who enjoyed the trip to the farm house.

When the cars, loaded with their happy cargoes of jewelers, passed the place of business of Frank H. Fry, Burlington, N. J., cries went forth of "Hello, Fry! Come out and join us, Fry!" etc., until the jeweler good-naturedly emerged and was immediately seized and forced aboard a car. Then Fred Yockel, with his fog-horn-like voice, began "For He's a Jolly Good Fellow," and the clubmen joined in enthusiastically. However, Mr. Fry managed to make his escape and return to Burlington, after shaking hands all around.

Like boys out on a picnic the jewelers abandoned themselves to the spirit of the occasion. A half hour's ride brought them to the old farm house, where the barns and outhouses had been pre-emptied for their especial benefit.

The caterer had already begun the preparation of the clambake on the green sward. The stones were heated and the seaweed steaming. While the jewelers employed the interval until dinner was served in quenching their thirsts and making merry according to individual inclinations, the dinner was prepared and cooked. The mound of good things was piled nearly six feet high with clams, lobsters, fish, sweet potatoes, corn and other vegetables, and the savory odor penetrated the nostrils of the guests and whetted their appetites for the coming feast. In the meantime a long table, 50 or 60 feet in length, was spread on the grass, and soon the 160 guests, with Archie Rutherford, the popular president of the club, seated at the head, were gathered comfortably about the table. With what relish the toothsome edibles were eaten is best told by those who have been fortunate enough to enjoy the hospitality of the club on like festive occasions.

After dinner the balance of the afternoon was spent playing ball, quoits and other convenient outdoor games. All were free to do as they pleased and entered heartily into the spirit of the day. The return to the boat landing was a repetition of the scenes of the trip to the farm. An excursion boat was in waiting and the guests of the club had another pleasant ride.

On the arrival at Philadelphia most of the party adjourned to the club headquarters at 1227 Chestnut St., where the festivities were continued until the small hours of the morning.

Among those who enjoyed the Jewelers' Club hospitality on this occasion were: Archie Rutherford, L. P. White, Wm. H. Long, Joseph Cadwallader, A. J. Le Jambre, Victor Binder, W. Grand, Wm. Kranich, C. J. Rust, John Brandt, Jacob Binder, Joseph Harvey, Mr. Levy, of Harper & Levy, Gus. Meyers, Gus. Eisenlohr, Warren Fulmer, Elwood Williams, Mr Strumpf, Isaac Elliott, Henry Bodenheimer, Charles Stockwell, Wm. H. Savage, Dr. Husband, Walter Stevenson, former Common Councilman Boorse, Fred Yockel, Mr. Goldstein, and many others. Among the guests were members of the trade from New York, Newark, Providence and the new England centers.

---

David A. Kahn, Erie, Pa., has suddenly disappeared, and the business has passed into the hands of a receiver. The stock was scheduled to be sold at auction last Wednesday.

### Imposter Fails in Attempt to Fleece New York Diamond Merchants.

Because New York diamond merchants are not in a rush to turn over their gems to every stranger who calls and asks for a collection, a man of foreign appearance was last week unsuccessful in efforts to swindle several firms in the Maiden Lane district. The man was about 35 years of age, five feet eight inches high, weighing about 140 pounds, with sallow face and dark eyes, and he wore a blue serge suit. When he called at the office of Alfred H. Smith & Co., 170 Broadway, he said that he represented Frank S. Boyden & Co., Chicago. A member of the New York firm saw the man, who tried to make arrangements for the transfer, immediately, from the company's safe to his pockets, of a quantity of two carat diamonds, which would be worth upwards of $2,000.

"Why does not Mr. Boyden go over to our Chicago office and make his selections?" inquired the importer.

"I do not know exactly," was the reply, "but as I was to be in New York, Mr. Boyden asked me to stop here and get the goods."

The merchant happens to know Chicago well, and is personally acquainted with Mr. Boyden; the stranger's story seemed so strange that the diamonds were refused to him on the pretext that they were not immediately available. The stranger then made some inquiries as to whether or not Joseph Frankel's Sons, or Stern Bros. & Co., would have sufficient diamonds to supply him at once. He also asked for one of the business cards of A. H. Smith & Co., in order to introduce himself to the other houses, but this was refused.

A telegram to Chicago brought a prompt reply from F. S. Boyden & Co., that the man must be an imposter. The police were then notified, but by that time the stranger had left the Maiden Lane section. As far as known, he did not obtain any diamonds and it is believed that after he left A. H. Smith & Co.'s, he changed his mind about calling at the other houses, possibly suspecting that he would be followed.

### Death of William Bushby Tilton.

Boston, Mass., Aug. 2.—William Bushby Tilton, who for the past 45 years had been well known in the retail jewelry business of this city, died at North Brooklin, Me., Thursday, Aug. 17, having just passed his 66th birthday.

Mr. Tilton was a native of Edgartown, Mass., born there Aug. 10, 1837, and was the son of the late Rev. David and Sarah (Batchelder) Tilton. He was of the eighth generation from William Tilton, who, emigrating from England, settled in Lynn in 1640. Deceased served his apprenticeship in the jewelry trade with the old house of Bacon & Co., Lowell, thence coming to Boston about 1856, and had been, up to within a few years, in the employ of leading jewelry houses, among the more recent positions held by him being that of clerk for the Smith, Patterson Co.

He leaves a daughter, Mrs. Herbert H. Hale of North Brooklin, at whose home he died, and where his funeral was held on Saturday last.

# THE GIANT OF COLLAR BUTTONS

## IN QUALITY, IN SALES.

The Standard American Collar Button.

**Millions of Krementz One-Piece Collar Buttons made, and are sold all over the world.**

**WHY?** *Because* of their HIGHEST QUALITY, BEST CONSTRUCTION, GIVING THE MOST WEAR AND GREATEST COMFORT and their IRON-CLAD GUARANTEE.

To verify this we invite the trade to read **"The Story of a Collar Button, with Illustrations,"** which may be had **FREE** for the asking, and to try the experiment suggested on page 5 of that booklet, by which all may easily determine the exact amount of 14 K. gold in Krementz plate.

**Extract from "Printers' Ink," Nov. 23, 1898.**

The Little Schoolmaster now suggests, to every pupil in his class, to send a two-cent stamp to Krementz & Co., 49 Chestnut Street, Newark, N. J., and ask to be favored with a copy of their leaflet. "The Story of a Collar Button." Afterward, if any pupil will send to *Printers' Ink* another leaflet, new or old, that is half as good as this one, or that approaches it in excellence, the deserving student will be rewarded with one of *Printers' Ink's* souvenir spoons as an acknowledgment of his discovery and contribution. "The Story of a Collar Button" is the best piece of advertisement construction that has come to *Printers' Ink's* attention in the year of our Lord 1898.

**Should you wish to utilize this booklet to increase your collar button business, we will, on receipt of your order, print your card upon and send you a quantity of them.**

**The several qualities of Krementz One-Piece Collar Buttons are stamped as follows, ON BACK.**

Patent Sustained by United States Supreme Court.

**Quality and Construction have made Its Reputation.**

## OUR TRAVELING REPRESENTATIVES

**Travelers may consider these columns open for the publication of any items of interest regarding themselves or their confreres.**

Wm. Klipper, Klipper Bros., will arrive in San Francisco in a few days.

The following traveling representatives were in Savannah, Ga., recently: M. L. Barnard, Larter & Sons; V. A. Picard, Pryor Novelty Co.; K. D. Yeaton, S. Sternau & Co.; L. D. Reynolds, Shafer & Douglas; G. H. Senter, Carter, Howe & Co.; A. J. Goode, Chapin & Hollister Co.; Edward D. Bogart, Dennison Mfg. Co.; S. D. Binge, Manchester Mfg. Co.; Oscar S. Schmidt, Aiken, Lambert & Co.

Among the traveling representatives who recently visited the trade in Detroit, Mich., were the following: J. T. Griffith, Jr., Carter, Howe & Co.; Walter Strauss, Jacob Strauss & Sons; Joseph Rifkin, L. Heller & Son; A. W. Ware, Arthur W. Ware & Co.; Walter R. Shute, Kohn & Co.; R. P. Coughlin, William L. Gilbert Clock Co.; Julius G. Bick, Adolph Goldsmith & Son; I. Gunzburger; Leo Heilbrun, Leo Heilbrun & Bro.

Traveling representatives who recently visited San Francisco, Cal., most of whom are still in the city, are: Jack Stanley, Mauser Mfg. Co.; Mr. Bernheim, Woodside Sterling Co.; Frank Moyer, American Watch Case Co.; Mr. Samuelson, Towle Mfg. Co.; Mr. Waite, Waite, Thresher Co.; David Beer, Bernheim & Beer; Mr. Ettinger, Gattle, Ettinger & Hammel; A. J. Parker, Osmun-Parker Mfg. Co.

The following traveling representatives were in Omaha, Nebr., last week: William T. Smith, Wilcox Silver Plate Co.; C. A. Hulstrom, Wilcox & Evertsen; H. B. Rogers, Whiteside & Blank; Robt. S. G. Edwards, Whiting Mfg. Co.; S. H. Lesser, Anchor Silver Plate Co.; E. B. Frank, Pairpoint Corporation; H. C. Rowbotham, Schrader-Wittstein Mfg. Co.; J. Thornton, Hayden W. Wheeler & Co.; Edward Du Bois, Electrolytic Art Metal Co.; Fred J. Foster, Unger Bros.; Max Gluck, H. F. Hahn & Co.; Henry Freund, Henry Freund & Bro.; Wm. Seckels, H. C. McConnell, McConnell-Colyer Co.

Travelers who visited the Louisville, Ky., trade recently included: Rodman B. Carr, Link & Angell; D. White Douglas, Quaker City Watch Co.; Sydney C. Straus, Standard Gold Jewelry Mfg. Co.; Louis Bernheim, Bernheim & Beer; J. W. McClanin, Wilcox Silver Plate Co.; Morris Lissauer, Ingomar Goldsmith & Co.; Zach. A. Oppenheimer; D. Skutch, New Haven Clock Co.; Wm. Matschke, A. Joralemon & Co.; C. L. Krugler, Mandeville, Carrow & Crane; Charles H. Anderson, Allsopp Bros.; Charles Marx; Harry A. Adams, Kraus & Deitsch; Ernest D. Wetton, C. Dorflinger & Sons; Mr. Schwartz, Fishel, Nessler & Co.

The following traveling representatives recently visited Lancaster, Pa.: A. R. Weiss, Adolphe Schwob; Chas. F. Sweasy, Champenois & Co.; A. C. Hanes, C. Dorflinger & Sons; R. V. Curran, F. W. Sackett & Co.; Mr. Geigerman, Sterling Glass Co.; Samuel E. Coggins, Towle Mfg. Co.; Morris Weil; G. B. Fletcher, Alvin Mfg. Co.; C. B. Gray, Shafer & Douglas; J. D. Bennett, Rockford Watch Co.; E. E. Fields, Roy Watch Case Co.; Samuel Heiman, Sabsehitz Bros.; H. A. Wintermute, Wm. Bens Co.; C. G. Walker, Pairpont Corporation; Alexander Conklin, Wm. S. Hicks' Sons; M. A. Hingworth, American Silver Co.; J. P. Melhado, N. Wolff & Co.

Among the traveling salesmen in Columbus, O., recently were: C. P. Stouffer, J. H. Stouffer Co.; James Baker, Frank M. Whiting & Co.; Robert A. Buehl, A. L. Blackmer Co.; Harry A. Adams, Kraus & Deitsch; John H. Carr, Elgin National Watch Co.; Ed. A. Schwartz, Fishel, Nessler & Co.; C. C. Graham, C. F. Egginton Co.; George H. Briggs, Briggs, Sibley & Pitman; Mr. Royer, Bassett Jewelry Co.; C. W. Edwards, Charles E. Hancock Co.; George H. Remington, Maintien Bros. & Elliot; Charles H. Lochner, Hayes Bros.' Co.; Mr. Smith, Roger Williams Silver Co.; Mr. Allen, Sansbury & Wells; Mr. Thomas, J. B. Bowden & Co.; J. F. Sherman, William Kincherf Co.; D. Skutch, New Haven Clock Co.

The following traveling representatives called on the trade in St. Louis, Mo., last week: Joseph Rifkin, L. Heller & Son; G. W. Bleecker, Martin Copeland & Co.; H. J. Hildebrand, H. C. Lindol & Co.; H. G. Pfordresher, George L. Brown & Co.; F. T. Burton, Fontneau & Cook Co.; W. F. Chambers, P. & A. Linton Co.; Hubert Sombron, Hipp. Didisheim & Bro.; W. S. Metcalf, Plainville Stock Co.; J. A. Limbach, Theodore W. Foster & Bro. Co.; Albert M. Stern, Goodfriend Bros.; H. A. Bliss, Krementz & Co.; John F. Garland, Keller Jewelry Mfg. Co.; C. T. E. Smith, Reed & Barton; F. C. Winship, H. C. Fry Glass Co.; Harry E. Barkham, Jones & Woodland; Charles H. Anderson, Allsopp Bros.; C. B. Bartlett, Whiting Mfg. Co.; W. C. Barry, Larter & Sons; B. Hyman.

Traveling salesmen who visited the trade in Cincinati, O., during the past week included: Harry Kennion, Parks Bros. & Rogers; Joseph Rifkin, L. Heller & Son; Mr. Ripley, Standard Button Co.; Mr. Wilkinson, J. J. Sommer & Co.; J. De Mariano, Albert Lorsch & Co.; Jules F. Schuman, Jr., William Kincherf Co.; A. J. Sherrard, Enos Richardson & Co.; J. H. Thompson, J. B. Bowden & Co.; Mr. Sichel, Bonner & Co.; Mr. Davies, Crane & Theurer; J. T. Griffith, Carter, Howe & Co.; H. Stevens, Bay State Optical Co.; Lewis Jones, Marsh & Co.; Harry Scofield, Scofield, Melcher & Scofield; Mr. Collom, J. J. White & Co.; E. L. Mumford, Miller, Fuller & Whiting; John Keene, Ostby & Barton Co.; Harry Bliss, Krementz & Co., N. Gunzburger, L. & M. Kahn & Co.; L. B. Jones, C. A. Marsh & Co.; K. L. Taylor, Riley, French & Heffron; George Southwick, Payton & Kelley Co.; J. W. McClennin, Wilcox Silver Plate Co.; Harry Osborn, R. Wallace Sons' Mfg. Co.; Ernest Block, Louis Stern & Co.; Mr. Dunn, Arnold & Steere; B. R. Noble, Sturtevant, Whiting & Bigelow; F. C. Allen, Sansbury & Nellis.

The trade in Pittsburg, Pa., was last week visited by the following traveling representatives: M. Decker, Plainville Stock Co.; William Matschke, A. Joralemon & Son; L. A. Blackinton, W. & S. Blackinton Co.; Frederick Dobra, B. S. Freeman Co.; A. E. Hayward, Seth Thomas Clock Co.; Fred H. Felger, F. & F. Felger; Harry B. Kennion, Parks Bros. & Rogers; R. C. Wilde, Meriden Cutlery Co.; Edward A. Brabnac, A. Wallach & Co.; O. G. Fehon, J. M. Fisher & Co.; Arthur Bradshaw, Meriden Britannia Co.; Mr. Mumford, Miller, Fuller & Whiting; S. A. Wilkinson, J. J. Sommer & Co.; Maurice Kohn, Silbermann, Kohn & Wallenstein; Charles C. Silk, Moore & Son; George Southwick, Payton & Kelley Co.; A. R. Dorchester, W. E. Richards & Co.; Frank W. Cullom, J. J. White & Co.; Harry H. Miller, Hutchison & Heustis; Abel King, I. Emrich & Co.; B. H. Noble, Sturtevant, Whiting & Bigelow; A. R. Weisz, Adolphe Schwob; Max Huss, S. & A. Borgzinner;

### Last Honors Paid to the Late Frederick D. Heffron.

NORTH ATTLEBORO, Mass., Aug. 16.—The funeral of Frederick D. Heffron, whose death was announced in the last issue of THE CIRCULAR WEEKLY, was held from his late home on Church St. Monday afternoon at 2 o'clock, and was largely attended, many members of the trade being present from New York, Philadelphia, Chicago, Baltimore and other places. Telegrams of condolence were received by the widow from all over the country. Rev. Ralph E. Conner, pastor of the First Universalist Church, and Rev. William A. Warren, pastor of the First Baptist Church, officiated.

The pall bearers were G. Herbert French, of Riley, French and Heffron; Dr. F. E. Hale, manager of the estate of O. M. Draper; Samuel E. Fisher, a retired jewelry manufacturer; Charles Clark, of C. H. Clark & Co.; Harry Curtis, a prominent Providence attorney, and George Shephardson, of Attleboro. The floral tributes were among the most costly and profuse ever seen in this town.

Interment was in Mount Hope Cemetery, at this town.

### Death of Samuel Dexter Dean.

NORWOOD, Mass., Aug. 16.—Samuel Dexter Dean, well known as a watchmaker and jeweler, died at his home Monday after a short illness, in his 72nd year. Though not actively engaged in business of late, he was for a long time prominent in commercial circles in this city. Mr. Dean was a native of Norwood, his family being one of the oldest in the village of South Dedham, as the town was originaly called, Dean St. here being named after one of his ancestors. He was born Aug. 15, 1834, and about 30 years ago opened a jewelry and watch repairing store, which he maintained almost up to the time of his death.

Mr. Dean was a member of the Masonic fraternity and of the I. O. O. F. He was twice married, his second wife surviving him. The funeral services were held from his late residence in Cottage St. yesterday afternoon, under the auspices of the Oddfellows.

### Jewelers' Gold Bars Withdrawn and Exchanged at New York.

*Week Ended Aug. 19, 1905.*

The U. S. Assay Office reports:

| | |
|---|---|
| Gold bars exchanged for gold coin | $442,638.61 |
| Gold bars paid depositors | 53,857.71 |
| Total | $496,496.32 |

The gold bars exchanged for gold coin are reported as follows:

| | |
|---|---|
| Aug. 14 | $116,675.25 |
| " 15 | 85,968.47 |
| " 16 | 35,964.01 |
| " 17 | 126,713.99 |
| " 18 | 56,371.35 |
| " 19 | 20,945.51 |
| Total | $442,638.61 |

# AN IMPORTANT ANNOUNCEMENT CONCERNING OLD ENGLISH BLACK JACKS

¶ The Gorham Company desires to direct attention to its extremely novel and original collection of Loving Cups and Tankards, offered under the name of "Old English Black Jacks."

¶ These have been designed especially to meet the very widespread demand for articles of this nature which shall be as dignified and as decoratively effective, but yet not so costly as though fashioned of solid silver. They are made closely to simulate the Old English "Black Jacks" and "Leather Bottles," those characteristic drinking utensils of the sixteenth and seventeenth centuries, which are to-day so eagerly sought after by collectors of artistic rarities.

¶ These strikingly original examples of an artistic revival are to be found in all sizes from the drinking mug to the imposing Loving Cup, the tall Tankard or the well-proportioned Flagon. The bodies are of heavy hand-worked leather, the linings of red copper, the mountings, including the shields for monograms, inscriptions or armorial bearings, of sterling silver.

¶ Black Jacks are made exclusively by the Gorham Company for the legitimate jewelry trade. They will be advertised extensively in the early Fall magazines, and as they can be sold at very moderate prices, a popular demand will undoubtedly be created for them. The supply must of necessity be more or less limited, and it is suggested that orders be placed as early as possible to insure a reasonably prompt delivery.

THE co-operation of manufacturers and exporters of clocks, watches, jewelry and allied lines is being solicited by the Department of Commerce and Labor in a work which should result advantageously to American producers. The Department is endeavoring through its Bureau of Manufactures to expand the foreign trade of the United States. It purposes to establish a comprehensive card index by means of which, upon application, information can be furnished manufacturers or possible customers in foreign lands which may result in opening negotiations between buyer and seller. A blank form is being sent out to American manufacturers which requests that full particulars be given on points outlined. In this manner when an inquiry shall be received for information from a foreign buyer it will be possible for the Department to give a list of the manufacturers of any article. The work also contemplates furnishing information to the producer so that it will be possible for him to secure whatever data he may require in regard to consumers in any country.

### Beware the Check Swindler.

A PERUSAL of the columns of THE CIRCULAR-WEEKLY of this and last week will indicate that attempts to swindle jewelers with worthless checks are being made oftener and in more parts of the country now than at any one time for many years past. Whether this outbreak of crime is due to the carelessness or laxity of the members of the trade on whom crooks are preying or whether it is due to a spasmodic outbreak of crime cannot be determined. In either case it has become incumbent upon all jewelers to exercise more caution than ever in conducting business with strangers, and to strictly adhere to the rule often impressed upon them, to accept no checks, drafts or postal orders from anyone whom they do not know unless they can hold the jewelry for which these are tendered, until after an investigation has been made. The apparent respectability of the stranger, or the absence of certain criminal "ear-marks" should never be deemed sufficient cause to excuse a merchant taking a risk of this kind, inasmuch as the members of the world of crime who play upon the jewelry trade include the cleverest, most intelligent and (if the term may be used) the most respectacle element, at least in appearance, manner and general deportment, that are to be found among the criminals of the country. The merchant who always bears in mind that as a rule one loss of this kind is sufficient to more than eat up the profits of all sales he may make in a year or two by reason of showing extra consideration and respect to strangers, knows that the risk he runs is too great to afford to take any chances.

As has often been pointed out in these columns one of the greatest and most effective remedies for evils of this kind, which menace the trade, is publicity, and jewelers will not only help protect themselves and protect their fellow members but will also stand a chance of recovering the stolen property if they will, whenever an attempt is made on them, be it successful or unsuccessful, immediately notify the police and in addition their local journal, their trade journal and any organization to which they may belong. In these reports they should give all the details of the crime or attempted crime and the methods employed by the swindler, that these may be spread abroad, thereby making his chance of successfully operating the same game again exceedingly small. The jeweler who after being swindled says nothing about it, feeling that he would rather pocket the loss than make public facts as to his carelessness, is not only committing a moral crime in thereby shielding the thief, but in addition is committing a direct crime upon the fellow members of his craft in subjecting them to the same danger to which he was exposed, by permitting the thief to remain at large, free to prey upon the next man he meets.

### Another Advance of Five Per Cent. in Prices of Rough Diamonds.

Diamond importers who buy rough stones from the "syndicate" at London, received messages by cable last week informing them of an advance in price of five per cent. on all grades. There was a small advance Jan. 1 of this year, and there were four advances of five per cent. each last year. The importers and the trade generally seem to be of the opinion that the advance will not check in the slightest degree the demand for the gems. The upward movement began several years ago, and the volume of trade has been increasing steadily all the time that the prices have been going higher.

It was suggested that, as the advance comes directly after an accident at the new Premier mine which puts it out of business temporarily by the flooding of the works with mud, possibly this gave the "syndicate" a convenient opportunity for putting up the prices. This view is scouted by the importers, one of whom said: "The output of the Premier mine has no practical effect on the gem market in the United States, because the stones have not the uniformity of quality necessary to make them a factor. The shutting down of the Premier works for a time can have absolutely nothing to do with the present advance in prices declared by the "syndicate" which controls the output of the De Beers Consolidated Mines, Ltd., and also of some of the small independent companies."

The extent of the advance in the last two or three years cannot be computed exactly because in addition to the action of the "syndicate" in putting up the quotations from time to time there have been changes in the sizes and qualities of the stones which the buyers must accept. The importers say that the variation in these respects is not less important than in the actual prices per carat. By mixing in each consignment a few stones of a slightly lower quality and by increasing the number of large stones, the cost to the importers is increased considerably.

Everett Clark, who for 24 years had been in the employ of August Wetteroth, St. Joseph, Mo., died recently in Salt Lake City, Utah, aged 42 years. The deceased was a Mason and a member of the Knights of Pythias.

The importers say that the variation in these respects is not less important than in the actual prices per carat. By mixing in each consignment a few stones of a slightly lower quality and by increasing the number of large stones, the cost to the importers is increased considerably.

Everett Clark, who for 24 years had been in the employ of August Wetteroth, St. Joseph, Mo., died recently in Salt Lake City, Utah, aged 42 years. The deceased was a Mason and a member of the Knights of Pythias.

## New York Notes.

M. Shiman, of Shiman Bros. & Co., left last week on an extended western trip.

Chas. Siegman, with the Gorham Mfg. Co.'s Maiden Lane store, was last Monday placed in charge of the company's city factory.

George Bresloff, Brooklyn, reports finding in an oyster, picked up in Hempstead Harbor, a pearl valued by a Maiden Lane appraiser at $50.

Geo. F. Kunz, of Tiffany & Co., has transmitted to the Division of Mechanical Statistics of the Geological Survey, at Washington, D. C., his annual report on American Precious Stones.

The Rowley Mfg. Co. has opened a New York office and show rooms for the display of their hotel ware in the Flatiron building. The office is in charge of Richard W. Miles and A. H. Kennedy.

Henri P. Alexander, who has three optical stores in Manhattan and one in Brooklyn, will open this week a fifth store at 1007 Broadway, Brooklyn. John Ashley goes from the 14th St. store in Manhattan to take charge of the new branch.

Six months' imprisonment was the sentence passed last week on Montauk Cyril, the Canadian youth, who took a gold pencil from the store of Udall & Ballou, 499 Fifth Ave., three weeks ago, while he was looking at jewelry as a pretended customer.

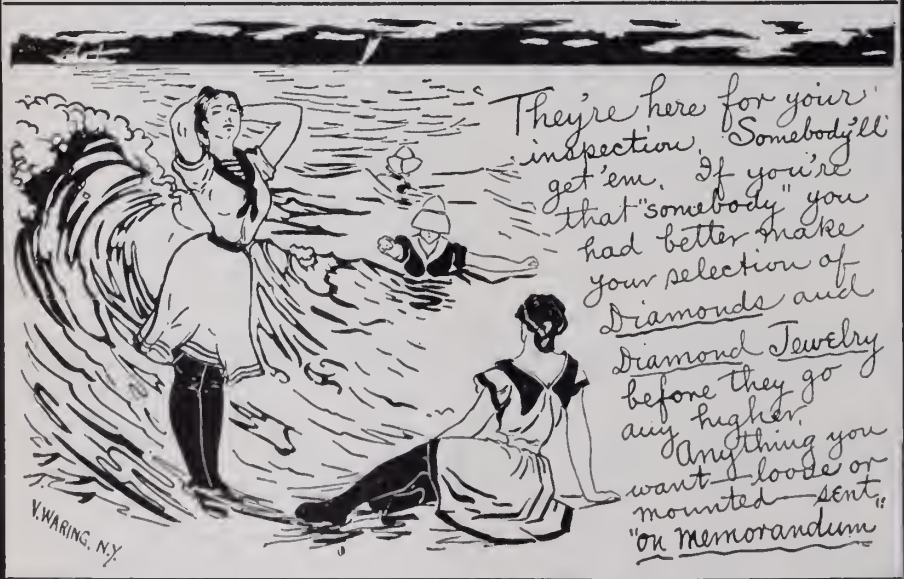
Plans were filed, last week, for the remodeling of the Hotel Cambridge, at the southwest corner of Fifth Ave. and 33d St., facing the Waldorf-Astoria. The property, which is to be turned into a six-story office building, is owned by the Gorham Mfg. Co. The cost of the improvements will be $25,000.

Daniel Miller, a partner in the firm of Goldman & Miller, umbrella handle manufacturers, at 100 Centre St., filed last Wednesday an individual petition in bankruptcy. He has been in business alone as a clock merchant at St. Joseph, Mo. An involuntary bankruptcy petition was recently filed against the New York firm.

A traveler recently returning to New York from the West Indies tells a story which is amusing jewelers and watch repairers who hear it. While he was in Curacoa the traveling man's watch got out of order, and he took it to the local watchmaker. In a couple of days he returned and the timepiece was handed to him, the watchmaker saying that it was now all right, but that one of the wheels seemed superfluous, so he had not put it back in the works.

Several western pearl merchants have been in the New York market in the last week, including W. D. Bird, Little Rock, Ark., and I. E. Anthony, Comanche, Ia., who were registered at the Astor House. Reports from the Maiden Lane district indicate that considerable business is being transacted among commission men and others. The western men say that the center of the pearl fishing industry this season has moved up the Wabash River as far as Vincennes, Ind., where a considerable group of buyers may be found these days.

Buried treasure, found at Egg Harbor, N. J., and ascribed by some of the papers to the late Captain Kidd's operations, has reached one of the large retail jewelry houses. Its expert was asked to examine about 50 English sovereigns of the reigns of George II. and George III. The sovereigns, according to the story told him, were found by Italian laborers back of an old iron fireplace. The coins were almost cemented together, as though the rain falling on the iron for many years had been the cause. The gold was valued at $250 by the expert.



Charged with the theft of a diamond ring, valued at $125, Henry Morris was arraigned Saturday in the Yorkville Police Court, and held in $1,000 bail for trial. Henry Fagan, a diamond broker, at 240 E. Houston St., said that last October he gave the ring to Morris for the purpose of obtaining a loan on it at a neighboring pawn shop. It was charged that Morris was unfaithful to the trust and disappeared with the ring. The police were unable to find him until last week, and he was identified with some difficulty, because during his absence he had grown a full beard.

A man giving the name of Patrick J. Kelly, who tried to pledge a quantity of silver spoons and forks in Goldstein's pawn shop on Bridge St., Brooklyn, was arrested one day last week, and at the police station was requested to explain where he got the silverware. He said that it was given to him by a woman for the purpose of pledging, but he was unable to say where the woman could be found, or what was her name. The police then went to 340 Bridge St., where Kelly lodged, and found in his room a quantity of rings, scarf-pins, brooches, fob chains and other jewelry bearing store tags. The man was held, awaiting further investigation.

Preparations are being made by a considerable number of New Yorkers to attend the convention which the National Stationers' Association will hold Oct. 10, in St. Louis, Mo. The Boost Club has been organized for the special purpose of augmenting representation from this city and of assisting in the arrangements for the comfort of those who go. The expectation is that at least one Pullman car will be chartered to accommodate those who will go direct to St. Louis from this city. These committees have been appointed to take charge of the excursion: Transportation committee, W. E. Smith, in charge; Arthur P. Jackson and Robert Ansley. Publicity committee, F. D. Waterman, F. P. Seymour and Eberhard Faber.

After smashing a small side light in the show window of Henri P. Alexander, optician and jeweler, at 11 E. 14th St., last Wednesday night, a thief or thieves stole a tray of glass eyes and a quantity of opera glasses, spectacles and other articles valued at $200. It is supposed that a long hook was used to extract the articles from the window, which is not large enough to admit a man. The police were notified, but thus far have made no arrests. The store is located in a block that is considerably traveled at all hours. Several months ago a similar burglary was committed at the same store and the thief was not caught. There have been a number of other burglaries in this part of the street and the storekeepers

ON MEMORANDUM

CROSS & BEGUELIN

*Importers and Cutters of Diamonds and Precious Stones*

48 Rue de Mesley, PARIS Telephone, 2188 Cortland 17 Maiden Lane, NEW YORK

ave appealed to the police for better protection at night

Samuel B. Ross, of Samuel B. Ross & Co., New York, sailed for Europe last Saturday on the *St. Louis*.

Among the men fined last week for holding meetings on the East Side without a police permit was Solomon Fieldman, an optician, of 363 Third Ave.

F. M. Neefus, for many years with the E. N. Welch Mfg. Co., and more recently with the Sessions Clock Co., now represents the Western Clock Mfg. Co.

Arthur A. C. Cocks, of Arthur Cocks & Co., Ltd., Sidney, Australia, is in New York, looking over lines of American jewelry with a view ot determining what will be most available for his home market.

S. F. Myers, of the S. F. Myers Co., and family have left Lake Hopatcong, where they have been for some time, and have settled for the remainder of the season at the Grand Union Hotel, Saratoga Springs.

Fred J. Reith, who moved from his store at 467 Eighth Ave., when the Pennsylvania terminal improvements were begun, to 1653 Amsterdam Ave., and closed out that store more recently, is now associated with the Mermod, Jaccard & King Jewelry Co., 400 Fifth Ave., having charge of the watch and clock repairing department.

Abraham Goodman, 102 W. 69th St., who was formerly in business as a diamond broker, was drowned last Thursday in the Hudson River, near Fort Lee. It is supposed that while walking on the dock near the river he had an attack of vertigo and fell into the water. For several years he made his home in San Francisco, returning to New York a few months ago.

At Sag Harbor, L. I., the Summer half-holidays of employes in the factories of the Fahys Watch Case Co. and the Alvin Mfg. Co. have been discontinued and all the works are now in operation full time. One of the largest jewelry manufacturers in New York said yesterday that his business is more satisfactory than it has ever before been at this time of the year. Retailers in some of the residence districts say that their business, suffering in Summer because of the number of people who are away from the city, will revive next month. In business centers of the city retailers say that losses caused by the absence of residents are made good in part, at least, by the trade of out-of-town visitors, thousands of whom come to New York as a Summer resort.

Enos Richardson & Co., 23 Maiden Lane, were notified last week by P. H. Phelps, one of their salesmen, that a hand bag, containing his clothing and a small quantity of jewelry, had been taken from the safe of a hotel in Lewiston, Me., at which he had been stopping. The contents of the grip were valued at $250. A day or two later the police of Gloucester, Mass., arrested E. E. Dunbar, on the charge of stealing the bag, which was recovered with most of the contents. The prisoner was formerly a bell boy at the hotel from which the grip was taken. Several months ago he smashed a window of a store, it is said, and stole a quantity of jewelry, for which crime he was sentenced to four months imprisonment. He was registered at the Puritan Hotel in Gloucester when the police arrested him on the new charge. He is to go back to Lewiston for trial.

An officer of the Jewelers' Protective Union, New York, said recently that notwithstanding reports from the west to the contrary, the organization is taking no measure to bring about a trial on a second indictment of Tom Dennison, the Omaha man, recently acquitted on the charge of receiving the stolen Pollack diamonds. The second indictment charges Dennison with complicity in the robbery. There is no intention on the part of the organization to do anything further in this case. The association was successful in obtaining the punishment of the man directly guilty of the robbery, and also took an active part in presenting the evidence against Dennison. As the latter was not convicted at the first trial, the organization is satisfied to let the matter rest as far as it is concerned. According to a report from Red Oak, Ia., the Harrison County authorities are looking to the Jewelers' Protective Union and the Civic Federation of Omaha to defray the expenses of the recent Dennison trial, which amounted to about $1,600, including the witness fees, mileage, jury and stenographic costs. In relation to this the officer of the Jewelers' Protective Union said: "We have paid in full every liability that we incurred in connection with the proceedings, but we did not promise at any time to pay the court costs or any share of them, and so the account, so far as the organization is concerned, is closed."

The plate glass window in the jewelry store of Joseph Sagor, 681 Broadway, Brooklyn, was broken early last Wednesday morning by a man, who grabbed a handful of rings from a tray. Policeman Frank Hannaman, who was standing in a doorway, saw the man's action, and caught him before he ran far. The prisoner was taken to the police station, where he gave his name as James Quigley, and his residence as 34 Bank St., Manhattan. He is 24 years old. When he was searched the police found in his pockets 36 gold rings.

SAFE DEPOSIT VAULTS.

10 silver watches, three gold watches, seven opera glasses, 10 silver match boxes, a diamond glass cutter. In one of his trouser legs were two felt hats. Quigley confessed that before he was caught he had smashed windows in three stores that same night. One was in the jewelry store of Henry G. Hoeting, 789 Broadway, and the other was in a hat store. The prisoner was held to answer to the charge of burglary.

Henry Knobelauch, who in former years was regarded as one of the most prominent jewelry workmen of the city, died last week at his home 635 Marcy Ave., Brooklyn, at the age of 84.

Tiffany & Co. have presented to the Isthmian Canal Commission the design of a seal to be used by it and the Zone Government on all state papers, and the same has been adopted. Around the margin are the words, "Seal of the Canal Zone, Isthmus of Panama."

David Munk, a diamond broker, who for a time had desk room in an office at 51 Maiden Lane, is the husband of Mrs. Minnie Munk, a handsomely dressed woman, who was, last week, taken into custody after she had been found sleeping in the city parks. She was sent to Bellevue Hospital to be examined as to her insanity. A couple of months ago she caused her husband's arrest on the charge of non-support and since that time he had been paying her $10 a week. She said in court that her husband should pay her $100 a week.

Fraud orders were issued last week by the Post Office Department against the Besser Watch Co. and other concerns said to be operated by E. H. Pfeiffer, Brooklyn. These companies advertised that they would give handsome gold watches as premiums for selling jewelry, pills and other merchandise. The post office inspectors decided that the schemes violated the regulations of the department.

For interference with firemen during a tenement house blaze at 13 Pitt St., Sunday, Abraham Greenspan, a jeweler, who owns the damaged house, and Abraham Weiglas, employed by him, were fined $5 each by Magistrate Moss in Essex Market Police Court Monday. It was charged that Greenspan and Weiglas broke through the fire lines, and tried to enter the burning house. When ordered back, the complainants said, they became abusive.

The H. W. Hunter-Hoecker Co. was organized last week to manufacture and deal in optical and surgical supplies, with a capital stock of $25,000. The incorporators were: Alexander Shaw, Berton G. Baird, both of 1145 Broadway, New York; John B. Hoecker, Jr., 312 Fulton St., Brooklyn. The company will carry on the business heretofore conducted at 1145 Broadway by Alexander Shaw, who succeeded his uncle, the late H. W. Hunter. Mr. Hoecker's father is in business at the Brooklyn address.

Leonard Strobel, who for several years has been engaged in the manufacture of watch cases in Brooklyn, was last week adjudged a bankrupt, in proceedings brought against him by Abraham Bachrach, 51 Maiden Lane, New York. It was alleged in the petition that Mr. Stroebel is the surviving member of a firm, the other partner having died recently. After the partner's death it is said Mr. Strobel sold a quantity of the assets, and with the proceeds satisfied the claim of several creditors to the exclusion of others who have been supplying him with money and materials with which to carry on the business. The latter creditors have claims aggregating $4,000.

In the recent fire at Fernie, B. C., the store of C. C. Wright was considerably damaged.

J. Guy Daniels, Newberry, S. C., has been successful in the recent damage suit brought against him by Perdeter Suber, who asked $5,000 for the death of her brother. The case grew out of the killing of Sam Eigner, a young negro, by a skyrocket on Christmas Eve, 1903, Mrs. Suber claiming that the jeweler was responsible in some way for the accident to her brother. When the case came to trial in the common pleas court recently, the jury decided in favor of Mr. Daniels, being shown that the suit should have been brought against the town instead of against Mr. Daniels.

## Trans-Atlantic Voyagers.

TO EUROPE.

Lee Reechman, of Joseph H. Fink & Co., New York, will sail to-morrow on the *Deutschland.*

Samuel B. Ross, of Samuel B. Ross & Co., New York, sailed last Saturday on the *St. Louis.*

Jean G. C. Cottier, of C. Cottier & Son, New York, sailed Thursday last on the *Britannia.*

FROM EUROPE.

Charles A. Keene, New York, returned Friday on the *Deutschland.*

A. A. Gillespie, of Gillespie Bros., Pittsburg, Pa., arrived last Friday.

H. E. Oppenheimer, of H. E. Oppenheimer & Co., New York, returned Saturday.

Henry Fera, of Fera & Kadison, New York, will return in the early part of next week.

Miss Edith E. Edge, watchmaker for Frank Picard, Lawrence, Mass., returned recently.

C. H. Crump, of the Shreve, Crump & Low Co., Boston, Mass., returned last Saturday on the *Arabic.*

Louis Manheimer, of Louis Manheimer & Bros., Chicago, will sail from Europe Sept. 2, on the *St. Louis.*

The Commercial Travelers' Club, of Mount Vernon, N. Y., held its annual clambake outing at Rye Beach, N. Y., on Saturday. A unique and successful feature of the event was that the members took with them their wives and sweethearts. Several well-known Maiden Lane habitues are members of this organization.

### Henry Bockstruck Again Wins Suit Brought by United States Against Diamonds He Imported.

ST PAUL, Minn., July 21.—Henry Bockstruck, of this city, has been successful in the litigation with the Treasury Department over 99 diamonds, which were imported in 1903. Word was received a few days ago to the effect that the United States Circuit Court of Appeals had affirmed the judgment of the lower court.

In this case the Government contended that the stones were actually the property of Fink, Bodenheimer & Co., New York. Under the terms of a contract, which the Government set forth, the New York firm arranged for the importation of the diamonds through the port of St. Paul, consigned to Mr. Bockstruck, who had the privilege of taking as many as he desired and returning the remainder to the firm. The Government claimed that under the terms of this contract the ownership of the gems remained at the time of importation with the firm, and that the St. Paul man had no legal right to make the owner's declaration. By so doing, it was claimed he had violated the law and the diamonds were forfeited.

W. Wickham Smith, of New York, who argued the case for the jeweler, contended that while the New York firm bore the relation of seller toward Mr. Bockstruck, yet as between the consignee and the Government, the consignee is the owner. He argued further that Mr. Bockstruck's statement was not made with the intention to deceive, and that, therefore, there could be no forfeiture.

The United States in carrying this case through the courts, it is understood, has been inspired largely by a desire to discourage the importation of diamonds at ports other than that of New York because the Government has most competent appraisers in New York, but practically none at other ports.

---

Leslie E. Carl, Deposit, N. Y., has interested several local merchants and manufacturers in the proposed establishment of a Western Union Time Circuit at Deposit, and it is expected that the system will soon be installed.

### Men Accused of Diamond Smuggling at Chicago Held for Action of Federal Grand Jury.

CHICAGO, Aug. 19.—Henry Hoffman, accused of smuggling diamonds, and L. J. Bohl, arrested as an accomplice, are held under bonds of $2,500 each to await the action of the Federal Grand Jury. Hoffman is not known here. Bohl is a diamond setter employed by S. Wechter & Co., manufacturing jewelers in the Masonic Temple, and lately opened a small repair shop on W. Chicago Ave.

The report that Hoffman and Bohl are connected with a large band of smugglers is without foundation. The Federal authorities had no inkling whatever of the doings of these two men. Hoffman was seen by a policeman while he was offering some diamonds in a west side saloon, and when the officer questioned him he tried to laugh the matter off, and said "They're mine; I smuggled them." The officer arrested Hoffman and Bohl, and notified the United States Collector of the Port here.

Hoffman had in his possession about 150 small diamonds, and as many more were seized in pawn shops, at which they had been sold. Altogether the entire amount is about 30 carats, valued at between $2,100 and $2,200.

M. Rosenthal, who conducts a pawn shop at 201 W. Madison St., bought from Bohl eight stones, weighing 3½ carats, at $70 a carat. He says he knew Bohl as a diamond setter, and the latter had pawned his watch with him once or twice, and he was, therefore, not suspicious when Bohl presented his card, sold him the diamonds and gave him a regular bill for them.

Hoffman at first said he had brought the diamonds from England, and had smuggled them through at Boston. When arraigned, both men refused to talk. Bohl is married and has a family. He is in poor circumstances. As a workman he is considered capable and competent.

---

Warren & Warren, 417 Broadway, Paducah, Ky., are disposing of their stock at auction, prior to moving to a new location on Broadway, near 4th St. The concern expects to be in its new quarters by Sept. 1.

## News Gleanings.

Wm. Y. Reed, Carmen, Okla., has sold out.

Culpepper & Dortch, Hazel, Ky., have sold out.

Walter B. Speer & Co., McKees Rocks, Pa., have discontinued business.

Clinton M. Kohr is closing out his stock at Tower City, Pa.

Robert Walsh, Port Huron, Mich., has discontinued business.

The stock of J. L. Sievert, who went into bankruptcy at Dayton, O., last spring, was sold Aug. 15 to L. Mosheim, for $9,060. Mr. Mosheim is a dry goods merchant at Dayton.

Marius C. Peterson, Cœur d'Alene, Idaho, has sold out to M. Barborka.

Krebs Bros. have purchased the business of F. E. Fee, Hartley, Ia.

S. H. Babb, Winnsboro, Tex., has moved to San Angelo, in the same State.

J. C. Pilcher has bought the stock of George E. Boyer, Wellsville, Mo.

Joseph Rittigstein, Los Angeles, Cal., recently sold out to F. Selkinghaus.

V. B. Teachout, formerly of Kendallville, Ind., is now located at Sturgis, Mich.

J. J. Stephens, formerly of Norwood, Mo., has moved to Hartville, in the same State.

B. G. Palmer, Saegertown, Pa., has moved to Blooming Valley, in the same State.

M. S. Hodgin, Lynn, Ind., has admitted a partner, and the firm style is now Cox & Hodgin.

W. E. Fleming and Joshua S. Gadd, both of Smith Center, Kans., have gone out of business.

The Carter Jewelry Co. has succeeded the Carter-Campbell Jewelry Co., Salt Lake City, Utah.

M. Sporleder, formerly of Bristow, Ind. T., is now located in a new territory in Shawnee, Okla.

Herbert K. Smith, formerly engaged in business in Patchogue, N. Y., has just opened a store in Far Rockaway, N. Y.

S. A. Simmons, Wappinger's Falls, N. Y., has removed to the Library building in that village. The change gives him more than double his former store space, and a much better business location.

Wm. B. Joseph and wife, Hudson, N. Y., have returned from an outing spent at the Thousand Islands.

Milo D. Eatinger, North Judson, Ind., has sold his stock to his son, who will continue the business.

E. T. Lord & Co., Quenemo, Kans., have dissolved, and the business will be continued by E. T. Lord alone.

Lujan & Lucero, Las Vegas, N. Mex., have dissolved, and the business will be continued by Sabino Lujan.

A. D. Schwab has admitted a partner in his jewelry business in Billings, Mont., and the firm is now Schwab & Roberts.

Harvey D. Pascal, Fishkill-on-Hudson, N. Y., has added to his stock a line of richly decorated imported chinaware.

Wm. H. Van Keuren, Poughkeepsie, N. Y., has returned from a vacation spent at Rockaway and Asbury Park.

Albert G. Fisher, Rodney, Ia., has been looking over Castana, Ia., with a view to putting in a new stock of jewelry at that point.

The store of Thompson Bros., Fertile, Ia., was recently robbed of cash and jewelry amounting to $60. Local thieves are suspected.

F. M. Glenn, Belington, W. Va., has admitted a partner in his business, and hereafter the firm style will be known as Glenn & Right.

Frank Siverling is now in charge of the watchmaking and jewelry department of

TRADE MARK

norson & Brown, Northwood, Ia., having ceeded S. P. Albrecht, who has returned his home in Moline, Ill.

C. E. Skaug has moved from Carpio to onnybrook, N. Dak.

Harvey T. Crane, Maryville, Mo., has anged his firm style. His establishment now known as the Normal Book & Jewry Store.

G. F. Hunt, who occupies a store as weler with H. P. Matthews, in Waverly, a., was taken into custody a short time go, accused by the former of the larceny cut glass and valuable bric-a-brac. About 35 worth of stolen stock was found in unt's home.

The report filed by the Syracuse Trust o., receiver in bankruptcy for the M. S. enedict Mfg. Co., still continues favorable. he receiver came into possession May 6, nd the latest report up to Aug. 1 shows at the receipts have aggregated $84,945, of hich $49,899 were the company's accounts, nd the balance the receiver's accounts. The isbursements have amounted to $47,849, aving on hand a balance of $37,095. The rchases have amounted to $20,097.56; ipments, $70,088.88; returned merchandise, 4,227.44; manufactured, $30,706.69. The eceiver's liabilities are insignificant. The ompany states that it has been selling on redit, but has been exceedingly careful of he credit extended. Accounts to August st amounted to $30,000 or thereabouts. The appraisers valued the property at being worth, May 6, $176,586.19. The total liabilities, as far as made known, slightly exceed $360,000.

## Baltimore.

General J. Stuart MacDonald, president of the J. Stuart MacDonald Co., is at Halifax, N. S., where he will remain for several weeks.

The City Hall clock appears to be in a general rundown condition, and has gained quite a reputation as a prevaricator lately. The action of the striking apparatus Saturday afternoon in striking the hours irregularly and generously made it evident to the city officials that a general overhauling is necessary. One face has a black hand, while the other is of a bright red. On another the hands are wrong, while on a third face the large hands are very rusty.

Maurice L. Reeder, who has been connected with the J. S. MacDonald Co., has decided to branch out for himself, and has signed a five year lease for a store in the Masonic Temple Building, on N. Charles St. At present the Third National Bank is occupying the premises as their temporary quarters, but they expect to vacate about Oct. 1, when the store will be put in shape for Mr. Reeder.

Rudisill Bros., Altoona, Pa., will shortly erect an addition to their store.

Guy C. Donaldson, 19 years old, and until recently employed by J. Wood, a retail jeweler of Mansfield, O., was taken into custody about a week ago, accused of stealing seven diamond rings from his former employer. One of the rings was recovered from an expressman. Donaldson, when arrested, confessed his guilt.

## You Only Pay One Profit On "Checo" Brand Combs.

They are made in our own factory, which is one of the best equipped plants in the country for the manufacture of Hair Ornaments.

Progressive Jewelers will particularly appreciate our extensive line of up-to-date patterns in shell, amber, white and gray finish. None but the finest grade of materials is used, enabling us to give our combs an extremely high polish that will not grow dull. This permanent high polish is a very important factor, and is a great "selling point".

Our trimmings are very attractive. Plain and engraved metal, rolled plate, and the finest quality of brilliants. "Checo" Brand Combs have all the qualities of higher-priced goods, and yet our prices are moderate.

It will pay you to see our line of Hair Ornaments, Jewelry and Novelties. Drop us a line. We can interest you and save money for you.

Max Noel is still in the Alexian Brothers hospital and is doing well.

Paul G. Luber, optician, has removed from 90 to 70 Washington St.

C. D. White, of White & MacNaught, Minneapolis, was here last week.

John H. Hardin, of F. A. Hardy & Co., is on a pleasure trip to the northwest.

Louis Manheimer, of Louis Manheimer & Bros. sails from Europe, Sept. 2, on the St. Louis.

George W. Bleecker, manager of the Chicago office of Martin, Copeland & Co., is on a western trip.

Edward C. Campbell, Kansas City, Mo., was a visitor here last week. Mr. Campbell was accompanied by his wife.

The assessed valuation of the Chicago office stock of Hipp. Didisheim & Bro. has been reduced from $10,000 to $4,000.

Maximilian Elbogen, of the Stein & Elbogen Co., left for New York last week, from which city he will sail for Europe.

Contrary to the wishes of the West Side Business Men's Club there will be no street carnival held this Fall on Madison St.

An explosion of gas in one of the offices in the Masonic Temple early last week did no damage to the many jewelers located in that building.

James Hickey, identified by N. E. Wathier as the man who assaulted him in his store, two weeks ago, is in jail awaiting the action of the Grand Jury.

A man with a new fad has appeared here. His ambition is to scratch State St. plate glass show windows with a diamond glass cutter. Sometimes he leaves his initials C. G. G. to attest his handiwork. Pitkin & Brook's windows have been adorned with his flourishes.

A salesman employed by Herbert L. Joseph & Co., who was arrested last week charged with selling a gold ring for $6.50 which a customer claimed he had bought there, and which he also claimed was not gold, was discharged when the case came to trial. Joseph & Co. refunded the purchase price and claim they bought the ring for 10K gold from a manufacturer whom they cannot trace.

The thieves on W. Madison St. are willing to take anything they can get. If diamonds are not available they turn their attention to cut glass, which they probably think is a good substitute. Early Thursday morning at about 3:30 o'clock, two men took a laundry sign and hurling it through the window of a jewelry store at 732 W. Madison St. escaped with four pieces of cut glass, after breaking about 10 other pieces in the window. The store was formerly occupied by B. Redepenning who was drowned about a month ago.

The Chicago Title & Trust Co., receivers for the bankrupt estate of Clapp & Cowl, is taking an inventory of the stock at 68 Washington St., to which place it has all been removed. The inventory will be furnished this week. The lease on the store in the Chicago Savings Bank building has been abrogated and the premises leased to the Bauman Loan Co., 159 S. Clark St., which concern intends to open a jewelry store there. The same company has bought the fixtures and show cases for $800. These are of mahogany and were only recently installed at a cost of $2,700.

Frank Mayr, South Bend, Ind., was here last week accompanied by the Chief of Police of that city and together they looked over the photographs in the rogues gallery at Police Headquarters. Last week two men entered the jewelry store of Mr. Mayr, and asked to see some diamonds. During the inspection of the stones one of the men substituted an imitation stone for one said to be worth $500 and the loss was not noticed until after the strangers had left the store. In the hope of identifying the men Mr. Mayr came to this city, but left without recognizing their photographs in Chief Collin's gallery.

Last week E. B. Voynow, jeweler and buyer of stocks, Champlain building, bought 21 dozens of the L. E. Waterman Co.'s fountain pens from the auction firm of the Western Salvage & Wreckage Co. at $9 per dozen. The wholesale price of the pens amounted to about $500. Mr. Voynow took the pens to the Chicago office of the L. E. Waterman Co., 160-162 State St. at which T. C. Keys is the manager, and offered them for sale. Mr. Keys recognized the pens as those which were recently stolen from the School Education Co., Minneapolis, Minn., and asked Mr. Voynow where he had bought them. Mr. Voynow says he showed his bill. Mr. Keys says he did not, and the latter charged Mr. Voynow with receiving stolen property. In Justice Caverly's Court Mr. Voynow showed his bill of sale and was discharged. He has brought suit against the L. E. Waterman Co. for $50,000 damages. The fountain pens were turned over to the Minneapolis concern on a writ of replevin.

Samuel Piser and Samuel Paris, doing business as the Piser & Paris Co., and dealing in fancy goods, notions, soap, shoe laces, suspenders and jewelry, have effected a compromise with their creditors on a basis of 30 cents on the dollar. Of this 15 cents is to be cash, and 15 cents on unsecured notes running one year. In jewelry and kindred lines the firms interested include the following: For less than $10—T. E. Bennett & Co., M. F. Williams, Tuttle & Stark, Attleboro Chain Co., Geo. H. Holmer & Co., Smith Bros., Holsman & Alter Between $10 and $25—J. M. Fraser & Co., Gordon & Morrison, Schofield, Battey & Co., Marden & Kettlety, J. Schwartzkopf & Co., American Ring Co., Western Clock Co., Wm. Loeb & Co. Between $25 and $50—Dennison Mfg. Co., Waterbury Clock Co., International Silver Co., S. E. Budlong & Co., A. Pollard & Co., Simms & Co., Eagle Chain & Novelty Co., Taunton Pearl Works. Between $50 and $75—Celluloid Co., Lyon & Healy, Esser & Co., E. Brown & Co., Capron & Co. The larger creditors are McRae & Keeler, $94; Freeman, Daughaday & Co., $300; Geo. Borgfeldt & Co., $1,100. The entire liabilities are $30,000.

---

Joseph Siegel, a retail jeweler of Grand Rapids, Mich., is a partner in the ownership of a three-story brick building at 17 Canal St., which was recently purchased for $26,000.

A. Conklin recently entered the store of E. C. Burrows, Dows, Ia., and after pretending that he was a real estate man who intended to locate at that place, succeeded in cashing at the establishment a bogus check for $45. Conklin disappeared immediately afterwards, and has not been captured since.

## St. Louis.

H. C. Jones, Casa, Ark., was in St. Louis last week purchasing goods for his new establishment.

Joseph A. Loftis, of Loftis Bros. & Co., spent several days in Chicago last week, visiting the headquarters of the firm.

Moses Straus, the veteran salesman with the L. Bauman Jewelry Co., is in southwest Missouri visiting friends in his old territory.

Mr Hickman, of Hickman & Eysell, Kansas City, Mo., spent several days in St. Louis last week, combining business and pleasure.

Newton Owen has returned to his headquarters in St. Louis after a visit to the factory of his firm, the M. S. Benedict Mfg. Co., East Syracuse, N. Y.

A. L. Bauman, president of the L. Bauman Jewelry Co., departs this week for New York to meet M. Bauman on his arrival from Paris.

W. E. Campbell, advertising manager for the Mermod, Jaccard & King Jewelry Co., has returned from a visit of several weeks' duration in New York.

Sidney C. Bachenheim, who formerly represented the E. Maritz Jewelry Mfg. Co., among the local jewelry trade, has returned to his home in New York.

John A. Gerst, manager of the repairing department of the Whelan-Aehle-Hutchinson Jewelry Co., has returned from New York and Atlantic City.

Charles Ens, manager for William Weidlich & Bro., is back at work again after a sickness which hastened the return home from New York of E. S. Weidlich, of the firm.

C. S Aehle, of the Whelan Aehle-Hutchinson Jewelry Co., has gone to Chicago, Buffalo, and New York on a business trip of several weeks' duration.

The Hess & Culbertson Jewelry Co., is displaying a cup of its own manufacture, which will be awarded as the prize in the rowing contest at the annual picnic of the United Railways employes.

Among the visiting jewelers who called on the trade in St. Louis last week were J. L. Mullins, Hillsboro, Ill.; F. Ricketts, Charleston, Ill.; J. C. Rileker, Wellsville, Mo.; J. H Hasenritter, Hermann, Mo.; Jacob Bersch, Waterloo, Ill.

Morris Schinderman is making his first trip for the L. Bauman Jewelry Co., in southern Iowa and northern Kansas. This is the territory formerly covered by Ellsworth Bauman, who now will remain at headquarters in St. Louis.

The Weiss Jewelry Mfg. Co. has denied a previously published report that the new firm of Weiss & Wohlgemuth, pawnbrokers, has any connection with it whatever. The name of Max Weiss had been given as one of the members of the pawnbrokerage concern.

---

Ira M. Radabaugh, Hastings, Minn., has remodeled his store and now has more space for his increasing business. He has closed out his millinery stock and will devote his entire attention to the jewelry business.

## Minneapolis and St. Paul.

C. S. Sutter, St. Paul, has removed from 150 E. 7th St. to 388 Wabasha St.

G. Gabriel, with the R. G. Winter Jewelry Co., has left his desk for a while, to enjoy a vacation.

Miss B. Betzler, bookkeeper for Johantgen & Kohl, has gone to the Great Lakes for a two-weeks' vacation.

Conrad Knudson, until recently in charge of the shop of S. Jacobs & Co., Minneapolis, has resigned and left the city.

Henry Doremus recently resigned his position with S. Jacobs & Co., to go on the road for the M. Thouren Mfg. Co.

There seems to be a scarcity of competent watchmakers in these cities, and several of the leading jewelers have been seeking desirable men.

J. B. Bodfors, 44 S. 4th St., has arranged to occupy the entire store after Sept. 1, instead of half as at present. He will carry a much larger stock and will install additional fixtures.

The wife of W. C. Leber is recovering from a serious injury to her arm. The injury was caused by a mosquito bite which caused blood poisoning. Careful medical attention prevented amputation.

The Minnesota State Fair will be held the week beginning Sept. 4, when there will be the usual influx of visiting merchants. A larger volume of business than usual is anticipated this season, owing to the better crop outlook.

---

Newell Bros., Chenoa, Ill., have sold out their jewelry stock to T. R. Schuirmann.

## San Francisco.

TRADE CONDITIONS.

The jewelry trade in San Francisco as well as along the coast is as satisfactory as it has ever been at this time of the year. One large wholesale dealer recently remarked: "Trade continues to improve and we are preparing for one of the best Fall seasons we have ever had." Other members of the trade are unanimously of the opinion that this will prove to be one of the busiest seasons on this coast. They cite as reasons for this belief the fact that trade already shows signs of unusual activity for so early in the season and also state that the general feeling of business prosperity and financial security which is being experienced throughout the country bids fair to make itself manifest on this coast as well as elsewhere.

Harry Adams, with Radke & Co., is away on a two weeks' vacation.

Harry B. Oberlin, Fresno, Cal., is stopping at the Grand for a few days.

Wm. Adelsdorfer, manufacturers' agent, his just returned from his southern trip.

H. Lipman, manager of A. Eisenberg & Co., is rusticating at Mission Rock, Cal.

Mrs. J. H. Hoever, Willow, Cal., was here last week placing her orders for Fall stock.

J. B. Reader, with the Bohm-Bristol Co., is spending his vacation in Southern California.

L. H. Service, Madera, Cal., is spending a few days in this city, calling on the jobbing trade.

S. D. Schoenfeld, Red Bluff, was in this city last week making selections for his Fall lines.

Peter O. Borg, Heppner, Ore., is at present sojourning in San Francisco on a pleasure trip.

J. J. Bryan, manager of the W. K. Vanderslice Co., will leave in a few days for a trip to the east.

L. Carrau, of Carrau & Green, has returned from a six-weeks' vacation spent at Bartlett Springs.

Geo. F. Blakesley, Tonopah, was in San Francisco recently, placing his Fall orders with the jobbers.

J. H. Lichstein, 804 Kearney St., is adding a new front and otherwise improving his establishment.

Spruce B. Bailey, Los Angeles, passed through this city last week, on his way to the Portland Fair.

Ed. Forrester, with Carrau & Green, has just returned from a deer hunting expedition in Marine county.

Wm. Hazell, cashier for the W. K. Vanderslice Co., has gone to Portland, Ore., to spend a two-weeks' vacation.

Ralph Cohn, who is connected with the Alexandria Jewelry Co., has just returned from an enjoyable vacation at Bartlett Springs.

E. B. Dana, who visits the Coast with Carter, Howe & Co.'s lines, is now in this city. Mr. Dana's father is with Shreve & Co., of this city.

Shreve & Co. are moving their factory from its former location at Fremont and Market Sts., into the new factory building at the corner of 3d and Bryant Sts.

Nathaniel Gilman, formerly with Shreve & Co., has accepted a position as traveling representative with W. R. Landram, who recently bought out the Prouty interests in the firm of Landram & Prouty, at 120 Sutter St.

Grenzweig & Co. are now well settled in their new location in the Spreckles Annex. The site is as desirable as could be found, and being on the first floor, is especially adapted to the large city trade which the firm enjoys. J. A. Schott, traveling salesman for the concern, has just returned from his northern trip. Leon Price, who covers the southern territory, is now away on his regular trip.

Emil Wagner, in the employ of Shreve & Co., of this city, was arrested Aug. 14, charged with having purloined several small silver ornaments from the work rooms of his employers. Jewelry has been recovered valued at $35, and it is expected that Wagner's thefts have amounted to much more. Wagner had been employed as a "pickler" in Shreve & Co.'s factory for the past 20 months, and his integrity has always been regarded as above question. Three of his sons had formerly been employed by the same firm.

Samuel Baker, of the Diamond Palace, has left with the veteran firemen, of which organization he is a member, for an excursion into the northwest, including a visit to the Portland fair and a trip to British Columbia. Mr. Baker has been identified with the business of Col. Andrews, of the Diamond Palace, for the past 34 years, and was a member of the original San Francisco Volunteer Fire Department. The entire trip of the veteran firemen will occupy about 15 days, and their time will be spent in seeing all there is to be seen in the territory in which they travel and in having a general good time.

A gang of confidence men and women has recently been operating among the pawnbrokers of this city. The gang was led by a woman who was taken into custody Aug. 10, on complaint of A. Rosenbaum, 514 Dupont St., who preferred charges of fraud against her. The woman admitted that she has received loans on six-karat gold jewelry, which loans were two or three times the value of the jewelry, but she defied the authorities to prosecute her, stating that the jewelry she had pawned was not bogus jewelry and that she merely accepted what was offered on it by the pawnbrokers, who were mistaken in regard to its quality. Captain of Detectives Burnett is perusing the codes to see what offence can be charged against his prisoner. Thus far he has found nothing upon which to base a complaint.

## Omaha.

Geo. Lerew, Hamburg, Ia., visited friends in Omaha last week.

T. J. Turner has taken a position as salesman with S. W. Lindsay.

E. Paul Shaw, with Samuel W. Lindsay, is visiting friends in the State.

E. A. Dayton, formerly of Omaha, but now of Chicago, was here last week.

Walter Lodge, with the Mawhinney & Ryan Co., has gone on a business trip to Burlington, Colo.

Harvey P. Sutton, McCook, Nebr., and Harry Dixon, North Platte, Nebr., bought stock here last week.

C. L. Shook, of the Shook Mfg. Co., is making a business trip through the State, in the interests of his firm.

Albert Edholm has gone on a three-weeks' fishing trip to Geneva Lake, Minn. Fred Nelson, watchmaker for Mr. Edholm, is rejoicing over the advent of a new baby girl.

ESTABLISHED 1854. INCORPORATED 1893

JUERGENS & ANDERSEN CO.,
DIAMONDS,
MAKERS OF FINE JEWELRY,
92 TO 98 STATE STREET,
CHICAGO.

23-25 Looljersgracht Amsterdam, Holland.

## Cincinnati.

Walter Beer, Versailles, Ind., is visiting Joseph Kramer, of Lindner & Co., this city.

Mr. Henn, of Henn & Haynes, Chillicothe, spent the past week with friends here.

E. Swigart, of E. & J. Swigart, 15 W. 7th St., is spending a few weeks in the northwest.

J. Dorst, of the Dorst Co., Lion building, is taking a much needed rest at Mt. Clemens, Mich.

George Hoockamp, of the Miller Jewelry Co., has left on his initial trip of six weeks in the northwest.

Joseph Mehmert, 6 Glenn building, has gone to drink the waters of French Lick Springs for a short time.

Hugo Lindenberg, of Lindenberg & Fox, Wiggins Block, has left on a trip through Kentucky and Tennessee.

J. W. Embry, North Lewisburg, O., visited friends here on his way to Vanceburg, Ky., last week.

H. Gilsey, of S. & H. Gilsey, 409 Race St., after a two weeks' sojourn at Atlantic City, is again at business here.

James Haslam, of the John Holland Gold Pen Co., has returned from an extensive trip, which included the Pacific slope.

Oskamp, Nolting & Co. have encased the safes in their store with burglar-proof cases, which now perfects their equipment of burglar-alarm systems.

G. H. Newstedt, 404 Walnut St., is beginning to move into his new quarters at 4th and Race Sts. and expects to be entirely settled by Sept. 5.

S. Lindenberg, of Lindenberg, Strauss & Co., Great Central building, recently made a successful western trip and stopped over with his family at Elkhart Lake, Wis.

A. G. Schwab & Bro. recently added to their road force Henry Cohn, formerly with Leonard Krower, New Orleans, La. Mr. Cohn will cover the southern territory.

Theodore Neuhaus & Co., Lion building, have had their factory closed for a week to make general repairs and put in new machinery. The plant will be redecorated as will the office also.

Frank Herschede, of the Frank Herschede Co., with his family has returned from a six weeks' automobile tour around the Lakes. C. S. Bennett, of this house, with wife, is sojourning at points in Kentucky and A. Westhoff, another representative of the company, is at business again after a stay at Atlantic City.

Out-of-town jewelers who replenished their stocks in Cincinnati during the past week included: J. G. Laupus, Seymour, Ind.; E. F. Starks, Newcastle, Ind.; A. S. Laramore, Sparta, Ga.; L. A. Boli, Hamilton, O.; J. O. Faris, Danville, Ill.; J. A. Simpson, New Richmond, O., and Herman Uhrig, Gallipolis, O.

As yet the pair arrested at Frankfort, Ind., as diamond thieves, have not been identified by the Frank Herschede Co., 24 E. 4th St., and the Duhme Jewelry Co., 25 W. 4th St., who were robbed last Spring. Detective Crawford is investigating the case and thinks from the fact that the couple had about 20 diamonds with them that they might be connected with the robbery here. If the couple can be identified steps will be taken to have them brought here for trial.

One morning during the past week G. W. Seifried, 115 W. 5th St., received a telephone order for 12 ounces of 18 karat gold from a man who represented himself as a member of Fox Bros. & Co., 31-39 E. 4th St. Mr. Seifried answered and asked why he didn't take pure gold as Fox Bros. & Co. usually did. The answer came, "all right, I'll send a boy over for it." A boy later arrived with a written order on Fox Bros. & Co.'s stationery, but without a signature. Mr. Seifried had doubts about the genuineness of the order and telephoned Fox Bros. & Co., who answered they knew nothing of the matter, nor how any outsider came in possession of their stationary. It was then learned by Mr. Seifried that the messenger was an errand boy of a local dry goods house acting for a strange man whom he had met on the street. The boy had been given the order to get the gold, after which he was to meet the man at the Carlisle building. Mr. Seifried summoned an officer, who went with the boy to the placed named, but the man was not to be found and has not appeared since.

## Kansas City.

TRADE CONDITIONS.

Business continues satisfactory. The jobbers believe the year will be the best in the trade's history in this city. The big harvests everywhere in the southwest are responsible for the orders that are now coming in.

C. P. Kionka, of Kionka & Stuhl, was in Texas, last week.

Emil G. Alber, 1319 Grand Ave., this city, is reported to be seriously ill.

W. H. C. Rudd, Westport, has applied for a divorce. Westport is a part of Kansas City.

C. E. Burnell, credit man of the C. B. Norton Jewelry Co., is in Colorado on a vacation trip.

George Gardner, of the Killiam Jewelry Co., Pittsburg, Kans., was a Kansas City visitor last week.

C. D. Hunt, Garnett, Kans., has gone to Colorado for a month's stay for his health. His wife is with him.

M. M. Hoyal, until recently a Kansas City buyer, has sold his retail business at Halstead, Kans, because of poor health.

Arthur Y. Boswell, Tulsa, Ind. T., placed Fall orders here, last week. He says money is plentiful in his territory.

S. E. Woodstock, president of the Woodstock-Hoefer Watch & Jewelry Co., has returned from his western recreation trip.

Mrs. C. W. Bowen, the head of an up-to-date retail jewelry store, in Brunswick, Mo., paid Kansas City a business visit, last week.

Cards announcing the arrival of a son at the home of Roy E. Bertholf, a jeweler of Cherokee, Kans., have just been received here.

C. B. Norton, president of the C. B. Norton Jewelry Co., has returned from a successful fishing trip into the lake country of Michigan.

Mr. Lytle, of the Bliss Jewelry Co., Atchison, Kans., made the rounds of the jobbing houses here last week, on an order placing mission.

Miss Anna Schmidt, daughter of J. A. Schmidt, Leavenworth, Kans., and for many years employed by J. R. Mercer, of this city, was married, last week, to a Dr. McMasters.

Joseph S. Pfeiffer and wife, Parsons, Kans., passed through Kansas City, last week, on a honeymoon trip to Colorado. Mr. Pfeiffer is a prosperous jeweler and watchmaker.

E. J. Netzhamer, a jeweler in the employ of the Hassig-Krieke Jewelry Co., is being congratulated for his enterprise. He went to St. Louis, last week, stayed there two days and returned with a bride.

Ward Lewis, manager of the jewelry department of the C. B. Norton Jewelry Co., Mrs. Lewis, J. V. Robinson, manager of the material department of the same company, and Mrs. Robinson, are at Lakeview, Kans., enjoying a vacation.

Among the out-of-town jewelers in Kansas City, recently, were G. A. Hayes, Effingham, Kans.; C. G. Dougherty, Cleveland, Okla.; J. H. Whiteside, Liberty, Mo.; H. O. Rakeman, Sapulpa, Ind. T.; F. M. Dillon, Bonner Springs, Kans.; James M. Coffman, Polo, Mo.; J. L. Potts, Marceline, Mo.; S. J. Huey, Excelsior Springs, Mo.

The jobbing trade is interested in a statement to the effect that Louis Smith, of Oskaloosa, Ia., is planning to open a store in Petticoat Lane, in this city. One report is that he offered to buy the stock of a well-known concern on that street. Louis Smith controls the T. K. Smith Jewelry House of Oskaloosa. His father founded the company.

## Indianapolis.

TRADE CONDITIONS.

Trade did not increase with the close of the harvesting season as much as was anticipated by the local jewelers. Farmers are not coming to the city in numbers. Manufacturers, however, report unprecedented business. Many firms are open day and night. Collections are said to be satisfactory.

Horace Comstock is spending a week at Bass Lake.

Albert Lock has returned from Denver and re-entered the employ of A. B. Swift.

I. D. Belasco, foreman for the A. P. Craft Co., is spending two weeks at Fox Lake.

Will Rindt, watchmaker for Jenkins & Co., Richmond, Ind., is recuperating from French Lick.

Rudolph Boemker, recently from Germany, has taken a position with Carl L. Rost as watchmaker.

Edward Johns, in the employ of Carl L. Rost, is spending a vacation in the southern part of the State.

J. H. Reed recently entertained Nelson Hageneuer, of the Eisenstadt Mfg. Co., and Maurice Smith, of the Bradley Ring Mfg. Co.

Ikko Matsumoto is now well established in new quarters on the third floor of the Fitzgerald Building, Market St. and Monument Pl.

The I. Groh's Jewelry Co. is enlarging its quarters in the State Life Building, in order to accommodate its constantly increasing wholesale business.

The sons of H. Cohen, who gave up his business on S. Illinois St., will open a new store at Pennsylvania and Market Sts. Sept. 1. New fixtures and an entirely new stock will be installed.

William E. Jenkins, former manager for Jenkins & Co., Richmond, Ind., was in the city last week, en route to Bloomington, Ind., where he will resume his duties as librarian of Indiana University.

Among the out-of-town jewelers who visited this city last week were J. F. Harding, Brownsburg, Ind.; Mrs. Berna Maier, Edinburgh, Ind.; John W. Hudson, Fortville, Ind.; D. S. Whittaker, Lebanon, Ind.; J. Alfred Meissen, Cicero, Ind.; Pennington, Knightstown, Ind.; J. Pickett, New Castle, Ind., and George Clemmons, Greenwood, Ind.

ST. LOUIS SILVER CO.

Branch Offices: CHICAGO, Republic Bldg. NEW YORK, 25 West Broadway. SAN FRANCISCO, 738 Mission St.

114-118 Chestnut Street, ST. LOUIS, U. S. A.

## Detroit.

V. A. Rankin, Toledo, O., recently visi- i this city, where he replenished his s k.

Edward Krainbrink, of the Berkey Cash Jvelry Co., and Miss Nettie Smitherman re married last week.

Theodore Gorenflo, of Noack & Gorenflo, i way on a 10-day vacation. Mr. Noack d family have just returned.

Harry F. Dorwald and George Haller, veling salesmen for Horace W. Steere, rted last week to cover their respective ritories.

H. E. Runnels & Son, who recently pur- sed the stock of J. W. Goulding & Co., rt Huron, Mich., have moved into the ks building.

A. E. Patterson, of Burr, Patterson & ., has returned from a two weeks' fishing in Canada. Frank Burr is in the west a business trip.

Max Jennings, president of the Ameri- n Retail Jewelers' Association, is spend- g a few weeks at his Summer home on St. Clair River.

W. W. Bugg, formerly of this city, has rchased the stock of J. B. Tomlinson, ckson, Mich. The Tomlinsons had con- cted a jewelry store there for 51 years.

E. H. Pudrith, of the E. H. Pudrith Co., t Monday, Aug. 21, for a two weeks' va- tion. M. E. Rowley, one of the firm's veling men, left last week to visit the io trade.

Moses Meister was fined $50 Thursday disposing of a $90 diamond bought from Louis Grosslight, jeweler and pawnbroker, on a contract. Meister, it is alleged, paid only $15 on the diamond and then sold it for $30 and a $15 watch.

Much to the surprise of the police who obtained a confession from Johnson and Parker, alleged murderers of Pawnbroker Moyer, the pair pleaded not guilty in police court. Their trial began Monday morning. The evidence against them is so strong, the police say, that the trial will be short and decisive.

Weyhing Bros & Co., 16 John R. St., will shortly move to the Farmer building, corner of Monroe and Farmer Sts. An additional story will be built according to the specifications of the firm, which expects to be in its new quarters about Feb. 1. B. J. Weyhing has just returned from a trip up the Canadian shore.

## Pacific Coast Notes.

B. N. Butler, Medford, Ore., has moved his store to the Medford Furniture Co.'s store.

James H. Mills, formerly of Chicago, has purchased Mark M. Heacock's business at Newberg, Ore., and will take possession at once. Mr. Heacock will take a vacation and visit his mother at Gresham for a few weeks, after which he expects to go east to take a course in optometry.

Probate proceedings regarding the estate of Charles H. Bush, who died recently in Los Angeles, were stopped about a week ago by a telegram from Philo L. Bush, Washington, D. C., who claimed to be the legitimate heir to the deceased jeweler's $200,000 estate. The claim is being investigated.

A. E. Sherley, Myrtle Point, Ore., has sold out his interest in the jewelry establishment of Bender & Sherley, and moved to San Francisco, where he is now taking a course at E. N. Radke's watchmaking school. It is reported that after completing the course he expects to return to his former location and enter the jewelry business again.

While S. M. Townsend, of Townsend & Gardner, 105 N. Main St., Los Angeles, was sweeping out his store one morning, recently, he groaned and fell to the floor. When Mr. Gardner reached his partner's side he found he was dead. Mr. Townsend was about 60 years of age. He leaves a widow.

The business men of Selma held an indignation meeting recently, led by W. R. Stammers, to protest against the action of the town trustees in employing a detective to run down alleged violations of the prohibition law. Several arrests have recently been made, and the methods used in collecting evidence have aroused indignation. Several staunch supporters of the prohibition movement joined in the denunciation of the trustees at the meeting, which was held at the Hauptli Hotel.

## Connecticut.

P. T. Ives, Meriden, accompanied by his wife, has just returned from a trip to the White Mountains.

Extensive improvements have just been made in the exterior of the establishment of S. Kronholtz, Stamford. New fixtures have been installed in the store.

The Seth Thomas Clock Co., Thomaston, has just awarded a contract for the construction of a brick vault at its plant. The vault will be about 20 feet square.

Edward Miller, founder and for several years president of the Edward Miller Co., Meriden, recently celebrated his 78th birthday at his residence on Broad St.

Among the incorporators of the recently organized Rogers Telephone & Electrical Co., Danbury, are N. Burton Rogers, East Orange, N. J., and C. B. Rogers, of Danbury.

Walter Lord, with R. Wallace & Sons Mfg. Co., Wallingford, returned recently from Europe with his bride, to whom he was married at All Saints' Church, Birmingham, Eng.

W. H. Cook, a watchmaker, formerly engaged in business in Higganum, died suddenly, about a week ago, of angina pectoris, in Middletown, where he had gone on business. The deceased is survived by three sons.

C. H. Grout, who has been connected with the G. J. Kirby Co., Mansfield Hollow, and who is to leave soon with his family for the Pacific Coast, was recently presented with a handsome gold watch by his fellow-employes.

The E. H. H. Smith Silver Co., Bridgeport, has been awarded the contract to supply the Consolidated Railroad with silverware to be used in the new passenger depot in Bridgeport, which is the largest depot between New York and Boston.

The Barbour Silver Co., (Factory "A," International Silver Co.), Meriden, has just discarded the contract and percentage systems in vogue at the factory and adopted the day-work schedule in each department, as is done in other Meriden factories.

The new building on Main St., which has been in the course of erection by the Bristol National Bank for a year, has just been occupied. The bank was organized in 1885 with the late J. H. Sessions as president and the late C. S. Treadway as cashier.

A new building is being erected by the New Haven Clock Co., New Haven, to be used, when completed, as a part of the concern's general establishment on Hamilton St. It is being equipped with electricity, with which power the machinery will be operated. Two departments, known as the fitting departments, will be located in the new building.

The International Silver Co.'s fire brigade held its third annual outing Aug. 10 at Cosy Beach. The outing was held under the auspices of factory "L," but was participated in by the fire brigade of factory "M." A shore dinner was held at the Momauguin. For the several interesting athletic events which were held some handsome trophies were awarded.

Geo. E. Ridge is the successor to the jewelry business of Noel C. Kennedy, at Langhorne, Pa.

## Boston.

D. C. Percival, Sr., has been at Andover, Me., during the past week.

Charles S. Wilson, formerly with the W. E. Woodman Co., is now with Wilson Bros.

Walter B. Snow, Boston selling agent of the Poole Silver Co., has been enjoying an outing during the past fortnight at Buzzard's Bay.

E. A. Bigelow, treasurer of the E. Howard Clock Co., went to Hillsboro, N. H., Saturday, for a couple of weeks' respite from business.

C. H. Crump, of the Shreve, Crump & Low Co., who has been abroad this Summer, was among the returning passengers last week on the *Arabic*.

Royal Robbins, treasurer of the American Waltham Watch Co., has been domiciled at the Sheafe Cottage, Isles of Shoals, for a part of the month of August.

Buyers in town during the week included: William Senter, Portland, Me.; N. A. Frost, Hanover, N. H.; W. A. Kemp, East Pepperell, Mass.; B. D. Loring, Plymouth, Mass.

William Ginnell, of Henry Ginnell & Co., arrived in Boston last Saturday from New York by automobile, having made the run in excellent time, and made several calls at business houses in the trade.

Charles W. Finlay, of A. Paul & Co., who recently underwent a surgical operation, is convalescent, and was able to go to Locke's Village, Mass., a few days ago, where he will remain for a few weeks to recuperate.

Friends of Willard Harwood, of Harwood Bros., who met him last week at his Boston office, to which he has been but an occasional visitor in several months, on account of ill-health, were much gratified to note considerable improvement in his condition.

Henry E. Warner, the referee in bankruptcy in the case of Alfred Nathan, dealer in diamonds and other precious stones, in the Jewelers' building, gives notice that the matter of the sale of the stock and fixtures will be considered at his office, 18 Tremont St., Aug. 29.

Again does the Stillings case figure in the courts. Suit has been entered in the Supreme Court by Burton P. Gray, receiver of the Preferred Mercantile Co., against George E. Stillings, Guy C. Stillings and I. Morton Walters, officers of the company, for an accounting. Receiver Gray claims that they misused and misappropriated money belonging to the company to the extent of upward of $100,000. He also seeks to reach and apply interests which George E. Stillings is claimed to own in life insurance policies, and an injunction was issued by Judge Barker restraining Stillings and the companies from taking any steps to make other disposition of the policies.

Lawrence Percival, of D. C. Percival & Co., who is one of the best known yachtsmen in New England waters, on account of his persistence in building newer and speedier yachts, year by year, for the purpose of having the best of its class afloat, is to have a larger craft next season than the *Sally VII.* his crack 25-footer which has defeated all comers.

The Boston police have been informed of a clever operator who passed worthless checks on three at least of the Boston retailers. At the store of Wilson Bros., Court St., he ordered spectacles valued at $4 and purchased a cheap watch, tendering therefor a $15 check, payable to C. Chase, which name he gave as his own, a blank of the Rockland National Bank being used. He received a small amount in change, and the bank returned the check in due course of time with the statement that there was no such depositor as I. H. Briggs, the ostensible maker of the check. A similar check, under very similar circumstances, was taken by the Tremont Jewelry Co., 26 Tremont Row, not far from the Wilson establishment. There the man gave the same name, but a different place of residence. His story was to the effect that he had received the check as wages from his employer. The game was worked Saturday afternoon, to add plausibility to the claim, and his dress and appearance were characteristic of a wage earner of the type that he personated. He had defective eyesight, and both at Wilson Bros. and at the Tremont Jewelry Co. he had his eyes tested for the glasses which he bought.

---

Clark & Engle, Wilkesbarre, Pa., who were recently forced to vacate their premises owing to rebuilding of the store, have secured a lease of a new store on S. Main St., into which they will move about Oct. 15.

G. J. Slick, South Bend, Ind., has decided to enlarge his jewelry and music business and will hereafter occupy the whole of the store in which his stock is situated.

E. H. Wetherhold, 738 Hamilton St., Allentown, Pa., has purchased the store property at 723 Hamilton St., at present occupied by E. J. Faust. The lot is 16x230 ft., and the price paid was $30,000.

## Providence.

J. A. Arthur is now with the George W. Dover Co., as traveling salesman.

Congratulations are being extended to T. U. Catlow, of the Davis Mfg. Co. He is looking forward to the time when the boy can say "Papa."

Adolph Lederer is named as one of the incorporators of the firm to be known as Cohen's Hardware and Electric Supply Co., which took out articles of association last Saturday.

Among the imports at the port of Providence last week were six packages of imitation precious stones from Bremen and one package of clock movements from Liverpool.

A case in which jewelry was displayed in front of the O. Gorman Co.'s store on Westminster St., was broken into one night last week and jewelry to the value of $160 was stolen. False keys are believed to have been used in gaining entrance to the case. The stolen property comprised watches, charms, cuff links, studs, rings and crosses.

Elizabeth Wunderle, of Cranston, has filed a suit against James E. Potter, of this city, claiming $1,500 damages for the alleged trover and conversion of seven chain machines, each valued at $200. Mrs. Wunderle is also the complainant in an equity suit in which it was sought to dissolve a copartnership in which Mrs. Wunderle and Mr. Potter were the members. Mrs. Potter, wife of James E. Potter, had a first mortgage on the firm's property, including these machines, and Mrs. Wunderle had a second mortgage on the same property. It is claimed by Mrs. Wunderle that portions of the machines were taken away, leaving the latter in a dismantled condition. Some of these parts could not be found, it is claimed. Mrs. Wunderle bought in the machines and other property at a receivers' sale for $601. She now seeks to recover an equivalent for the machines, which she says, have been damaged.

The employes in the preparatory department of the Gorham Mfg. Co., which embraces the rooms where the metals are prepared for stamping, recently held their first annual outing at Emery Park. It was a pronounced success and the gathering decided that hereafter it shall be held annually. It was voted to form a permanent organization and outings will be held in the Summer and entertainments in the Winter. F. C. Lawton, superintendent, donated as a prize for the ball game a silver-trimmed tankard. This was contested for by the stamp shop and the power pressroom, the latter winning by the score of 5 to 1. For the 100-yard dash, A. Stiche proved to be the speediest man in the bunch of 20 entered, and was accordingly awarded a sterling silver match box, donated by Assistant Superintendent W. H. Whipp. W. H. Browning contributed the prize for the pitching quoits match. The company had a genuine Rhode Island shore dinner and spent the time pleasantly after the field sports had been run off.

## Attleboro.

Mrs. Short, widow of Mace B. Short, of Short & Nerney, is critically ill.

The J. P. Brooks plant has been sold to Thomas McWilliams, Providence.

Charles P. Keeler, of McRae & Keeler has gone with his family to York Beach Me.

Frank Miller has retired from Leach & Miller and Edward Leach will continue the business.

Jesse Carpenter, New York, representing the Horton-Angell Co., has returned from a lengthy European tour.

Virgil Blackinton, son of Charles Blackinton, formerly a prominent manufacturer was married Saturday to Miss Ida M. Macdonald.

George H. Herrick, of G. H. Herrick & Co., is interested in game law enforcemen and is distributing copies of the new law among the sportsmen.

An annual feature of Attleboro's Summer is "children's day" at Talaquega Park This occurred Monday, Col. S. O. Bigne donating the cost of two band concert while James E. Blake, of the James E Blake Co., paid for the Punch and Jud show.

In the periodical circular issued by th Massachusetts Bureau of Statistics o Labor the past week, entitled "Good Oppor tunities Abroad for Wide-Awake Massa chusetts Manufacturers," appear severa suggestions for industries akin to the jew elry trade.

Col. Sidney O. Bigney, of S. O. Bigne & Co., whose campaign for a place in th Governor's council has now reached point where all his competitors have hope lessly withdrawn, was the guest of th Boston republicans of wards 21, 22 and 2 last week. All the speakers eulogized hi as a business man and a candidate.

The manufacturers of Taunton hav joined hands with the Veteran Firemen t make the September hand engine muster i their city an attractive event. For firs prize Reed & Barton have donated a silve parade trumpet; for second prize, the Co hannet Silver Co. has donated a massiv flagon with ebony pedestal; for thir trophy, Poole & Roche have given an elal orately chased silver loving cup.

The death of Albert T. Salt, the head e the Atlas Silver Foundry, will lead in few days to a complete change there. Mr Salt had a silent or financial partner inte ested with him and the latter is arrangin to have the plant resume under a new ma ager, whose personality is not yet deter mined. It is said unofficially that in addi tion to the kind of work done heretofor there will also be a venture into other line in the future.

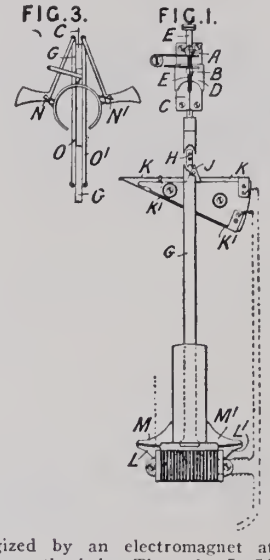
A LIST OF THE LATEST PATENTS GRANTED BY THE UNITED STATES AND GREAT BRITAIN AND UNITED STATES PATENTS THAT HAVE EXPIRED.

[Note. Owing to a delay on the part of the Patent Office in issuing the Official Gazette it has been impossible to get the illustrations of the United States patents of Aug. 15 in time to publish them in this issue of our journal. This list of patents will appear next week.—Editor The Jewelers' Circular-Weekly.]



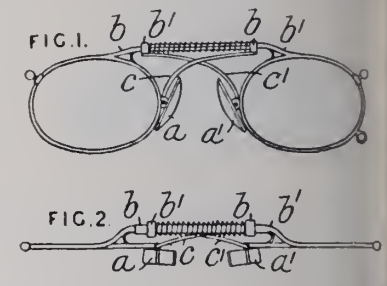
## BRITISH PATENTS.

ISSUE OF AUG. 2, 1905

(Abridgments of Specifications, 1904, from *The Illustrated Official Journal.*)

**8398.** CLOCKS. G. D. Granger, Rotherham, Yorkshire. April 12.

Electric clocks in which an impelling pendulum



is energized by an electromagnet attracting an armature on the bob. The poles L, $L^1$, Fig. 1, of the electromagnet and the wings M, $M^1$ of the armature are flat pieces disposed so as to maint a fixed plane of oscillation. While the amplitu is adequate, no currents are passed and a trian lar tumbler J on a spring K is flicked each v by a bit H on the rod G, but, when the amplitu has fallen off, the tumbler catches in the notch the bit and is thrust down, so making the spr K complete circuit with a fellow-spring $K^1$.

*Escapements.*—The motion of the pendulum conveyed to the clock movement by means of pair of pallets N, $N^1$, Fig. 3, which drive a lock an escapement-wheel as they swing with l O, $O^1$ flanking the pendulum G.

*Regulators.*—The pendulum spring C, pinned a post A, has its effective length determined b slide D, which is moved by a screw E to shift clip B.

**8,650.** EYEGLASSES. G. C. Bateman, Re ing. April 15.

Pince-nez or eyeglasses with parallel sliding b are rendered more rigid by curved stay rods c which connect the plaquets *a*, $a^1$ with the ends

the sliding bars *b*, $b^1$. The stay rods are sho crossing each other, but they may pass to the s ing bars without crossing. Two flat sliding b *b*, $b^1$, arranged one above the other, are shown, a single bar may slide between the members o double bar, and the curved stay rods may fo continuations of the sliding bars. The stays a prevent straining of the sliding bars.

*Complete specifications accepted July* 26, 190

**925.** PINCE-NEZ FRAME. Oehlschlager.

**1264.** PENDANT. Goode.

**8,157.** WATCH. Goldstein.

*Design issued Feb. 11, 1902, for three and one-half years.*

35,707. BELT. H. J. Gaisman, New York, N. Y.

The new 28-page catalogue and price list of the G. W. Parks Co., Newark, N. J., well illustrates the company's sterling silver toilet sets and general line of novelties. The size of catalogue is 8½ by 12 inches, is handy, and the book will be appreciated. The company is the successor to the Hayden Mfg. Co.

A brochure entitled "Jeanne d'Arc" has just been issued by Simpson, Hall, Miller & Co., Wallingford, Conn., in which is illustrated and described the new Jeanne d'Arc pattern of sterling silver flatware, made by the concern. The booklet also tells the story of the modest maid of Orleans in a way that cannot help but interest everyone. It contains 32 pages, well printed and illustrated, and should be read by jewelers generally. One of the illustrations shows the great clock over the gateway at Rouen, the city in which this martyr was executed.

# THE LEADING JEWELRY AUCTIONEER OF AMERICA.

SO say the entire trade and press. I sold the Oliver & Davis Stock (all diamonds and fine goods) at No. 3A Maiden Lane, New York. I got 100 cents on the dollar for it. Never a sale placed on record to equal it.

I personally conduct all large sales and am at present selling one of the finest stocks of Art Bric-a-Brac in Atlantic City. I employ 3 first-class men to help me, and if you want all 3 it will be one charge. These men are instructed daily by me by mail in any part of America. **I guarantee a profit on all salable goods.** Will give you, if desired, $10,000 worth of goods to "sweeten" your stock. These goods I will bill at cost to me, and I import them direct. We make 25% to 40% profit on these goods and *then* they are lower in cost than the public ever bought them.

Do you want a Fall date? Then write or wire quick to one of my 3 offices.

**3 Maiden Lane, New York. 151 Wabash Ave., Chicago. 512 Race Street, Cincinnati.**

## Loving Cup Recently Presented to the Miller Brothers in Oklahoma.

DURING the recent convention in Kansas City, Mo., of the National Millers' Association, an excursion party of 200 delegates visited the famous "101" ranch of the Miller brothers, in Oklahoma. The hospitality shown them was of the t western brand. A short time ago the preciation of the Millers was shown wl the Jaccard Jewelry Corporation, Kan City, turned out a beautiful loving cup the Miller brothers, the gift of the delega who were their whilom guests. The cos the cup was about $300.

# TRADE MARK INFORMATION

**Note.**—The publication of our work, "Trade-Marks of the Jewelry and Kindred Trades," Second Edition, containing 4,000 marks, the accumulation of various works of reference, and the ramifications of our business enable us to trace to their origin nearly all marks that may be found in jewelry, silverware, art pottery and kindred lines, of both American and foreign make. All questions in regard to trade-marks will be cheerfully answered. We would be pleased to have the trade seek the benefit of our facilities regarding the identity of any marks they cannot trace. We would prefer to receive the article for examination; for, if the mark is of foreign origin, the slightest difference between a drawing and the original is of great importance.

*All queries received are also answered promptly by mail.*

RACINE, WIS., Aug. 6, 1905.

## Fish as a Decorative Design.

*(A study for artists in ceramics, goldsmithery, jewelry and silverware.)*

UNCEASINGLY extending his domain, the decorator thrusts both hands into the infinite reserves which nature holds, and which is ever so prodigal of its splendors. Master of the vegetable world, it is in the animal kingdom that the artist now pursues his investigations. From insects he has demanded new ornaments; and it is to fish he now addresses himself for decorative designs.

To whichever side the artist turns in the midst of nature, he discovers beauty, and nature has been and always will be the eternal inspiration, the parent of every artistic and ornamental work, for one cannot imagine a form outside of the forms known to nature. Our minds absolutely refuse to create, and the forms which seem to us the most unexpected and unnatural are, at the end of the story, only a transposition of natural forms rememorized. Observe the most striking work of fantastic geniuses, in which they have been pleased to give themselves up to the wildest, the most unbridled dreams; to create miraculous beings, fearful, beyond the real. What have they imagined except to put in juxtaposition the diverse elements borrowed from various animals, or the placing of animal parts on a vegetable, mixing in one whole dissimilar elements? The mind cannot conceive a form outside of natural forms; and if it could, would the benefit derived from this faculty be very considerable? Would it recompense one for the efforts that the creation may have cost?

Let us then content ourselves with natural forms, and according to the need, let us interpret them more or less strongly. Are not these resources inexhaustible? In nature all forms are certainly not available, but in the innumerable reserves she offers us, shall we not find enough to vary our compositions indefinitely? A claim to invent the use of animals as ornamentation, we shall not have the absurd pretension to make; the famous examples of the grand epochs of ornamentation relieve us of that. Who has not in mind the celebrated frieze of lions, to speak only of Assyrian art? The employment of lions is rare in ornamentation in our days, although, perhaps, this total abandonment is unjustifiable.

Among animals and according to their mode of life, distinctive characterizations are very different. The mammiferæ and fish, the birds and insects, offer striking contrasts of structure and form, which answer to the material needs of their existence. The decorator will find in them innumerable elements of beauty, whether in the complete forms, or in fragments of these forms, or in the elements themselves. For instance, with a bird one may utilize the entire animal, naturally or conventionally, or a wing or a feather, or an ornament upon the feather. The decoration exists in all these forms in the embryonic state, and the task of the artist consists not only in discovering this decorative idea, but in fully developing it.

It is fish, living either in salt or fresh water, that we will study to-day, and although this study is restricted, being but a small part of the animal kingdom, it will nevertheless place under our eyes very diverse elements, which may be used as direct forms, or as derivative ornamentation. As examples, the most common fish have been chosen, like the eel and the mackerel, those which anyone can procure and study at leisure. The temptation to extend the lines was great. What amusing and unexpected forms, what strange characterization, mark the hippocampus and the *syngnathus*, or horn-fish! What shall we say of the coffer, a fish enclosed in a box, through a hole in which the tail sticks out? And the St. Peter, with enormous head, flat body, and fins ending in long, black, floating filaments! And the moon fish, and the hedgehog fish, and the flying fish, and the wrasse with their sumptuous and changing colors blue and black, brown and lilac, green and black, peacock blue and orange; their enamels the richest, their tones the most strong and pleasing; and a thousand others a list too long to make here. Let us content ourselves with but touching the surface of the subject, to speak of but a few fish; to see their ways, to study their structure, and the use which artists have made of it. In the waters and especially in the sea, everything seems alive, or about to become so. It is there the animal kingdom offers the extremes of grandeur and of pettiness, these last of which would have been eternally invisible to us, save for the marvellous power of the microscope and the former of which, like the whales are twenty times larger than the terrestrial quadrupeds. Cuvier says that all the animal classes have their representatives living in or out of the sea. The ancient stated that everything that exists elsewhere is found again in the sea, but that the sea has many things not found elsewhere.

Among the innumerable creatures which people and vivify the liquid element, there is none which is more remarkable in number, variety of form and beauty of coloring, and none more useful to man, than fish. The importance of fish is so great that it has spread their name to all aquatic animals, so that mollusks and other crustaceans are spoken of as fish, a mistake all the easier to rectify as the characteristics of fish are invariable. Ever logical, nature has given to these inhabitants of the water the means to progress rapidly through them. Almost all being essentially carnivorous, it is by the chase that fish must conquer their prey; therefore, rapidity indispensable. See with what absolute science the forms of their bodies are in general conceived with a view to swift progression; forms little or not at all projecting, body spindle-shaped, or more or less flat, pointed head, making the cutting of the water an easy task, fins admirably disposed for swimming and for direction. Certain ones among these fins correspond in principle to the members of the mammiferæ; but others are appendices peculiar to fish. Perfectly equipped by nature, the fish moves in the midst of the waters with complete facility, with an ease which is perhaps greater than that of the bird in the air. The forms are various, and cause fish to be arranged in two great groups, the spindle-bodied fish and the flat fish, but in each of these categories there is a considerable difference in the species, which is due to the mode of life of each kind. The sea-pirates, like the shark, etc., are smoothly spindle-shaped, which permits extreme rapidity. Other fish, of gentler disposition and more sedentary mode of life have heavier and shorter bodies, like the carp. Others are cylindrical, like eels; some fish have enormous heads and very small bodies. When nature has not favored them much in regard to swiftness she has given them most ingenious fishing apparatus.

# WALTHAM WATCHES—"TIMING THE TIME-BALL"

Every day the Time-Ball on the Western Union Building, opposite old St. Paul's, Broadway New York, is dropped at exactly 12 noon, recording Washington time.

## Old Sun and Nocturnal Dials.

nslated expressly for THE JEWELERS' CIRCU-AR-WEEKLY *from the German of* MAX ENGEL-MANN, in the *Leipziger Uhrmacher Zeitung.*)

(*Continued from issue of Aug. 9.*)

YPES of equatorial dials at one time in extensive use are shown in Figs. 5 Dials Nos. 5 and 7 were orientated b means of a compass; No. 6 by a fixed r idian line. Nos. 6 and 7 are also pro- d with small metal plummets for find- i the horizontal position. No. 5 is an per equatorial dial and can therefore y be used in Summer; No. 7, on the er hand, has a gnomon prolonged wnwards through the transverse axis h corresponding divisions, and is con- uently an upper and lower equatorial l. In No. 6 the gnomon is replaced by adjustable eyelet and the inside of the g dial is divided accordingly, so that

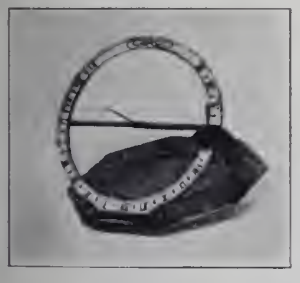

Fig. 5.

s dial can also be used for ascertaining time at the period of the equinoxes. e latitudes of the principal places in rope are usually engraved on the free faces of such dials, so that the latter n be accurately placed in position on a rney with the aid of the graduated arc. ese three dials can be folded up and rried in the pocket. Nos. 5 and 6 were de respectively by Andreas Vogler, of gsburg, about 1700, and by Schindler, of alle, about the beginning of the 18th cen- ry; No. 7 was part of the property left redcrick Augustus I., first king of xony, and bears the name of the maker, odauer, of Carlsbad.

Though it was possible to tell the quar- r hours with the dials I have described, t with the rapid improvement in clocks, and especially after the introduction of minute hands, the demand for sun dials capable of controlling or checking the accuracy of these more precise timepieces grew more urgent. Sun dials were therefore made with contrivances for showing the minutes. Three timepieces of this kind are shown in Figs. 8, 9 and 10. No. 8 is

Fig. 6.

an upper equatorial dial made by Andreas Pfab, of Dresden, at the beginning of the 18th century. In this instrument the broad shadow-casting gnomon was replaced by a contrivance ensuring greater accuracy in the determination of time.

The modus operandi was as follows: After the instrument had been orientated by means of the compass and plumb-line and adjusted to the proper latitude, the pointer was turned with the hand till a ray of sunlight penetrated through a thin slit in the upright rod to the left of the figure and fell upon the center line of the opposite dial plate. The pointer (at the foot of the rod) then showed the hour. Under the dial the arm of the pointer was connected by means of toothed wheels with the pointer of the smaller minute dial plate, the latter thus participating in the turning movement of the first pointer. Two minute equatorial dials constructed on the same principle are shown in Figs. 9 and 10; they were made previous to 1770 and one of them bears the name of the maker, J. G. Zimmer (castle) Reinhartz. No. 9 is merely an upper equatorial dial and has a style and shadow plate. No. 10, on the other hand, is an upper and lower equatorial dial and has eyelets or eyeholes, instead of a style. The parallels of latitude are marked on the quadrant shown in the figure. Other equatorial dials will be mentioned below among the compound instruments.

The most convenient and practical sun dials were the horizontal dials. The gnomon, parallel as before to the earth's axis, casts a shadow on a dial plate in the same plane as the horizon: hence the name. They had this important advantage over all other kinds, that they could be used during the entire year whenever there was sunshine. They may properly be desig-

Fig. 7.

nated as the most practical and the most perfect of all sun dials.

A few specially noteworthy horizontal dials constructed by the "geometrical and astronomical master," Christopher Schissler, of Augsburg, already mentioned, are represented in this collection. Two of his instruments (Fig. 11) show the horizontal dial with five separate faces forming the principal dial plate in the rectangular gilded universal dials first made in the year 1558. These five faces are adapted for the latitudes 42°, 45°, 48°, 51°, and 54°, and the quarter hours are marked on the lower portions of each. The gnomon, in this instrument, a string of gut, can be inserted in either of the five grooves, corresponding to the five parallels of latitude, in the metal hook. The string is fastened to a

spring in a little case under the dial plate, so that it always remains stiff when adjusted. This small case bears the Mansfeld arms worked in an irreproachable manner in enamel. Around it are engraved the names of 49 towns with their latitudes.

The map of Germany, with Dresden as the center, is likewise engraved on the in-

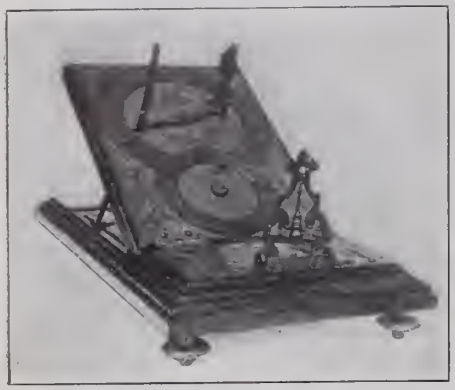

Fig. 8.

side of the cover. Over it is an adjusting rule which could be moved around the center, and which served the purpose of orientating the dial when traveling. The outside of the cover shows the northern hemisphere as a planisphere, with the degrees of longitude and parallels of latitude and an adjustable ecliptic circle. On the inside of the base is an adjustable lunar

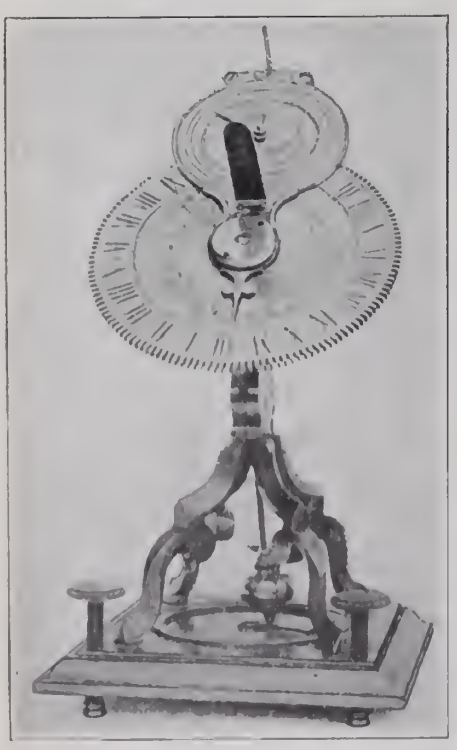

Fig. 9.

calendar, and on the outside an astronomical dial for the stars of the Great Bear, with buttons for feeling the hours and a movable rod. The pair of compasses is also provided with a horizontal sun dial. The gnomon, intended to be inserted in the cross pieces between the arms, is missing. The instrument carries a small compass in the vertex, and can be used as a pair of compasses, a measuring rod, a protractor or a leveling instrument.

A fine instrument made by the same

Fig. 10.

master in 1562 is shown in Fig. 12. A thread, one end of which is fastened to the center of the picture of the sun in the foreground, and the other to the top of the stick carried by the beautifully carved

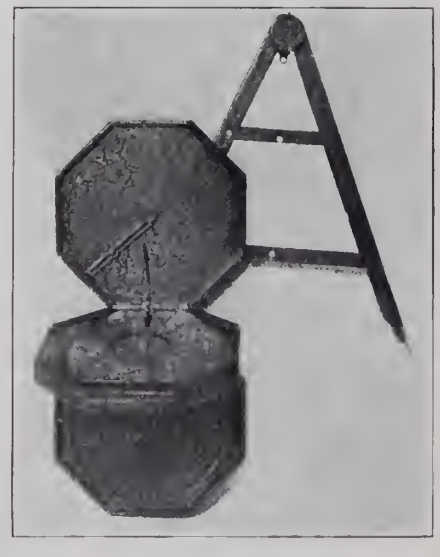

Fig. 11.

Turkish figure, serves as a gnomon to this horizontal dial. By altering the position of the stick and turning the globe on which the figure rests, a check on the correctness of the latitude and the mean noon can be obtained. The dial plate is provided with a system of lines which, being connected with the signs of the Zodiac engraved on the rim, indicates the varying altitude of the sun in each month. A second system of lines is arranged to correspond with the hours of the Nuremberg clock. Two movable disks, one a lunar calendar, the other arranged to show the planets ruling each day and hour, com plete this timepiece.

A horizontal dial showing the minute is represented in Fig. 13. It was made l J. M. Textor and purchased by the Ele tor Augustus the Strong in 1729. Th dial is made of Solenhofer stone and is 4

Fig. 12.

millimeters in area. The dial plate e closes a planisphere of the northern hen sphere. A system of transversal lines inserted between the hour divisions f reading the minutes. The center of t surface of the gnomon is formed into annular sun dial. The eyelet (double quadruple) is attached to an arm whi can be turned in every direction. The i side of the ring was intended to show t divisions of time; since, however, in co sequence of the width of the gnomon t determination of the time at noon cou not be accurately made, recourse was h to the contrivance just described. The being no compass, a fixed meridian l was used for orientation.

Portable vertical sun dials were seldo made, whereas sun dials for buildings a almost exclusively vertical. In verti

Fig. 13.

dials, as the name shows, the dial plate placed perpendicular to the plane of t horizon, the gnomon being parallel to t earth's axis as before. The vertical s dial is variously designated according the direction in which it is turned, bei called a noon dial, midnight dial, morni or oriental dial, or evening or occident

**San Francisco Office, 206 Kearny St.**

dial, when directed towards the south, north, east or west. The two last-named were also called meridian dials, since their faces were placed parallel to the meridian. The use of vertical dials was very limited, if we consider the number of other dials constructed. The noon dial could be used for the greatest length of time, from six in

Fig. 14.

the morning till six in the evening. The time could only be ascertained from the morning, evening and midnight dials for a few hours in the morning and evening, and only during Summer, when the sun rises before six and sets after seven.

A hand sun dial, combining every kind of vertical dial, is shown in Fig. 14. It was made in 1621 by Hans Ducher, of Nuremberg. This instrument, made of wood and with rectangular faces, has the noon, midnight, morning and evening dials engraved on silver plates on the faces pointing respectively to the south, north, east and west. The other faces are ornamented with engravings representing the apostles Mark, Paul, Luke and John. The noon dial bears the words "mein leben und end sted in godes hend," and has a flat gnomon, whereas the other dials are provided with style gnomons. A small compass is inserted in the rim of the upper face, the remainder of the face containing two horizontal dials, the hour divisions of which are marked for the "behmis ur" and "gross ur" (old German), respectively. Their gnomons are missing. The two last named time divisions require a few words of explanation. According to Bohemian time, usually called "Welsch" or Italian time, the day was divided into 24 consecutive hours of equal length, beginning and ending at sunset.

This system was in special use in southern countries as well as in Bohemia, Silesia and Poland. The "grosse Uhr" was so arranged that the day was divided into two sets of hours, day and night hours. Added together, these two sets always amounted to 24 hours of equal length. But it was only at the time of the equinoxes that each set contained 12 hours. With the natural variation in the length of day and night the number of hours in the two sets also varied, and somewhat abruptly; the day-hours would increase to 16, succeeded by eight night-hours, and vice-versa. At the close of each set the "Garausläuten" was rung. The first hour that was struck after the "Garausläuten" at sunset was called the "first hour of the night," the second the "second hour of the night," and so on, while the first hour following the "garaus" at sunrise was counted as the "first hour of the day," etc. Time was kept after this fashion in some

Fig. 15.

Bavarian towns, especially in Nuremberg (till 1806), hence this system was known as Nuremberg time.

Fig. 15 represents a south vertical dial possessing great artistic merit on account of its finished workmanship. It bears the name C(ristoph) T(rechsler) D(er) J(üngere) M(echanikus), and the date 1623. The stump below the picture of the sun is

IMPORTANCE · OF · THE · WATCH · IN · BUSINESS

WHY IS THERE such a strong and steady demand for good watches? Did you ever think of the tremendous importance of watches to the entire business world? How many great affairs hinge on the prompt keeping of appointments? How many business men are very particular—and properly so—about punctuality? If in some mysterious way watches all stopped at once, business would stop! The business world looks to the Jeweler, and he in turn looks to this establishment for good watches.

# Jas. Boss Screw Back and Bezel

# Jas. Boss Swing Ring

This pair of Keystone favorites continue to increase in popularity as is evidenced by the fact that for the last six months both the factory product and our sales have shown a steady increase; in fact it has been impossible to increase our output as rapidly as the demand from the trade for these goods has increased. We have therefore, much to our regret, been compelled to ask the indulgence of the trade on account of the delay in filling their orders. Our production of these two lines is over 125 per cent. greater than it was a year ago and still we are unable to supply the demand. Can there be any better evidence of popularity?

Do you, Mr. Jeweler, give these lines the prominence in your stock that they are entitled to? We are increasing the output just as rapidly as we can without allowing the quality and finish to suffer, and we hope to be able to fill orders fairly promptly during the next three months.

Do you ever stop to think what an extensive line of Screw Cases we manufacture, and how eminently the line is fitted to cover your requirements?

that remains of the gnomon. This d shows the hours from six in the morni till six in the evening, and indicates t length in hours of every day and night means of curves and the signs of t Zodiac representing the months. A th system of lines is arranged for reading the plantetary hours. The latter, a called ancient or Jewish hours, were e ployed chiefly in astrology. According the ancients, every hour was ruled by o of the seven planets, the Sun, the Moo Mercury, Venus, Mars, Jupiter and S urn in regular succession. Day and nig were divided by them into 12 hours eac reckoning from sunrise and sunset, resp tively.

These planetary hours were consequen long on Summer days and Winter nigh short on Winter days and Summer nigh The relation between these hours and t hours of true time may be seen in t figure. This timepiece is also an instr ment for measuring elevations and depr sions, with an alidade (a movable a carrying a sight) and transversal lines division (at the back), a ruler with mea uring scale, and an instrument for orient tion with a finely graduated compass. T engravings, the Moorish carved work the base plate, and especially the lines division in this instrument are of su thorough and finished workmanship th they will bear comparison with many pro ucts of modern fine mechanism.

*(To be continued.)*

### The Clocktender's Secret.

THE old watchmaker of a small town the west of England recently retire and the contract for keeping the chur and town hall clocks in order was given his successor. Unfortunately, from t start the new man experienced a difficul in getting the clocks to strike at the san time. At last the District Council reques ed an interview with the watchmaker.

"You are not so successful with t clocks as your predecessor," he was tol "It is very misleading to have one clo striking three or four minutes after t other. Why, before you took them in han we could hardly tell the two were strikin Surely you are as competent as Mr. H—?

"Every workman has his own method gentlemen," replied the watchmaker, "an mine ain't the same as H—'s were."

"I'm decidedly of opinion that it woul be for the general good if they were," re marked one of the councillors.

"Very well, sir; in future they shall be, came the reply. "I happened to write t Mr. H— last week about the trouble I ha with the clocks, and—but, perhaps," he add ed, as he produced a letter and handed to the chairman, "you'd like to see wha he said."

"Dear Sir" (ran the letter)—"Abou them clocks. When you get to know wha

## A Time-Recording Camera.

TO ascertain the exact speed at which motor cars are traveling is often a question of great importance to the general public, who suffer by reckless motoring, and of equal importance to conscientious and careful motorists, who wish to obey whatever the law on the subject may be. A new time-recording camera has just been patented in England.

If the police wish to know the speed at which a motor car is traveling, two of the time-recording cameras referred to can be placed at each end of a "trap," the distance between the points where the cameras are located having been accurately measured. The plan is for the cameras to take actual photographs of a car, including the people on the car, as it passes the selected spots, recording the time of taking to the fraction of a second. This gives the speed and means of identification of car and occupants. If the watch be synchronized, the decision arrived at must be accepted by all parties as accurate. It is proposed, the *Motorcar Journal* states, that when a driver is summoned for exceeding the speed limit he be furnished with the photographs of the car entering and leaving the "trap" and the time records, and be given an opportunity before appearing in court to measure the length of the trap and calculate from this data the time actually taken in traversing the distance and from this the rate of speed. The *Motorcar Journal's* description in part is as follows:

With this camera it is possible to take a photograph of any rapidly moving object passing any given point, the shutter speed giving a range of exposures from one twenty-fifth of a second to one-thousandth of a second; at the same time and with the same movement a photograph is taken of a watch, thus giving the exact time. A special case is provided for the watch, and an opening above the latter a card is inserted giving the date, which can be signed by the officer responsible for the time. Underneath the dial is a numbering apparatus, and each watch case bears a register number before it is sold. The case is made that after the official has placed the watch in the case it can be sealed (or locked) up, and it is impossible for the person in charge of the same to tamper with the watch without breaking and destroying the seal. The camera thus makes a record that can be produced in court, and if carefully stored can be referred to or reproduced months afterwards.

## Horological Notes.

THE Courthouse Building Committee at a recent meeting at Lincoln, Ill., awarded the contract for installing a tower clock to the Seth Thomas Clock Co., Thomaston, Conn., for $1,500, the dials having been previously bought. There was only one other bid.

The *Blade*, of Toledo, O., offered a unique trophy for the winner of the boat races in the 25-foot class at the Inter-Lake Yachting regatta, held some days ago at Put-in-Bay, Lake Erie. It consisted of a marine clock made by the firm of Bigelow, Kennard & Co., Boston, Mass. It was set in a gold case with a mahogany base and sounded bells instead of striking the hour. Although after the general style of a mantel clock, it is intended for use on board a yacht. After the fashion of marine clocks it strikes the first bell at 12.30, the second at one and every half-hour thereafter until eight bells are struck, when it repeats throughout the entire 24 hours.

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with THE JEWELERS' CIRCULAR-WEEKLY regarding any advantageous device or plan which they are utilizing in connection with their business.

### A Word About Auction Sales.

WHEN the jeweler finds too many old articles in his stock, this accumulation sometimes means loss of trade, as people will go where they can buy up-to-date jewelry. And as long as a jeweler finds his cases full of goods he will not buy new stock. The time of year makes very little if any difference as to conducting a successful auction sale.

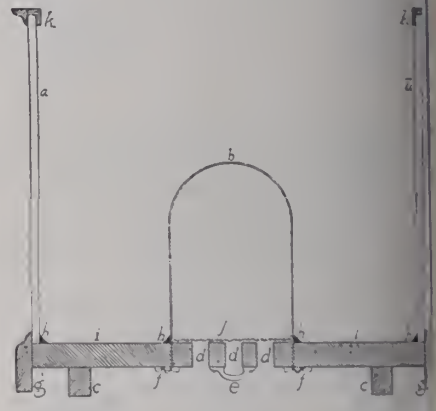
There are many points to be considered in making a good sale. First, the jeweler must bear a good name for honesty and honor; second, he must have a room of ample size for the accommodation of a large number of prospective buyers. Then the sale must be conducted on the most refined principle, and the man who conducts the sale must be a gentleman in every sense of the word, as much depends upon him. He must be a man born for the business, cool headed, kind and quick on every point. He must have a perfect gift in explaining the good qualities of every piece of stock which he handles, and must be a practical jeweler to enable him to explain how every article is manufactured. He must be endowed with an exceptional memory, remembering from day to day what statements he has made to the public in regard to the goods.

The sale must be conducted honestly, otherwise it will be disastrous to the good name of the jeweler after its discontinuance. Properly conducted the sale will be of great benefit to the jeweler, as it will convert his old goods into cash, and will be an enormous advertisement, spreading his name and bringing people to his store who have never traded with him before.

Of course the jeweler and auctioneer both should exercise great care and judgment in selling stock. The customer should not be allowed to pay too much for an article. It is an easy matter to take advantage of a customer under the strain of excitement, and thereby make him pay more for the goods than their actual value, which would be unjust; then upon discovering his error the customer will naturally be disappointed and prejudiced, finding he had saved nothing by buying at auction, and will therefore make an attempt to injure the good name of the jeweler. Now, to prevent this the auctioneer must use keen judgment, and always make it a point to knock down the article a trifle under the retail price asked for it. Unless a man can follow this rule he is not fit to be a jewelry auctioneer, for he will do more harm than good to the public and to his client.

If, however, such a man can be employed a successful sale can be held at almost any time of the year, and 100 cents on the dollar can be had for the gods sold on an average. Some old goods will sell at a loss, while by hard work better goods will bring a profit of 20 per cent. to 30 per cent. over cost, so the sale will average up daily a profit of 10 per cent. to 20 per cent. over cost of goods. The writer, who has conducted sales for 15 years, has kept a record of the cost of all goods sold, also what goods sold for, and has never conducted a sale at a loss to the dealer. MID.

### An Ingenious Show Window Attraction.



HERE is an idea for a show window hoax suggested by Henry Remillard, of Holyoke, Mass., and described in a recent issue of the *Merchant's Record and Show Window*, Chicago. The accompanying illustration shows a simple contrivance by means of which people are to be made to believe that there is a bird living under the water and flying about among the fishes as ordinary birds do in the air. The drawing shows an ordinary aquarium with square glass sides, in the bottom of which is inserted a large round-topped glass cover, such as is used to cover microscopes and other fine instruments.

The construction of the aquarium is as follows: *aa* are the glass sides which are made tight at the bottom by the mouldings (*gg*) on the outside and the putty (*hh*) on the inside. A well-fitted moulding (*kk*) is used at the top to hold the sides in place. In the wooden bottom of the tank (*ii*) is cut a round hole into which the glass cover (*b*) fits as snugly as possible. A line of putty (*hh*) should make the joint around the glass cover waterproof. This makes a watertight tank with the round glass cover protruding up from the middle of the bottom.

A movable bottom (*j*) is made to the cover. This bottom is held in place by catches (*ff*) and is removed by means of a common drawer-pull (*e*). The tank can now be filled with water, but the compartment surrounded by the glass cover will be filled with air.

Fill the tank and put in it a number of fishes of any kind that can be had. In the air-filled compartment put a bird or two the holes in the bottom (*ddd*) will all plenty of fresh air. From the outside, appearance of the resulting combination very startling. The glass cover is invisi and the birds seem to be hopping ab among the fishes on the bottom of the ta with the utmost unconcern.

Of course, it is necessary to cover t floor in such a manner that the outline the lower part of the inner glass will show. This can be done with small ston bits of shell, etc. A perch also should provided for the birds in order that th

may be able to fly about. If this contri ance is made properly, a person who is n in the secret finds it extremely difficult t understand the apparent phenomenon.

To make the most of this scheme, it necessary to use some of the methods the circus press agent. A few press notic should be used to arouse curiosity and on or two people could be let into the secr to help the thing along. A window car could be made to read something like th

See the wonderful
FILLELULU,
Or Senegambian Water-Bird.
Captured in —— Creek.
The only one in captivity.

A scheme of this sort would certainl attract a good deal of attention and creat a good deal of fun. The tank could eithe be shown in the window or some place i the store where people would have to com in to see it. In either case it ought to draw a good crowd if properly managed.

## Generously Advertised Clearing Sale.

A FEW days ago A. J. Reinhardt, Lincoln, Ill., concluded a clearing le in jewelry, which was advertised in unusually enterprising manner. For veral days prior to July 22, when the sale ened, Mr. Reinhardt advertised in the cal papers, using three ads. of different es on different pages of the medium, the ls. consisting simply of a solid black heart rmounted by the letter R and having inted beneath the dates July 22 to Aug. These ads. were supplemented by large d heart-shaped posters, bearing the same nouncement.

This unique style aroused many a read- s' curiosity, which was satisfied by a ance at long, narrow posters distributed roughout the city, bearing the inscrip- on, printed in red—"Reinhardt's Big welry Sale, July 22 to Aug. 10."—Post- s bearing this same inscription were also inted in German.

Circulars of different sizes announcing e special features of each sale were also stributed daily. Besides all this, tickets ere given away entitling the bearer to a ass of soda water at a local ice cream rlor. The price tags used by Mr. Rein- rdt were adorned with a red heart which as printed in the center near the upper rtion of the tag. The jeweler used this art as a sort of trade mark and it is needless to say that it served to give a tone of distinction and individuality both to the advertising and to the establishment.

## A Spacious Retail Jewelry Establishment in Kansas City, Mo.

THE palatial establishment of the Cady & Olmstead Jewelry Co., which has succeeded Cady & Olmstead, Kansas City, Mo., is illustrated below. The store has a frontage of 48 feet and a depth of 100 feet. The floor is made of ceramic tile. The show-cases are neatly designed and very spacious. The slide cases are of mahogany, while the counter cases are of rosewood.

The store is lighted by electricity, eight massive chandeliers being suspended from the ceiling. Besides these there are numerous electric lights in the wall cases. A handsomely equipped optical department occupies the extreme rear of the store.

The illustration furnishes a fair idea of the attractive arrangement of the interior. The width of the aisles adds to the comfort of prospective purchasers, especially during the holiday season, when crowds flock to this busy jewelry emporium.

INTERIOR VIEW OF THE STORE OF THE CADY & OLMSTEAD JEWELRY CO., KANSAS CITY, MO.

The Beck jewelry stock, Norway, Ia., was recently sold at auction to Lawrence Becker for $330. Mr. Becker in turn sold it to J. F. Smith, late of Paullina, Ia.

## Bits of Rustic Philosophy.

IMPROMPTU advertisement writing like impromptu speaking is often conspicuous and resultful to the extent of unsatisfactory returns.

A business like a nail that is crooked, can't be successfully driven; but the man who is trying to drive it doesn't care for advice.

Discontented advertising like a half swallowed meal doesn't do much good anywhere.

Select your advertising medium and your ads. even as carefully as you do your eggs and your setting hens—and remember there are hard boiled eggs and crowing hens in both businesses.

Sticklers for the ideal will appreciate your artistic advertisement—but idealists seldom have money.

Many an advertiser rises to the bait of a gaudily colored "special edition"—but when he sits down it is on a tack.

The untruthful advertiser is like the woman who dyes her hair—unpleasantly talked of when he isn't looking.

One little advertisement isn't a whole advertising campaign any more than one little wave is the whole ocean—although it may make you sick to pay the bill.

A fixed plan of advertising is just as necessary for results as a strong string to the can on a dog's tail—*White's Sayings.*

# MURINE

Have Stood the Test of Time and Criticism

# Optical Aids

## Gone to success on the wave of good opinions of Physicians, Opticians and the People

*Murine rapidly reduces an Inflamed Eye to its normal condition preparatory to its proper measurement for Glasses.*

*Murine Clears the Transparent Media and obviates the use of a dangerous Mydriatic.*

*Banene Stimulates the Blood Supply which nourishes the Eye, removes Floating Spots, strengthens vision, and with Murine greatly aids those wearing Glasses, hence their value to the Optical Profession.*

THE maximum per cent of those ordering Glasses seek your aid only after continued urgings from over-worked and defective Eyes—urgings that have left inflamed tissue and local irritation. Correct Eye Defects with Properly-fitted Glasses. Correct Effects of Defects with *Murine*.

**Properly-fitted Glasses and Murine Promote Eye Comfort**

# Banene

**This preparation should be in the hands of every Refractionist**

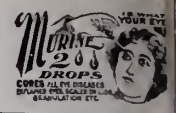
*STIMULATES the circulation of the blood supply that nourishes the Eye*, clears the retina of congestion, removes the causes of floating spots, dimness of vision, cobwebs, and an *inability to wear glasses with comfort.*

**Banene absorbs opacities of the Crystaline Lens—Cataract and in many cases renders an operation unnecessary**

# Murine Eye Salve

**(Unguentum Hydro-Murine)**

*A REMEDY FOR THE EYELIDS*



**Restores lost Eyelashes and promotes a healthful growth. Cures Cysts, Styes and Ulcers**

THE Eyelashes often fall out in consequence of neglected disease, both at their roots, and of the Lubricating Glands which open near them, resulting in a thickened and crusted condition. This condition is intensified by an *Error of Refraction*, and properly-fitted Glasses should be worn in addition to applications of *Murine* and *Murine Eye Salve.*

**NOTE**—The law does not confine the sale of these preparations to any class. Jewelers and Opticians have a right to sell them, but not the right to compound or administer.

## Toric Lenses.

(Paper read by L. W. Bugbee before the recent meeting of the Granite State Optical Association, at Manchester, N. H.)

I CAN assure you that I approach this subject with a good deal of diffidence, for I have more than once read statements made by men supposed to be authorities, which statements I knew to be erroneous. Therefore, in writing this paper I have tried to bear in mind a proverb, generally credited, I believe, to Josh Billings, namely, "It is better not to know so much, than to know so many things that aren't so."

I have been interested while looking up the subject in trying to ascertain when spectacles were first used, and when the different improvements were made that brought spectacle lenses to their present state of comparative perfection. Spectacles seem to have been used in Europe as early as the 13th century, and their invention has been ascribed to several persons. The Encyclopædia Britannica, however, states that undoubtedly they were known to the ancients, and credits their origin to the Chinese.

It seems to be the proper thing when an invention or discovery is veiled in obscurity to lay the blame wholly upon the Chinese. The first known use of a cylindrical lens was by Airy the astronomer, who corrected his own astigmatism by this means in 1827.

For some reason this form of lens did not come into general use for many years. The periscopic form of lens is generally credited to Dr. W. H. Wollaston, and if history is correct this form of lens is quite old, as Wollaston died in 1828. The cylindrical lens has been almost solely used to correct astigmatism until quite recently. I say however, because the toric form was not known, as it is quite certain that the true toric lenses were made at least 60 years ago. Probably the reason why the toric form of lens has been so slow in coming into use lay in the extreme difficulty in grinding perfect toric tools as well as the necessarily high cost of the lenses.

So far as I know, the first attempt to make toric lenses commercially was by J. Borsch, of Philadelphia, Pa. Mr. Borsch once showed me his machine, which was made in 1885, and also some of the lenses produced. If I remember correctly, he made a toric lens in the double convex form by grinding a convex toric on one surface of the lens, and a convex sphere on the other.

Now, as to the advantages, if any, of the toric form of lens over the cylindrical. Let us again take up the ordinary periscopic, with which we are all familiar. The main characteristic of this lens is described by its name, which is derived from the Greek words, $\pi\epsilon\rho\iota$, meaning around, and $\sigma\kappa o\pi\epsilon\omega$, meaning to see; hence to see around. Now, the periscopic lens is, as its roots imply, a wide-angled lens. With the ordinary 1.25 curve it does not give a very wide angle of vision, though better than a double convex, but with the 6.00 curve of our meniscus or deep periscopic lenses, it is possible to get nearly as wide a range of vision as one would be able to get without glasses. The human eye has a motion of about 55 degrees in every direction, or any angle of vision of about 110 degrees. Now, any one who has ever worn ordinary double convex or compound lenses knows that it is necessary to look practically through the center of them in order to get distinct vision. This means a constant turning of the head in order to see objects within a comparatively narrow angle.

You are probably asking—what has all this to do with the toric lens? Simply, that the toric lens can be ground, and is ordinarily used as a meniscus or deep periscopic lens, thus giving a meniscus lens with cylindrical effect.

Therefore, the chief advantage of the toric lens is that it can be made in the meniscus form, and this gives us a good definition of objects viewed at practically any angle in which the eye can be turned. The principal reasons for this better definition of the meniscus I have never seen stated, except in a general way that it enabled one to look radially or normally through the lens. It is my opinion that the comparative freedom from internal reflections, and also the very slight spherical aberration are the main reasons.

In a double-convex lens a ray of light entering the lower part of the lens at an angle around 45 degrees from the axis of the lens would be sure to be incident on some parts of the surface of the lens next to the eye at greater than the critical angle, thus being totally reflected, and, of course, such rays must confuse the vision. With a meniscus lens of a 6.00 to 9.00 base curve the rays entering at the same angle would be incident on the surface of the lens at very near the normal, and therefore would be refracted and not reflected.

Now, as to spherical aberration, the textbooks tell us in a general way that a double-convex lens has four times the spherical aberration of a plano-convex, the light being incident on the convex surface, and that a crossed convex lens with radii of about 1 to 5, the light being incident on the stronger surface has less aberration than either. This certainly does not seem to favor a meniscus lens, and if we were to try to throw an image upon a screen with a meniscus lens we would probably find a great amount of spherical aberration, but if we remember that the screen is stationary with regard to the lens and that it takes in the whole picture at once, while the eye moves in its socket, looking simply at a point at a time, we will see at once that conditions are different.

The formula for a lens of least possible spherical aberration is very complicated, but the principle involved is that the lens should be of such shape that the opposite angles of the incident and refracted rays would be equal. For a spectacle, or eyeglass lens, the meniscus form more nearly fulfils the conditions required. For a spherical lens, then, the ordinary meniscus answers every requirement, but when a lens is required to correct astigmatism, one surface of the lens must be of such form as to give a cylindrical effect. This is accomplished by making one of the surfaces a toric form.

Now, as to the toric surface, the word toric is descriptive of the shape of the surface. It is derived from the Latin *torus*, the name of the semi-circular convex moulding around the base of a column. The architectual term for this curve is a tore, and a slab sawed from a tore would be of the same shape as the surface of a toric lens.

As to the other advantages of the toric, one of the greatest is the absence of reflections from the surface next the eye. When a ray of light meets a reflecting surface, the angles of incidence and reflection are equal, and it is almost impossible for a ray of light to meet the concave surface of the lens at a great enough angle to be reflected on the retina. This is a good talking point for the meniscus lens, although it might not work with a school teacher. I remember seeing her watch the scholars behind her by means of the reflections on her glasses. I would not recommend a toric lens for a very strong sphere, as the outside convex curve then becomes extreme. It would be a better plan, when such a sphere is called for, to grind a convex toric on one surface of the lens and a plus curve on the other, making a double-convex form of lens.

The operation of grinding and polishing perfect toric surfaces requires the greatest skill and care. To begin with, the tools should be mathematically corrrect, and this means expensive machinery to make them,

## Optical Department.

and to frequently true them up. The curves should be the true torus, and with the most perfect machine imaginable only a few pairs of lenses should be ground on a tool. It should then be trued up before being used again. This does not mean rubbing it with a file until a lens will appear right by the lens measure, but it should be returned to the mathematically correct curves.

To save glass, time and wear on the tools, I have, with great success, for a year or more made my toric blanks by melting the glass and moulding to shape. They require very careful annealing afterward to prevent them from breaking. This, however, is a simple matter with the proper kind of furnace. The blanks are then fastened to the blocks with pitch, and brought into shape on a tool made for the purpose. They then go to the machine, and here only very fine emery is used to smooth the surfaces and insure accuracy. The motion imparted to the lenses by the machine must be such that any wear on the tool will be evenly distributed over its whole surface, so as not to change the shape.

The machine, which I use, and on which I have recently been granted a patent, will generate circular, oval or straight line motions. In practice I use a very long oval, being almost a straight line, and this line changes its direction at every stroke, distributing the wear with mathematical precision, and making hundreds of motions before a given point on the lens touches the same point on the grinder twice.

After the lenses are ground they are polished, and as it is of the utmost importance that the lenses be ground theoretically correct, it is equally important in polishing not to destroy that shape. This is where the utmost skill is required, and has been the most difficult problem to solve. The finished surface should be perfectly free from waves. A wavy surface on a toric lens is hard to detect, but is simply ruinous to the eye of the wearer. After the toric surfaces are ground the next operation is grinding the spherical side. If the proper allowances for the curves and thickness of the finished lens have not been made, the finished lens will not neutralize. To illustrate—if you were to grind a plus 6.00 on one side and a 6.00 on the other side of a piece of glass an inch thick, you might at first think the 6.00 curve would neutralize the plus 6.00 curve, but you would really have a fairly strong Pcx lens, and the thicker the glass the stronger would be the lens. Of course, the one-inch thick lens is an exaggeration, but it serves to illustrate the principle.

Next comes the edging, and right here is a chance for a great talking point if your customer is a sportsman, billiard player, or, in fact, interested in any pursuit requiring a wide range of vision. It is possible to so shape a toric or meniscus that when properly mounted, the lens will practically touch the face all around its edge except at the extreme outer end of each lens. This is done by giving the lens a sort of half-eye shape, the top of the lens flat fitting along the eyebrows, the ends of the lens well rounded, and the lower half of the lens very full shaped. The bulge or curve of the lens makes it clear the eyelashes, and the result is a lens, which, if properly shaped, is becoming to anybody, and gives as wide a vision, practically, as the same person would have without glasses. It may be necessary, in order to get the best results, to use an inset stud so as to get the lenses as close to the face as they should be.

One word more in the nature of advice: Use the concave toric surface and you will always be sure of a deep lens. For instance, supposing the Rx. calls for + 6.00 = + .50 cyl.; if the toric surface is convex, the resultant lens is a plano-convex, and might just as well be an ordinary compound. If the toric surface were concave, the lens would have been a meniscus form with all its advantages. Of course, in case of a bifocal the segment would require to be on the outside of the lens, but that is the place for it, as it does not collect dirt from the lashes, and if properly made, will be as nearly invisible on the outside as on the inside, when on the face.

Personally, I do not believe that the convex toric can be as accurately ground as the concave, although it is considerably cheaper to make. Judging from my experience with toric lenses, I believe that no one who has been properly fitted with them, and worn them long enough to get accustomed to them, would be willing to go back to the flat form of lens.

### The Early Literature of Optics.

(Résumé of an address by Prof. Silvanus Thompson, President of the British Optical Society, London, Eng.)

(*Continued from issue of July* 26.)

ANOTHER idea of Plato's was that light consisted of corpuscles, which were shot out of those colored bodies and entered the eye. Another idea to be found in the early Greek writers was that when the observer saw in a mirror the image of a thing, his eye projected that image through the mirror to some point in the space at the back. That was part of the old idea of the eye sending out rays. In the middle of all this, they came upo writings of Aristotle, who did not give us much bearing directly upon optics, who controverted some of the ideas of current. He controverted the notion that the eye sent out corpuscles or rays. In those days all things were classed as belonging to four elements, and the eye was classed as fire or a fiery body which shot out corpuscles or rays.

Aristotle disproved that notion with the pertinent query why the eye, if it were a fiery body, could not see in the dark. In other branches of optics Aristotle made further advances. In his book on "Meteors," he treated of the rainbow, in which he distinguished three colors only; and he wrote about the scintillation of the stars and why they twinkled. It was surprising that a man of such gigantic intellect did not give more attention to the science of optics. Nearly 100 years later came Euclid, whose work on optics had been lost for a long period. In the form in which it had been handed down to us, one could not say how much was Euclid's and how much the work of other writers or editors.

This extremely interesting book was divided into two parts—general optics and reflection. There were axioms, and en followed a number of theorems, each hg ing to one another and developing the b ject. Professor Thompson read a n ber of these quaint and curious axioms d theorems. Coming to the time of H o, of Alexandra, 260 B. C., Professor Thp son characterized Hero as the invento of the slot machine. To him was due e discovery of the law of reflection, the c trine of least time. M. Fermat afterw is developed this doctrine; and it was associated with the names of Hamilton Chalmers.

Archimedes, who discovered hydros displacement was certainly acquainted the law of reflection. Around his name grown up considerable amount of litera on the subject of the burning mirror, which, it was alleged, he had set fire t Roman vessels in the harbor of Syra In 1646 a Jesuit published a marve book treating of a variety of subjects cluding the laws of reflection and re tion. Another interesting treatise on op written by Alhazen, the Arabian, was p ed at Basle in 1662, giving another ver of the mirror of Archimedes. Then had the treatise on the same subject Seguer about 1730, and other treatises various authors, including Buffon, the n ralist, who tried the Archimedean exp ment.

Clearly, Archimedes attracted a dea attention from those interested in op They wrote about the mirror, and told v to repeat the experiment; but it was a they did not go back to the original count. There was no reference to Ar medes' mirror in the writings of Polyb or Livy, or Plato, who were his cont poraries, or nearly so. Although Polyb wrote a detailed account of the siege Syracuse, and mentioned the fireships t were sent out against the Roman fleet, did not mention the burning mirror. Th was every reason to believe that this st of Archimedes' burning mirror was a sp ious one; and it seemed that someone, or 700 years afterwards, mixed up t great philosopher's work in defending Sy cuse with this story of the burning mir Seneca investigated the colors of a pri in sunshine, and compared them with rainbow.

Claudius Ptolemy gave us the first m tion we have of dioptrics, the law of wh he investigated. It was to Ptolemy t we owed the first approximation to law relating to the angle of refraction the case of air and water. Other wo which might be singled out for mention connection with the burning mirror w the treatises of the younger Pliny, Vinc de Beauvais (1240) and Saint Isidor.

Among the Arabs, two writers treat of optics, one of whom was Alhazen (10 1100). Alhazen confirmed Ptolemy as refracted light, and to him we owe t doctrine of optical reversability, confir ing the doctrine that light can always trace its own path. To him we are debted also for the use of the magnifyi glass. Yet Alhazen somehow never me tioned spectacles. Roger Bacon describ the use of two lenses, but these were on a sort of superior magnifying glass. Spe tacles were unknown to him.

It was not certain when spectacles can

## Optical Department.

Salvini sometimes was credited with invention; and in 1299 there was a dis- t reference in an Italian treatise to spec- les. About the year 1300 there was a ır reference to the same subject; and 1305 another writer spoke of spectacles having been invented about 20 years ore.'

'he Abbé Maurolycus, teacher of mathe- tics at Messina and author of a treatise itled "De Lumine et Umbra," in 1755, lt with focal planes, and investigated the first time, as far as he (Professor ompson) knew, the cause of short-sight. ey came now to a contemporary of the bé, in Joannes Baptista Porta, of Naples, o wrote the first book on refraction in 3. (Professor Thompson here exhibited rta's own copy, annotated by Porta him f.) This Neapolitan invented the *camera cura*, and discussed the actual path of a through the lens.

Kepler's contributions to dioptrics were ll known. He invented the astronomical escope, and made many valuable con- utions to our knowledge of dioptrics. gave a new formula in refraction, and was the first to put a draw tube to a escope. There were sound reasons for ieving that the telescope was invented in lland. Galileo never claimed the inven- n for himself; but he heard of it, and to work and reinvented it for himself. Holland, too, was made the first binocu-

Among the great contributors to the sci- e of optics whose names were mentioned his review of the progress of the science re Descartes, Robert Boyle, and Robert oke (1635-1678), the inventor of the crometer. No one seemed to have in- ted the microscope. Apparently it had wn up. It might be said that Newton l put the science of modern optics on its is as it came to us.

n conclusion, Professor Thompson said he ed he had made good his plea as to the ue of going to the original sources and wing how the science grew. Anyone o took the trouble to discover how points re noted and developments made could fail to obtain thereby a much firmer d of the subject, even in the scientific se, than if the whole of the information l been derived from text-books written the 19th, or even in the 20th century.

THE END.

Davis R. Cohen has been appointed man- r of the jewelry and optical department the store of the H. Herpolsheimer Co., ncoln, Nebr.

Geo. A. Rogers, president of the Illinois tical Society, is sending out to the mem- 's copy of an amendment to the consti- ion, which he proposes to offer at the xt annual meeting of the society. This endment proposes that no one shall here- er be admitted until he has passed a rough examination in practical and tech- al optometry, and that the members of society shall before the following meet- submit to the same test. The amend- nt is a long one, taking in nine sections, viding for a Board of Regents, and details of the examination, fees, etc.

### Retinal Images in Literature.

BY E. LE ROY RYER.

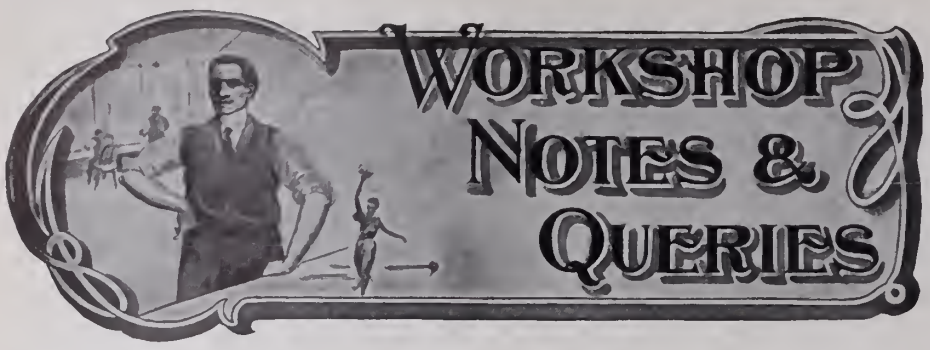
IT appeared of sufficient interest to those engaged in the study of optics to warrant calling attention to the fact that Edgar Allen Poe used as the nucleus of one of his stories the phenomenon of retinal images. The title of the story is "The Sphinx." It deals with a young man who is spending a fortnight in the country at a friend's home, during the period in which the cholera reigned in New York. Each day brought reports of the death of some friend or acquaintance, until a state of mind was produced in the young man that permitted him neither to think, speak nor dream of anything else. His friend was of a more philosophical turn of mind, and endeavored to arouse him from this abnormal state of gloom into which he had fallen. The story, after dealing with the psychological features, leads up to the point that interests the optometrist.

One evening the young man is seated at a window reading, when, upon looking up, he sees a living monster of hideous conformation making its way from the summit to the bottom of a distant hill. The description of this monster in the author's own words is as follows: "I concluded it to be far larger than any ship of the line in existence. I say ship of the line, because the shape of the monster suggested the idea—the hull of one of our 74 might convey a very tolerable conception of the general outline. The mouth of the animal was situated at the extremity of a proboscis some 60 or 70 feet long, and about as thick as the body of an ordinary elephant. Near the root of this trunk was an immense quantity of shaggy black hair—more than could have been supplied by the coats of a score of buffalos; and projecting from this hair downwardly and laterally sprang two gleaming tusks, not unlike those of the wild boar, but of infinitely greater dimension. Extending forward, parallel to the proboscis, and on each side of it was a gigantic staff, 30 or 40 feet in length, formed seemingly of pure crystal, and in shape a perfect prism—it reflected in the most gorgeous manner the rays of the declining sun. The trunk was fashioned like a wedge, with the apex to the earth. From it there were outspread two pairs of wings, each wing nearly 100 yards long, one pair being placed above the other and all thickly covered with metal scales, each scale apparently some 10 or 12 feet in diameter. I observed that the upper and lower tiers were connected by a strong chain. But the chief peculiarity of this horrible thing was the representation of a "Death's Head," which covered nearly the whole surface of its breast, and which was so accurately traced in glaring white as if it had been there carefully designed by an artist. While I regarded this terrible animal, and more especially the appearance on its breast, with a feeling of awe and horror—with a sentiment of forthcoming evil, I perceived the huge jaws expand, and from them there proceeded a sound so loud and so expressive of woe, that it struck upon my nerves like a knell, and as the monster disappeared at the bottom of the hill, I fell fainting to the floor."

After some days passed and only with great effort he tells his friend of the experience, who is, at first, alarmed, but who acts finally as follows: "Requesting me to exchange seats with him he opened the book and said: 'But for your exceeding minuteness in describing the monster, I might never have had it in my power to demonstrate what it was. In the first place, let me read to you a school-boy account of the genus Sphinx, of the family Crepuscularia, of the order Lepidoptera, of the class of Insecta. The account runs thus:

"'Four membranous wings covered with little colored scales of metallic appearance; mouth forming a rolled proboscis, produced by an elongation of the jaws upon which are found the rudiments of mandibles and downy palpi; the inferior wings retained to the superior by a stiff hair; antennae in the form of an elongated club, prismatic; abdomen pointed. The Death's Head Sphinx has occasioned much terror among the vulgar, by the melancholy cry which it utters and the insignia of death which it wears on its corslet.'

"Here he closed the book and leaned forward in the chair, placing himself accurately in the position I had occupied at the moment of seeing 'the monster.'



"'Ah, here it is,' he exclaimed. 'It is reascending the face of the hill, and a very remarkable looking creature I admit it to be. Still, it is by no means so large or so distant as you imagined it; for the fact is that as it wriggles its way up this thread which some spider has wrought along the window sash, I find it to be about 1/16 of an inch in its extreme length, and also about 1/16 of an inch distant from the pupil of my eye.'"

Thus Poe works up an ingenious story, but from a technical point of view it is a mass of flaws; superficial knowledge would lead one to believe this effect could be obtained, but a proper knowledge of the accommodation and retinal images soon makes it evident that only a very marked myope could focus an object so situated, and, of course, he meant 1/16 of an inch from the cornea instead of from the pupil.

### An Optical Query Answered.

*Patient is a young man, aged 25 years, who, recently, had trouble with his eyes, owing to the excessive use of tobacco. As a result he can see only large letters at a very close point, while at a distance he can barely see to enable him to go about. With the retinoscope, O. W., I get + 75, which affords no improvement. With the opthalmoscope the optic nerve is pale, almost white, in spots. Is there any chance of this patient getting improvement by medication? It is now over two years since he became blind. He has received circulars from several advertising oculists, and thinks of trying the treatment, although the oculist who attended him at the time gave him no encouragement.* M. T. V.

ANSWER:—If your patient has found no gradual improvement in vision during the time specified, there is but little chance of his ever obtaining any. The ophthalmoscopic changes noted in atrophy of the optic nerve are as follows: The disk is greyish or whiteish, and often cupped, and the vessels are diminished in size to a certain extent. I would place but little faith in the statements of a "long-distance cure" oculist.

[*Answers are also solicited from our readers to the questions published on this page.*]

QUESTION No. 1276. — **Hollow Knife Handles.**—*How are hollow knife handles made?* *H. K. H.*

ANSWER:—The better grade of knives and forks manufactured now have hollow German silver handles. They are made in halves and are shaped under a drop hammer. The surplus edges are cut off and the two halves, after they have been filed and fitted together are hard soldered together. After filing off the seams the handles are fitted to the shank of the knife and this is again hard soldered to the handle around the holster. The knife is now ready for the buffing room, from there it goes to the plating room, etc., until finished. This mode of making knife handles produces a light and in every respect an article superior to the solid steel handles.

QUESTION No. 1277.—**Davis' Potassium Cyanide.**—*Is there any difference between the German cyanide and the Davis cyanide? We use much of it for gold plating solution, and were informed that the Davis was the best for this purpose.* *H. E. & Co.*

ANSWER:—Many of the older platers prefer the use of the Davis brand, but it is doubtful if there is any difference. The German cyanide possesses more strength and it is necessary to use it in a smaller proportion than the Davis. There is no doubt that the Davis cyanide is a much purer and cleaner product and for that reason it is preferred for gilding solutions by many platers, owing to its comparative cheapness. The German product is used for silver and other large solutions, while the Davis is employed in the making of gold solutions.

QUESTION No. 1278.—**Weak and Strong Mainsprings.**—*I would like to have you settle a dispute by answering two questions for me. (1) If I take the mainspring out of a watch that keeps good time, and put a stronger mainspring in the watch, will it still keep good time. If not, please state what effect it will have. (2) If I put a heavier weight on the pendulum of a clock that keeps good time, will the clock still keep good time. If not, please state what effect it will have. By keeping good time I mean not changing any other part of the movement.* *F. T.*

ANSWER:—The changing of a weak mainspring for a stronger one will surely change the running of the watch, as such a change will affect the extent of the vibration of the balance, which will destroy its isochronous properties. The changing of the mainspring is often resorted to, when a watch with a going barrel is losing time in the last hours during the day's winding. Changing the weight of the lens or the bob of a pendulum will change the point of oscillation and must change the time keeping, but the clock may be regulated again and made to resume its good time keeping by shifting the timing nut. In a clock with a recoil escapement the changing of a light pendulum for a heavier one will change the time keeping and the clock with a lighter pendulum will go faster than one with a heavier pendulum.

QUESTION No. 1279.—**Soft Soldering.**—*I recently tried to solder together parts of a broken cover belonging to a plated ice-pitcher, but the solder would not run even; it remained in lumps, which I had to file off. How can I make the solder run smooth?* *S. B. T.*

ANSWER:—The pieces should be scraped perfectly clean where the soldering is to be done. Then use the light on the articles and warm the pieces, but not enough to endanger melting the metal. Any soldering fluid can be used as a flux. Apply this to the parts with the solder rod and warm the pieces enough so that the solder will flow in smoothly, using very little solder. If the proper heat is used the solder will run in, easy and smooth. Sometimes the solder is too hard and can be used only by an experienced solderer. In this case it is best to remelt the solder and add a small quantity of quicksilver, which will reduce the melting point and prevent the burning of the metal.

QUESTION No. 1280.—**Silverplating Brass and Whitemetal.**—*Silverplating brass rods, to which are soldered white metal trimmings, will turn the metal trimmings black during the preliminary for the plating. Is there any way to prevent this?* *Y. T.*

ANSWER:—This blackening of the white metal is caused by the acid which is used to clean the brass. To avoid this acid, dip, by plating a light deposit of silver on the brass before the trimmings are soldered on. In this case all the buffing necessary will have to be done before the plating. After the trimmings are soldered to the whitened rod the plating can be done as usual with white metal.

QUESTION No. 1281.—**Casting Spouts and Handles.**—*How are the handles and spouts, on plated teapots cast, so as to make them hollow?* *N. L. B.*

ANSWER:—The metal is flushed out of the mould before it becomes cold. The explanation of this is that the moulds are at such a temperature as to allow the metal to cool at the outer parts, and the molten metal being poured out before it becomes cold, leaves the articles hollow.

QUESTION No. 1282.—**To Remove Egg Stain from Silver.**—*A customer will sometimes ask me how to remove egg st from silver. Will you kindly tell me to do this?* *C. L*

ANSWER:—Strong salt brine will rub the tarnish, or use ammonia.

QUESTION No. 1283.—**To Remove Stain from Silver.**—*I have a few sil articles that are spotted with ink; how I quickly remove the stains?* *K. L. I*

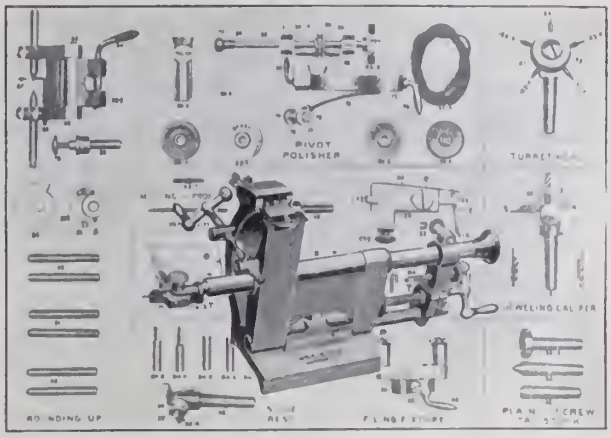
ANSWER:—Make a paste of chloride lime and water, and rub it on the sta

QUESTION No. 1284.—**Gilding Glas** *How can I gild the edges and a bend a glass cup?* *S. B. T*

ANSWER: — To have gilding adh firmly to glass, a proper flux of anhydr borax is necessary. The real gilding effected by the aid of heat. For this p pose a solution of gold in aqua re (chloride of gold) is precipitated by p ash or green vitriol, resulting in a fi divided powder consisting of meta gold. This is washed, dried and rub up with the flux of anhydrous bor Mix the same with oil of turpentine or g water and apply this with a brush. W heated in the muffle, the volatile oil capes, the gum is consumed, the bo melts and firmly attaches the gold to surface of the glass.

QUESTION No. 1285.—**Cyanide Process Electroplating.**—*I would like to know h the use of cyanide was brought about in electro deposition of metals.* *C. P. M*

ANSWER:—According to Hoefer, prus acid appears to have been known to t Egyptian priests, who used it for poiso ing those found guilty of divulging t sacred mysteries. According to Eisler, t fact that gold, when in a fine state of vision, was soluble in cyanide of potassiu was already known in the middle ag when the gilding of metals was carried o by jewelers and alchemists, by dissolvi gold in a cyanide solution. Unless pota sium cyanide was at that time made fr prussic acid, obtained from vegetal sources, it is difficult to reconcile this wi the statements made by Watts, by Rosc and Scharlemmer, and by other authoriti that potassium ferrocyanide was discover by Macquer in 1752 and hydrogencyani by Scheele in 1782, for these, particular the former, are the present sources of pota sium cyanide. The solubility of gold a silver compounds in a cyanide solution demonstrated by Scheele in his "chemic essays." According to Gore, it was t reading of this passage in Scheele's wor which, in 1840, suggested to John Wright, Birmingham, England, the availability cyanide of gold and silver, dissolved in solution of alkaline cyanide, for use electroplating. This plan was immediate tested with solutions and later in potassiu cyanide. The electroplating was embodie in a British patent, issued to G. R. and I Elkington, Mar. 25, 1840. This patent b came the basis of the arts of electrosilverin and electrogilding, which have been so ex tensively practiced ever since. It was 1840 also that the availabilities of the metal themselves were taken advantage of, fo in Mason's separate battery, devised in th year, the necessity of supplying additiona metallic salts to the bath as deposition wen on was obviated by using an anode com posed of the metal to be deposited on th object suspended at the cathode.



# Clement Combined Lathe Attachment

Do your own work; don't lose the profit.

12 attachments in one; 30 advantages besides, at one-fifth the price.

SAVES { time, money, patience, inconvenience.

We want EVERY WATCHMAKER IN THE WORLD to have this attachment on trial. Free for the asking.

This space is too valuable for testimonials; send for them, also catalog.

All important parts nicely hardened and tempered.

## cent Reappraisements of Glassware, China and Decorated Earthenware.

REAPPRAISEMENTS of glassware, china and decorated earthenware ere announced recently by the United ates General Appraisers as follows:

lown Glassware—From Schott & Genossen, na, exported May 4 to 17, 1905; entered at New ork and Philadelphia (File Nos. 35856, 35908, 909 and 35930); findings of Sharretts, G. A.: 00 Jena perforated globes, Q opal; entered at 24 arks per 100; 8256 ditto, ob opal, 50 m/m; en- red at 24 mks. per 100; 1872 ditto, 49 m/m; en- red at 34 mks. per 100; 1152 ditto, O opal 49 m; entered at 24 mks per 100; rehate 24½ per nt.; 9600 Jena perf. globes, Q opal; entered at 24 ks. per 100; rebate 23½ per cent.; add cases and cking; all no advance.

Decorated Earthenware—From Quong Tsui uen, Hong Kong, exported May 23, 1905; en- red at Chicago (File No. 36107); findings of aite, G. A.: 4 boxes china plate, cac'. 13 set; ntered at 22.75 Mexican dollars per box; no ad- ance; 1 box china soup bowls, 70 pieces, entered 10.50, advanced to 11.90 Mex. per box; 2 boxes, tto, each 80 pieces, entered at 7, advanced to 80 Mexican per box; 1 box china dishes, 80 eces, entered at 8.75, advanced to 8.80 Mexican er box; 2 boxes china bowls, each 27 sets; en- red at 9.45, advanced to 10.80 Mex. per ox; 1 box china soup bowls, 40 pieces, en- ered at 3.59, advanced to 4.40 Mexican per box; pieces, ditto, entered at 4.55, advanced to 4.70 lexican for all; 1 box china covered teacups, 3 et; entered at 2.71, advanced to 3 Mexican per ox; and similar goods, packing included.

Decorated Earthenware—From Etienne Delan- oy, Amsterdam, exported June 30, 1905; entered New York (File No. 36086); findings of Shar- tts, G. A.: 1 earthenware jar; entered at 12, dvanced to 20 florins; 1 earthenware round laque, entered at 6, advanced to 12 florins; 1 rthenware picture, in wood frame, entered at 18, dvanced to 60 florins; 1 earthenware blue bowl, ntered at 3, advanced to 5 florins.

Blown Glassware—From Gebr. Greiner, Penzig, xported June 6 and 20, 1905; entered at New ork (File Nos. 36088/90); findings of Sharretts, A.: 120 doz 2¼x7″ green cones, entered at 3 arks per doz, no advance; 50 doz. 2¼x10″, ditto, ntered at 5, advanced to 5.10 marks per doz; 100 oz. green cone shades, 170, 2¼x10″, entered at 4, dvanced to 5.10 marks per doz; 100 doz. ditto, 4, 3¼x10″, melted bottom; entered at 5, ad- nced to 5.10 marks per doz; cash discount, 2 per nt; add cases and packing.

Blown Glassware—From Gebr. Greiner, Penzig, xported May 25, 1905; entered at New York File No. 36083); findings of Sharretts, G. A.: 40 oz. 10″ green uher fg. auerschirme m/scizze; en- red at 5.20, advanced to 6.16 marks per doz; 25 oz. 10″, ditto, augenschirme; entered at 1, ad- nced to 1.50 marks per doz; 50 doz. 10x2¼″, tto, electr schirme, entered at 4.50, advanced to 10 marks per doz; 12 doz. 7x2¼″, ditto, entered 2.60, advanced to 3 marks per doz; 25 doz. een uher fg. glasbirnen, entered at 2.60, ad- nced to 3 marks per doz; 8 doz. 10″ green uher . chirme m/scizze, entered at 6.50, advanced to marks per doz; cash discount, 2 per cent; add ses and packing.

Decorated China—From Porzellanfabrik Victoria, trohlau, exported Apr. 29, 1905; entered at New k (File No. 35996); findings of Board No. 3: dinner sets, 101 pieces, seconds, 834/8153 A, en- red at 17.50, advanced to 19 crowns per set; dinner sets, ditto, 834/8154 A, entered at 7.50, advanced to 19 crowns per set; balance as reviously published in Circ. No. 1267, Reap. No. 55, July 31, 1905; add crates and casks.

## Early Indian Pottery.

(C. H. ROBINSON, in the *Keramic Studio.*)

ETHNOLOGISTS divide mankind into four classes—savage, barbarous, civilized and enlightened. In this division they consider the making and use of pottery to be the first stage above savagery, as indicating more fixed habitations and a commencement of the individual ownership of property. There are but few tribes now below the rank of barbarous as gauged by this rule, for nearly all the so-called primitive tribes have advanced to the manufacture and use of pottery.

In the investigation of prehistoric ruins in all parts of the world, the grade of pottery found has been a sure index to the progress which had been made in other domestic arts. Some scientists conjecture that the potter's art was originally discovered by accident. They think that baskets were first made, and that desiring to boil meat or other food, the savage coated the outside of his basket with clay and set to simmer over a slow fire. After being thus used several times, the hardened clay dropped off, retaining its shape, and an intelligent savage concluded the intervention of the basket was wholly unnecessary and clay formed to the proper shape and submitted to the action of fire would answer the purpose equally well. If this be true, the discovery of pottery, like that of many other things in the path of progress, was accidental.

When the primitive inhabitants of what is now the United States first came in contact with the whites, all were potters, but those inhabiting the southwestern part who were more nearly in contact with the Aztecs of Mexico were the more expert in this art.

In other portions of this country, the best pottery was manufactured by the tribes which inhabited the localities in which mounds exist, and these peoples or tribes are commonly known as "Mound-builders." Their vessels of baked clay were far superior in material, manufacture and artistic form, to those which have been found in other localities.

In the moundless regions, pottery is seldom found except in a fragmentary condition near the surface or upon old village sites, and its imperfection is very evident from the coarse and porous character and the imperfect firing, but in the excavations of mounds whole vessels are not infrequently found, which, for material, artistic form and complete firing, are scarcely inferior to the pottery of civilized peoples.

In the writer's collection are fragments which, from the arcs of the circles, must have been as large as washtubs, and they were so well made and thoroughly fired,

that they were no doubt used for boiling food or making maple sugar.

The smaller vessels were evidently formed by hand and with rude implements from lumps or masses of prepared clay, but the corrugations on the larger fragments clearly indicate that the method of manufacture employed was that of coiling.

In the collection also are some hundreds of fragments from widely separated localities, which vary greatly in material, firing and ornamentation. In some the ornamentation is by incised lines, evidently conventional, others indicate that a form or die with the figure in relief was used upon the soft vessel, while from others it would appear that a circular or semi-circular implement with notches or cogs was used to impress the figure by indentation. A few show that cords were tied about the vessel while soft, but in nearly all the ornamentation appears to be conventional rather than original.

A study of the prehistoric pottery of the United States would be of great interest to the ceramic clubs, especially as to the process of manufacture by coiling.

---

The contract for the bell and clock for the new court-house of Fargo, N. Dak., was awarded, about a week ago, to the E. Howard Clock Co., which was represented by the E. P. Sundburg Co., the amount of the bid being $3,770. The bell will weigh 6,000 pounds and the clock will have four dials.

The Bluefield Loan Co., Bluefield, W. Va., has purchased the entire stock of jewelry, fixtures, etc., of T. H. Mebane & Co., and will in the future carry a first-class line of jewelry, optical goods, etc. In addition to the pawnbroking business a watch repairing department has also been added. The new concern occupies the large storeroom formerly occupied by T. H. Mebane & Co., at 221 Princeton Ave.

## *THE RAMBLER'S NOTES.*

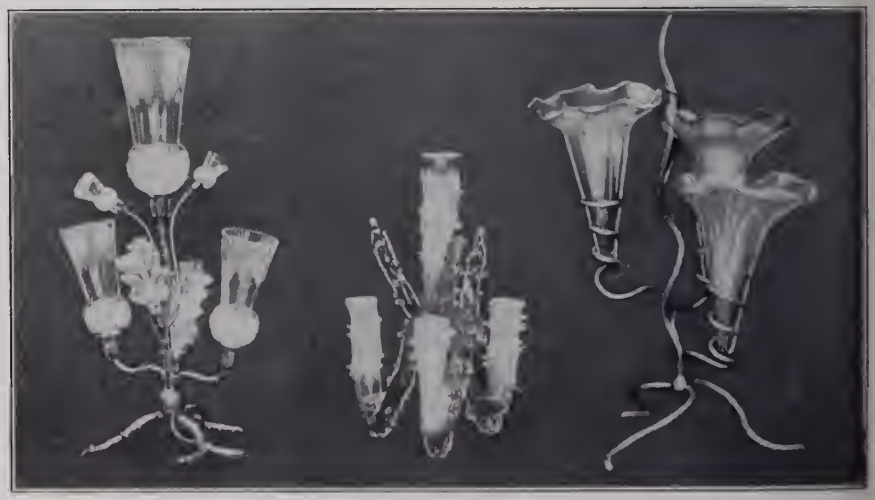
WHAT THE RAMBLER SAW AND HEARD AMONG DEALERS IN ART POTTERY, CUT GLASS, BRONZES, ETC.

**SPRING CHIN SAMPLES SOON TO BE SHOWN.**

SAMPLES for delivery in the Spring of 1906 will soon be shown by Paroutaud & Watson, 37 Murray St., New York. Mr. Paroutaud spent most of the Summer at the Pouyat works in Limoges, France, making selections for the American market, and he will return with his samples early in September. A representative of this house said that last Spring the trade placed its orders unusually early, and the deliveries for the Fall trade have been met with promptness, the Limoges strike not causing any delay, as was feared at one time. The deliveries for Fall will continue for some time yet, and dealers who desire to pick goods for their Spring trade will have an opportunity of doing so after Mr. Paroutaud's return from Europe.

*

**NEW IMPORTATIONS OF FRENCH CHINA.**



EVEN in midsummer the importation of new and attractive designs in plates is not discontinued by Charles Ahrenfeldt & Son, 50 Murray St., New York. Among patterns recently received from the firm's factory in Limoges were assortments in all sizes from service plates down to bread and butter plates. The hand-painted patterns are principally in quiet and tasteful designs, and the encrusted borders add to the harmony of the color effects.

THE RAMBLER.

# To Visiting Jewelers.

No trip to the city, whether for pleasure or business, is complete without a visit to the great art centers of the metropolis. 'Tis a welcomed relief from the noise and bustle of the business world to stroll among the fascinating creatures of the artists' fertile brain. And if the jeweler will wend his way to our galleries, we can make it both pleasurable and profitable for him, for among our vast collection of the choicest art goods are many exclusive pieces that will strongly appeal to him and to his customers. He will view in all their entrancing beauty the highest conceptions of the leading artists of the world, sympathetically and understandingly executed by master craftsmen.

Our new importations for the fall season, gathered by our representatives among the leading art centers of Europe, display a greater wealth and wider variety than has ever before been exhibited by any house. Only a personal inspection can convey an adequate idea of the exceptional excellence of our display.

A cordial invitation is extended to the trade to call.

## SILVER SERVICE FOR THE BATTLESHIP NEBRASKA.

THE silver service for the battleship *Nebraska*, the contract for furnishing which was awarded the Reichenberg-Smith Co., Omaha, Nebr., is to be one of the finest possessed by any ship in the navy. The service will consist of a centre-piece, loving cup, punch bowl, punch ladle, silver waiter and 18 silver goblets. The *Nebraska* service is to be delivered Nov. 1. Mr. Smith, of the Reichenberg-Smith Co., by whom it will be delivered, says it will be placed on exhibition in Omaha and Lincoln several days before it is to be sent to the Pacific Coast, where it will be placed on board the battleship.

The total length of the center-piece shown on this page, is 35 inches, and its height is 21 inches. The lights have silver candle shades with the seal of the navy and the seal of the State etched on them. A fine picture of the *Nebraska* is etched on the central panel, as shown in the cut, while at one side is an etching of the Union Pacific bridge at Omaha, indicating the first overland route to the West, and at the opposite side is a scene on the Platte River.

On the corresponding panels of the reverse are etchings of the Capitol building, a farm scene showing stacks of hay, and a skirmish with Indians. Between the various etchings or scenes is relief work, showing the products of the State, including corn, wheat and cattle. The eagle holds in its talons the golden rod, the State flower, and the laurel branch, indicating victory. Seaweed is introduced in connection with a shell effect, indicating the nautical purposes of the objects. The center-piece weighs 500 ounces.

The loving cup or flower vase is used either in conjunction with the center-piece

(*Continued on page 83.*)

CENTER-PIECE OF SILVER SERVICE TO BE PRESENTED TO THE UNITED STATES BATTLESHIP "NEBRASKA."

total weight of the service will be 1,300 ounces. It would take nearly 1,500 silver dollars to supply the metal that is used in its manufacture. It costs $3,000.

The service is being made by J. E. Caldwell & Co., which firm was also successful in the competition for contracts to make the services for the U. S. S. *Pennsylvania*, U. S. S. *Kentucky* and U. S. S. *Iowa*. The

# Scarf Pins that Men Delight to Wear

**Distinctive Designs—Rich Effects—Wide Range of Prices—**
**A Stock that Challenges Comparison.**

THIS little group of twelve Scarf Pins shows something of the richness and beauty of design that mark our productions.

Of course the color effects cannot be given here. This firm prides itself on the form, color and general impressiveness of its products.

The line includes faces, heads, nationaltypes, Egyptian and other strong characteristic designs. With these are combined pearls, diamonds and other precious stones.

THERE are two lines of Scarf Pins made by us—14 Karat Gold, and Platinum with 18 Karat Gold backing respectively. We have 1,000 designs of Scarf Pins in stock, ranging in price from 75c. to $250.

The Scarf Pins here shown run from $1 to $5.

These are merely representative of our general line, which has an immense number of equally attractive designs. Send for selection package. See our Travelers' Stocks.

Yokohama: 30 packages clocks, $1,410; 2 packges cutlery, $130.

---

The Austin Jewelry & Loan Co., Austin, Tex., was one of several other local concerns which were victims of check forgers a short time ago. Two men, accused of the crime and giving their names as Ernest Womack and Wm. Shelley, respectively, were subsequently arrested in Waco and brought back to Austin to await trial.

Chas. Rudd, a railroad man, was arrested last week, at Buffalo, N. Y., by detectives, who charged him with grand larceny in the second degree. The complainant in the case, T. Louis Terry, 13 Jefferson St., accused the prisoner of obtaining two watches valued respectively at $50 and $45, paying a small sum down on each, and agreeing to pay the remainder on instalments. The jeweler alleges that Rudd pawned both watches and failed to make an accounting.

ILLUSTRATED SERIAL STORY OF

# Modern Ring Making

Life Studies of Larter Workmen

ILLUSTRATION NUMBER FIVE

THE DROP HAND

¶ The die complete, the gold ready, the fifth step in ring making is to bring the die and gold together. We use powerful drops that force the gold into the die. ¶ Everyone knows the superiority of wrought iron over cast iron in durability and wearing qualities.

¶ Larter rings are all wrought and none is cast, therefore, it is needless to say, they must be superior to many others made; this is another reason why Larter rings sell.

¶ Made for Man, Woman or Child.

## Last Honors Paid to Jacob A. Wineburgh, Utica, N. Y.

UTICA, N. Y., Aug. 23.—The funeral of Jacob A. Wineburgh, of Jos. Wineburgh & Sons, this city, took place Monday afternoon at the family home, 153 Blandina St. The remains were surrounded by an immense pile of floral tributes sent in loving remembrance by organizations, social and business friends of Mr. Wineburgh. Gattle, Ettinger & Hammel, New York, sent a large piece of rare Autumn flowers, while other jewelry houses in New York and Albany sent beautiful floral remembrances.

Rev. Dr. Guttman, of Syracuse, and Rabbi Levine, of this city, had charge of the services, which were simple and quiet, in accordance with the wishes of Mr. Wineburgh. The pall bearers were M. Liberman of Abelson & Liberman; S. Heller, C. H. Livingstone, David Eldridge and Richard Perlen, of this city, and H. A. Diemel of Herkimer. The honorary bearers were John E. Morgan, ex-Police and Fire Commissioner; Arthur Hind, Ald. William F. Hayes, Walter S. Schuderer, James E. Price, Charles Williams, M. W. Campbell, City Engineer Paul Louis Schultze, Matthew Callihan and Henry B. Moore. Delegations from many organizations of which Mr. Wineburgh was a member attended the funeral.

THE LATE JACOB A. WINEBURGH.

---

C. Edmonds Snow, Belchertown, Mass., is among those who displayed interesting jewelry designs at the recent exhibit of Arts and Crafts at that place.

Consul Atwell, of Roubaix, France, writes that the international exposition to be held in the Spring of 1906 at Tourcoing will afford excellent opportunity to Americans desiring to bring their goods before the French public. While the chief feature of the exposition will be the textile industries of the surrounding country, wool predominating, other industries will be well represented. Machinery will be exhibited on an extended scale.

## lore Attractive Exhibits Shown at the Lewis and Clark Exposition.

PORTLAND, Ore., Aug. 23.—Ornaments, rinkets and jewelry of every description re prominent among the pretty things at he Lewis and Clark Exposition. They ome from many countries and are not onfined to American products. France, Germany, Austria-Hungary, Russia, Italy nd Japan are among the principal foreign xhibitors. Most of the jewelry exhibits roper are in the Foreign Building at the xposition, but in the Manufactures Build-ng also may be seen some very interest-ng ornaments and pretty trinkets.

From Rome comes a beautiful display f artistic mosaics in all kinds of fancy ewelry and ornaments of every descrip-ion, on exhibition by G. Savignoni & Co. Adriano Zachis, Venice, Italy, has a fine lisplay of Venetian mosaic jewelry, con-isting of pins, stick-pins and other articles f artistic design and workmanship, a beau-iful lot of cameos, prominent among which re some exceedingly fine cameo doves. n this exhibit are some very pretty terra-otta figures, perfect imitations of bronze tatuary, colored by a special process, ar-istic Venetian glass articles and fine art pecialties generally.

G. Poggione and G. Spinnalli have an ex-ibit of fancy clocks, statues and figures of nany kinds, in marble and alabaster, made y Bessi & Calona, of Rome.

Steiner & Kolliner, Vienna, have a fine xhibit of Bohemian garnet jewelry, con-isting of pins, bracelets, brooches, stick-ins, rings and necklaces. Among the ar-icles in their display is a beautiful tiara f garnets valued at $550, and other garnet ewelry of considerable value.

A Courbois and R. Troispoux, Paris, ave a fine assortment of bijou opera-lasses, artistic pottery and fancy leather oods, bronzes and fine jewelry of all inds, among which are many articles of gate, such as beads, pins, etc., etc.

In the German section is a pretty collec-ion of steins, cut glass, mugs, vases and ther fancy articles, also an interesting dis-lay of crystal glasses with pictures burned n by a new process, and an assortment of ne porcelain vases and mugs, in an ex-ibit made by Gebr Heubach, Lechte, Sax-ny, Germany, and Ed. Rau, of Munich, Germany.

Arndt & Markers, Berlin, have a large upply of artistic bronzes, glass and metal rticles and artistic pottery.

Heufel & Co., Dresden, have a fine dis-lay of porcelain paintings.

Emil Bender, Pforzheim, has a large dis-lay of artistic pins, pencils, pens, ear-ings and fancy jewelry of all sorts.

F. Van Houton, Bonn and Rheim, have display of fine bronzeware from Julius emmhoff, Berlin, Germany, and Arndt & Marcus, Berlin, have a fine exhibit of ar-stic bronzes, fancy clocks, lamps, statuary, ases, etc.

Russia is also fairly well represented at he Exposition. C. Klingert, Moscow, has n extensive exhibit of Russian enamel-ware, consisting of cigarette-cases, spoons, ups, saucers and various other articles. A ne collection of garnets and other stones n elaborate settings, a loving cup of Rus-ian enamel work, worth $400, and a gold

tea set worth $400, are some of the fe tures of this exhibit.

James T. Hayward, of St. Louis, has fine display of jewelry made of agat mineral specimens and American stones different kinds.

The Lewis and Clark Exposition is t admiration of all visitors and the atter ance is exceeding all expectations. T grounds are wonderfully beautiful w their great trees, magnificent roses a rich green lawns. The large lake on t grounds adds materially to the other tractions of the Exposition. The buildin are pretty and artistic and the exhibits a displayed to advantage, in many respe making a better appearance than those the St. Louis Exposition.

### Recent Customs Decisions on Jewelr Precious Stones and Kindred Lines.

Decisions by the Board of United Stat General Appraisers, New York, in cases r lating to duties on articles of jewelry, we promulgated last week by the Treasury D partment as follows:

UMBRELLA HANDLES—ARTICLES COMPOS OF BEADS.—Protest of L. P. Hollander Co. against the assessment of duty by t Collector of Customs at Boston. Certa umbrella handles, composed of wood thic ly studded with cut-glass beads in imitati of jet, were held to be dutiable under Pa 408, tariff act of 1897, as assessed.

PARTS OF JEWELRY.—Protest of Americ Electric Novelty & Mfg. Co., against tl assessment of duty by the Collector of Cu toms at New York. Certain brass rings s with imitation diamonds, to be used in tl construction of diminutive incandesce lamps, were held to be dutiable under Pa 434, tariff act of 1897, on the authority G. A. 5549 (T. D. 24935).

PRECIOUS STONES—IMITATION PEARLS-GOLDSTONES.—Protests of Lassner & Nor linger *et al.* against the assessment of du by the Collector of Customs at New Yor G. A. 6088 (T. D. 26554), G. A. 6089 (T D. 26555), and G. A. 6097 (T. D. 26586) fo lowed, relating to imitation whole and ha pearls, precious stones and goldstones.

ORNAMENTS—CHATELAINES.—Protests Leon Rheims against the assessment duty by the Collector of Customs at Ne York. As claimed by the importers, tl Board held (1) certain millinery ornamen and metal pins not to be dutiable as jew elry; (2) silk ornaments not beaded spangled or composed in part of lace or en broidery, and similar ornaments made cotton, to be dutiable as manufactures silk and manufactures of cotton, respe tively; (3) certain chatelaines to be dutiabl as manufactures of metal. G. A. 6130 (T D. 26653), G. A. 5664 (T. D. 25254), an Tiffany *v.* United States (T. D. 25316) fo lowed.

Maynard & Son, Miami, Fla., hav installed three new massive solid oak jew elry cases, and one handsome wall cas the latter making four wall cases in al Recently this firm had the interior of it store burlaped in a light green effect an a metal ceiling put in. All the fixtures ar of oak. The concern now has one of th most attractively furnished stores in tha territory.

## Developments in the Bankruptcy Proceedings Instituted Against Harry Levinsohn.

In the bankruptcy proceedings brou against Harry Levinsohn, wholesale je eler, at 30 Maiden Lane, New York, th was a hearing last Friday before Uni States Commissioner Alexander, in N York, at which, after some legal sparr with reference to the missing books a the disposition of assets, a stipulation w agreed upon under the terms of which jeweler may be adjudicated a bankr without further formality, in accorda with the creditors' petition filed Aug. 15

When the case was called, Commissio Alexander announced that he had recei from Judge Holt a decision of the iss submitted to him a week before. At t time Mr. Levinsohn and his bookkeep Moses Feinberg, refused to answer a questions relating to the books or ass of the business, on the ground that t were privileged because of the hazard incriminating or degrading themselves. T judge ran over the list of questions to wh answers had been refused, and marked words "must answer" after nearly a them. In the list of questions which L insohn is accordingly required to answ are the following: "Where are the boo you keep in your business?" "When you last see your books?" "What boo did you keep?" "Where did you ke these books?" "When last did you your books in your office?" "Did you ke correct and regular books in your bu ness?" "Did you take an inventory your business?" "When last did you p pare a balance sheet in your business "Have you destroyed any correspondenc papers, data, or documents relating to yo business?" "Will you state whether books, data, papers, checks, and relati to your business are in existence?" "H much stock have you on hand?" "H much outstanding accounts?"

The questions which Moses Feinberg required to answer include the followin "Have you any ties of affinity or consa guinity to the proprietor's business?" "D you prepare any of the data or informati on which a statement was issued to agency, as well as to the Jewelers Ass ciation and Board of Trade was based Feinberg is also required to tell about t books.

Lawyer Marx, of Marx & Miller, sa that Mr. Levinsohn and Mr. Feinberg we not in court and the commissioner ma a note of their default. Mr. Marx ask for an adpournment until next week.

A. H. Gleason, representing the Jewe ers Association and Board of Trade, a Leonard Bronner, representing the pet tioning creditors and the receiver, made suggestion that before an adjournment granted, Mr. Marx consent to an adj dication placing Levinsohn in bankrupt

Mr. Marx at first vigorously objecte to the adjudication. He said that a pet tion for a composition was in circulatio and he wished to know the result befo he consented to an adjudication.

"What progress has been made with th settlement?" inquired the commissioner

"It is practically effected," said M Marx.

"It is practically unaffected," said M

Gleason, with a broad smile; "there a creditors with claims for $16,000, who s that they will not settle. Some of the will fight tooth and nail. You will nev get a settlement."

After further talk, the lawyers all agre to the stipulation that Mr. Marx shou withdraw his answer, and that Levinsol should be adjudicated a bankrupt. T opposing lawyers consented that the exa ination of Levinsohn and his bookkeep should go over until next Thursday.

Before the hearing closed Arnold Koh vice-president of the State Bank on Gra St., was sworn, and he submitted copi of Mr. Levinsohn's account at the ban Mr. Kohn said in relation to the loan the bank of $5,000 on a Lexington Av apartment house: "I was disinclined make this loan because I was not co vinced that Levinsohn's equity was suf cient to justify it, but he called with h partner and friends and argued the matt so that we finally let him have the money

Mr. Kohn said that the bank credit Levinsohn's account with $2,000 cash notes signed by the jeweler, and for whi jewelry, invoiced at $4,000, was put up collateral. In like manner the bank cre ited Mr. Levinsohn's account with $4,0 in cash, when jewelry valued at $8,000 the invoice was put up as collateral.

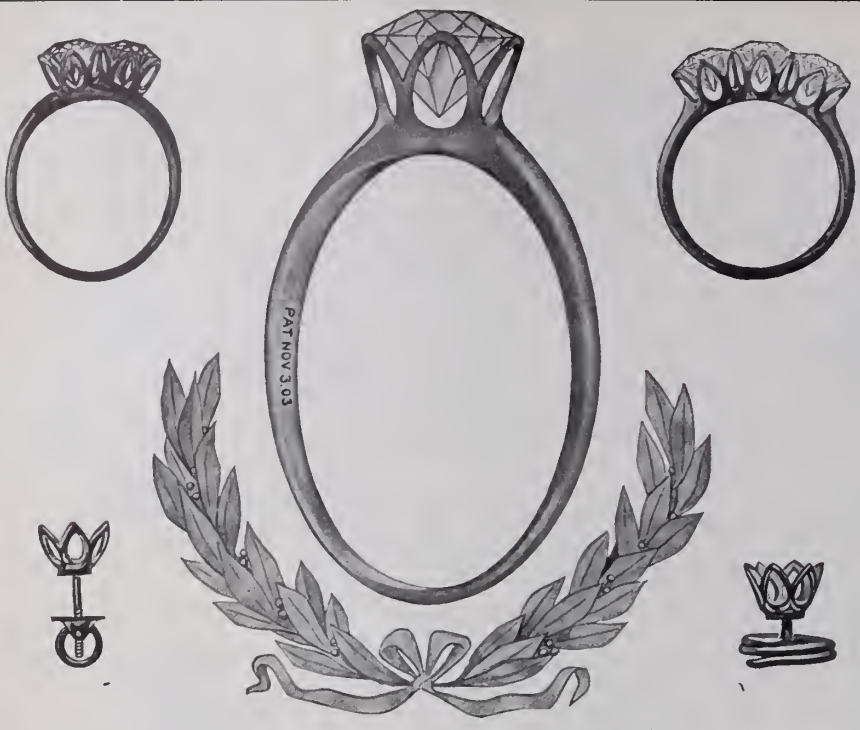
Judge Holt decided during the day refer to Peter P. Olney, as referee, a motio made by the attorneys of the creditors require the bankrupt to turn over his boo to Lindsay Russell, the receiver. In t affidavits, it was stated that the books h disapeared before Mr. Russell took po session of the business. An affidavit ma by Mr. Levinsohn says that he has not his possession at this time any books r lating to his business.

### Death of Edward M. Morphy.

TORONTO, Can., Aug. 24.—Edward M Morphy, founder of the firm of E. M Morphy, Son & Co., retail jewelers, 1 Gouge St., this city, believed to be t oldest business man in the city, died Mon day last at his residence, 18 Wellesley S aged 86 years. He had been ill for abou three weeks.

Mr. Morphy was born in Monaghan, Ir land, in 1829, and came to Toronto wit his family when 15 years of age. Aft partially finishing his education he engag ed in the jewelry business. In 1843 h went into business on his own account o the same spot where the store now occu pied by the firm stands, and carried o business there continuously until h death.

Deceased was a public-spirited citize well-known for his advocacy of the temp erance cause. He was treasurer of th York Pioneers' Society, and an activ member of the Orange body and the Iri Protestant Benevolent Union. He took prominent part in organizing the Reta Jewelers' Association, of which he was th first president. In religion he was Methodist.



Mr. Morphy is survived by a widow an five grown up children, two of whom Fred. J. Morphy and E. J. Morphy, ar members of the jewelry firm founded b their father. His brother Andrew is i the jewelry trade in London, Ont.

ISN'T it interesting to watch the evolution of an O. & B. Ring from a crude piece of gold? While our factory is equipped with every modern machine, every useful device necessary to manufacture our product—it requires time—yes, quite a deal of time, before the completed article is ready for the Jobber's inspection.

The Jobber, of course, has a different story to tell, and saves time through the excellence of our product. Our unlimited assortment of new designs makes his end a simple matter. If you want business this fall—Ring business—sell the O. & B. product.

### Jewelers Should Watch Out for Swindler Who Presents Stolen Express Money Orders.

By means of a money order issued by the Adams Express Co., a man wearing a railroad uniform recently swindled Charles A. Keene, 180 Broadway, New York, out of a watch valued at $8 and $10 in cash. The man with the order falsely represented himself as the payee, G. O. Severance, a dining-car conductor, running between New York and Boston. The order was mailed at Springfield by E. D. Bird, and was directed to Mr. Severance in the care of the Pullman office, in the New York Central Railroad Station, 42d St., New York.

The man who presented the order, and whose identity is as yet unknown, picked out the watch that he desired at the store It was a 16 size, open face, 20-year, gold-filled Montauk case, with a seven-jeweled Hampden movement, number 1878539 When the money order was presented in payment, Manager Talbot was called by the salesman. To the manager the buyer said that he was the conductor named as payee in the order, and as his appearance was that of a railroad man the watch was given to him as was also the change.

The money order was banked, and after a few days, the express company discovering that the endorsement was forged, notified the bank.

The order was turned over to Mr. Severance on his establishing his ownership, so that the jeweler is now out the watch and the money. The swindler is a man about 35 years of age, or possibly a little under, about five feet nine inches high, thin, with a smooth, pale face and high cheek bones.

ELK GOODS A SPECIALTY.

## South African Geologist to Look Over Alleged Diamond Fields in This Country.

A noted South African geologist, David Draper, F.G.S., of Johannesberg, the discoverer of the first diamond mine in the Transvaal, is at present in this country on a brief tour of inspection of certain sections in the United States, namely North Carolina and Kentucky, in which diamonds are supposed to exist. Mr. Draper comes here at the instigation of no one but himself, claiming that having been interested in the reports on that section in Dr. Kunz's "Precious Stones of North America," and having received what he believes to be true Kimberlite, which is supposed to have come from that region, he decided to make a personal investigation to find out exactly what the conditions were and what the chances of finding diamonds in that section might be. Mr. Draper was in New York until Saturday afternoon, when he left for Richmond, Va.

In speaking with the editor of THE CIRCULAR-WEEKLY at his hotel, Mr. Draper said that it was his intention to go direct to his field of investigation, but that he had no definite plans as to his work in this country. He might return soon or he might "camp out," as he expressed it, for about a month or so if he found much to interest him. When asked what were the topographical conditions necessary to indicate the region wherein diamonds might be found, Mr. Draper said there were none, and that diamonds were found in all localities, on hills, in valleys, in river beds or on plateaux. To discover diamonds it was necessary only to find kimberlite, and where that was found he believed diamonds would be.

Even if diamonds be found in this country, said Mr. Draper, there is no indication that a big mine will be discovered, or that the diamond workings of America will become a factor in the gem market of the world. In connection with this statement he called attention to the fact that though diamonds were found in the Transvaal almost simultaneously with the discovery of the gem in Cape Colony, it was not until 1896 that the first diamond mine was discovered in the Transvaal—29 years later; and this despite the fact that thousands of men familiar with the conditions surrounding the diamond mines were exploring the country at all times. Although the same rock had come under the eye of many geologists and diamond experts, it was not until Mr. Draper identified the substance submitted to him from the Schuller farm as kimberlite that the first mine was located, and within a year or so four other mines were found in the same district. Therefore, it will be easily seen that even if a diamond mine exists in the country it may take 1 50 or 100 years to discover its exact loc tion, even if experts should be employed the search, and how much longer may take when we consider that but few me in the United States know anything abo diamond mines. Although there are 1,0 or more true diamond mines of Sout Africa at the present day, Mr. Draper sa that but a handful are paying expenses.

In speaking about the recent report the mud rush in the Premier mine of th Transvaal, Mr. Draper said that part of th account which stated that work had bee entirely stopped was erroneous, as the fie was so large as to make it impossible f an accident to stop work in all parts of th mine. While it was true that a dam ha broken and parts of the machinery had bee interfered with, if the open part of the m could not be worked it will be a simp matter to open up a different location.

When asked about the Cullinan diamon the largest gem in the world, recently take out of the Premier mine, Mr. Draper sa that he had handled the stone twice an made a careful inspection of it. He did n agree with the experts who said it was small segment of a large crystal, but is sur that the stone is nearly four-fifths of th size of the original crystal. The origina crystal was never pure octahedral o duodecahedral in form, but showed indica tions of both classes of crystalization. Th stone, he said, had a flaw in it, but he be lieved that a perfect gem of fully 900 carat could be cut from it. Inasmuch as th Government of the Transvaal owns a 6 per cent. interest in all diamonds mined i the territory, he said that this practicall gives the Transvaal control of the grea diamond, and that the Government, urge on by the people in the country, will insis that the stone be sold at an early date, o as soon as it is possible to realize a prope value (say £1,000,000) for it; this woul mean about £600,000 to the Governmen treasury. The people in the Transvaal, h stated, are even now talking of refusing t pay taxes until the stone is sold, and th agitation is so strong that something surel will be done toward disposing of the ge

When the reports of the discovery of dia monds in Rhodesia were called to M Draper's attention, he said that there wa little doubt that the reports were correct but that it could have no effect upon th diamond market, as the chances were that little mining could be done, because th mineral deposits of that country were abso lutely controlled by the De Beers Consol dated Mines. Until this company deems i necessary that mining should begin there i little likelihood of any large output from Rhodesia.

## Developments in the Bankruptcy of L. J. Cowl Trading as Clapp & Cowl, Chicago.

CHICAGO, Aug. 26.—In the matter of Linden Y. Cowl, trading as Clapp & Cowl, bankrupts, the J. D. Bergen Co. petitioned the court to return $45 worth of cut glass which the latter company claimed was held by the bankrupts on memorandum. The court allowed the claim. Eisler & Laubheim have petitioned the court to have the receiver return to them 10 pieces of jewelry valued at $145, which they claim was delivered on memorandum to Mr. Cowl March 21 last. The petitions state that Cowl agreed to return the jewelry on demand, but this he had not done, though repeatedly requested by the petitioners to do so.

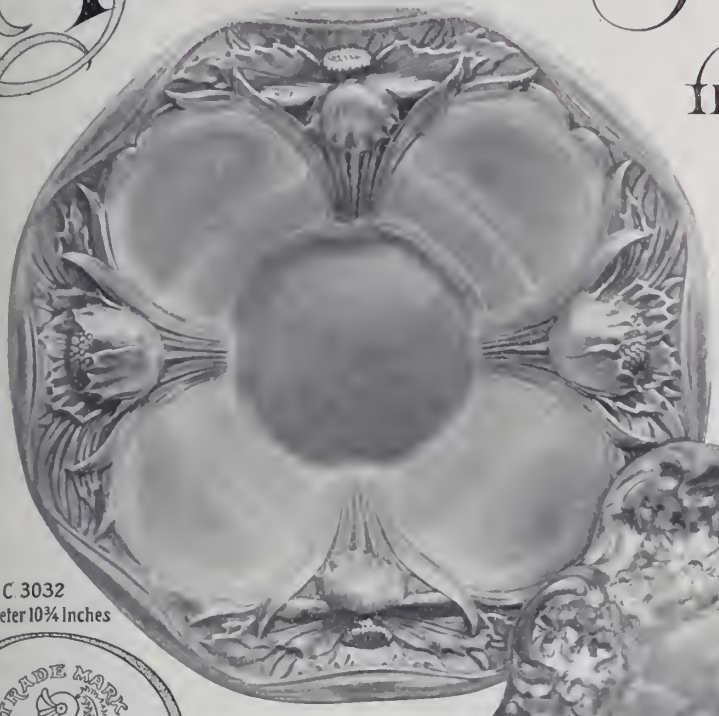
The receiver has secured an order from the court compelling Cowl to turn over to him the pawn tickets for the jewelry on which Cowl borrowed $3,300 from W. C. Slatts, trading as Slatts' Collateral Loan Bank in the Champlain building. The court also issued an order restraining Slatts from disposing of the jewelry he holds as security for the loan.

The receiver petitioned the court for leave to employ counsel, and W. W. Maxwell was appointed solicitor. The receiver has asked for an order restraining the Hibernia Banking Association from disposing of $5,400 worth of book accounts and notes assigned to them to secure a loan of $2,500 made to Cowl. The receiver in his petition to the court said he was advised that all of these open accounts were assigned to the bank within 10 days prior to Cowl's voluntary petition in bankruptcy, and further says that some action should be taken toward compelling the banking association to return these notes and come in as a regular creditor.

Action will also be taken to secure the recovery of the jewelry pawned with Slatts, in as much as it was pawned within four months of the bankruptcy petition. Precedent for the return of the jewelry and book accounts is found in the case at Washington, D. C., in the case of F. W. Brandenbery, receiver for Joseph Drukker v. E. Heidenheimer, a pawnbroker, and the Traders' National Bank.

The inventory of Clapp & Cowl's assets has not yet been filed, but is said to show $15,000. Bids are asked for and will be submitted to the court, Sept. 5. If these are not satisfactory the receiver has permission to sell the stock at public auction on Sept. 6 However, it is thought that Cowl may effect a compromise at about 25 or 30 cents on the dollar.

---



Theodore Little, an aged jeweler of Wilkesbarre, Pa., who mysteriously disappeared from his home several months ago, after selling his property, and taking a large sum of money with him, has been located in California.

Robert L. Hall, formerly of Little Rock, Ark., recently filed a replevin suit in the Circuit Court of Kansas City, Mo., to recover jewelry from O. H. Stephens, a pawnbroker of the latter place, who, Hall says, is holding his property on illegal interest charges. The rate of interest charged for money loaned on articles pawned by Hall is alleged by the latter to be usurious

### New Jerseyites Worried Over Remov from Newark, N. J., of Wm. Gay and the National Jewelry Company.

NEWARK, N. J., Aug. 28.—Many residen of this city, the Oranges, Harrison, Kearn and other suburban places have bee surprised the last two weeks by the d parture of William Gay, promoter "watch clubs" and manager of the Newa offices of the National Jewelry Co., at Clinton St. Many had paid into the "club sums varying from $5 to $20. A numbe who called at the Clinton St. offices, fou the door locked, and were informed th the furniture had been taken away.

It was said Saturday that Gay has se circular letters to men who were known the "chairmen" of some of the "clubs." announced that it had been decided transact all business of the National Jew elry Co. through the main office in the Ma ley building, in New Haven. He called a tention to the contracts requiring membe to make their remittances by mail whenev such a course is required by the compan and then directed all to send their mone by postal order to the New Haven office.

There have been drawings each wee and the holder of the lucky number re ceives a gold watch. Most of the "clubs were formed in factories.

Mr. Gay was for several years, until la Spring, in the installment business at Ne Haven, acting as manager of the Nationa Jewelry Co. Other styles have also bee used, such as the New Haven Watch C and the New England Watch Co. Severa months ago, after opening in Newark, h closed the New Haven office, which he no reopens. For a time he had an office at 17 Broadway, New York.

### David H. Kahn, Erie, Pa., Files Vol untary Petition in Bankruptcy.

PITTSBURG, Pa., Aug. 26.—David Herma Kahn, a dealer in jewelry, china and fanc goods at Erie, Pa., filed Monday in th United States District Court, at Pittsburg a voluntary petition in bankruptcy, placin his debts at $3,452.93 and resources a $1,607.

Mr. Kahn, who was formerly in the clot ing business, has recently had a small jew elry store at 1129 State St., Erie, where h conducted auction sales at night. His ha bilities to New York jewelry firms are be lieved to be small.

## Robbery Carefully Planned.

### Three Thieves Hold Up Chicago Jewelry Store and Get Valuable Diamonds.

CHICAGO, Aug. 28.—One of the most carefully laid and daring robberies ever committed in this city took place last Saturday a little after noon, when F. E. Lindahl, a clerk in the store of A. W. Johanson, retail jeweler, at 270 Wells St., was held up by three bandits and robbed of jewelry worth between $1,500 and $2,000. The methods of the robbers showed a plot hatched long in advance of its completion.

A. W. Johanson has been in Europe with his wife for the past three months, and returned just two days after the robbery occurred. In his absence his three employes looked after his interests. These three employes are F. E. Lindahl, E. H. Roling and A. B. Wedeen. A few days before the robbery a well-dressed stranger entered the store and asked to look at some loose diamonds, saying that he wished to make a present to his wife of a diamond ring. Prices were quoted to him and he left without making a purchase, saying he would call again. He called later, was again shown the diamonds and, as before, left without buying anything.

Saturday morning, about 9.30, a telephone message was received at the store, asking that some one be sent to an address to get a clock which needed repairing. The party who sent the message said that he and his wife were going to the country and would not be there one minute later than 10 o'clock. Mr. Wedeen was sent to get the clock, but found the address to be a fictitious one, and returned without the timepiece. This message is believed to have been sent by the stranger who had previously called twice at the store to look at diamonds in order to decoy one of the clerks away from the store, thereby making the work of robbery easier. Promptly at 10 o'clock the same stranger called, saw Mr. Lindahl and left again, saying he would bring his wife with him to decide on a purchase. During this last visit of the stranger Mr. Roling noticed two new men in a buggy driving slowly past the store.

At 12 o'clock Mr. Wedeen left to go his lunch and Mr. Roling went upstai to his mid-day meal. Mr. Lindahl, ho ever, was not alone in the store, as t electric clock, which was out of order, w being repaired by an electrician of t Western Union time service. At 12.15 t stranger again entered the store and to Mr. Lindahl his wife was indisposed a that he intended to make the purcha without her. Mr. Lindahl brought out few papers of diamonds containing fi stones all over a carat in weight and of value of $800. A minute later two m drove up in a buggy, rushed into the sto and all three drew revolvers. Pointir them at Lindahl they took the five di monds, and one of them going back of t counter seized three trays of rings. O tray contained 24 diamond rings, rangi in price from $30 to $150 each, while t other two trays contained 18 rings eac priced at from $5 to $30 each.

Lindahl in the meantime had edged h way to an electric button in the floor plac there for just such an emergency. The bu ton connects with an alarm bell in the re of the store. He reached the button a pushed it. A scrub woman was workir in the back room, and instead of giving t alarm she hurried into the store and w promptly held up. The thieves then toc the jewelry and fled in the buggy.

In the meantime Mr. Roling, who was u stairs, heard the scrub woman's scream and rushed downstairs, but did not arriv until the thieves had escaped and Lindal was telephoning to the police of the Ch cago Ave. station. A patrol wagon arrive on the scene a few minutes after the rob bery, and following the directions given b Lindahl took up the chase of the men.

At a lumber yard the bandits leaped fro the buggy, and two of them escaped, but th third was captured. He gave the name W. L. Edwards at first and later said h real name was W. L. Ely. He was ident fied by Lindahl as the stranger who ha been in the store so often to look at dia monds. Edwards or Ely said he had s creted the jewelry in the lumber yard prio to his capture, and when led to the yar claimed he could not find the place wher

he had hidden the jewels. So far they have not been recovered.

A woman, believed to be the wife of Henry Hoffman, the alleged diamond smuggler, was arrested here last week and held under a bond of $2,000. She first gave her name as Lena Schiller, and later said she was Tina Werner. She is a German about 30 years old and speaks English with difficulty.

### Death of John T. Dilts.

ANDERSON, Ind., Aug. 23.—The recent death of John T. Dilts, a well-known jeweler of Summitville, was deeply regretted by his many friends in this section. Mr. Dilts was found dead in his bed a week ago, and was believed to have succumbed to heart disease. He had been feeling ill for a few days, but his condition was not believed to be at all serious.

The deceased was about 57 years old and was originally in the jewelry business in Fairmount, Ind. He came to Summitville in 1889, remaining there for about 13 years. He then moved to Orestes, Ind., but finally returned to Summitville and continued business alone until last May, when he formed a partnership with T. E. Jones, under the style of Dilts & Jones. In addition to the jewery business the concern acted as sewing machine agents and had an undertaking shop.

Mr. Dilts is survived by a widow.

The Lilley-McDonald Co. is moving its stock of jewelry from Twin Falls, Idaho, to Kimberly.

### Merchants' Supply Co., Columbus, O Closed Under Execution for $3,400.

COLUMBUS, O., Aug. 25.—The Merchant Supply Co., a corporation of this city, doi business at 166-168 N. Third St., has be closed on an execution of $3,400. The a tion came somewhat as a surpise here, the company had a paid-up capital of ov $50,000, and was believed to be doing we According to a recent report, T. J. Har ley was president of the concern, Arthur Featherstone was the secretary.

The company was originally incorporat with an authorized capital stock of $25,00 and this was increased to $50,000 and lat $100,000, of which $34,200 was said to ha been paid in in cash ,and $20,000 addition subscribed for, which subscriptions were have been paid by the end of this mont The business was started in May, 19 Mr. Hartley, the president, having prev ously been an auctioneer and later a cred man. The concern handled jewelry, rug rings and other lines.

The company has a few creditors amo the manufacturers of the East.

## The Diamond Markets.

AMSTERDAM, Aug. 16.—The diamond market here is not active, though conditions may be classed as generally fair. A number of merchants are away on their Summer vacation, and there is a general tendency on the part of every one to wait until the beginning of September before taking an active interest in business. It is believed that within a fortnight the trade will resume its normal condition.

The market remains about the same in regular lines; small rough flat goods have been selling from 5 to 10 guilders a carat, principally to Antwerp cutters. Bort is weaker this week than usual.

LONDON, Aug. 17.—The diamond market here has been active as far as rough is concerned, many sales having been made within the past fortnight. This is probably on account of the advance about to be declared by the "syndicate." The lower grades of diamonds as well as good grades have been finding ready sale, but at prices which show a slight decline.

Pearls are again playing an important part, many big sales having been made, principally to American buyers.

PARIS, Aug. 16.—The diamond trade is suffering from the usual midsummer stagnation, due to the fact that most of the leading merchants are away from the city; necessarily, therefore, sales have been few. There will be a general return to business about the first part of September and it is confidently predicted that the market will then become even better than normal.

Retailers have felt a slight impetus to their business, due to the many large purchases made by the Shah of Persia, on his present visit, some jewelers selling him as much as $15,000 worth one time.

The past few days pearls and other colored stones have had a good sale, this being due to the demand created by the new styles in jewelry.

A local merchant has failed for about $20,000, and at present it looks as if there was little if anything for the creditors.

ANTWERP, Aug. 16.—The effect of the Summer holidays is very apparent on the trade at present. There are less than the usual number of merchants in the city owing to the fact that many have been attending the exhibition at Liege.

The following were among the visiting diamond buyers recently registered at the Diamond Club: Messrs. Kauffman, Lunzer and Goldberg, London; Messrs. Van Praag, Mitacopoulo, Benedikt, E. Mayer, Woelffling, S. de Lion, Prager, Paris; Mr. Rubstein, Warsaw; Mr. Baron, Chicago; Messrs. L. Stern, Cooper and Hofman, New York; Mr. Weiss, Lodz; J. Cohen, Milan; Messrs. Julius Figolor, W. Kohn, Gross, Frier and Hock, Vienna; Messrs. Goretti, Varade and Bertelli, Rome; Mr. Frankel. Frankfurt-on-Main; Mr. Van Gulk, Goch; Mr. Hartman, Sheffield; Mr. Harrisohn, Manchester; Mr. Bawly, Amsterdam; Mr. Schettino, Naples; Messrs. Oakley, Landau and Cohen, Birmingham; Mr. Margolin, St. Petersburg.

## Visiting Australian Jeweler Tells of Conditions of Trade in the Antipodes.

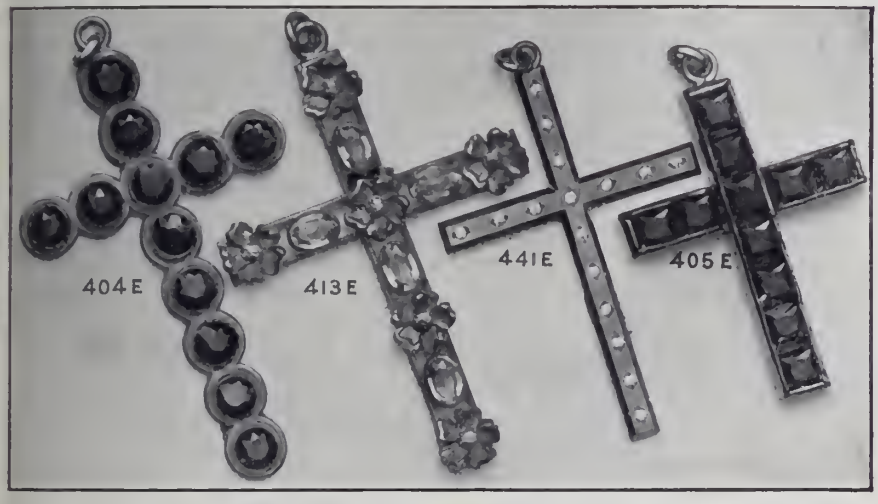
From far off Australia, Arthur A. C. Cocks, of Arthur Cocks & Co., Ltd., came recently to New York to look over the lines of American manufactures in jewelry, silverware and optical goods. He is registered at the Park Ave. Hotel, and has spent the time since coming to the city in diligently ransacking the market.

To a reporter of THE CIRCULAR-WEEKLY Mr. Cocks said that he had been in New York on previous trips in the interest of his house, so that the field is not entirely new to him. The business of his home is of a jobbing character, and the company also acts as agent for manufacturers. The main office is in Sydney, and its branches are in Melbourne and in Wellington, New Zealand, with English headquarters in Birmingham.

"No, I cannot say that Australia is enjoying prosperous conditions just at present," was the reply of Mr. Cocks to a question. "In the last couple of years there has been a period of some depression. Our industrial situation is affected more directly by politics perhaps than is the case in some other countries.

"About three years ago our federal tariff went into effect. As we have few manufacturers, it has not perceptibly increased the demand for labor and has put no money in the pockets of the ordinary people. As a result of its operation the purchasing power of the people is reduced by just the amount paid in tariff taxes, and naturally those who economize cut off first the luxuries, in which jewelry may be classed.

"The jewelry tariff is a 25 per cent. ad valorem duty. To the invoice value 10 per cent. is added, making the net duty 27½ per cent. On watches 10 per cent. is added, the same as in jewelry, to the invoice value, and the duty is 20 per cent. of the total, or a net duty on the invoice value of 22 per cent. There is an undercurrent of belief that a preferential tariff in favor of English goods, the same as now exists in New Zealand, will soon be a live question with us."



In reply to questions as to the sale of American jewelry and kindred lines in Australia, Mr. Cocks said: "Your two leading watches are now largely sold in our country, and some other American watches are also being sold. I believe that we are taking as many American watches as can reasonably be expected. Electro-plated silverware from the United States is also selling well. Some of your manufacturers are now copying those English designs which are most suitable for our market, and in one or two instances Americans are showing ingenuity in presenting new patterns of a character that appeals to our people. In American rolled gold and cheaper lines of gold jewelry, including chains, studs and links, there is considerable business. Optical goods from the United States are in fair demand in Australia. There is a steady call in our market for goods, which, judged by the American standard, would be behind the times, but which are preferred by our people. No strong demand for rimless work in optical goods is evinced in Australia.

"In our towns the line of demarcation

between optical and jewelry establishments is getting more and more marked. The tendency is not to take seriously in either way the man who combines the two lines. In the country districts there is the tendency to combine, because there is not sufficient business in either line to afford a man a living.

"As to gold jewelry and sterling silverware, I see no opportunity for American manufacturers, at least at present. Our people are educated to English standards, and so prefer the goods made in England. The Americans can scarcely make any sales in these lines unless they copy the English styles, which, I believe, they are not inclined to do. Even if they did, the business could scarcely be profitable, because the price of labor in the United States is too high for them to compete successfully.

"Make no mistake about it, the Americans are ahead in all lines that can be made by machinery. That is your forte. It is because of the ingenuity of your machine makers that your manufacturers are capturing our market in the cheaper and lighter lines, but when it comes to art jewelry and wares made by hand your manufacturers are at a serious financial disadvantage with those of Europe. The prices of American sterling silverware, for instance, are much higher than those of English goods.

"The jobbing houses and resident agencies look after the distributing end of the business pretty fully. The retailer can buy from the jobber a large variety of goods, obtaining favorable terms in making payments."

## Newark.

Lawyer William J. Linihan, who wa counsel for Thomas J. Bradley, formerly jeweler at 372 Broad St., Newark, befor the latter became involved in divorce an bankruptcy proceedings, has returned t Newark after a short absence, durin which, it is said, he visited Bradley. Th latter left Newark several weeks ago whe there was an order for his arrest for con tempt of court, growing out of the suit o his wife for alimony and divorce. In th bankruptcy proceedings lawyer Liniha was called as a witness, but he re fused to answer questions on the groun that he gained his knowledge in the confi dential relation existing between counse and client. His refusal has been reporte to United States District Court Judge Lan ning by Referee in Bankruptcy Edwin G Adams.

By the arrest of a man who gives hi name as John Baldwin, in Madison, N. Y last week, the police have recovered $40 worth of jewelry which was stolen abou two weeks ago from the home of Wallac M. Scudder. The police made the arres on information furnished by Robert Schen ermann, proprietor of a Madison jewelry store, who purchased from Baldwin for $ a gold pin worth about $20, and for $1.2 a ring set with amethysts and small dia monds worth about $50. He took them fron the fellow for the purpose of getting pos session of them, and then he notified police man Ryan, who soon found Baldwin. Bald win is now in the Morris County jail.

# JOHN SCHUMACHER

workmanship and design applied to Jewelry stands for the very highest perfection and desirability.

JOHN SCHUMACHER,
Mfr. of HIGH GRADE DIAMOND MOUNTINGS,
64 Fulton Street, NEW YORK.

VERY little talk is needed to sell the Simmons Armilla. The Armilla is its own best argument—to properly display it is to sell it.

This attractive display card is as good as a salesman; placed on your show case or in the window it will assuredly direct universal attention to the Armilla and make sales.

This counter card is 7 by 9½ inches and is printed in brown and green on fawn-colored board, and with the gold of the bracelet makes an exceedingly pleasing color combination.

It is free to everyone who carries the Armilla.

This handsome easel display card is sent free to help sell the SIMMONS ARMILLA.

PROVIDENCE, R. I.

## North Attleboro.

Mr. and Mrs. William F. Maintien have returned from Wareham, Mass.

Mr. and Mrs. Woodbury Melcher have returned from a vacation at Osterville.

Fred. I. Gorton has returned from a business and pleasure trip to New York.

Joseph Irvine has resigned his position as head colorer at the George L. Paine factory.

William Chisholm, of the Bugbee & Niles Co., has returned from a cruise along the Maine coast.

The breaking of a shafting caused the B. F. Freeman shop to shut down for three days last week.

Raymond Wise and Thomas Frothingham returned Wednesday from a two weeks' stay at Cottage City and the White Mountains.

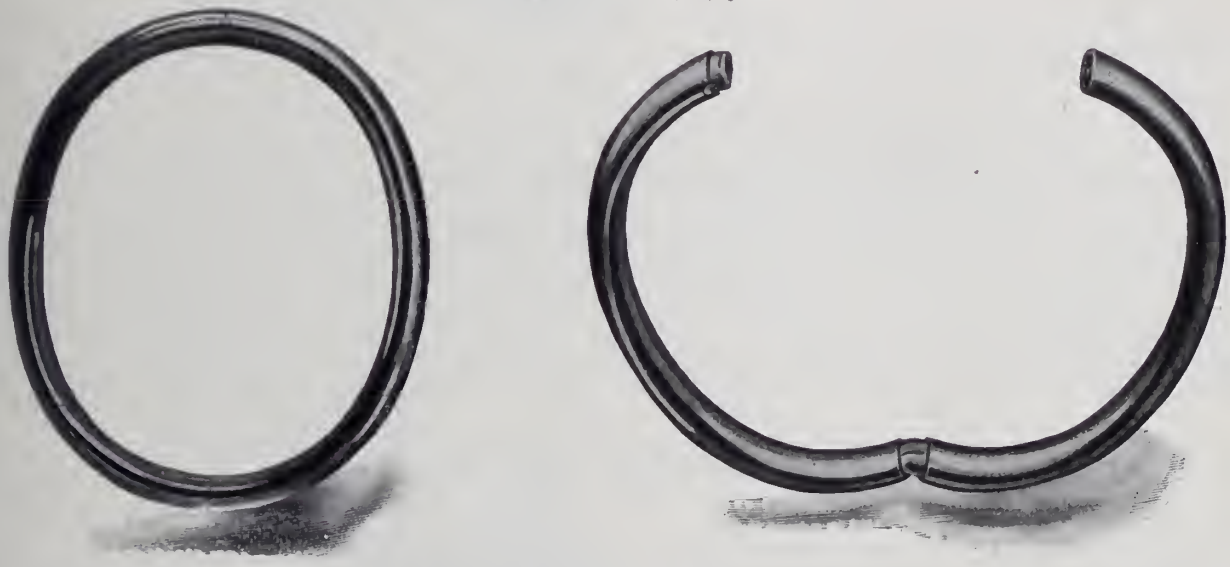
Albert H. Knight, for many years one of the best gold platers in the Attleboros, died Thursday at his late home in this town, aged 74 years.

The selectmen of Plainville, in which town the only industry is jewelry manufacturing, have announced that the population of the town was an even 1,300, 669 males and 632 females.

Harvey G. Fisher, employed at the factory of R. Blackinton & Co., and Miss Maybelle F. Strong were married Wednesday evening. They were the recipients of a substantial purse of money from the groom's fellow employes.

The will of the late Frederick D. Heffron has been presented for probate and allowed. The executors named are, Mrs. Emma F. Heffron, the widow; Mrs. Ordelia Heffron, the mother, and William H. Pond. The will contains no public bequests.

Orin W. Clifford Saturday afternoon won the much delayed jewelers' golf tournament for the French July cup. The contest commenced July 1, but was dragged along because so many of the contestants left on vacations after playing the preliminary round. Mr. Clifford won the possession of the trophy for one year by defeating Mr. Hale, manager of the estate of O. M. Draper, three up and two to play.



The State is making a rigid inquiry into its industries, paying particular attention to the healthfulness of the factories. Wednesday a State inspector made a systematic inquiry into the conditions existing in the local jewelry factories. It was his purpose to ascertain how many of the employes were required to wear glasses as a result of the work of making jewelry, and whether any poisonous substances were used in the factories. He also made careful inquiries about the health of the employes.

Mrs. Mary E. Ellis, wife of a prominent jeweler, who has been an invalid for many years, is now fully recovered and the case has attracted considerable attention. Mrs. Ellis was taken sick in May, 1898, and soon lost all control of her limbs and was about helpless. Physicians pronounced her case a hopeless one, some giving her but a short time to live. A few weeks ago Mr. Ellis left his wife with relatives while he visited the Cape. One day during his absence she was taken with violent pains in her head. Soon afterwards she had a similar spell and now she is able to go about unassisted and feels entirely well.

## Attleboro.

Charles M. Robbins left last week for a two months' trip on the road.

Thomas G. Sadler has been spending his vacation at Narragansett Pier.

Emmons D. Guild, of the W. H. Wilmarth Co., has gone to the Weirs, N. H., for rest.

Ernest J. Qvarnstrom, of Carter, Qvarnstrom & Remington, has returned from an automobile tour of the White Mountains.

John W. Taft, a Brockton retailer, reported to the police last week that his big plate glass show window had been smashed by a vandal.

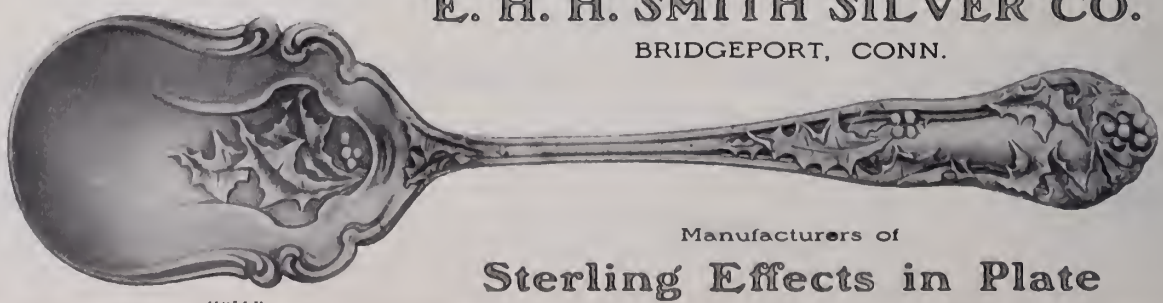
Charles H. Tappan, of the D. F. Briggs Co., is visiting several of the New England race tracks to watch the performance of his swift trotter "Ben Hal."

Frank C. Gray, who for several years held a responsible post in the factory of the W. H. Wilmarth Co., will soon be transferred to the force of salesmen.

Charles Thomas, foreman of the enameling department of the Watson & Newell Co.'s factory, received a handsome chair from his fellow workers on his birthday last week.

William A. Bigelow, of Sturtevant, Whiting & Bigelow, who was critically ill for a long time last Winter, has returned home after spending the Summer at Lake Archer. He has been materially benefited by the outdoor vacation.

Nils Wallenthin, formerly regarded as one of the most expert mechanics on lines connected with the jewelry trade, and later with the Mossberg Wrench Co., has resigned from the latter concern to accept a position with J. M. Fisher & Co.



Joseph M. Bates, of Bates & Bacon, has gone to Cottage City for a period of complete rest. Close application to business has led to extreme fatigue and some illness, requiring for the present entire freedom from all active participation in the affairs of his firm.

---

A. C. Wilson, who covers Minnesota, Max M'Maas, who covers Kansas and Missouri and John Morehouse, whose territory is Iowa, started out on their trips, last week, for the Kennedy Optical Co., Detroit, Mich.

John Hoare, son of Jas. Hoare, has been appointed the general foreman of the glass cutting shops of J. Hoare & Son, Corning, N. Y., to succeed Wm. Allen. Mr. Hoare, who was formerly traveling representative of the firm, has thoroughly familiarized himself with the business since he left the Alfred University two years ago.

## Boston.

N. D. Moulds, of the New Haven Clock Co., was in Boston during the past week.

Joseph Cowan goes west this week on a six-weeks' business trip, visiting Cincinnati, Chicago and several other important Lake region and Ohio Valley cities.

Work was resumed early last week at the O'Hara dial factory in Waltham, after the annual vacation of two weeks. Prospects for the coming season are very bright.

It has been reported to the police that valuable bronzes, statues and busts, have disappeared from the show rooms of the Bradley & Hubbard Mfg. Co., and auction rooms, pawnshops, etc., have been seached in vain for clues, in the hope of apprehending the thief.

Samuel D. Dean, Norwood, whose death was reported last week, was well known in Boston, having worked as watchmaker soon after the Civil War with William Bond & Sons, and later with the oldtime firm of Palmer Batchelder & Co., where he was head watchmaker.

Charles Long and Fred. E. Alexander, two colored porters on the Santa Fe limited, who were in town last Saturday, were held at the point of a revolver till the police arrived by C. Alberts, jeweler, 229 Tremont St., after an altercation over the price of a wedding ring. Long tendered $5 for it, according to the story told to the police, after placing the ring on his finger, and made a move toward the door, but was stopped by the jeweler. A crowd gathered and all three were escorted to a police station by an officer, but were subsequently released.

## Providence.

C. A. Russell, of Irons & Russell, is taking an automobile trip "down east."

F. C. Murray, managing the local office of the Jewelers Association and Board of Trade, is enjoying a two weeks' vacation.

Friends of C. Eugene Platt were congratulating him last week on the fact that he was able to be out after an eight weeks' siege of pneumonia.

Among buyers in town last week were, L. C. Goldsoll, Chicago; Miss K. L. Sullivan, Syracuse, N. Y.; W. A. Kaufman, Chicago; E. C. Denny, Kansas City, and B. L. Bogle, S. Diman, of Sterling, Ill.

The grand circuit meeting this week brought out a goodly number of jewelers both from this city and the Attleboros. A number of members of the trade in both places own "speedy" horseflesh, of which they are reasonably proud.

J. E. Straker, for more than 40 years in the employ of the Gorham Mfg. Co., has retired from active service with the company on a pension. For a number of years he has been the manager of a silverware department. During his period of service with the Gorham company he has been awarded two gold medals for the excellence of his work, one by the Paris Exposition in 1900 and the other was by the St. Louis Exposition last year.

Peter J. Donnelly, until recently with the A. R. Vanderbilt Jewelry Co., Amsterdam, N. Y., has left for a short sojourn at Lake Luzerne in the Adirondacks.

## Columbus, O.

Harry Crecilius, treasurer of the Bancroft Bros. Co., started east Saturday, to spend a vacation at Baltimore, Boston and New York.

T. O. Pickering was called to Sandusky, O., last week, by the illness of his wife, who was visiting there. She was so much improved that he returned home Sunday night.

Secretary J. Y. Bassell, of the Board of Trade, returned last week from the east, where he had been to interest gun manufacturers in the line of adjustable gun sights invented by him and Fred. C. Blenkner, 60 N. High St.

The striking bells of the clock in the steeple of the Holy Cross Catholic church went off duty Aug. 22. This is only the third time in 60 years in which the clock has failed to work. An investigation showed that the cable had slipped off a wheel and caught in the mechanism in such a manner that though the clock ran all right and struck the quarter hours, the hour bells were stopped. Once the clock was struck by lightning and the bells were silent until repairs were made, and another time the string attached to a boy's kite caught the hands and stopped the clock.

Albaugh & Pickering Saturday cleared up a mystery as to the systematic stealing from their show window, which was first noticed about three weeks ago when a chatelaine watch was taken. Nothing was said as the various articles were missed, but Saturday morning when it was found that several lockets had disappeared, it was decided t call in a detective. Just before starting fo the police station Mr. Albaugh saw a smal hole under the window and was impelle to look into it. He found the watch, 1 gold lockets and two rosaries with gol crosses attached. The goods had been car ried there by rats.

Joseph Sculler, 212 E. Main St., Wednes day caused the arrest of a boy in his em ploy, George Jake, aged 13 years. The bo had stolen two gold-filled watches and movement, and admitted the theft whe taken to police station. He will go to th Lancaster Reform School.

## Savannah, Ga.

Jacob Sternberg, of Simon & Sternberg has gone to New York on a business trip

Word was received here last week of th death of J. E. Veal, Jr., of Rome, Ga.

S. E. Theus, of Theus & Co., has bee appointed a member of a committee fron the Retail Merchants' Association to unit with committees from the City Council Savannah Cotton Exchange, Board o Trade, Chamber of Commerce, and othe trade organizations for the purpose of in viting the officials of the Atlantic Coas Line Railroad to a conference, relative t the rumored removal of the railroad shop from Savannah.

Extensive alterations are being made t the exterior of the store of J. Cohen, Read ing, Pa. The show windows will be made three feet deeper, and an entirely new glas front will be put in.

MR. RETAILER:

and

you may be sure these Jobbers were not hypnotized. They knew what they were doing and you will aeknowledge they made no mistake when you see the goods.

Look for the trays with Solidarity Gold Watch Cases in them, they will speak for themselves.

SOLIDARITY WATCH CASE CO.,

ESTABLISHED 1885.

3 MAIDEN LANE, NEW YORK.

GENERAL SELLING AGENTS:

JOHN W. SHERWOOD. FRANK E. HARMER.

LAST week we told you about the quantity of adjusted watches we sold. Now we will tell you the cause.

Almost every large retail dealer in Railroad watches is pushing the sale of ***BUNN SPECIALS*** and ***SANGAMOS,*** because, these watches are ***absolutely satisfactory*** and are now the recognized standard for Railroad service.

For the past three years minimum retail selling prices on these grades have been established and maintained, enabling the dealers to make a justifiable profit, and at the same time give their customers perfect watches at reasonable prices.

We sell to a limited number of jobbers, who cooperate with us in protecting the retail dealers against undesirable competition.

If none of these solicits your business, and if you are not familiar with the quality and prices of our watches, write us.

Minimum Retail Selling Prices of R. R. Grades.

## Albany

The explosion of a lamp in the jewelry store of John Furhman, last week, caused a slight blaze, which was extinguished by the fire department upon the prompt arrival of the engines.

A novel case came up in Schenectady, the other day, when the action of the Anchor Silver Plate Co., St. Paul, Minn., against J. Krank, a local jeweler, was before Justice Wemple in the City Court. The suit is to recover $174, alleged to be due for silver plated ware furnished the defendant in the Fall of 1904. The answer set up was to the effect that the Anchor Silver Plate Co. had not complied with the corporation law of New York or secured a permit to do business in this State, and therefore had no standing in court. The case was set down for Sept. 18.

An incendiary fire on Aug. 14 in the home of John Krank, the Schenectady jeweler, has given the Police Department, the Coroner and the District-Attorney a lively job, and although traces of incendiarism were everywhere apparent, no progress in running down the culprit or culprits has been made. Krank has employed private detectives to look up evidence, and meanwhile the insurance companies have refused to pay the loss, claiming that the authorities have failed to make a proper investigation. Mr. Krank says the police authorities tried to connect him with the incendiary fire, but he says he can prove by 50 witnesses that he was 226 miles away from Schenectady at the time. According to the investigation so far made, some time between Aug. 9 and Aug. 14 some one entered the Krank home, at 23 Wendell Ave., and played the part of the firebug. Those who got into the house used gallons of kerosene, besides cans of wood alcohol, varnish, a large quantity of excelsior, several boxes of matches and wax tapers. Clothing belonging to the Krank family was stolen, and notwithstanding there were innumerable clues for the authorities to work upon, they have thus far obtained no light on the fire.

## Canada Notes.

G. M. Mayberry, Wetaskiwin, Alberta, is removing to Lloydminster.

B. & H. B. Kent, Toronto, Ont., have made extensive alterations to their establishment.

Out-of-town buyers visiting Toronto, Ont., last week, included: Wm. H. Hillyer, Canton, Ont.; William Busby, Oakville, Ont., and Mr. Felt, Oshawa, Ont.

George Kessler, who was recently arrested in Toronto, Ont., charged with the theft of jewelry at Wetaskiwin, Alberta, has been taken to that town to stand his trial.

John L. Robertson, of the Dominion Optical Co., Toronto, Ont., died at the Western Hospital, Toronto, Saturday, Aug. 19, from paralysis. He was born in Ireland in 1839, and came to Canada in 1889, and was for many years engaged in the publishing business. He was a prominent temperance worker. He leaves a widow and a family of six.

# DIAMONDS

WHEN you need mounted diamond pieces, large or small, if you will order of us, stating what you want, and about the prices you want to pay, we will convince you that our stock, both in variety and range of prices, is adequate to supply your wants.

Diamond Rings,
Diamond Pendants,
Diamond Scarf Pins,
Festoon Necklaces,
La Vallières.

Catalogue illustrating these goods sent on request.

HAYDEN W. WHEELER & CO.,
TWO MAIDEN LANE, NEW YORK.

## Optical Notes and Briefs.

C. L. Barry recently opened optical parlors in the Dowdell block, Clarinda, Ia.

Harry Lovoie, optician, has opened an office in the Jenkins building, Whitman, Mass.

The Minneapolis School of Watch Engraving and Optics, Minneapolis, Minn., moved recently from the Commercial building to the Hulet block, at the corner of 7th and Hennepin Sts., where it occupies the entire seventh floor.

The picnic of the Rochester Optical Society, which was to have been held Saturday, Aug. 19, has been indefinitely postponed. So many members were on their vacations or otherwise unable to attend that is was decided to call it off for a time.

Mr. Jones, optician, Tempe, Ariz., is now enjoying a month's vacation. He is making an extended stay in San Francisco, Cal., and is taking in all of the interesting places in and around that city. Mr. Jones is taking the State examination just by way of keeping himself in practice.

Capt. Henry Lomb, of the Bausch & Lomb Optical Co., Rochester, N. Y., returned home, last week, after a visit of several months to Germany and other European countries, largely undertaken for the benefit of his health. Mr. Lomb is in good health and enjoyed his trip abroad to the fullest extent.

The store of A. J. Fisher, 156 Virginia Ave., Indianapolis, Ind., was broken into, last week, and spectacle frames valued at $50 were carried away. The trays that held the frames were found near the Union track by Detectives Gerber and Trimpe. It is believed that the burglars escaped on a freight train.

George M. Cooley, Sidney, N. Y., has on exhibition a pair of spectacles which have been an heirloom in the family for a century and a quarter. They are a curiosity when compared with modern spectacles. The frame is made of solid iron with hinges in the center. The frame is heavy enough to make no small load on the face of the wearer. The lenses are only about half the size of those in use nowadays.

San Francisco (Cal.) opticians have organized the Southern California Optical Society, with the following officers: President, A. L. Apffel; vice-president, J. W. Fuller; secretary, T. N. Dychut; treasurer, J. C. Fleming; executive board, H. H. Hooper, Whittier; G. A. Picon and Bruce Blackman, Los Angeles; E. Steinman, Pasadena, and O. G. Tullis, Santa Monica. The object of the society is to protect and better the condition of all registered optometrists in Southern California.

Bert Lissner, the Oakland, Cal., optician, who was arrested several weeks ago charged with violating the California State Optometry law, has been granted another continuance until Sept. 1 by Police Judge Smith. Lissner has been granted several continuances pending the decision of a similar case which has been appealed to the Supreme Court. If the other case is decided in favor of the defendant, Lissner will be dismissed, but should it go against the defendant Lissner is prepared to appeal his own case and fight it out on the lines of a test case.

# AN IMPORTANT ANNOUNCEMENT CONCERNING OLD ENGLISH BLACK JACKS

¶ The Gorham Company desires to direct attention to its extremely novel and original collection of Loving Cups and Tankards, offered under the name of "Old English Black Jacks."

¶ These have been designed especially to meet the very widespread demand for articles of this nature which shall be as dignified and as decoratively effective, but yet not so costly as though fashioned of solid silver. They are made closely to simulate the Old English "Black Jacks" and "Leather Bottles," those characteristic drinking utensils of the sixteenth and seventeenth centuries, which are to-day so eagerly sought after by collectors of artistic rarities.

¶ These strikingly original examples of an artistic revival are to be found in all sizes from the drinking mug to the imposing Loving Cup, the tall Tankard or the well-proportioned Flagon. The bodies are of heavy hand-worked leather, the linings of red copper, the mountings, including the shields for monograms, inscriptions or armorial bearings, of sterling silver.

¶ Black Jacks are made exclusively by the Gorham Company for the legitimate jewelry trade. They will be advertised extensively in the early Fall magazines, and as they can be sold at very moderate prices, a popular demand will undoubtedly be created for them. The supply must of necessity be more or less limited, and it is suggested that orders be placed as early as possible to insure a reasonably prompt delivery.

ACCORDING to news received from England last week the Goldsmiths' Company has decided to appeal from the judgment recently rendered by Justice Channell in regard to the hall-marking of foreign watches. As already told in full in these columns, the judgment was to the effect that a watch was not technically "plate" under the law, and that the statutes requiring the marking of foreign plate did not, therefore, apply to watches or watch cases. Despite the fact that many of the leading men of the English trade, as well as the leading journals of the British jewelry trade, practically agreed that the justice's decision was a common sense interpretation of the law, it is probable that the question at issue will be carried up on appeal as far as possible before action is begun to obtain relief by legislation. According to an English authority should the Appeal Court uphold Justice Channell, the House of Lords will be asked to pronounce a final opinion on the case. If the Lords uphold the decision handed down, the Watch Trade Section of the London Chamber of Commerce will immediately introduce a bill to remedy the defect in the law.

### To Promote Export Trade.

MANUFACTURERS will be interested in the communication of a well-known business man of New York to the Bureau of Manufactures regarding the methods followed by American manufacturers whose products are shipped abroad. It is represented that for years American manufacturers have intrusted their products to commission houses in this and foreign countries, and that some of them have placed their goods with English commission houses exclusively. The policy of these English commission houses, it is said, is to prevent direct communication between manufacturers and buyers, and in consequence very few American manufacturers have established a direct trade.

Controlling, as they do, in a large measure, the trade of Europe in manufactured products, the English commission houses naturally give preference to their own manufacturers. Within the past 12 months export orders have been comparatively small, and some of our largest manufacturers sent agents direct to Europe to learn the reasons for this decline. It was found, as a result of the inquiry, that foreign commission houses, dissatisfied with the rate of commission, had sold American goods under conditions which enabled English and German manufacturers to sell competitive products of their respective countries to the prejudice of the United States.

To remove these obstacles, and with a view of bringing American manufacturers in direct contact with foreign actual buyers, it is proposed to establish in New York an organization which will undertake to sell direct to the actual trade for a commission only. The goods will be sold in the name of the manufacturers, and thus each manufacturer will be brought into direct communication with importers. In this way our manufacturers will learn the actual needs of the various foreign markets, and it is believed that this cannot fail to infuse new life into the export trade. In connection with the organization there will be a responsible fiscal agency to guarantee the credit of foreign buyers, which agency will make an advance of 80 per cent. on the net amount of shipments, the remaining 20 per cent. to be paid after payment for the goods.

### Jewelry Seizures Made Last Week for Violations of Customs Laws.

When the *Kronprinz Wilhelm* arrived at her pier in Hoboken, N. J., one day last week, Moritz Mordell, who says that he was until recently a manufacturing jeweler in St. Petersburg, Russia, was detained as he stepped off the ship. Custom Inspector Timothy Donohue then took from the Russian's pockets a quantity of jewelry valued at $1,000, comprising unset stones, gold chains, pins, rings, studs, brooch settings and earrings. Mr. Mordell denied that he had any intention of defrauding the government, and said that as the articles were intended for distribution in the form of presents among his relatives in this country he did not suppose that they were dutiable, or that it was necessary for him to declare them to the customs authorities.

This explanation was not satisfactory to the custom inspector, who sent the jewelry to the seizure room in the appraisers' warehouse on Washington St. Mr. Mordell was then permitted to go to Boston. He has not been arrested, and it is not known that the department contemplates any criminal proceedings in connection with the seizure. Mr. Mordell has served on the department notice of his intention to appeal to the Secretary of the Treasury for an order directing the return of the articles that were taken from him. It is possible that there will be no legal developments until the Secretary of the Treasury acts.

Mr. Mordell, who was accompanied by his wife and two children, is 32 years old. He said that he left Russia because of the persecutions of the Jews, and that he intended to make his headquarters for a while with his brother-in-law, Barnard Levinson, 3 Cunard St., Roxbury, Mass. Despatches from Boston say that the Levinsons corroborate Mr. Mordell's statement. They had never seen him until he reached their home, a few days ago, but had corresponded with him for 20 years or more.

Among passengers on the Hamburg-American steamship *Pennsylvania*, which arrived at Hoboken last Thursday, was a man named Nicholas Nelsenson, who passed the examination satisfactorily, and was walking along the pier, when a customs inspector noticing that one of his pockets bulged, detained him and took out a good-sized paper package; in this were three small diamond rings concealed under a quantity of newspaper cuttings. While the inspectors were examining the package the man ran away, leaving in their possession the rings, which are valued at $170. Unless he returns to claim them they will be sold at auction.

CHICAGO, Aug. 28.—The Federal authorities yesterday arrested Kirza Werner, a woman, said to be an accomplice of Henry Hoffman, whose arrest on the charge of smuggling diamonds was mentioned in last week's CIRCULAR-WEEKLY. The woman who was arrested yesterday says that she is Hoffman's wife.

## New York Notes.

Oscar Sherman, who had a store at 1201 Broadway, Brooklyn, has gone out of business.

Frank Sloan, of Sloan & Co., who is passing his vacation at a camp in Maine, will be back about Sept. 5.

Tiffany & Co. made the silver case which held the bottle of champagne used in the launching of the battleship *Kansas*.

Jay Taylor Ashby, for many years with the Gorham Mfg. Co., is now with Reed & Barton Co., Fifth Ave. and 32d St.

L. W. Levy, of L. W. Levy & Co., 580 Broadway, left last Saturday for Europe on the *Kroonland* in search of novelties.

A fraud order was issued, last week, by the Postoffice Department against the Fidelity Publishing Co., 32 E. 23d St., New York, which put up watches as premiums.

In a page article descriptive of East New York's industries, published in last Sunday's Brooklyn "Daily Eagle," is a picture of the Solidarity Watch Case Co.'s factory.

J. H. Noyes, the secretary of the Jewelers Security Alliance, will return in the latter part of this week from a vacation passed in New England, chiefly in bicycling.

Leo Wormser, of the Julius King Optical Co., returned last week, with his wife, from Canada, where they had passed a couple of months, spending most of the time in Montreal and Toronto.

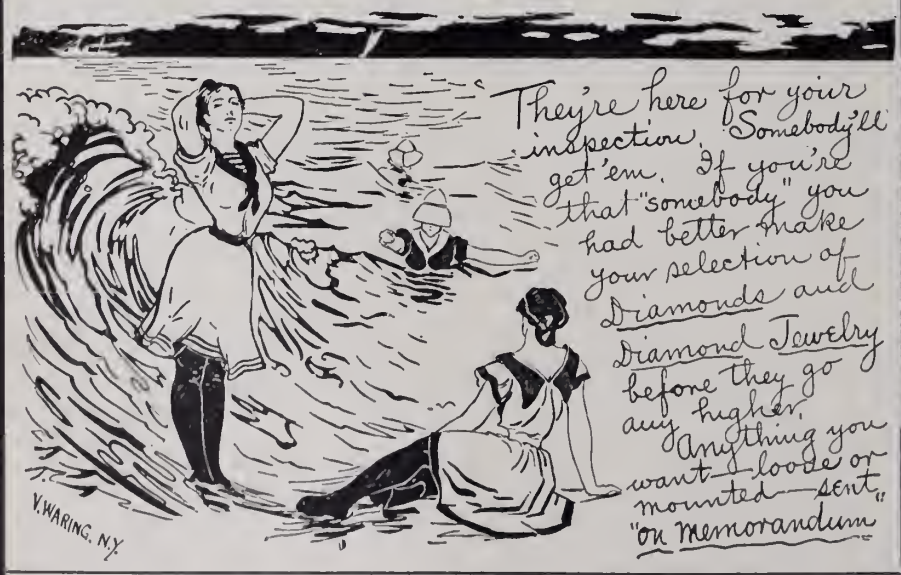
Sloan & Co. will next month occupy their new factory at Mount Pleasant and Third Aves., Newark, N. J., where they will have larger quarters. Additional machinery will be installed and a larger force of men will be employed.

Joseph Brown, of Joseph Brown & Co., Chicago, has been in New York for several days, registering at the Astor House, and after leaving here this week will go to Providence, R. I., where he will make his headquarters, during his visit, at the Narragansett Hotel.

Simon Frankel, of Joseph Frankel's Sons, is taking advantage of the usual August holidays in London and Paris, where he has been looking after the branch office of his house, to enjoy a trip with his family through Wales and Scotland, visiting scenes of historical interest in those countries.

Tiffany & Co. obtained last week the contract for furnishing the silver set which will be presented by the State of New Jersey to the battleship bearing its name. A large number of designs were submitted in competition. The successful drawings, presented by the New York company, were made by F. W. Whitehouse. The cost of the service is to be $10,000, and the set is to be ready when the *New Jersey* goes into commission.

In a current number of "The Technical World Magazine" is an article by Fritz Morris on "The World's Clocks." The writer describes a number of the notable time pieces from the days when Peter Henlein was engaged in improvements at Nuremberg, Bavaria, down to the present time. The article is profusely illustrated and among the pictures are representations of the time ball on the Western Union Telegraph building, the clock of the *Herald* building, and the clock in the sidewalk in front of Wm. Barthman's store, Broadway and Maiden Lane, all in New York.



Samuel Heller, of L. Heller & Son, is in receipt of many expressions of sympathy from his friends, owing to the illness of his little daughter, Helen. She had an attack of appendicitis five weeks ago, which necessitated an operation, and since then has been confined to her bed. Mr. Heller abandoned his proposed western trip on this account, but hopes that, with the recovery of his child, he will be enabled to call on his friends in the near future.

Tannous Azeez, who was in business at 551 Boardwalk, Atlantic City, N. J., died, last Sunday, at the Roosevelt Hospital, New York. Mr. Azeez was in business at Atlantic City for four or five years and was quite well known in New York. He was an Assyrian, and it is said that about 40 years ago in a battle with the Turks he received a wound, which troubled him all the years up to the time of his death, and finally necessitated the operation under which he died.

On the charge of secreting a diamond ring on which there is a chattel mortgage Fred Buehl, 195 Cornelia St., Brooklyn, was arrested last Friday, the complaint being made by Aaron Baych, 1412 Broadway, Brooklyn. Mr. Baych said that the young man called at the store and selected a ring worth $44, agreeing to pay $1 a week until the debt was liquidated. After making four payments Buehl failed to meet his further obligations, and the jeweler was unable to get back the ring. At his preliminary examination in the Gates Ave. Police Court the prisoner said that he had given the ring to a girl, and had not the courage to ask for its return. He said that it was his intention to pay the balance due the jeweler if the latter would wait. The young man was paroled for further examination this week.

Charges are made that some of the pawnbrokers in New York City make a practice of extracting from jewelry intrusted to them diamonds or other precious stones, and substituting paste gems. The subject was brought to public attention in the Court of Special Sessions, last week, in a case tried before Judge McMahon. A young man was sent to the penitentiary for stealing a pair of diamond earrings. He told the police that he had pawned the earrings at Louis Rosenberg's pawnshop, 386 Eighth Ave. The pawnbroker was summoned to court and required to turn the earrings over to the owner, who learned the next day that paste gems had been substituted for the genuine stones. The judge, being notified, again sent for the pawnbroker, who said that he had given the thief $25, having been deceived by the fictitious gems. The judge called the attention of Acting District Attorney Nott to the case, saying that there should be an investigation of this and similar instances by the Grand Jury. A short time ago, said the judge, a friend, who is a member of the Manhattan Club, had lost a diamond and emerald pin valued at $1,800, which had been stolen by a bellboy and pawned. The pin was returned to the owner, who was highly pleased, until a few days later when he went to a jewelry house to have the stones reset and learned that they were imitations. The judge said that in his opin

ON MEMORANDUM

CROSS & BEGUELIN

*Importers and Cutters of Diamonds and Precious Stones*

ion the pawnbrokers of New York are not being deceived by men who get loans on glass imitations. The explanation of the disappearance of the real gems, he said, is that some pawnbrokers make substitutions. One of the largest pawnbrokers in the city said that if such substitutions are made, it is only in the smaller concerns. He did not believe that any such dishonest methods can be charged against the better known houses in this line of business, or that anyone would credit such charges if they were made.

Leon Hirsch, 37 Maiden Lane, has leased a portion of the building formerly occupied by the Courvoisier Wilcox Mfg. Co., in Newark, N. J., and will here manufacture watch cases, this factory being additional to his New York plant.

One man was killed and several seriously injured, Monday, by the fall of a section of the balcony in the old Knickerbocker Athletic Club building, Madison Ave. and 45th St., which is being remodeled for the Tiffany Studios. An investigation is being made to determine the cause of the accident.

Alderman John B. Wood, of C. F. Wood & Co., has announced his intention of resigning his seat in the Common Council of Newark, N. J., He has represented the 11th Ward for a number of years, but his private business interests and the poor state of his health now forbid his giving time and attention to the duties of the aldermanic position. He denies that his resignation as an alderman is connected with the talk of making him the Essex County nominee for State senator, and says that he does not desire this nomination.

M. M. Heacock has sold his business in Newberg, Ore., to J. Mills.

### New York Jewelers Trying to Discover Whereabouts of Robert Castelberg, Jr.

Robert Castelberg, Jr., formerly of the Castelberg National Jewelry Co., which has branches in Washington, D. C.; Baltimore, Md.; Philadelphia, Pa., and Norfolk, Va., has been missing for some time, and a number of New York diamond importers and jobbers in watches and jewelry, from whom he made purchases, have been looking for him, thus far unsuccessfully. His principal creditors in New York are Bonner & Co., 51 Maiden Lane; B. H. Davis & Co., 68 Nassau St., and Sol Lindenborn, 170 Broadway. Charles Marx, 37 Maiden Lane, is a creditor in a smaller amount, and there are said to be some other small creditors. Detectives have been employed in an effort to trace Mr. Castelberg's movements.

A conservative estimate of the amount owed by Mr. Castelberg in New York is $25,000, but, according to one report, Castelberg owes fully $50,000 to a single concern, with proportionately large amounts due to other firms. The merchants directly affected adopted a policy of silence, which naturally led to reports that are probably exagerated.

Castelberg was active in the management of the Washington installment business of his family until last March, when he withdrew with the consent of his father. After that he looked about for an enterprise in which to engage, and after a time came to New York, buying diamonds, watches and jewelry on memorandum. It is said that he was last seen by his friends July 27. The New York creditors, it is now learned, became suspicious Aug. 10, when one of the firms made a call for the diamonds given to Castelberg, and there was no response.

Opinions differ as to the cause of Mr. Castelberg's disappearance. One theory is that he has met with foul play.

### Loss of Jewelry Salesman's Trunk Reported from Portland, Ore.

Word was received in New York last week that a trunk containing $10,000 worth of jewelry belonging to a Chicago wholesale jewelry house and in possession of a traveling salesman for the firm, had been stolen somewhere between Tacoma and Portland. When the salesman arrived on Northern Pacific train No. 7, he went to the Portland Hotel and showed the check for his trunk, which had been sent ahead on another section. A trunk not containing the jewels and entirely unlike the one checked at Tacoma was brought to his room, but it bore the same number check.

A search of the baggage room at the Union Depot failed to reveal the missing trunk. The matter was then reported to the police.

"Gems, Jewelers' Materials and Ornamental Stones of California" is the title of a book of 172 pages written by George F. Kunz, of Tiffany & Co., New York, and just issued by the State Mineralogist at Sacramento. The book is illustrated with pictures showing notable gems found in the State and scenes of the discoveries. One of the full page illustrations shows an autoprint of a Kunzite crystal after it was exposed for five minutes to the Roentgen ray. In the text is an interesting review of the development of the precious stone fields in the State, with a concise description of the geological formation and an explanation of the scope of the work carried on by the California State Mining Bureau.

## FRED. W. LEWIS & CO.,

IMPORTERS AND CUTTERS,

1 Maiden Lane, - - - New York.

## Pittsburg.

M. A. Gallanger has opened a store at 4507 Liberty Ave.

Dawson B. Adams and his wife have been spending a short vacation at Atlantic City.

O. C. Graf, of Graf & Niemann, is spending his vacation in the Blue Ridge Mountains.

John M. Roberts has gone to the Adirondacks to spend the remainder of the heated term.

A. W. Levy, New York, spent several days in Pittsburg last week, being called here on account of the serious illness of Samuel Weinhaus.

E. A. Bloser, New Kensington; L. Furtwangler, Greensburg, and J. J. Schmidt, of Turtle Creek, were among the out-of-town merchants who visited this city last week.

Samuel Weinhaus, of S. & B. C. Weinhaus, is seriously ill with pneumonia, and last week his condition was such as to cause great worry to his friends and relatives.

The Guarantee Mfg. Co., of Pittsburg, was incorporated Friday at Harrisburg for the manufacture of jewelry, medallions, etc., with a capital of $5,000. The directors are Harrison D. Sterrick, William Roberts and Frank J. Hart, all of this city.

The police last week located at a pawnbroker's office in Wylie Ave., between Fifth and Sixth Aves., a large amount of jewelry which had been stolen by William Rager, of Homestead, Pa., who pleaded guilty to a charge of robbery and was held in the sum of $1,000 bail for court. The pawnbroker in question will be arrested if he does not turn over the jewelry to the police, so the police officials say.

The Merchants' and Manufacturers' Association of this city has completed all arrangements for its fifth outbound trade excursion to be taken in October. The following towns will be visited: Greensburg, Derry, Latrobe, Blairsville, Indiana, Windber, Ebensburg, Patton, Barnesboro, Hastings, Philipsburg, Houtzdale, Osceola Mills, Tyrone, Altoona, Huntington, Everett, Mount Dallas, Bedford, Cumberland, Hyndman, Meyerdale, Somerset, Johnstown, Mount Pleasant, Scottdale, Jeanette and Irwin. All the towns are in this State except Cumberland. The association is now conducting a series of inbound excursions, out-of-town merchants being rebated one per cent. of the amount of their purchase, provided the amount does not exceed the cost of the railroad ticket.

The stock of the Prosser Optical Co., at 220 6th St., recently attached, has been sold by the Sheriff and the judgment satisfied. Loftis Bros. & Co., Chicago, have taken possession of the store, which undoubtedly contains the handsomest fixtures in Pittsburg, costing, as they did, between $7,000 and $8,000. The store has been opened for business with a full line of jewelry. R. E. Prosser, who was the manager of the company, becomes manager of the optical department for Loftis Bros. & Co. Just what shape the affairs of the Prosser Optical Co. are in is not generally known, because Mr. Prosser, when seen, refused to explain or declare. H. A. Murray, Chicago, who will manage the jewelry department, arrived in the city last week. Joseph Loftis also arrived in town to look after the opening of the store. Mr. Prosser, who had opened

emporary quarters in the Smith block, just across the street from the Prosser Co.'s former headquarters, has abandoned his office and taken up his new position with the Chicago firm.

Since the publication of the account of the capture of Howard Hall in the Graf & Neimann store, 210 6th St., as told in last week's issue of THE CIRCULAR-WEEKLY, a different story has come to light. Hall was really captured under the show window in the front part of the store, where he had hidden for three hours, and not under the stairs, as given out by the police. Mr. Niemann called at the jail last week to see Hall, whom he charged with entering a building with intent to commit a felony. Hall made a confession of his intentions, saying he had gathered up everything he could carry, even dumping all loose jewelry taken from the show cases, mostly silver goods, into four delivery baskets, intended taking the stuff out that night. Hall is being held to await the action of the Grand Jury, and he will probably get a heavy sentence.

Charles Glich, alias "Lowenthal," whose exploits in passing bogus checks on certain jewelers in Pittsburg, Washington and elsewhere has been told in previous issues of THE CIRCULAR-WEEKLY, will be brought back to Pittsburg should the authorities at Washington release him. Goddard, Hill & Co. have placed their case in the hands of Superintendent of Detectives Thomas A. McQuade, who is in correspondence with the authorities at Washington. It is said that there is some talk that Glich, who was known here as R. Heer, will make restitution, but Mr. Hill said that if Glich makes good in the east he will have to make good here as well or else he will be compelled to come to Pittsburg and face the charges against him. Mr. Hill also has information to the effect that Glich is also wanted by several New York jewelers. Even if Glich should be punished at Washington, it is intimated that he will have to come back here and stand trial.

Superintendent of Detectives Thomas A. McQuaide, of Pittsburg, paid a compliment to THE CIRCULAR-WEEKLY Saturday when he said without solicitation: "Every detective in the country and every jeweler should read this creditable trade paper, as an edification to themselves and a protection to their interests." His statement was the result of the publication of the work of Charles Glich and Howard Hall, whose crimes were told of in the last issue, when pictures of the men were published. "When I was a front office man," said Detective McQuaide, who is now at the head of the local detective bureau, "I used to secure the paper wherever I could get it and watch for news relative to the movements of jewelry swindlers. Every detective in the country should read it. The publication of the doings of these men and the presentation of their photographs does much good and aids the detectives in their work. The giving of details in the movements of thieves and the plans they use, is all valuable to us and to the jewelers. It informs us about the manner in which a job is being 'pulled off' and we can notify jewelers to be on the lookout for men working such a game. The information is valuable and serves to protect the trade everywhere."

## TO WHOM IT MAY CONCERN:

Everyone knows that specialties in Precious Stones and Pearls are not to be picked up every day; no one knows what day they may appear in the market.

A dozen short trips to Europe might not hit upon the accepted time.

In view of these facts, does it occur to you that a reliable expert of 27 years' experience, *always* on the *spot*, and continually on the *watch*, can serve your interests to great advantage?

Both time and money can be saved by collecting your goods in advance through the only American Commission Merchant in Precious Stones and Pearls located in Paris.

## DIAMONDS, PEARLS AND PRECIOUS STONES

MEMORANDUM ORDERS SOLICITED.

## Connecticut.

Edward McDonald, for several years a foreman in the employ of Rogers & Hamilton Co., Waterbury, died Wednesday at that place, aged 60 years.

The wife of Gen. Geo. H. Ford, New Haven, arrived in New York, Thursday afternoon, on the *Deutschland*, after having enjoyed a sojourn in Europe.

Fred J. Mueller, with the International Silver Co., Meriden, recently returned from a trip to Atlantic City, N. J., where his family has been spending some time.

R. Reed Gwillim, with W. V. Blair, Meriden, has just returned from a 10 days' trip to different places in New England. Mr. Gwillim was accompanied by his wife.

C. Howard Daley, Danbury, is displaying in his show window the trophy cup which he has offered for the competition between the Pahquioque and West Danbury Gun Clubs.

The E. Howard Clock Co., Boston, Mass., was recently awarded the contract to supply a tower clock to the Record building, Meriden. The dial, which will be illuminated at night, will have a diameter of four feet.

Samuel Dodd, president of the International Silver Co., who had been confined to his home by an attack of congestion of the lungs and pneumonia, is reported to be convalescent.

The F. L. Wilson Co., Danbury, is making a special display in its show window, consisting of a reproduction of the seal of the city of Danbury, in fancy pins and souvenir spoons.

About 80 employes of the Parker Clock Co., Meriden, Conn., and their friends held an enjoyable outing Wednesday at Community. The diversions included boating, bowling, dancing and lunch in the Casino.

The Bradley & Hubbard Foremen's Outing Association, composed of employes of the Bradley & Hubbard Mfg. Co., Meriden, recently gave an excursion to Steeplechase Island, Bridgeport, which was largely attended.

William Midgley, who came from England several years ago and entered the employ of the Middletown Silver Plate Co., Middletown, as an engraver, was found dead in bed at his home in Middletown, Wednesday. The deceased was 67 years old.

Sam Berhowitz and Isaac Rosenberg were taken into custody last Wednesday, in New Haven, on a charge of selling and offering for sale cheap jewelry at prices above its intrinsic value. When searched at the local station house, a large number of cheap watches, pins and rings marked 14 karat were found in their possession.

The employes of factory "P," International Silver Co., held an outing and clam-bake yesterday at Toelles. Much credit is due to the committee in charge of the affair. President Geo. E. Bampton and Secretary Geo. A. Lehoullier. The Reception Committee comprised S. Stevens, C. S. Allen and G. E. Bampton; Committee on Sports, D. C. Dudley, P. H. Bridget and Morris Slater. Thomas Nagel acted as sergeant-at-arms.

---

A. F. Plenker & Co., have bought the stock and business of E. V. Speer, at Boise, Idaho.

# THE GIANT OF COLLAR BUTTONS

## IN QUALITY, IN SALES.

The Standard American Collar Button.

**Millions of Krementz One-Piece Collar Buttons made, and are sold all over the world.**

**WHY?** *Because* of their HIGHEST QUALITY, BEST CONSTRUCTION, GIVING THE MOST WEAR AND GREATEST COMFORT and their IRON-CLAD GUARANTEE.

To verify this we invite the trade to read **"The Story of a Collar Button, with Illustrations,"** which may be had **FREE** for the asking, and to try the experiment suggested on page 5 of that booklet, by which all may easily determine the exact amount of 14 K. gold in Krementz plate.

**Extract from "Printers' Ink," Nov. 23, 1898.**

The Little Schoolmaster now suggests, to every pupil in his class, to send a two-cent stamp to Krementz & Co., 49 Chestnut Street, Newark, N. J., and ask to be favored with a copy of their leaflet. "The Story of a Collar Button." Afterward, if any pupil will send to *Printers' Ink* another leaflet, new or old, that is half as good as this one, or that approaches it in excellence, the deserving student will be rewarded with one of *Printers' Ink's* souvenir spoons as an acknowledgment of his discovery and contribution. "The Story of a Collar Button" is the best piece of advertisement construction that has come to *Printers' Ink's* attention in the year of our Lord 1898.

**Should you wish to utilize this booklet to increase your collar button business, we will, on receipt of your order, print your card upon and send you a quantity of them.**

**The several qualities of Krementz One-Piece Collar Buttons are stamped as follows, ON BACK.**

Patent Sustained by United States Supreme Court.

**Quality and Construction have made Its Reputation.**

**All Krementz Collar Buttons—of every quality—are manufactured by**

# WESTERN DEPARTMENT

Western Office:
204 Columbus Memorial Building,
Chicago.

Telephone:
4079 Central.
Chicago.

Vol. LI. CHICAGO, WEDNESDAY, AUGUST 30, 1905. No. 5.

## Chicago Notes.

Herbert W. Allen visited Minneapolis last week.

Sol. Hess, of Rettig, Hess & Madsen, is on a long western trip.

D. A. Wilkins, with the Ostby & Barton Co., made a trip to the northwest last week.

The Bauman Loan Co. has opened a new branch at 72 Madison St., under the name of the Bauman Jewelry Co.

Mr. Teichman, credit man for the R. Wallace & Sons Mfg. Co., has returned from a vacation in Michigan.

G. W. Milligan, representing the Quaker City Cut Glass Co. and the St. Louis Silver Co., is on a trip to the Coast.

F. E. Blackburn, formerly for about five years manager of the Colonial Jewelry Co., Atwood building, has been succeeded by R. N. Blair.

Detectives from Chicago are in Pittsburg, where they went to bring back three boys, said to have robbed a State St. department store of $700 worth of diamonds.

The jewelry shop of Henry E. Cohen & Co., formerly Cohen & Weinman, in the Republic building, is closed on account of the foreclosure of a chattel mortgage on the machinery.

R. E. Jensen, of Jensen Bros., Milwaukee Ave., will return from Europe about Sept. 1. Mr. Jensen has been away since May 16, and has made a trip through Denmark, Germany and England.

Col. T. P. Moody, the jewelry auctioneer, has returned with his family from West Baden, Ind., began an auction sale, Saturday, at Ludington, Mich., for the J. E. McCourt Jewelry Co.

The Chicago salesrooms of the M. S. Benedict Mfg. Co. have been removed to the sixth floor of the Silversmiths' building. E. H. Banker, the vice-president, has returned from a two weeks' eastern trip.

The American Express Co. has received many complaints recently that small packages have not reached their destination. Last week J. E. Hurst, a driver for the company, was arrested for the theft of a pair of opera glasses.

The Mutual Bank, the newest State banking institution in Chicago, will open Oct. 1 in the Heyworth building. Otto Young is chairman of the Board of Directors. Among the stockholders are C. D. Peacock, Benj. Allen and J. P. Byrne, of Lyon & Healy.

Charles Moe had a very unique ring made up the other day. It is composed of two large diamonds set half the circumference apart. One stone weighs 4¾ carats, the other weighs 2⅞ carats. When the wearer is tired of displaying the larger stone he can turn the ring around and show the smaller one.

Aaron Feldenstein, in the Chicago Savings Bank building, is the wearer of another remarkable three-stone diamond ring. The stones are immense in size and were set by L. J. Eckhardt. The setting is of gold, silver plated and then oxidized, giving it the appearance of gun-metal. The effect is startling.

At the inquest held over the death of Mathias Mamer, the W. Harrison St. jeweler, who was murdered by a policeman named Benson, two weeks ago, Christopher Mamer, brother of the dead man, accused the police of neglect of duty in not finding the watches claimed to have been stolen. The repair shop run by Mamer is for sale.

Dave Weinstein, formerly in the jewelry business here, who recently bought out the Raine Jewelry Co., Cripple Creek, Colo., has been in this city for the past two weeks buying Fall stock. Mr. Weinstein will return to Cripple Creek with his wife, who remained in Chicago pending the numerous improvements made in the Cripple Creek store.

John Johnson, said to be an engraver, was arrested here last week on a charge of attempting to kill his sister. J. Johnson, an engraver, in the Chicago Savings Bank building, has no connection whatever with the man arrested, and was busy all last week answering questions regarding the identity of his namesake, whom he does not know.

Wm. C. Reinack, manufacturers' agent, has given up his office in the Republic building and has gone to New York. F. B. Tinker, retail jeweler, has leased the same office and represents the Corning Cut Glass Co. and the Jennings Bros. Mfg. Co., Bridgeport, Conn., manufacturers of clocks, candelabra and metal specialties. Mr. Tinker still retains his jewelry store.

## Omaha.

E. Paul Shaw, with S. W. Lindsay, is back from a two weeks' vacation.

Jos. P. Frenzer and father have returned from a trip through Yellowstone Park.

Mrs. Henry Copley and daughter have gone to Bancroft, Nebr., to visit friends.

S. E. Dodge, with the Johnston Optical Co., Detroit, Mich., visited this city last week.

Earl Clay, with the Mawhinney & Ryan Co., has returned from a trip to the Black Hills.

Miss Anna Hoyt, with S. W. Lindsay, is spending her vacation with friends in Popillion, Nebr.

Henry Copley has remodeled his store. A new metal ceiling has been erected, and new show cases have been installed.

Alfred Brodegaard, of the firm of Fred. Brodegaard & Co., is rejoicing over the advent of a new baby girl at his home.

A water pipe which burst on the second floor of Fred. Brodegaard & Co.'s store on 16th St., last week, damaged goods to the amount of $100.

A. Brodkey, who has been in the loan business in Omaha and Fort Worth, Tex., has sold out and will engage in the poultry raising business near this city.

C. B. Brown has received a letter from his partner, L. A. Borsheim, who met with a misfortune recently, and broke his leg while at Lake Geneva, that he is rapidly recovering and will be home next week.

A. M. Harms, Hooper, Nebr.; A. E. Edlund, Axtell, Nebr.; Mr. Farnham, of Farnham & Samson, Blair, Nebr.; J. W. Crabill, Plattsmouth, Nebr.; W. C. Coon, Beatrice, Nebr.; Geo. Offenhauser, Norfolk, Nebr., and Dr. Goldsberg, Craig, Nebr., bought goods in Omaha last week.

---

Harry Bearsford has succeeded the jewelry business of Arthur W. Miller, Fort Dodge, Ia. The latter will continue in the musical instrument business.

C. K. McCain, Kokomo, Ind., is receiving the condolences of the trade on the recent death of his father, Wm. Harrison McCain, who was the first white child born in Carroll County, in the State of Indiana. The deceased was 75 years of age.

## San Francisco.

TRADE CONDITIONS.

Retail trade conditions continue to improve gradually and the wholesalers report a brisk business now in all sections except the interior valleys of California, where a superabundance of rain has been rather destructive to crops.

C. P. Clark, Santa Cruz, was in this city recently on a buying trip.

John T. Lowe, Hollister, Cal., made the local jobbers a brief call last week.

Henry Wolff, of the Henry Wolff Co., started out for a southern trip last week.

Jules Franklin, New York, was in San Francisco last week in the interest of his firm.

Wm. Thayer, with the S. H. Collins Co., is taking a two weeks' respite from business.

Geo. W. Ryder, of Geo. W. Ryder & Son, San Jose, Cal., was a recent visitor to San Francisco.

J. D. Bennett, San Rafael, was in San Francisco last week making extensive Fall selections.

W. E. Steuben, Visalia, Cal., has just left San Francisco, where he made selections for his Fall stock.

D S. Briggs, with Radke & Co., is unable to be at his accustomed post, on account of illness.

Fred Levy, president of M. Schussler & Co., has just returned from a vacation spent at Lake Tahoe.

Andy Logie, watchmaker for Geo. R. Moss & Co., is absent from his accustomed post on a two weeks' vacation.

H. B. Oberlin, Fresno, Cal., has just recovered from a very serious illness. He was in San Francisco last week buying Fall stock.

R. Bernhardy, representing A. Eisenberg & Co., is now making his southern trip, and A. Eisenberg, Jr., is again taking care of the city trade.

A. E. Springborg, Redlands, Cal., stopped off a few days in San Francisco, last week, on his return from Portland, Ore., where he had been visiting the Lewis and Clark Exposition.

Chas. Branstedt, with Hammersmith & Field, has left for a two months' visit to Shasta, where he hopes to improve his health, which has been very poor for some time past.

Among the out-of-town jewelers here last week, not elsewhere mentioned, were: M. Oppenstein, Kansas City, Mo.; Peter Engel, Marysville, Cal., and F. C Ostrander, Exter, Cal.

A. Prouty, formerly of Landram & Prouty, who have since dissolved partnership, has returned from a trip to the east, where it is reported he secured some eastern lines which he will handle on the Pacific Coast.

Shreve & Co. have just completed the six golf prizes which will be given by the Hotel Del Monte at a tournament to be held next month, for three ladies and three men. The first prizes are elegant hand-chased solid silver loving cups; the others are a silver decanter and a cocktail shaker for men and a pair of handsome silver vases for women.

## Pacific Northwest.

Thomas J. Russell, Post Falls, Idaho, has organized the Falls Drug & Jewelry Co.

Wm. H. Harman, Creston, Wash., has sold his store to G. K. Birge.

C. L. Bender, Myrtle Creek, Ore., has just added a well equipped optical department.

L. R. Burnett, Glendive, Mont., is spending his Summer vacation at Hunter's Hot Springs in the same State.

M. Barborka, Los Angeles, Cal., has purchased the interest of F. H. Van Norden in the jewelry business at The Dalles, Tex. Leo Stanwood will remain in charge of the store.

J. L. Rose, San Diego, Cal., recently made a trip to Portland, Ore., with his family, in a wagon of his own construction. He is now on his way back, having passed through Ashland, Ore., a few days ago. Mr. Rose and his family left San Diego in April, and at the time of passing through Ashland, a cyclometer on one of the wagon wheels indicated that 1,752½ miles had already been covered.

Clay Henry has resumed business in Ironton, O.

J. C. Lindsay, Mansfield, O., has resumed his business duties, after having been confined to his home on Hedges St., by a serious illness.

The business of the late M. C. Connor, Burlington, Ia., was recently sold to Edward Rapp, who has been in the employ of the concern for several years.

## St. Louis.

A. L. Bauman, president of the L. Bauman Jewelry Co., is in New York.

Guinsberg & Appel, 612 Franklin Ave., have been succeeded by Apple & Good.

Albert Paulson, of H. Paulson & Co., Chicago, was in St. Louis several days last week.

Louis Storch, of the Commercial building, has returned from a business trip to Cincinnati.

George Staph, cashier for the Whelan-Aehle-Hutchinson Jewelry Co., has returned from a two weeks' vacation in the Ozarks.

A. Kurtzeborn & Sons, of the Carleton building, are displaying the medals to be awarded at the meet of Muegge Institute in this city.

Frederick W. Drosten has returned from a trip to the east of several weeks, during which he visited New York, Albany and Saratoga.

Mrs. M. Overstreet, manager of the stationery department for the Whelan-Aehle-Hutchinson Jewelry Co., is spending her vacation in the west.

E. Maritz, president of the E. Maritz Jewelry Mfg. Co., has returned from Mount Clemens, Mich., whither he went with his family. Mr. Maritz's health has greatly improved because of his trip.

Henry Dryer, who has been with the Mermod, Jaccard & King, Jewelry Co. for the last 10 years, and Miss Mary Lannon, were quietly married in St. Louis last week. They departed for Utica, N. Y., on a bridal tour.

The Henry Lowenstein Jewelry Co. has been incorporated, with a capital stock of $10,000 fully paid, to do a general jewelry business. The stock is divided as follows: Henry Lowenstein, 52 shares; Joseph Lowenstein and Alfred Falke, 24 shares each.

Among the visiting jewelers in St. Louis last week were, G. H. Geer, Jackson, Tenn.; W. R. Haselwood, Bradwell, Ky.; J. H. Hasenritter, Hermann, Mo.; A. P. Wolff, Chester, Ill.; B. Gottlieb, Pine Bluff, Ark.; G. A. Rayer, Bismarck, Mo.; M. Miesch, Muskogee, Ind. T.; J. Bersche, Waterloo, Ill.; C. D. Smith, Brookhaven, Miss.

George Bergfeld, father of Herman G. Bergfeld, late president of the H. G. Bergfeld Jewelry Co., who died about a month ago, passed away last week. Mr. Bergfeld was 61 years old, and a stone mason contractor. Charles E. Bergfeld, a son, is vice-president of the Bergfeld Jewelry Co., and another son, H. B., is with the same concern.

James A. Mariner, who has been with the Mermod, Jaccard & King Jewelry Co., for the past several years, first as traveling salesman and then assistant superintendent of the St. Louis house, has severed his connection with the firm, and will go to New York Sept. 1 to enter the employ of T. Quayle & Sons, as traveling representative.

Goodman King, president of Mermod, Jaccard & King Jewelry Co., left Saturday for New York, whence he will sail to-day on the *Teutonic* for Europe. Mr. King will spend at least a month abroad, in which time he will visit the jewelry and art centers of France, England and Germany to purchase stocks for the New York and St. Louis houses of the company. This is the second European trip Mr. King will have made within the year, which is due to the wonderful increase in the business of the concern.

At the convention of the Metal Polishers' International Union, which opened Tuesday of last week, the following officers were elected: President, A. B. Grout; secretary and treasurer, Jas. J. Cullen, New York; vice-presidents, J. J. Flynn, New York; Geo. Leary, Newark, N. J.; J. L. Merchant, New Haven; Geo. Lever, Boston; Jos. Stokes, Rochester; J. T. Burke, Cleveland; J. Acheson, Hamilton, Ont.; Chas. Atherton, Cincinnati; Thos. Lynch, Detroit; W. W. Britton, Kenosha, Wis.; C. B. Meyers, Chicago; Ed. Leberman, St. Louis; H. Baker, Philadelphia; Thos. Caldwell, San Francisco, and C. Crawford, Allegheny, Pa.

Representing himself as a jeweler from this city, an unidentified man is said to have swindled coal miners of Edgemont, Ill., across the Mississippi River from St. Louis, out of $100, complaint to that effect having been made to Sergeant Nolte at the Fourt Courts in this city. The claim of the miners is that the stranger has been coming across the river for some time to sell watches and take pictures for the men working in the mines. Last week he paid a visit to them, with the result that he obtained $70 from one and $30 from another upon the claim that he was a jeweler in St. Louis, and needed a little money. The miners advanced the sums requested by him and have not seen the man since. The workingmen around Edgemont are angry at the man, and it is stated that he will be handled roughly if he makes his appearance there again. Besides the two men, others are said to have been fleeced out of sums ranging from $5 up.

## Kansas City.

TRADE CONDITIONS.

Jobbers are still busy shipping goods. Retailers from as far west as California are sending in orders. Collections are satisfactory. The brisk times in the southwest have resulted in a number of jewelry jobbers in the east sending out representatives. The retailers are giving their business to the jobbers who accommodate them when times are not as good as they are now.

G. C. Hunt has notified the trade that he has moved from Gault, Mo., to Polo, Mo.

C. P. Kionka, of Kionka & Stuhl, is soliciting trade on the fringe of the yellow fever belt.

The Barr-DeVault Jewelry Co. has added a full line of cut glass ware to its stock.

H. F. Sloane, of the Edwards & Sloane Jewelry Co., is visiting relatives in New York.

Leo Ludwig, manager of the material department of the Edwards & Sloane Jewelry Co., was at Wisconsin Lake last week.

J. A. Zimmerman, Warrensburg, Mo., and C. A. Clement, Springfield, Mo., visited Kansas City on a buying mission last week.

Sam W. Evans, manager of the manufacturing department of the C. B. Norton Jewelry Co., and Mrs Evans are at Mackinaw Island.

J. Tobias, of Tobias & Son, Carrolton, Mo., was here last week and informed the trade that he is looking for a business location in Colorado or Wyoming.

D. L. Brown, who retired two years ago from the retail jewelry business in Glasgow, Mo., has hung out another sign in that village. He bought his opening stock here.

Harry B. Carswell says tent life in Summer agrees with him. He has camped on the banks of the Blue river all during the

t period. Street cars take him to within few feet of his canvas home.

Among the out-of-town buyers in Kansas ty, Mo., last week, were the following: H. Reed, Golden City, Mo.; A. H. Price, da, Kans.; A. Siebels, Buckner, Mo.; Mr. irkham, Ashley & Kirkham, Ornick, Mo.

Kohn & Co., wholesale merchandise auc-neers, have secured the stock of Cannon Co., bankrupts, and will place it on sale r the trade about Sept. 5. The Kansas ate Bank paid $30,000 for the stock to otect a claim of $23,000.

## Pacific Coast Notes.

D. C Davison, Modesto, Cal., accom-nied by his wife, is spending a few days Oakdale, Cal.

Albert Hansen, Seattle, Wash., has gone Portland, Ore., to visit the fair. He will ake the trip in his automobile.

O. R. Feist, Globe, Ariz., is enlarging his ore and making extensive improvements the way of painting and decorating. He also remodeling his show window.

J. Jensen, Calistoga, Cal., is retiring from usiness at that place and expects to leave nortly for Los Angeles County. The nange is made owing to the fact that his ife is in poor health.

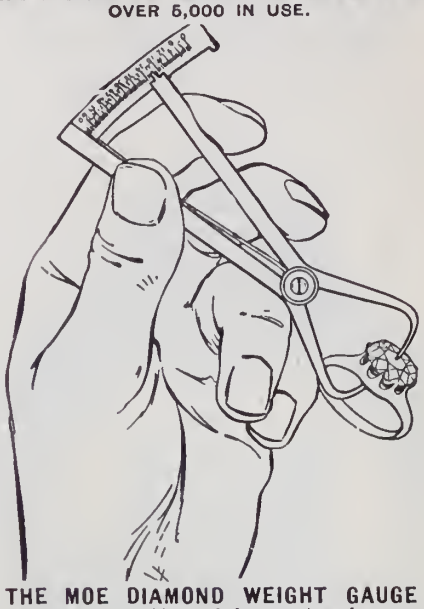
Chas. M. Hanf, San Bernardina, Cal., is emodeling his entire store, putting in a ew front and new fixtures. When finished e will have one of the most attractive ores on the Kite-Shaped Track.

L. M McManus, San Luis Obispo, Cal., as made extensive improvements in his ore. He has installed six of the very lat-st style plate glass show cases, and they re set on a marble base six feet in length, our feet in height and two feet in width.

F. Pequegnat, Riverside, Cal., is now in an Diego, Cal., looking after some granite uarries in which he is interested. It is re-orted that he intends going out of the jew-ry business in the near future and devot-g all of his time to the quarry interests.

H. F. Vollmer & Co., Los Angeles, Cal., ave taken a lease for 20 years on a store n Broadway, between 5th and 6th Sts., and ill move in about the middle of Septem-er. The new store will be fitted up in the most modern style with a room for each kind of ware in stock.

C. F. Mears, of Compton, Cal., has just completed a Masonic charm on which he has been engaged for 15 years. It is made of solid gold and contains four diamonds and 11 rubies, and has 219 letters upon it. It represents all the degrees of Masonry except the 33d, including both the York and Scottish rite. It is said that there is not a handsomer piece in the State.



Geo. Madeira, Healdsburg, Cal., while engaged in collecting minerals for the State, found garnets in the sands of Mill Creek about three miles from Healdsburg. The garnets are all comparatively small and are found in a matrix of mica-schist. Samples of the material were sent to the United State Geographical Survey Office in Washington, tried by the expert chemist and mineralogist of the survey at Washington and pronounced excellent.

John R. Farrell, chief engineer for a large mining company in Congo Free State, Africa, has just arrived in Tucson after an absence of 20 years. Mr. Farrell, who is thoroughly acquainted with all the phases of diamond mining in Africa, says that America is the greatest market for these gems in the world. He says that the most noteworthy feature of diamond buying in the United States is that the purchasers in this country are largely men, whereas in England and most other foreign countries very few diamonds are worn by the male contingent of the population.

Stebbins & Lake, Fall River, Mass., have moved from 19 Granite Block into attractively furnished quarters at 52 N. Main St. The new store gives the firm much more space for its increasing business.

Judge Dole, in the United States District Court of Hawaii, has sustained a protest to a ruling of Collector Stackable as to the classification of strings of Tasmanian shells, great quantities of which are imported by the Hawaiians. They are worn like strings of beads, the shells being beautifully iridescent. The Collector of Customs classified them as jewelry. The importers protested and Judge Dole has held that they are not jewelry.

John E. Rentz, of Rentz Bros., Minneapolis, is home from a trip into the province of Ontario, north of Sault Ste. Marie, to investigate a gold mining proposition in the Michicopoten country. Roy McCard, with Rentz Bros., was married recently.

The Minnesota State fair opens at the fair grounds between St. Paul and Minneapolis Sept. 4, and will continue for a week. The merchants of the northwest take advantage of the reduced rates for the occasion, to visit the cities and make their Fall purchases. The attendance of buyers this Fall is expected to be exceptionally large as the crops are turning out very well, and the prices on grain are fairly high, which will bring a large amount of money into the northwest.

## Harrisburg, Pa.

Charles Krause, of the H. C. Clasty's store, at 4th and Market Sts., has returned from a trip to Niagara Falls.

George Breen and Leon Wachtel, two peddlers of cheap rings and jewelry, were arrested last evening for hawking their wares about the street here without a license, and fined $5 cash by Mayor Gross.

Charles Merkel, a New York salesman, has filed suit for $1,000 damages for false arrest against Frank E. Commings, 411 Market St. Merkel claims that Commings caused his arrest on a charge which he did not press before the Mayor. Mr. Commings stated to THE CIRCULAR-WEEKLY correspondent that Merkel had a watch repaired at his place and objected to the cost so strenuously that he was ejected from the store and arrested.

## A Felicitous Testimonial Presented to President Edward Holbrook.

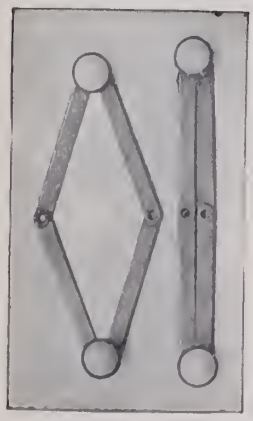
DURING a recent visit to the factory at Providence, Edward Holbrook, president of the Gorham Mfg. Co., met with one of those pleasing surprises rarely accorded even to the most notable captains of modern industries. In this instance the surprise took the form of the presentation to him by William C. Codman, the head of the designing department, and his artistic comrades, of an elaborately illuminated and engrossed testimonial.

As will be seen by the accompanying illustration, which necessarily lacks the extremely beautiful coloring of the original, the testimonial is noteworthy as an example of the modern revival of the 13th century illuminator's craft, which for nearly two centuries materially helped in keeping alive the painter's art in Europe. Nevertheless it may be safely assumed that to Mr. Holbrook the chief value of the gift lay in the spontaneity of feeling on the part of associates which led them to unite in the composition and preparation of this frank token of their esteem and regard. Singularly felicitous, too, was the choice of the time at which the address was presented, marking, as it does, not only the length of Mr. Holbrook's association with the company, but also the removal of the headquarters of the business to the new building at Fifth Ave. and 36th St., New York.

The well-chosen expressions, showing appreciation of Mr. Holbrook's lifelong interest in the silversmiths' craft, and his love for the beautiful in silverware, came with peculiar fitness and force from Mr. Codman and his associates. They served as an agreeable reminder of the fact that the signers of the testimonial are more closely in touch with Mr. Holbrook than with any other official of the company, and that the relations existing between them have always been of the pleasantest and, in many ways, of the most intimate description.

The testimonial was designed and drawn by William Codman, who was assisted in its execution by Messrs. Kingman and Barrett. In designing it the main idea was to give pictorial expression to the story of Mr. Holbrook's lifelong connection with the company. Thus, in the left-hand upper portion appears the Gorham building at Broadway and 19th St., New York, to the right the new building at Fifth Ave. and 36th St., New York, and across the lower part of the design stretch the wide-spreading buildings of the factory at Providence. All three buildings were planned and carried to successful completion under Mr. Holbrook's administration of the company's affairs.

Into the circular medallion in the lower center is deftly worked the cross of the Legion of Honor, awarded to Mr. Holbrook by the French government in 1900. More symbolical, but not less significant, are the four ideal figures which occupy the square panels forming the four corners of the border. The figure on the upper left-hand side represents Die-Sinking and that on the upper right-hand side Designing. The figure in the lower left-hand panel symbolizes Chasing, and the one to the right Silversmithing.



The remainder of the border is a conventional treatment of the clover as typifying Prosperity, while the sunflower, which forms so prominent a decorative feature of the design, is emblematic of Happiness. The testimonial is illuminated on a sheet of fine vellum and the color scheme is a remarkably attractive harmony of low-toned green, yellow, rose and gold, the only primaries employed being the black and red text.

It remains to be added that all the signatures to the testimonial represent the actual craftsmen of the Gorham designing room with the exception of J. F. P. Lawton, who was admitted to fellowship in the fold on account of the services he has rendered to the company in connection with the printing and publication of its books.

TESTIMONIAL PRESENTED TO EDWARD HOLBROOK, PRESIDENT OF THE GORHAM MFG. CO.

## Silver Service for the Battleship Nebraska.

(*Continued from page* 1.)

or separately. It is 12 inches in height and has dolphin handles, with shell border. An Indian it etched on one side, and on the other is the head of a buffalo. Its weight is 100 ounces.

The punch bowl, shown on this page, stands 21 inches high and is 16 inches in diameter, inside measurement. It has a capacity of five gallons and is plated with gold on the inside. It has two graceful handles, each surmounded with full modeled eagles. The

PUNCH BOWL AND LADLE OF "NEBRASKA" SILVER SERVICE.

seals of the State and navy adorn either side of the bowl and are surrounded by the State flower—the golden rod. Corn and wheat relief work completes the decoration. The bowl stands on three massive feet, representing the head, shoulders and fore feet of buffaloes. Between these feet are modeled relief heads of cattle, the bull-sheep and antelope being the most prominent. The punch bowl weighs 300 ounces. The punch ladle is 18 inches long and weighs 18 ounces.

The silver waiter is to hold the punch bowl and goblets. An etching of the battleship adorns the center of the plate. The waiter has a shell border, with entwined dolphin handles and also the seals of the State and the navy, with floral decorations. The head of a bear is shown in high relief on the side. The total weight of the waiter is 260 ounces.

## Fish as a Decorative Design.

*(A study for artists in ceramics, goldsmithery, jewelry and silverware.)*

*(Continued from issue of Aug. 23.)*

ALL such documentary study has for its object the elaboration of decorative design representing the type of the species chosen. It is therefore not on a single individual that such study should be made, but on a group of individuals, permitting the artist to recognize and determine the characteristics of the species. It is well first to get the principal proportions of the animal by taking a fixed basis, the length of the head, for instance, from the nose to the *operculum*. This will give the relation of proportions between the head and the body the size, situation of the fins, etc. This is only a summary mensuration, but it is sufficient, for it is not well to fall into an excess of minutiæ. What the decorator should give is the impression of the animal, rather than its absolutely exact representation. He is free to change the proportions of the species in view of an effect to produce; he can accentuate the character proper to that species in a way distinctly to differentiate it from others. He will insist on the large size of the head in some species, and the spikes upon it. Perch seem humpbacked, and their fins have sharp points. It is on features like these that the artist must lay stress, modifying or accentuating them according to his own temperament, and the end to be achieved.

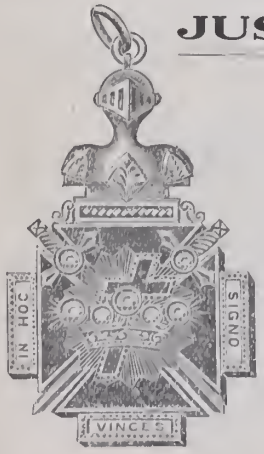
Now for our study: Sketches as a whole and in detail, upper part, lower part, profile, front, underneath, are made. This documentary whole must be completed by sketches of attitudes. Furnished with these notes the decorator can, without further model, compose the fishes he needs with a liberty greater than if he had confined himself strictly to copying nature. He can put in it more suppleness, because, having analyzed the forms, he knows better their relations, their characteristics.

But, it is asked, is the use of the fish in decorative art easy, can one apply it easily? Well, it is sometimes not at all easy to compose an ornamentation by means of animals which are entirely special, like fish. Speaking generally, flowers are much easier; but nevertheless, whenever possible, why should not the decorator try to enlarge his domain, extend his resources? For goldsmithery and silverware, in jewelry and in ceramics, the applications for the fish design are many. Vases, trays, plates, penholders, buckles, scissors, are beautifully treated by the representation of fish. In fish the colors are often marvellous, yielding nothing in that respect to the plumage of the most gorgeous birds. The mackerel with its opal abdomen, the redfish, and many others, are splendidly dressed. To describe the fish of tropical waters approaches perilously near the point of exaggeration to those unfamiliar with these animals. Some of these fish are striped with silver and pale green, turquoise blue and gold; others are spotted with sapphire and emerald; amethysts, rubies and black diamonds are scattered over the backs of these fish; indeed, the stones named are but poor in color beside the splendors of these fish, whose hues are unbelievable for brilliancy and purity, like colors seen in dreams.

Nor are the forms of these fish behind their coloring in variety and fancy. The moon-fish, a crescent; the hippocampus, with its horse-head; the sword-fish, and countless others, all different in form and coloring, and whose modes of life are also very different. The common eel, *anguilla vulgaris*, is too well known to be described at length. All are familiar with its cylindrical form, its small pointed head, and fins lying along almost the entire length of the body. The reproduction of the eel remains a mystery. In the autumn months, during dark nights, the adult eels descend the water currents to the sea; in the Spring, multitudes of very young eels mount the same water courses which the adults sailed down a few months before; this is all that is at present known on the subject.

The eel is a nocturnal fish, very voracious, living at the bottom of the water and near the mouths of rivers, between roots and understones. These are the things the decorator needs to know; and he should be particularly observant of the marvellous suppleness of this serpentiform fish. The color of eels varies from dark green to brown and gray.

The livery of the mackerel is gayer. Its smooth, spindle-shaped body presents wonderful effects of color. This superb animal should be studied while living. The back, of changing hues, goes from steel to green, mirrored with purple and gold lights. Green and dark blue sinuous lines run down the back, stopped by the black line which starts at the pectoral and ends at the tail. The top of the head is dark blue, while the white abdomen presents all the changing hues of the opal. Like herring, the mackerel is a roving fish. Of slender form, and almost invisible scales, he is useful to the decorator, who will make good value of the zebra like stripes on his back. A characteristic feature which may be noted, are the false fins which lie between the dorsal fin and the tail, and between the tail and the anal.



The Japanese make great use of the carp. They treat it admirably, we must confess; bringing out wonderfully well all the fine characteristics of this fish. Of the 3,900 varieties of fish known, the cyprins, to which family carp belong, number about 1,600, nearly one-half. Their fecundity is great, whence the classic name of cyprins; the carp was dedicated to Venus by the ancients.

The carp lives generally in calm waters, and is mostly herbaceous; speed for pursuit of prey is not essential to it, therefore the form of its body is somewhat heavy. It is partial to worms, mollusks and the larvæ of insects; in color it is brown with golden lights. Its longevity is proverbial, and it can live quite a long time out of water.

All Nature offers itself to the decorator. His duty is to profit by this glorious fact, to claim forces and resources ever new, proper in the progress of his art, and abundant in its diversification.—Translated and compiled from the French for THE JEWELERS' CIRCULAR-WEEKLY.

THE END.

The Chas. M. Robins Co., Attleboro, Mass., recently mailed to customers a new and handsome catalogue of 100 pages. The book is concise and most complete, containing thousands of illustrations, portraying the many designs of college class pins, enameled souvenir spoons, State and city seals, military ornaments, secret society badges and buttons, belt buckles, sash pins, fobs, charms and other lines manufactured by the company. One is impressed at first glance with the cover design, in colors of green, tan, brown and black, representing a college student in cap and gown poring over a classic. Upon turning the first page, a large cut of the company's factory, together with six scenes from the work rooms, showing the general office, the enameling room, the die sinkers' benches, the tool manufacturing department, and several of the automatic stamps and presses, give a general idea of the magnitude of the plant. There follows 91 solid pages of illustrations and explanatory matter, together with prices for every article reproduced. To every university is devoted a double page, and heading all of the college pages is a scene of interest from the college itself. Memorial Hall of Harvard University, the libraries of the Universities of Minnesota and Pennsylvania, King's Chapel of Bowdoin College and several others are handsomely shown. The Chas. M. Robins Co. has shown good taste and enterprise in giving the trade so convenient and attractive a publication.

## Old Sun and Nocturnal Dials.

Translated expressly for THE JEWELERS' CIRCULAR-WEEKLY from the German of MAX ENGELMANN, in the *Leipziger Uhrmacher Zeitung*.)

*(Continued from issue of Aug. 23.)*

CYLINDRICAL dials, or pillar dials, as they are sometimes called, may be classed among vertical dials. Those represented in Fig. 16 are pocket instruments. In these timepieces the hours before noon proceed from above downwards, the afternoon hours from below upwards. The points

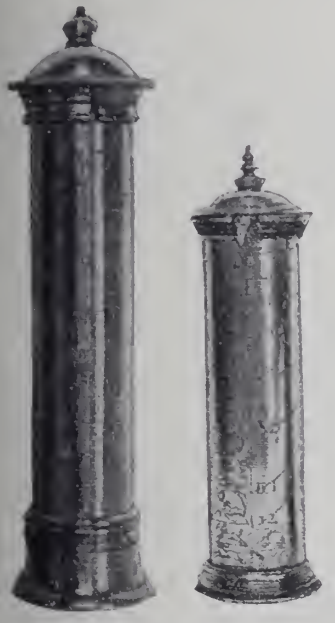

FIG. 16.

indicating the hours correspond by means of descending curves with the signs of the Zodiac engraved in two lines around the instrument and over its base, thus facilitating the accurate reading of the true solar time at the varying solar altitudes. The gnomon can be seen projecting from under the overlapping cover. The interior was intended to serve as a receptacle for the collapsible gnomon. That of the larger instrument is also utilized to contain a table of latitudes, that of the smaller, an oscillating needle, a so-called needle level, the forerunner of the box air level in use at the present day.

The tendency to construct instruments adaptable to the most varied uses is especially noticeable in the products of the 16th century. This applies also to sun and nocturnal dials, as we have seen in the case of several of the instruments described above. We subjoin a description of four

FIG. 17.

combined dials in which this universality of adaptation is clearly shown.

A wooden dial made during the 16th century is reproduced in Fig. 17. The outside of the cover is arranged as a table showing the regents of the astrological planetary hours. The inside of the cover contains the compass and the names of 22 countries with their latitudes. With regard to the dials we find in the first place a scaphium in the center; the hollow portions of the sides are vertical dials, the edges opposite the dial plates forming the gnomons. The trough-like dial in the narrow front part of the figure is a small horizontal dial. The length of the shadow cast by the narrow edges of the trough indicated the required hour in the curves drawn on the inside. The base of this dial is furnished with an adjustable lunar calendar. The length of this instrument is only 69 millimeters.

In Fig. 18 is shown another universal dial. It is likewise made of wood and richly adorned with paintings, most of them in gold. Among them are the arms of the Mansfeld family. The inscription,

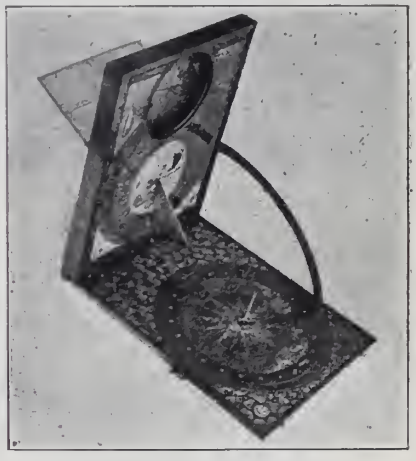

FIG. 18.

"Horarium generale a solle luna et stellis absolvebat Hilari anno Chr. 1556," proclaims its arrangement as a combined sun, lunar and nocturnal dial, and points out at the same time the maker and the date of manufacture. The sun dial is an upper and lower equatorial dial with a style gnomon in the center and lateral adjustment to the latitude (the graduated arc shown in the figure). The nocturnal dial, with teeth for telling the hour by the touch, is combined with the upper equatorial dial plate. The inner face with the angular gnomon is a lunar dial. The construction of the latter is similar to that of the horizontal dials, except that below the gnomon it has another movable dial plate with hour lines and a pointer turning round a circle divided into 30 degrees for

adjustment according to the epacts. A sector of this movable disk shows the phase of the moon at the time of observation. On the inside of the cover of a case for the graduated arc is a mirror, which shows that this dial was also used as a toilet article.

A beautifully constructed universal dial is shown in Fig. 19. It is made of ivory and the exterior is richly ornamented with etched and gilded mountings. The divisions, figures and designs are painted in various colors which are still fresh. The letters T. D. and the device of a crowned snake over the circular opening in the cover, indicate the maker, who certainly belonged to the Ducher family of Nuremberg. (See Fig. 14.) The dial was made at the end of the 16th century.

The interior of the instrument is arranged as follows: On the inside of the cover

Fig. 19.

at the top is a south vertical dial with a short style gnomon. The length, in hours, of everyday is shown by the curves crossing the hour lines and connected with the signs of the zodiac at the sides. The principal dial, enclosing the compass, is a horizontal dial with three faces for the latitudes 42 deg., 48 deg., and 54 deg. The angle of the thread gnomon belonging to it can be altered to correspond to either of the three latitudes by moving the upper end from one to another of the three openings below the vertical dial. Two scaphia can be seen in front of the horizontal dial plate, the one to the left showing the "Welsch ur," and the one to the right the "Nirenperger ur" (explained in the description of Fig. 13). On the outside of the top of the dial is a compass containing the 32 winds, with an adjusting rule and weather cock. The latter is kept in a hollow receptacle on the left. The lower surface is a nocturnal dial surrounded by the Gregorian and Julian epacts.

The ivory sun dial (Fig. 20), undoubtedly constructed by the celebrated compass maker, Charles Bloue, Dieppe, is also adapted for universal use! The principal dial round the compass is a horizontal dial, the gnomon of which is likewise a thread gnomon, while the cover through which the style gnomon passes, with the table of latitudes on the inside and on the right edge, forms an upper and lower equatorial dial. This dial can moreover be used as an equatorial lunar dial showing the phases of the moon, a description of which is given under Fig. 23. In this dial, which is only 74 millimeters long, we find an additional contrivance for measuring time, not very frequently applied.

Under the magnetic needle is a dial plate on a strip of metal formed into a hoop. On it are marked the hours from VII to XII and XII to V. The south pole of the needle was used as a pointer. This dial plate is made to correspond with the varying dec-

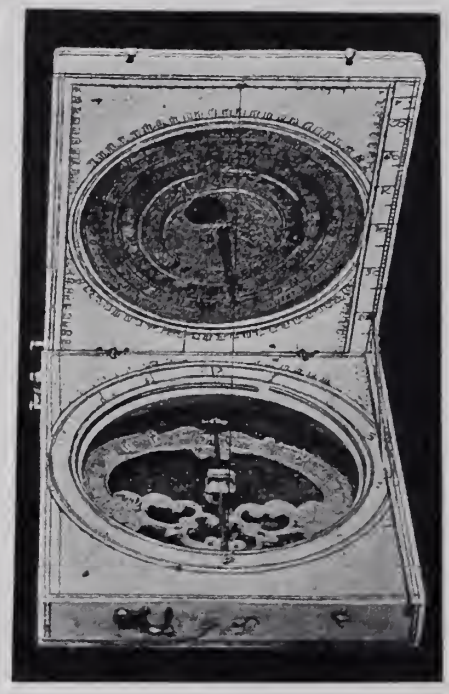

Fig. 20.

lination of the sun in the following manner: In the bottom of the case is a revolving disk showing the months. On the inside of this disk is an eccentric groove.

When the disk is adjusted to the month by turning, a forward or backward motion of the dial plate band corresponding to the altitude of the sun is induced by a style working into the groove.

*(To be continued.)*

---

A Louis XV. clock with an eight-day work has the imposing height of 2.15 meters. The frame is formed by a wooden column with inlaid decorations of rosewood and colored varieties of wood. The feet, the edges, as well as a heart-shaped shield in the center of the front, are fashioned of bronze, from which leaves and twigs are made. Over the dial, which is placed very high, are flowers and foliage of the same material.

Thieves recently broke a large plate glass show window in the store of the Wilbur, Lamphear Co., Galesburg, Ill., and succeeded in stealing watches and rings valued at about $200. Thus far no arrests have been made. The store of Chapman & Armstrong was also entered, but no plunder was secured.

## Watches with Visible Balance.

(Translated for the Jewelers' Circular-Weekly from the *Journal Suisse d'Horlogerie.*)

FOR some time recently, scarcely a fortnight has passed without the list of patents registered at Berne having mention of one or two new watches carrying a visible balance at the side of the dial. This is called "the fashionable invention," by our co-laborer and friend, C. Sivan, in his monograph of the inventor. In honest truth, it is not a favorable sign; for, when the construction of the normal-watch is in peril numbers of so-called novelties make their appearance, their object being to stimulate custom.

The balance in sight is in this category for it lends itself to all sorts of fancies; some place it at noon, others below, at 6 o'clock, and in still other instances there is displayed through a small circular opening the bob of a pendulum, imitating that of a Neuchatel clock; while other makers there be who exert their ingenuity by showing walking automatons, blacksmiths, etc. Some of these inventions certainly have a more technical design; in placing the balance in the thickness of the case, their object is simply to diminish the size of the works. These flat watches, at present so popular, which compel good work and good workmen, are, on the other hand, the despair of many of the makers and the setters of escapements, compelling them to use undesirable artifices, such as the suppression of the stop of the cover of the barrel, and even of the second *plateau*, although it is an essential organ.

But let us not get too far from our visible balance, remarking in its favor that it has forced makers to bring a little more taste and finish to the shape of their cocks and rackets. Each endeavors to please the eye of the probably purchaser, but their efforts resemble the case of the moth and the flame, for in the Museum of the Horological School at Geneva, and in the collections of C. Sivan, may be seen divers specimens of the styles which modern makers are trying to produce, and which show present-day inventors that the patents they are at such pains to acquire can only furnish them a doubtful guarantee.

A description of some of these venerable witnesses of a past epoch will attest this statement, and we would recall besides the pictures of some of the pieces of the Marfels collection, which our journal presented some time ago, in corroboration of our words. Therein may be found watches with visible balance, clock style, automatons, *guichet* (wicket, shutter), etc. The first two watches of which we are about to speak belong to the Museum of the School of Horology at Geneva; others are in the collections of C. Sivan.

The first is a piece with cylinder dating from the beginning of the last century, without case or dial, made by Gregson, at Paris. The gold balance, in sight at noon, is of four twisted rods; it is carried by the lengthening of the pivot of the cylinder, and for the purpose of isolating the rest of the movements, the constructor has placed below a curtain formed of two surfaces, in polished steel, which can retire or approach by pivotal means; a somewhat complicated arrangement, it is true, but

*Time*
*O my friend*
*is money!*

—*BULWER-LYTTON.*

And in this money making age there is an enormous and increasing demand for accurate timekeepers. This means that time is money for the dealer who carries a stock of

which evidently marks the proposed aim, namely, that of attracting attention to the balance. The dial-face of the hours is below, opposite the balance; that is, near six o'clock.

The wheel of the cylinder is of brass, the stop, Breguet style, has its stop-wheel immobilized by a light spring resting on the enclosure, and making friction.

A second specimen consists of a fine silver watch, remarkably well preserved. On the upper part of the case, that is, beside the pendant of the case, an enamelled escutcheon bears the name of Achard & Co., Geneva. Immediately beneath, a narrow concentric opening displays a tiny gilt pendulum-bob, attached to one of the arms of the balance, whose movement gives the idea of a clock's pendulum. Three small dials, placed triangularly, are surmounted by an enamelled crown; the one below, Breguet style, shows the hour, that of the left the second, that of the right the day of the month; the whole reposes on a fine engraving of waving lines, from which spring two cornucopias full of roses, increasing in size as they approach the noon hour, then diminishing indefinitely. This piece must also have been made at the beginning of the last century. The movements are similar to those of the one about to be described.

This is a silver-cased watch, bearing no name. The balance, placed near noon, is carried by a pierced cock, its light *coquerct*, steel and rubies, disengaging itself well from the combination. A glass inserted in the dial covers the cock; a good precaution, seeing that the winding was done daily on that side. The dial, with Breguet's hours, is placed quite at the bottom. It is enclosed in a surface of painted enamel, representing a woman in Empire dress, who is declaiming, apparently, while looking upon an open book, which rests on a marble column. Seen from beneath, a garland is displayed, surrounding the advance and retard movement, and entwining itself around the rochet-tender of the barrel in harmonious spirals, detaching the pivot of the fusee. Very evidently this watch was made to display the cock.

Another watch has the peculiarity of being wound while going, and belongs therefore to the class of watches usually called "perpetual," whose invention (1780) is attributed to Abraham Louis Perrelet, of Locle. It is in a silver case, and bears the name of Cabrier, of London (1780 to 1804). The dial, Breguet style, presents on the outside a circular opening, which must have been made at the outset, judging by the finish of the minutiæ, and the winding, which is visible, as well as the cock; but this arrangement hardly seems adapted to the preservation of the enamel, which is marked with many fissures.

The escapement is cylinder, the wheel being of brass, with 12 teeth. The hands, Breguet, spreading and pierced, are somewhat heavy, no doubt with the intention of letting them be better seen. The winding mechanism is remarkable, of elementary simplicity, but working perfectly. It is sufficient to carry the watch half an hour in order that it may be completely rewound.

The Museum of the Horological School at Geneva, and the collections of C. Sivan contain watches similar to the above.

## New Tools for the Watchmaker.

THE device represented in Fig. 1 is a gauge to be used for measuring the staff hole in ordering chronometer balances. This gauge is supplied with a number of projections of graduated sizes corresponding to metric measurement. It is intended to obviate frequent errors which occur in ordering one or several chronometer balances, of which the staff holes are to be of some standard size, as it is very important

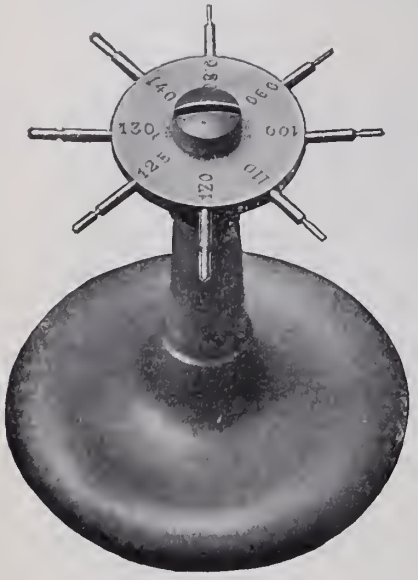

Fig. 1.

that a balance shall fit most accurately on the staff.

These gauges are made of nickel with steel shanks, hardened, tempered and ground to perfect measure within 1/100 of a millimeter. The following standard sizes are represented in strict accordance with measurements furnished by the Bureau Internationale des Poids et Mesures à Sèvres; mm. 0.80, 0.90, 1.00, 1.10, 1.20, 1.25, 1.30, 1.40. These sizes cover all the dimensions which are found in watches from 10 to 24 lines with a Swiss measurement.

Fig. 2 represents a tool for cutting the laminæ of chronometer balances. All watchmakers, whose occupation is the adjustment of watches and who often find it necessary to cut the laminæ of a chronometer balance, know from experience that this operation without the use of proper tools is unsatisfactory and tedious. It can hardly ever be done without distorting the rim of the balance in several directions. To obviate these effects the tool shown in Fig. 2 has been designed. The cutting of the laminæ of a balance on this tool is done by a circular cutter, of which three are furnished, graduated in thickness for large and small balances.

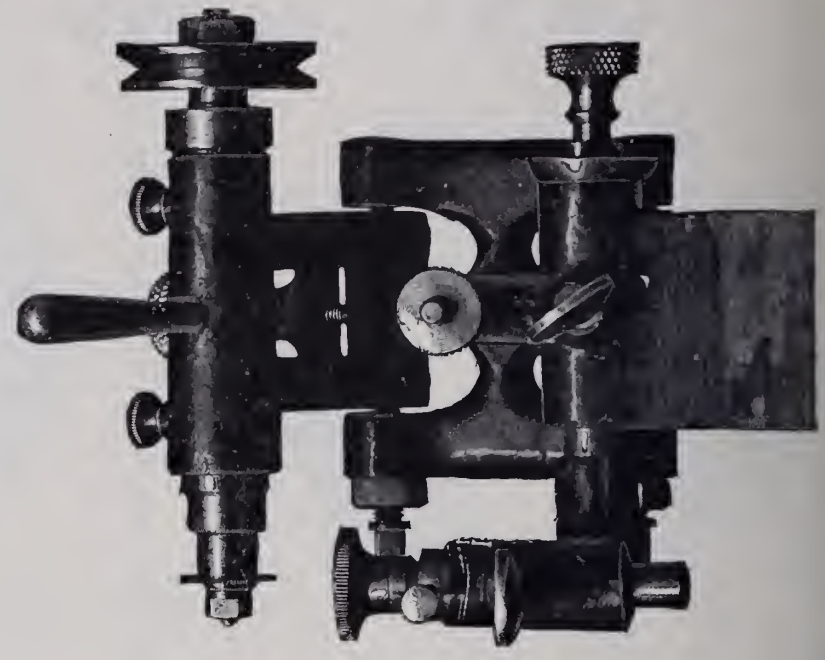

Fig. 2.

Three carriers are on hand for the cutters, as also are fixtures for placing the balances, which can be attached and easily removed. This tool supplies conveniences for cutting the balance after it has been fastened and trued on a pivoted staff. For the latter purpose the balance is place on a platform of a proper diameter an duly centered. The balance staff pivo are protected against side pressure by b ing placed in a triangular fixture, t whole construction somewhat resembling wheel rounding-up tool.

Other centers and fixtures are supplie to cut balances, which are not fastened c pivoted staffs, but it is always to be pr ferred that a balance be cut after bei placed on a pivoted staff, as only in th manner a balance can be properly trued u This may be done equally well by much le effort, and a trued-up balance of this kin is more likely to be in poise.

These tools were designed by M.M Huguenin Thiebaud et fils, at Ponts Martel (Neuchatel).

# IMPORTANCE · OF · THE · WATCH · IN · BUSINESS

WHY IS THERE such a strong and steady demand for good watches? Did you ever think of the tremendous importance of watches to the entire business world? How many great affairs hinge on the prompt keeping of appointments? How many business men are very particular—and properly so—about punctuality? If in some mysterious way watches all stopped at once, business would stop! The business world looks to the Jeweler, and he in turn looks to this establishment for good watches.

# RETAIL JEWELERS ADVERTISING

*The use of this department is open to every retail jeweler and optician. Forward for criticism your newspaper ads., booklets, catalogues, novelties, circulars, etc. Ask advice and offer suggestions. Replies in these columns are unbiased. Make letters as full and particular as you desire. Every letter and ad. sent will receive full attention, though the publication of the matter may sometimes be delayed several weeks.*

## Group of Newark, N. J., Retail Jewelers' Advertisements.

N a recent issue of a Newark Sunday newspaper there appeared seven advertisements of jewelers and opticians, and they are reproduced below in reduced size, show readers of the CIRCULAR-WEEKLY the lines of argument used by merchants in the principal city of New Jersey.

Wm. T. Rae & Co. use a "business card" announcement with a black background and the illustration of a diamond in the center. It occupied four inches.

L. B. Hilborn attracts the attention of readers with an illustration of eyeglasses. The arrangement of this advertisement is very good. This ad. was used in a space of two and a half inches, double column.

Chas. Hartdegen & Co. make a special bid for the trade of persons whose glasses do not fit. The field for this class of business is very large, and it should be cultivated by jewelers generally.

J. Wiss & Sons, in a space of five inches, double column, call attention to their general line of goods and also to their optical department.

Jean R. Tack shows the public, in a well-written four-inch ad., that the purchase of diamonds to-day is a safe investment. This is an argument that should appeal to those who are anticipating buying, and also to those who have money to invest in anything which is safe and apt to increase in value.

George A. Scheller is after the careless man with the watch that doesn't keep time. The space occupied is but two inches, but the arrangement is such that it is both attractive and convincing.

Wm. Verrier, in a four-inch space, has touched a point that ought to open up good business for any jeweler who will advertise similarly. There is scarcely a family that hasn't some old jewelry packed away which is of practically no value except as "old gold." Mr. Verrier's idea is to induce persons to bring such heirlooms to his place of business and to pay cash therefor. The jeweler could follow this same plan, but incidentally he would at the same time be in an exceptionally advantageous position to interest such persons in new and up-to-date goods displayed in his show-cases.

## What Some Jewelers Say.

DAZZLING effects in jewelry are shown in my assortment. Words convey but a faint idea of the beauty, richness and exquisite workmanship of my superb collection of diamonds, watches, chains, lockets and gold novelties. The diamonds are perfect, and the gold jewelry of square quality. —Jesse Davidson, Montgomery, Ala.

Exclusive Artistic Diamonds.—Always something new—something different than you see at other jewelers, will be found at "Morden's." If you appreciate a fine line of rings, pins, brooches and other pieces, don't fail to look over our recent importations. Andrew Morden, Columbus, O.

Amateur photographers who bring their work to me can be sure of satisfactory work. I use best quality paper on amateur work as on portraits. If properly timed negatives are made you can be sure of getting a good and permanent print. W. T. Hunter, Taunton, Mass.

It's "Easy Money" buying diamonds, watches, rings, etc., from us. We sell on the instalment plan. Small weekly payments. That's all we ask. Bring us a good reference and you can have the goods. Meyer J. Daniels, Columbus, O.

The Hatless Season.—It calls for pretty combs in a woman's hair, and our suggestions, simple and elaborate, add materially to the attractiveness of the summer coiffure. Davis & Freeman, Atlanta, Ga.

Watches for Ladies and Men.—Business men, professional men, railroad men will find every desirable kind of gold, gold filled, and silver watches in our stock. We guarantee them to pass inspection for railroad men, and accurate timers for all classes. Also fine watch and jewelry repairing done. Aristides L. Desbouillons, Savannah, Ga.

# STORE KEEPING DEPARTMENT.

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with THE JEWELERS' CIRCULAR-WEEKLY regarding any advantageous device or plan which they are utilizing in connection with their business.

## Getting the Store in Shape for the Holiday Season.

"THAT'S a large subject," mused Mr. Wide-awake reflectively, when the question as given in the caption above was propounded to him by THE ONLOOKER. "I do not know exactly how to tackle it," continued he, "there are so many phases of it, and I find every Fall that I have so many things to tackle.

"Well," he resumed meditatively, "I'll plunge right into the middle of things, without any attempt at following a logical sequence or any system at all in fact. Mind you, I am only speaking for myself, and some other dealer who may be equally as experienced and successful, may think my plan is an altogether wrong one.

"One of the things which I have made it my invariable practice to do every Autumn, before the approach of the holidays, and I am sure that it has paid me, is to gather every single piece of goods that I have in stock which I have found unsalable since the last holiday season. These goods are not old stock, as yet, but if they should remain over until the holiday season is past, they will have become so. So I have them all put in the best of order and make them look as bright and attractive as it is possible to make them. Then I have them mounted on cards and have the old prices plainly marked on them. And then, there is where my experience and my judgment are put to the test. I have them distributed among the more salable and newer wares.

I tell you, I have found that this method pays. These goods, properly presented, I have found just as salable as any of the goods among which they have been placed, and when I have taken up stock after the New Year, I have invariably been pleasantly surprised to find how few articles I have left remaining which, when Summer ended, I had feared I would have to put among old stock to be sent back to the factory, to be melted and made over again, or upon which I would have to stand a big loss in some way.

"Another thing which I do in order to get the shop in shape for the holiday season, is to subordinate all my optical goods and give their room to wares of a more festive character. It is well enough after New Year, through Spring and Summer, to let optical and photographic and similar lines spread themselves, but as the harvest time approaches, I begrudge every inch which is not taken up by the wares which make a greater display, and are quicker sellers and yield larger profits. Then, too, with the goods which you have thus put in the background, there is no chance to give your store the gala appearance so desirable at Christmas time, and I have always made my store just as attractive at this period as I possibly could.

"It is my opinion that dealers ought to 'plunge' a little at such times. 'Plunging' within reason is not at all as reckless as it seems. Oftentimes, I have been a little frightened at the contemplation of some Christmas display that I have proposed to make, and my trusted clerks have shaken their heads dubiously. That always strengthened my determination to make the outlay, for I can not stand to have my judgment impugned. I have invariably found that the outlay has been justified. Such outlays had to do with store and window displays. I found that they created so much favorable comment and drew so many people to the store who would otherwise not have dreamt of coming that they paid well. They paid directly too. But in addition, I believe they advertised me better than three times the amount spent in any other way would have done. You undoubtedly recall my last year's holiday display. I know people generally do and that as the holidays approach, that part of the public that is acquainted with my store expects a display.

"I have made no mention at all of brightening up the general stock, of displaying all the goods to the best advantage, of making special efforts on window display, of forcing your regular employes to keep primed up to their best, of infusing morals into the extra force which all retailers have to employ at this time. I do not think it at all necessary to refer to these matters, for, of course, they are in 'the day's work.'

"There are lots of other things to be done in connection with preparing for the holiday season, but these are either the conventional things, or they are details, or they vary with each establishment. At any rate, I think I have told you enough for one day. Give some other man a chance."

THE ONLOOKER.

---

Anton Engleman, formerly engaged in business in West Point, Nebr., and who, a year ago, was adjudged insane and confined in an asylum in Lincoln, Nebr., has entirely recovered, and contemplates re-engaging in business.

## How Salesmen Should Be Received.

"I HAVE no special room for the reception of drummers or wholesale salesmen who call on me, and for the display of their samples," said a well-known and progressive New York retail dealer, a short time ago. "But that is not because I do not believe I ought not to have one, but simply because I am so crowded for room. If I had to fix up my place again, you may depend upon it, no matter how it crowded me, I would arrange some kind of a comfortable and private retreat in which to receive them.

"My view of the matter is that they are fully as necessary to me as I am to them notwithstanding that I am situated right here in New York, the heart of the market. As long as business is conducted upon its present lines, and whether those lines are the right ones is entirely another matter and apart from the question; salesmen are essential features and factors of the system. That being so, they ought to be accorded thorough privacy and comfort when they call on the dealer.

"I go a step further, for I believe in giving them to the full every bit as much consideration as I would to a favored customer. I know that a great many dealers, taking advantage of their position, are not considerate to salesmen. But putting it even on the low ground of policy, I think they are making a grave mistake. For I have found throughout my experience, and I was not animated by policy, that my treatment of salesmen has been worth a great many dollars to me.

"I started in as a salesman, and so I have the primary advantage of being able to look at the subject from both sides. The salesmen with whom I have to deal become my friends. They appreciate that if I could do so I would give them a separate room full of comforts, easy chairs, the magazines and perhaps a cigar, for, of course, I could permit them to smoke in such a retreat, something that would not be right to allow in the store, and I find they are always glad to call upon me. Furthermore, I have time and again received the evidence of their good will in the matter of special goods or hurrying my orders up, and even in price.

"You take my word for it, and this is only another illustration of the truth, courtesy pays. Everything in business nowadays is reduced to a money basis, and, believe me, courtesy has a money value."

### ow the Jeweler Can Overcome Department Store Competition.

BUFFALO, N. Y., Aug. 23.

*ditor* THE JEWELERS' CIRCULAR-WEEKLY:

I have read with great interest the articles on "Retail Advertising" from week to week, in your storekeeping and retail dvertising departments, and have profited considerably by using the ideas and uggestions in my own local advertisements.

The hardest competition I have to meet, the department store, and I find it necesary to resort to up-to-date advertising ethods to overcome same.

The tendency of the buyer of to-day is o look for bargains. It doesn't make any ifference whether the selling price of an rticle is actually a bargain, as long as the uyer or shopper *thinks* it is.

It seems that an article, if offered at 4.99 reduced from $5, will sell, whereas would *not* sell if offered at $5. It may eem difficult for jewelers to advertise leaders" at reduced prices without lowering their business dignity, but it is really ery easy to find some legitimate excuses or such reductions, which excuses or reaons should of course be published in the dvertisements.

As an illustration of how department tore methods and competition are successfully met by an enterprising jeweler who onducts his business along modern lines, send you an advertisement of Geo. T. Brodnax, Memphis, Tenn., which appeared n a Memphis paper in July.

This announcement is a trade-puller. It ndoubtedly induced many persons to visit he store to take advantage of the reduced rices on a limited number of articles, and ve can easily imagine Mr. Brodnax and is experienced clerks "doing the rest."

The advertisement starts with a legitimate reason for the special sale of the particular goods in question, which fact emoves any possible lowering of the business dignity of the firm.

I should very much like to have every eader of THE CIRCULAR-WEEKLY see this dvertisement, and if you can conveniently eproduce it in your columns, you would ertainly help the thousands of jewelers who are anxious to find a way to combat department store competition, and you would also greatly oblige

Yours very truly,

AN OLD SUBSCRIBER.

---

The word *advertisement* was taken from he French word *avertissement*. This was atinized by the English to *advertisement*, nd it was intended to be exclusively for nnouncements by the editor or by the ublisher. It was much later that the word *advertisement* was adopted by merchnts for the purpose for which it is now sed. The French used the word *reclame*. The Latin origin of the word is *advertere animum*, which means "to turn or draw he attention to something." The Latin verb *verto* forms its noun in *versio*, but his form was not adopted and—taking the Greek verb *vertiso* into consideration—a new word was formed *vertisementum*. This evolved into *advertisementum*. From his came the French word *avertissement*.

BRODNAX

$1.00

For Cut Glass Bon-Bon Sold Regularly at

$2.00

In revising our catalog we have found it necessary to leave out several pieces of cut glass, owing to the fact that the factories have discontinued them.

In all such cases we will close them out at such low prices as to make it worth your while to buy them now and lay away for wedding presents next Fall.

We find on hand 50 6-inch bon-bon dishes, 50 full-size celery trays and 50 5-inch bon-bon dishes.

The celery trays are 10½x4½ inches, cut with chrysanthemum on extra heavy pure white flint glass. These have been sold regularly and largely for $4.00 each.

Monday's Special Price $2.00

We have 50 6-inch bon-bon dishes with handles. These are ornamented with sunburst cutting and the glass is extra heavy and the finest grade of flint. It is an unusually handsome piece and is well worth our regular price of $2.50.

Monday's Special Price $1.25

We also have 50 bon-bon dishes 5 inches in diameter, with cut glass handles. These have a beautiful chrysanthemum cutting on pure white, extra heavy flint glass. We have always sold them for $2.00.

Monday's Special Price $1.00

The sale will start Monday morning at 9 o'clock, and owing to the limited number on hand we cannot sell more than one celery dish and one of each bon-bon to a customer.

Mail orders postmarked Monday will be filled at an advance of 25 cents on each piece to help pay the express and packing charges.

Geo. T. Brodnax, Inc.

Gold and Silversmiths

Memphis, Tenn.

### A "Daisy" Window Display.

A VERY attractive window which may be used to good advantage by the jeweler at this season of the year is arranged as follows:

Daisies yellow and white, are to be used for this display. The back floor and sides of the window are draped with alternate widths of white and yellow paper, curled at the sides and overlapping each other, thereby forming a graceful background for the exhibited articles, which may appropriately include at this season of the year gifts for friends who are about to go abroad and also those who travel at home, such as silver-mounted brushes, combs, mirrors, toilet articles, etc., leather-mounted traveling clocks, card-cases, belts, and, in fact, all the accessories which are so acceptable to the average person.

In the center is placed a small, round tabourette covered with yellow and white crêpe paper, harmonizing with the remainder of the window, and on this is set a pot of growing daisies, the pot being covered with white paper entwined with alternate bands of yellow. About the center are arranged four other stands to hold goods, each covered in white and yellow, and yellow and white, respectively; place on one, gold and silver articles, on the next cut glass, on the third leather goods of white and yellow, thereby carrying out the color scheme.

Scattered about the floor, entwined around the stands, and suspended from the ceiling on wires, are artificial daisies.

Incandescent lights peeping from among the flowers will increase the effectiveness of the window.

### Store Keeping Sense Boiled Down.

THE best advice that was ever offered a salesman was given in one word—"think." If you'll study your customer, and think, there will be no question about the sale.

All things come to him who doesn't wait, but hustles.

Too many clerks and not enough salesmen. That is the cry.

If you never do more than you are paid for, you will never get paid for more than you do.

The sheriff is always making goo-goo eyes at the store that don't advertise.

Resolve not to worry so much about your competitor. Take the lead, for a change.

Many succeed because they advertise correctly, and ever so many fail because they don't.

If you have no confidence in your employer, for heaven's sake be honest and go in and tell him so. Draw your pay and quit.—*Brains.*

---

Some men keep their noses so close to the grindstone that they lose sight of passing opportunities.

It's easy for a wagon to run down hill without much pushing and its just as easy for a business if it is "properly advertised."

The funniest advertisement writer is the man who writes funny ads, that he thinks pay the advertiser.

Trying to sell goods without advertising is about as easy as getting light from an electric company for a church social.

## Atrophy Not Paralysis of the Optic Nerve.

REALIZING in the strictest sense with what care the optometrist must avoid any appearance of touching upon medical territory, it is still evident that in many instances he is called upon to converse upon topics relating to diseased ocular conditions, for most every intelligent patient will ask questions along these lines expecting no medical advice but general information, and it behooves the optometrist to be prepared to talk intelligently on a subject that is of such universal interest. Even medical men cannot deny that.

Many appreciate this point and prepare themselves to meet all emergencies, and yet many excellent dissertations are spoiled by a little slip that any one seems liable to make and which by its marked frequency has called forth these remarks. The error consists in confusing the two terms "atrophy" and "paralysis," as applied to the optic nerve.

The only point necessary to remember is that the optic nerve can never be paralyzed. When speaking of eyes, one invariably leads to a consideration of the optic nerve as a matter of course. In speaking of its diseased conditions or in answering the very common question, "What is the cause of blindness?" you will be apt to answer, "The optic nerve becomes paralyzed," whereas you should say, "The optic nerve becomes atrophied."

Paralysis is defined in Gould's medical dictionary as "Loss of sensation or voluntary motion"; while in the Standard Dictionary it is "Loss or material impairment of the power of contracting the muscles, and sometimes of the power of perceiving sensations."

Atrophy, according to Gould, is "A wasting of a part from a lack of nutrition." According to the Standard, "A wasting or withering of the body or any of its parts."

If one studies these definitions carefully, it will be seen that paralysis properly applied signifies a loss of motive power producing energy on the part of a nerve, while atrophy signifies a wasting away of the nerve itself; thus as the optic nerve is in no sense a motor nerve, it does not possess the quality of producing motion and not possessing it it cannot lose it, and therefore cannot ever become paralyzed.

To sum up: Loss of vision, if due to an inability on the part of the optic nerve to transmit sensation, should never be attributed to optic nerve paralysis, but may be expressed as possibly the result of optic nerve atrophy, or in other words, "optic atrophy."

## The Color of Eyes May be Changed by Means of Radium.

IT is reported that Dr. William Pratt, of Chicago, undertook to change the color of a lady's eye from green to black by the use of a special preparation of radium. The process has not been disclosed nor was the experiment entirely successful in so far as the color obtained, instead of black, was a rather pale brown; but even the change from greenish to brownish is of sufficient significance to warrant our attention.

We know that one eye is brown and another blue, not because of any difference between the coloring matter, but because there is more of the regular pigment (coloring matter) in the brown or black than in the blue, gray or green eye. In the albino all pigment is absent, and in consequence such a person suffers severely from exposure to light.

Now, if radium is able to change the green eye to brown it is most logical to assume that it brings this change about by producing more pigment, and if this be possible it does not seem beyond hope that perhaps pigment could be created in the albino, in which case much suffering could be relieved and an almost useless eye made in every way efficient.

## Experimental Effects of the Electric Light Upon the Eye.

METTEY, in the "Arch. d'Ophthal.," states he made a series of experiments upon dogs and rabbits, keeping the arc-light directed upon *one* eye for a total of 50 to 90 minutes, with frequent interruptions. The other eye served as a control. With those retinas treated by the method of Nissl or Bethe he found no alterations, either in pigment, ganglion cells, or layer of rods and cones. On the other hand, in those treated by the Marchi method, the optic nerves showed a breaking down of the myelin into dust-line droplets. With short exposure this change reached 6 mm. back papilla; with the longest exposure this alteration reached nearly to the chiasma.

Whether these changes were due to the action of the light rays, or to the chemical rays, or to both could not be determined. With the interposition of a red glass during the exposure these changes did not occur. But the red glass cuts out both chemical rays and a part of the light rays; and so is not conclusive. A practical deduction from the experiments would seem to be that red glasses would be of service to those working exposed to long or frequent looking at bright (arc) electric lights.

## Abstracts from Dr. Emile Javal's Lates Work Entitled "On Becoming Blind."

ONE of the leading eye specialists France is Dr. Javal, who, when 6 years of age, lost his sight completely an irrevocably. That which is so unfortunat for him is, in one sense, a public blessing, n so far as he offers suggestions of inestim able value to those who are becoming, o those who are already blind, and as th optometrist is so apt to come in contac with this unfortunate class we have deem ed it proper that he be made familiar wit the more important suggestions containe herein. None of these remarks are of medical nature, relating purely to ordinary conveniences that may be offered the af flicted. The value of this work is further enhanced when you consider the fact tha no other collection of advice on this matter exists.

Javal first points out the difference be tween those who are born blind, those whose vision fails gradually, and those who become suddenly blind after enjoying sight for many years. The last class is the most pitiable. His first advice is: "Never lie to a blind man, be it with the best intent in the world; because to render him a passing service, you will have killed his confidence, and in consequence his security. For most services paid help is preferable. For example, a paid reader reads what we wish. . . . If we dictate a letter to him, he does not interrupt to give us his advice. But, docile slave, he ends sometimes by making himself indispensable and may become the household tyrant. He urges that relatives make not entire abnegations of themselves, for then, upon their loss, the blind man is worse off than ever. "All efforts," he says, "should tend to give the blind the maximum of freedom compatible with his condition by providing him with the means of doing for himself as many things as possible! Maintain around him the most perfect and scrupulous order, so that he is free to find things for himself instead of having to ask for them."

"According to a widespread opinion, the loss of one sense has the effect of increasing the acuteness of the others, but nothing is more false. This is not to say that the blind do not reap a useful benefit from certain sensations which escape the seer. He learns to bring his attention to bear upon many things which, for those who see, are of secondary importance or even negligible." Thus touch becomes of importance, for by this means the blind tell whether or not a visitor be gloved, and the difference

## Optical Department.

hands informs them, when they com- with it the voice and the height from ch it comes, of the sex, the build, and me measure, of the age and social con- n of the speaker. The sense of smell aids at times. But "there is not ght out any refinement of the audi- tactile, and olfactory senses, but ter keenness in the interpretation of mformation furnished by these senses. For the blind, hearing is almost the sole ns of recognizing distant objects. It is rable, therefore, to avoid useless es He who would obtain from smell the information possible ought to am from smoking and taking snuff. bacco destroys smell in a very marked ree Finally, touch, of which no one wholly deprived, is for the blind the t precious of his senses; and it is pos- to increase by training, not its sen- eness, but its usefulness. One who , in carrying his finger over Braille ting is unable to feel the arrangements he points which the blind person recog- s without hesitation." Braille writing composed of a series of raised or em- sed points.

Lathe and carpentry work are not beyond reach of the blind, and they may make nselves useful by contributing to house- l work. I urge upon those who have care of very young blind children to is- e them as little as possible; for every son they must not be tied to their hers' apron strings. Great care should given to the hygiene of the blind. "I e had occasion in the course of my prac- to persuade a patient threatened with dness to purchase a residence so as not be exposed to the danger of a forced nge of home, which, to the blind man, almost a disaster, for the slightest dis- cement of any object is most displeasing. be able to call for help in case of need nake use of a whistle, which I always ry in my pocket. Meals being for the nd the pleasantest moments of life, it is y important for him to train himself to properly. There are watches made ecially for the blind, or a repeater may used For writing, a simple apparatus y be used that guides the hand or the ewriter is easily mastered by the blind." The chapter on "The Sixth Sense" is hly interesting. This extra sense is med also "the sense of obstacles" and ttes to that ability some blind persons sess of recognizing the presence of ies, their size, shape, and location. The stion as to whether or not the blind uld marry is ably treated, and one very resting point brought out is that blind- s is very rarely inherited, thus this no reason against marrying.

Dr. Javal, it may be pertinent to note, the inventor of the ophthalmometer.

---

J. Bausch, of the Bausch & Lomb Opti- Co., Rochester, N. Y., on the occasion his 75th birthday, which he celebrated ently, presented to each employe of the cern an amount equal to an extra week's ary. The gift was made also to the 's employes in New York, Boston and cago.

### Lunaphoria, or Frenzied Optics.

(Address of Prof. Geo. A. Rogers, delivered before the Convention of the A. A. O., held recently in Minneapolis, Minn.)

I SEE by the program that I am expected to entertain you for a half hour on the subject of mathematical optics. I wrote to Secretary Snell a week or 10 days ago, and asked him to have a blackboard prepared for me, giving him some of the details of its construction. I received a letter from him a day or two ago, saying that he had had the blackboard made, but he had the audacity to tell me that I had neglected to state whether I wanted the cloth attached to the board according to the principles of static orthophoria or whether I preferred to have it so fixed to the center of rotation as to induce a condition of dynamic heterotropia. How is that for a piece of impertinence? What kind of language would a man employ in his family who wrote you such a letter as that? I confess that I am no longer surprised, when I consider the color of his wife's hair, that Brother Snell is almost totally destitute of that article on the top of his head. He has probably been thumped good and hard, for just such pieces of impertinence.

I did not tell the honorable secretary what I wanted this blackboard for, and I daresay that he assumed that I wanted it to make chalk marks on, but I didn't. Why I really wanted it was to serve as a background for my ponderosity. I have become so accustomed to talking in front of a blackboard that, without that support, I am afraid I should be stricken speechless, or have a fit of stammering and stuttering, and become a good subject for to-morrow's clinic. With a blackboard at my back I feel, I imagine, like a hunter who has a good Winchester rifle, chock full of loaded cartridges, in front of him—capable of facing any danger, equal to any emergency. I feel the need of some such support, for I want to assure you that in appearing before this convention, and saying what I have to say, I feel that I am taking my life in my own hands. Perhaps Brother Snell, or some member of his family, will consider that I have already forfeited it.

Now, I don't propose to talk to you about mathematical optics. I don't think it would be appropriate. In the half hour that has been assigned to me, I would barely have time to reach that subject; and if I should once get to talking upon it, I should be in danger of encroaching upon the time of my successor, which would not be courteous. But I have a better reason. I am preparing a manuscript for a book on that subject, and I do not consider that it would be good business policy to spoil the sale of the book by giving you an advanced installment of its contents. I shall, however, talk to you upon a matter that is of far greater interest and concern to the optical profession, and to that subject I will now give attention.

During the past two or three years I have felt considerable alarm on account of a new disease that has broken out among opticians. I do not know whether it is a germ that is causing the trouble or not, but it certainly shows strong symptoms of becoming contagious. Personally I have not been affected as yet, but I can feel it. It is one of those things you can feel coming on. It has appeared in this convention and has its manifest on the program of the week. It has affected some of the State optical societies. I am afraid that, the next thing we know, it will break out in these State boards of optometry having in charge the optical interests of their States, and if it does there is going to be the liveliest kind of a time among those who appear before them for examination. With that foothold there would be no stopping it until, like yellow fever, it had run its course and worn itself out, numbering among its victims, who knows how many of us who are assembled here to-day.

This malady which has not yet been scientifically classified, and therefore does not appear in the books, I am going to call by a name of my own, one invented for the occasion, and which will appeal to your understanding. It is a new kind of 'phoria, and I call it "Lunaphoria," or a tendency of opticians to become lunatics. It is a sort of frenzy and probably bears a close relationship to other frenzied things that are occupying so much attention in the leading magazines and newspapers of the day. It manifests itself chiefly by a disposition on the part of opticians to cut the acquaintance of the one and only tried and true friend they ever had—refraction.

Refraction for refraction's sake no longer has any standing among opticians. It has gone 'way back and sat down. Lenses are no longer prescribed to correct errors of refraction of the eyes. What they are prescribed for is to cure all the ills that human flesh is heir to, to reform the mind and to remodel the character. The range of diseases covered extends all the way from ingrowing toe-nails to insanity, and the reformation of character they produce reaches over as wide a field. In the place of refraction we have optometry, or optomerot, if you choose to pronounce it that way. In the place of the optician and refractionist we have a row of ground and lofty tumblers who call themselves neurologists, ophthalmologists, psychologists, skiologists, or who combine these terms into neuro-ophthalmic-psycho-skiologists. This array of glorious names does not include many things which an amazed public is calling them, and which, if less euphonious, have a very much higher flavor, and which, for obvious reasons, I must omit in a public meeting of this kind.

To opticians who are affected by this disease, the old-fashioned idea that lenses are worn before the eyes for the purpose of correcting hypermetropia, myopia, presbyopia, astigmatism, etc. (what a faint and far-away sound those good old-fashioned names now have), has passed away. Lenses are now worn to make fat people lean and lean people fat; to make honest men out as knaves and to reform the liars. The most inveterate scold and termagant is converted into a lovely and loving wife and mother. (I understand that there are more men in Minneapolis looking for glasses for their wives than in any other city in the Union, and they are ready to pay almost any price, running into the four figures, *if they can get the right kind.*)

Glasses also cure men of staying out late nights, of licentiousness and general cussedness. (I am told that there are more ladies in St. Paul ready to sacrifice their next

## Optical Department.

Spring's Easter bonnet for a pair of glasses for "hubby" than in any other city in the Northwest.) But glasses also cure bashfulness in young men and obduracy in young women, and it is only a question of getting the right kind to settle, in 15 minutes, that all-important question of "Two Souls With But a Single Thought, Two Hearts That Beat as One." Have you ever noticed how many young men and women are wearing glasses now-a-days? Do you know what this will lead to?

But to be more serious, glasses are going to appeal more strongly than ever to boards of education, for the purpose of reforming incorrigible school children and to do away with hoodlums. A neuro-skiologist will soon be a fixture in all the State reformatory institutions, where his services will be in perpetual demand. You perhaps already know that glasses are superseding the gold cure, and Keeley Institutes all over the country are having the hardest kind of a time to get anything to do. This is an illustration of the homeopathic principle; like cures like; glasses, glasses. Of course the public is a little skeptical still, but it is coming around all right, and such light as will be thrown upon the subject by this convention is going to have a far-reaching influence. This will be manifest particularly to-morrow, when my distinguished coadjutor talks to you upon "Growing Light and Higher Optometry," and to the public by a clinical demonstration, before their very eyes, of the cures of any and of all the things which I have named by glasses. If this matter has been properly advertised a hall 10 times as large as this ought not to be sufficient to hold the gentlemen of Minneapolis and the ladies of St. Paul who come flocking in, and I hope the committee of arrangements will be ready to meet any emergency that may arise in this direction.

I would suggest also, for the purpose of making these cures matters of records, that a committee of the most eminent medical specialists of St. Paul and Minneapolis be invited to be present and report to the society their findings on a strictly Missourian platform, "You have got to show me," and that this report be given the widest publicity. The doctor will undoubtedly feel gratified at so distinguished an attendance and feel much more at home before a body of his own profession, who will appreciate his work at its full worth.

Now, do you know, that whatever cures the doctor may be able to make with glasses, I do not regard it within the province of opticians to cure, or pretend to cure, any disease or mental derangement even by the same means. As for curing insanity with glasses, I don't think the doctor needs to look far for subjects, for I think the prospects of a frenzied bunch of opticians occupying the padded cells of insane asylums is far brighter than that glasses will ever relieve the present congested condition of those State institutions. However, it is all right for the doctor, or any other medical practitioner to investigate this field of cure. In the case of epilepsy, chorea, locomotor ataxia, palsy or other obscure nervous affliction, correct lenses may be a means of relief, but they are not the only means.

The doctor undoubtedly uses, in connection with his glasses, other remedial agents, which are of a strictly medical character. You could not, in an emergency, use those means. You don't know anything about them. You don't know whether epilepsy is an affectation of the liver, of the epiglotis or the vermiform appendix. What would you do if one of those epileptics came into your office and had a fit right on the floor? I mean one of his kind of fits, not yours. Would you apply ice to his head and hot waterbags to his feet, or would you reverse this arrangement, or would you try to give him both at once? The only thing you could do, even under the doctor's directions, would be to drag him into the dark room, clap on a pair of 17 D. spheres with a pair of 27 D. prisms, base in, and expect him to walk right out of the fit, to bow to you and say: "Thanks, Doctor, I feel much better now. You are certainly a wonder, and I am going to send all of my friends to you for glasses." But suppose he didn't recover, or even got worse, then what would you do?

In the field of legitimate refraction the optician is safe, safer than the doctor who doesn't know refraction. There is no danger of his harming a child. It is a field that the medical profession, even oculists, have treated, up to the present time, as a purely empirical art, something that anyone, with a little practice, can do as well as anyone else. That has been the doctor's mistake, and his mistake has been your opportunity. And what you have done in it has given you a semi-professional standing, even among the unwilling medical fraternity. Why, do you know that they don't even teach refraction at many of the post-graduate medical schools on the eye. Attendants are supposed to know all about that when they come there. Where do they get it? Certainly not at the medical colleges. They are supposed, I suppose, to have absorbed it through the pores of the skin, or perhaps it is because there is no one to teach it. Leave out refraction and where are you? If the doctor should take up this neglected branch of knowledge and study it seriously, it is not hard to see where you would be.

The optician doesn't know all there is to refraction yet. I see by a recent report of the California State Board that a large percentage of those who took the examination couldn't do a simple thing like neutralizing a lens. Other State boards have had similar experiences. Where did these applicants get their optical education? Perhaps at some two-dollar correspondence school. But why do they take so shallow a course? Isn't it due to the neglect with which refraction is being treated? Too many are getting the idea that refraction is of no particular importance. If lenses are to be given chiefly to cure disease, certainly the poorest refractionist in the country can put up just as good a bluff on that score as the best. I am not sure but what he can put up a little better one. He can't need to know refraction in that sort of business. One lens is as good as another to base a claim of any kind of a cure upon, and a pair of spheres with a prism or two will go the whole round of diseases.

Do you know that a good refractionist is a specialist among specialists? A specialty is characterized in two ways: by the n rowness of field and the depth of resear made in that field. The oculist is a speci ist, but he is not so much of a specialist a refractionist. I do not consider t doctor who merely fits glasses as an ocul or specialist. He is a medical refraction and a medical refractionist is not so mu of a specialist as a refractionist. As for t oculist who does not fit glasses, or pay a attention to refraction, he is more of a sp ialist, and less of an oculist, on that count. I do not count as an oculist ev doctor who appropriates that title. The called eye, ear, nose, and throat specialist not an oculist in any proper sense of t word, and he is still less a specialist.

But I would like to enquire where in this galaxy of specialists our dear lit neuro-skiologist, or psycho-ophthalmolog stands? To be candid with you, and w him, he doesn't stand anywhere. If he not a refractionist he is nothing. If, w he is cutting the acquaintance of refract he cuts the acquaintance of his barber will soon appear in his true character, a long-haired crank of the typical vari and of no practical use to anybody earth.

When I return to Chicago from this c vention, I am going back there to teach fraction. I shall teach it harder thar ever taught it before. I will write the w "Refraction" in big red letters on my fr windows, and if this Lunaphoria tries break into my premises I will not even play the courtesy of escorting it to the vator, but will be tempted unceremoniou to kick it down the four flights of stairs tween my office and the exit of building.

Understand, I have no objection to word optometry. It is a good enough w But the simultaneous appearance of t word and the craze to cure disease w glasses has had a tendency to taint it, you know the American public is show considerable distaste for tainted things this time, even for tainted money. when the American nostrils become delic on a money proposition, they will be sen tive about anything under the sun. know there was a word proposed seve years ago, the word opticist, and it sho for a time some signs of being swallow all right, at five dollars a swallow Bu Boston man, the late Mr. Sanborn, ha sensitive smeller, and he smelled a ta not of the word, but the proposition t went with the word, and he made ev other optician in the country smell it a As a result there is not an optician in country who would be found dead with t word on his person.

You probably understand now why I h steered clear of the topic, mathematical tics. I didn't think there was likely to any interest felt in that or any other fractive subject. The only way I can count for so many being present is the pectation you had that I might "break l and talk about something else. I d think anyone who has come here to t refraction would have very much of a sh I think that the one ambition that is wor of our best endeavors is the ambition to known, not as neurologists and skiolog but what we can still claim to be, the b refractionists on earth.

[*Answers are also solicited from our readers to the questions published on this page.*]

QUESTION No. 1286.—**To Remove Silver Nitrate Stains.**—*How can I remove silver nitrate stains from clothing and fingers?* *L. E. H.*

ANSWER:—Silver stains may be removed from clothing by wetting the stain with a solution of bichromate of mercury. The chemical result is the change of the black-looking nitrate of silver into chromate of silver, which is whiter or invisible on the cloth. To clean the fingers, dip them into a strong solution of cupric chloride. In about a minute the silver will be converted into a chloride and may then be washed off with hyposulphate of soda solution.

QUESTION No. 1287.—**Gold Lustre for China Painting.**—*Kindly give formula for gold lustre in china painting?* *P. H.*

ANSWER:—Dissolve 1 drm. chloride of gold in water. Add 6 grms. metallic tin, and enough aqua regia to dissolve it. Pour with constant stirring into a mixture of one-sixth drm. balsam of sulphur and 20 grms. oil of turpentine. As it stiffens, add one-sixth drm. oil of turpentine and mix. More gold gives a brighter effect, tin inclines it to a violet tinge. Balsam of sulphur is made by boiling together in a covered vessel one pound of flowers of sulphur and four parts oil until the mass thickens.

QUESTION No. 1288.—**Brassing Solution.**—*I use a brass solution, but have some trouble in getting the right colors. Wish you would give me a formula for making the solution?* *C. L.*

ANSWER:—The following is one of the formulæ for making a brass solution: Cyanide of potassium 12 parts, carbonate of potassium 610 parts, sulphate of zinc 4 parts, chloride of copper 25 parts, nitrate of ammonia 305 parts, water 5,000 parts. The cyanide is dissolved in 120 parts of the water, and the carbonate of potash, sulphate of zinc and chloride of copper are dissolved in the balance of the water the temperature of which is raised to about 150° F. When the salts are dissolved, the nitrate of ammonia is added and the mixture well stirred until the latter is dissolved. The solution should be allowed to stand for several days before using and the clear liquor separated from any sediment that may have deposited. In this solution the proportions given are fluid measure for liquids and avoirdupois weight for solids. If the plating be too red, use more battery power or add more zinc salt. If too white, decrease the current or add more copper salt. The specific gravity should be from 5 to 1 Baumé. It requires from 20 to 25 minutes deposit.

QUESTION No. 1289.—**The Supply of Ivory.**—*Is ivory hard to carve? What is its supply in the world?* *A. R.*

ANSWER:—Very interesting information on this material was published a short time ago in the *Connoisseurs Library*, part of which is as follows: Ivory is comparatively easy to carve; it has exquisite texture and color and it is extraordinarily durable. Though really large objects cannot be made out of it in a single piece, tusks have often been available which, by their generous dimensions, have permitted the craftsman to develop his design on a fair scale. Some of them are from eight to 10 feet long and big enough in diameter for positively imposing slabs to be cut from them. Mr. Maskell has some striking notes on the sources of supply. In Siberia, for example, there are vast deposits of mammoth tusks and other remains of extinct animals. For the last 200 years ivory has been dug up from these deposits, and still, according to Mr. Maskell, "the store appears to be as inexhaustible as a coal field." He thinks it possible that Siberia may be the great source of the material when the African elephant has been killed off. Some idea of the energy with which that valuable animal is being exterminated may be gathered from the following passage: "When we consider the enormous drain on the supply of ivory in Africa alone, which has been going on for centuries, it is, indeed, surprising that the surce has not long since been exhausted. The whole question is one which cannot fail to excite astonishment. To begin with, the mere number of elephants which roam over these territories is almost beyond calculation, and the supply of food which they must require is enormous. Literally, almost, they represent a forest of ivory tusks, and it is not a forest which can be periodically cut down and allowed to renew itself by growth from the same roots. Every pair of tusks represents a slain elephant. At the periodical sales of ivory in London parcels of a hundred tons and more are put up at auction. In the year 1900 the importation amounted to 11,757 hundredweight, which represented 60,000 tusks, and a value in its rough state of over half a million sterling. For billiard balls alone the sales of one of the great London firms are nearly 10,000 tusks a year. In 1888 the importation into Antwerp from the Congo amounted only to 36,400 kilos, say, 1,000 hundredweight. In 1902 the Congo furnished to the same port 380,000 kilos. The prices at this market ranged for sound tusks from 28 to 38.25 francs. The greater part came from the Congo, but Senegal, Angola, Gaboon, Abyssinia, the Cameroons, Zanzibar and other places contributed about 40,000 kilos." The ancient ivory hunter may not have rivalled the modern in the number of tusks which fell to his weapon, but he must have been pretty successful, if we may judge from the facts that there are allusions in Scripture pointing to lavish use of the material, that the Egyptians doted on ivory, and that the Romans made use of it with the same enthusiasm. In the fourth century the Latin poet Claudian speaks of the gathering of ivory and tells how "the great wonder of the Indies, the elephant, wanders about in tuskless shame." Mr. Maskell recalls that the Senate sent Porsenna an ivory throne, and if the substance was used for such magnificent purposes it was also used for the manufacture of many things forming part of the everyday life of those living in the classic period. One of the best chapters in this book is that which deals with the consular diptychs. It was customary among the Romans to write letters on tablets of ivory which had been so hollowed out as to leave a raised margin to hold the thin layer of black or green wax on which words could be scratched with a metallic stylus. Just as in our own day a notebook may be simple or luxurious, according to the purse and taste of the owner, so the ancient Roman diptych varied in style according to whether the owner was an ordinary citizen, a wealthy Senator, or, above all, a Consul. Says Mr. Maskell: "Ordinary writing tablets were usually of a handy shape. A common term for them was pugillares, because they could be conveniently held in the hand, and, as may be readily imagined, they were very frequently used for elegant presents much the same way as similar things are at the present day. Consular diptychs however, and other diptychs made to commemorate special events were much larger, measuring generally about 12 inches in height by five or six in width and correspondingly thick and massive. The fashion appears to have been prevalent of sending these magnificent ivory tablets as presents on the occasion of great family events or celebrations, such as marriage, a coming of age, or the like, and doubtless it was of importance that the ivory should be of the finest description and of the largest size that it was possible to procure. In a similar manner new consuls, on their appointment, caused a number of such diptychs to be made for presentation to the Emperors and to their equals and subordinates on the day of their entering upon their office. The size, excellence of workmanship, and value of material, of course, would vary according to the rank of the recipient. If intended for officials, or others of the very highest position, they would be of fine ivory, carved by the best artists of the time, and perhaps mounted in gold; for others bone rudely carved and roughly finished, would suffice, and these, possibly, were turned out by the dozen, or hundred, like modern photographs. Some of these tablets or diptych leaves are of extraordinary dimensions, again arousing our wonder as to the manner in which such very large pieces of ivory could have been procured."

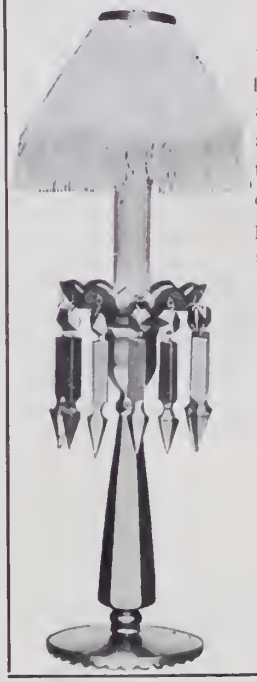
## Sale of an Important Collection of Old Wedgwood Ware.



AT his galleries, 147 New Bond St., London, W. Chas. Davis is exhibiting one of the most remarkable collections of "old Wedgwood" ever made. It was formed by the late Lord Tweedmouth, and it is satisfactory that the public have such an excellent opportunity of inspecting it. It is reported that Mr. Davis has disposed of the collection in its entirety. It is no exaggeration to say that in this exhibition the greatest of British potters is represented by some of his most artistic productions. The charge for admission and a catalogue is one shilling, and the whole of the money received is to be handed to the "Lague of Mercy." Visitors, therefore, while inspecting a unique collection of pottery never before exhibited, are helping a very deserving charity.

The story of Wedgwood has often been told and yet it is ever new and always interesting. No real lover of ceramics can be tired of hearing of the man "who converted a rude and inconsiderable manufacture into an elegant art and an important part of national commerce." There are scores of connoisseurs who are proud to possess even one or two pieces of old Wedgwood. It, however, falls to the lot of but few to be able to obtain possession of so many priceless pieces. Many valuable pieces were bequeathd to him, but the accumulation of such treasures must have cost Lord Tweedmouth many years of labor and many thousands of pounds. The circumstances under which Wedgwood ware became so popular need not be recapitulated here. The present collection affords ample evidence that the popularity is richly deserved. It is rich in plaques and tablets, cameos and medallions, vases and pedestals, jardinieres, and choice cabinet pieces. Fine jasper ware predominates, with bas-reliefs modelled by Flaxman, Pacetti, Webber, and other famous artists. This jasper ware, produced by Wedgwood in 1775, is without doubt the highest achievement of the great potter, and Lord Tweedmouth succeeded in acquiring some of the very finest specimens. The beautiful effect produced by applying ornaments of white jasper to colored grounds is well-known, but Wedgwood made many other combinations of colors. He did this largely by the uses of minerals as constituents of the paste; by mixing various oxides, the jasper received a variety of tints, sage green, blue, lilac, pink, yellow, and even black. There are specimens of all these in this comprehensive collection.

There is a marvellous display of vases—upwards of 40 in number—many of them unique in both form and treatment. There are exhibited the two largest Wedgwood jasper vases ever made. They are in blue jasper, with a Bacchanalian triumph or procession of youths and nymphs in relief, designed by Davaere. Then there are two of Wedgwood's famous copies of the celebrated Barberini, or Portland Vase, and a pair of Homeric vases in black jasper, with white reliefs, on high pedestals. One of these was bought from Dr. Gibson's collection in 1876 for 700 guineas (about $3,570). Of the whole collection perhaps the most rare pieces shown are two oval-shaped bonbon baskets, one dark and the other solid pale blue, pierced trellis work relieved with white scrolls, beads and various borders. A note in the catalogue describes these as "most exquisite specimens of Wedgwood's finest work in jasper, and equal to any fine silversmith's work in a material more difficult to manipulate, entailing also great risk in the subsequent firing."

The most noteworthy feature, however, in this very remarkable collection is the series of 33 original designs in wax, made for Wedgwood by Flaxman, Pacetti and contemporary artists. Wedgwood went to the greatest geniuses of the day for designs, and those now exhibited are their work, the originals of the famous plaques and reliefs of the vases, etc. These, of course, belonged originally to Josiah Wedgwood, then to Dr. Erasmus Darwin, his friend and medical attendant. They were afterwards the property of Charles Darwin, his descendant, author of "The Origin of Species." It will be matter of surprise to many that original designs of such historical and artistic value should be found in private hands. It is safe to assert that in any other country they would have been preserved in the national art gallery. As a matter of fact they were offered to our own South Kensington Museum, but the authorities pleaded poverty, and declined to buy them. This is what Lord Tweedmouth himself says about these wax designs in his manuscript note upon his collection. "This beautiful series of models was purchased from Charles Darwin, grandson and descendant of Josiah Wedgwood and author of 'The Origin of Species,' etc., in 1856, when Lord Elcho and myself endeavored to induce the South Kensington Museum to purchase the series. But poverty was urged, and an offer was made for 'six only.' This Mr. Darwin declined, and I subsequently became the owner."—*Pottery Gazette, London.*

WHAT THE RAMBLER SAW AND HEARD AMONG THE DEALERS IN ART POTTERY, CUT GLASS, BRONZES, ETC.

MOVEMENT TO REVIVE IRISH GLASS INDUSTRY.

IT is announced that at the Irish Industrial Exhibition to be held about the middle of September, in New York, a collection of cut glass, made early in the last century in Belfast, Cork and Waterford districts, will be shown. Earnestness is displayed in several directions of late by people who are interested in reviving the art in Ireland. The belief is that by importing the blanks, as was done in the early history of the trade in the United States, the industry can be reestablished at various points in the Emerald Isle. A writer in a Waterford paper recently called attention to the important work of the Irish cutters, who left their country 60 or 70 years ago, to seek occupation in England and Scotland, where high-grade work was then in demand. The influence of these cutters and their descendants is seen in these shops to-day, and in the American factories in which many Irish names are met. When the cutters of former days left their old homes the business began to die out in Ireland, but there is hope that under altered circumstances now prevailing, and with the backing of the present Gaelic revival, much may be done to restore the ancient industry.

*

NOVELTIES IN BRITISH GLASS WARE.

AT Edward Boote's salesrooms, 46 West Broadway, New York, recently there has been added to the display of English china two fine lines of cut glass from abroad. Mr. Boote now represents John Walsh Walsh, an English manufacturer of fancy designs in cut glass and rock crystal, and also represents the Edinburgh & Leith Glass Co., Scotch manufacturers of a high grade of plain glassware and rock crystal. Conspicuous among the samples already received from John Walsh Walsh are beautiful center pieces, in which brass and bronze are made into pretty arborial and vine shapes, which act as supports for flower holders and candle holders made in cut glass. The glass holders are in tasteful floral and unconventional patterns. Beside the center pieces there is a variety of bowls and vases artistically fashioned in glass, including a deep green that is rare and also a line of radium glass which gets its name from certain chemicals used in the coloring. Among the varieties that are likely to please Fall buyers is a collection of mother-of-pearl glass, in which the pearl like effects are certainly clever. The stemware from the Edinburgh & Leith factory is much admired, because of the perfect clearness of the crystal and the graceful shapes. Plain and old-fashioned patterns are especially exploited by this company, which is noted for the success it has achieved along these lines.

*

ATTRACTIVE CUT GLASS ASSORTMENTS

ASSORTMENTS of cut glass selected with especial care for the jewelry trade are offered by H. B. Stites, 253 Broadway, New York, who represents the Maple City Glass Co. These groups include upward of 20 pieces, comprising vases, bowls, pitchers, water bottles, bon-bons, olive dishes, tumblers, napkin rings and other articles. The patterns shown by Mr. Stites include a number of new conceptions. Several elaborate designs in which deep cuttings and fine engraving are used in producing brilliant lighting effects will attract attention.

# MASSIVE PUNCH SERVICE FOR THE BATTLESHIP "MISSOURI."

IE solid silver punch bowl and service or the battleship *Missouri*, de- d and executed by the Mermod, Jac- & King Jewelry Co., St. Louis, is one he finest and most elaborate pieces of rsmithing ever presented to a boat of United States Navy. It was designed constructed on a special order that was usted to the makers by a committee of citizens of the State of Missouri, who red a service of extraordinary character he battleship which bore the honored e of their State.

It was the desire of the committee that the service should be confined to a single thought; to be the most beautifully elaborate of its kind ever produced, rather than to have a general service of numerous pieces, which has been the general custom in battleship presentations. Therefore, under these instructions the Mermod, Jaccard & King Jewelry Co. designed the extraordinary punch bowl, which in size and massiveness is probably the greatest bowl of silver ever produced in America, its capacity being a little more than 15 gallons.

In very bold, high relief are shown the escutcheon of the United States, the seal and arms of the State of Missouri, the main products of the State, namely, corn, wheat, tobacco and fruits, the ocean and navy being symbolized by the dolphin handles. On the reverse side of the bowl in the center of a very elaborate panel is placed an etching of the battleship itself. The bowl is heavily gilded on the interior, the exterior being in oxidized bright relief. The points of the handles of the bowl extend more than 36

MASSIVE SILVER PUNCH BOWL PRESENTED TO THE UNITED STATES BATTLESHIP "MISSOURI."

# The REPAIRING

**END OF YOUR BUSINESS IS THE MOST IMPORTANT PART OF IT**

More people come into your store to leave work than to purchase goods.

Almost every one of your good customers became so through your repair department.

Progressive jewelers know this and concentrate their efforts on the repair department their business. They give it the most prominent place in their stores; they emphasize in all their advertisements; they keep themselves and their employes thoroughly formed on the costs of all kinds of work, new ideas and methods; they are courteous d accommodating to repair customers; have all work ready when promised; and do ly such work at home as they can do well.

They send all the rest to us.

We devote our entire time, energy, capital, and twenty-five years' experience to this portant branch of the jewelry business; employ and educate the best help that can be tained; systematize and inspect the work, and use every modern method to produce the st work promptly at reasonable prices.

It is to your interest to do business with us, it is to our interest to have you.

Let us work together.

---

Fred. L. Mills, at one time engaged in business in Hartland, Wis., died recently. The deceased had also been treasurer of the village of Hartland.

C. H. Harris, Portsmouth, O., has sold his business to J. F. Carr, Kenton, O. Mr. Carr will take possession Oct. 1, and as soon as Mr. Harris can find a location where the climate will agree with him, he will start again in the jewelry business. Mr. Harris has many friends in the vicinity of Portsmouth, who deeply regret his departure and the causes that prompt it.
